To be helpful all around in insuring good times we will do our part in good, large measure by taking over merchandise of our quality even if we simply turn over the customer's dollar to pay back the manufacturer's dollar.

Mr. Manufacturer, come along!

JOHN WANAMAKER.

JANUARY 3, 1914.

JOHN WANAMAKER.

Now, if the gentleman from Ohio [Mr. ASHBROOK] wants to be further informed about the regional banks, and it is a fair question, I will ask him whether it is not reasonable to assume that even the banks of Philadelphia were beginning to fear they were going to lose their prestige and that they had to draw in and curtail their loans, so that the manufacturers could not get money on which to move their stocks? Mr. Wanamaker had twice spoken of the inability of the manufacturers to get

What was the occasion for Mr. Wanamaker, on January 3, three days after he made the prosperity speech which the gen-

tleman from Alabama quoted-what was the necessity for him offering to take this vast volume of business, these tremendous stocks of goods, even if he did not make a dollar? Why should he offer to turn them over to the customers at the same price he would pay the manufacturer? Times good? With warehouses stocked, foreign goods rushing into the country, and the Underwood tariff bill in full swing; times good? Were they? Mr. Wanamaker knew the conditions, the manufacturer knew the conditions, and it was known to everybody in our city when this advertisement was published that idleness in certain trades existed. Everybody was hoping for prosperity and Mr. Wanamaker was looking forward with his prophecy of better times, but the conditions actually confronted us.

Mr. TALCOTT of New York, Will the gentleman yield?

Mr. MOORE. I will.

Mr. TALCOTT of New York. Does not the gentleman recognize that it is usual at this time of year for stagnant stocks of merchandise to be on the market?

Mr. MOORE. I have just answered that in response to the gentleman from New York. Mr. Wanamaker answers it in his advertisement. I have not known it to be usual after the holidays in Republican times, and Mr. Wanamaker indicates in his

advertisement that it is unusual. As I said, it attracted great attention, and the explanations from day to day indicated as

Now, I will not deal with the question at length except to say that other men, as well as Mr. Wanamaker, were thinking about this problem. The head of the Baldwin Locomotive Works was thinking about it, and this may help to answer the gentleman from New York [Mr. TALCOTT]. The president of the Baldwin Locomotive Works, Mr. Alba B. Johnson, during the holiday season was discussing this very question in public at a meeting in Philadelphia. It is not the popular view, for the newspapers want us to be hopeful, but because of what Mr. Johnson said then-things which my Democratic friends do not want to hear, things which go to prove that the Democratic tariff policy is not succeeding very well up to date—I wrote to the head of the great Baldwin Locomotive Works for a trustworthy statement as to actual conditions affecting labor in that great establishment during the past year. Mr. Johnson's letter is as follows:

THE BALDWIN LOCOMOTIVE WORKS, Philadelphia, December 27, 1913.

Hon. J. Hampton Moore, House of Representatives, Washington, D. C.

My Dear Mr. Moore: I have your favor of the 26th instant.
One year ago we had in our shops 19,300 men; on July 1, 17,695
men; on September 1, 17,046 men; on October 1, 14,623 men; on
December 26, 10,464 men.
It is, of course, impossible for us to know during what period this
reduction of employment will continue. If the Interstate Commerce
Commission should great the advance of rates requested by the railroads, I think it would stimulate all of the industries of the country
dependent upon railroad prosperity; otherwise I can foresee only further
reductions of force after January 1.

Very truly, yours,

ALBA B. JOHNSON,

President

ALBA B. JOHNSON, President.

Think of it! At the beginning of the year 1913, 19,300 men turning out as many as 8 locomotives for use in this and other countries per day. Six months elapse. The Democrats Fear with regard to the tariff and currency, are in control. slackening of orders because of business uncertainty and inquisitorial legislation, and at the end of six months, on July 1, that 19,300 men had been reduced to 17,695.

Mr. FESS. Will the gentleman yield? Mr. MOORE. Certainly.

Mr. FESS. Did the gentleman read on the first page of the Philadelphia Ledger to-day—a Democratic paper—of the installation of soup houses in Pittsburgh, at which place the Stallation of the Poor has taken charge of Society for the Improvement of the Poor has taken charge of the situation and is furnishing soup at 3 cents a bowl?

Mr. MOORE. I did not read that particular article, but I read in the same paper that during the last few weeks soup houses have been established in the district of Kensington, and that soup is being served to the unemployed. At the same time, while I did not see the article the gentleman refers to, I saw in the Ledger this morning a dispatch from New York, signed by "Holland," analyzing the report of the Royal Bank of Canada and indicating that American capital was coming over the border so rapidly that the Canadians and the British were becoming extremely prosperous at our expense. The report started out by announcing that \$25,000,000 of Canadian munici-The report pal debentures were marketed in the United States in 1913, and this without regard to our loss in giving Canada virtual free trade in our markets through the Underwood bill. Apparently American capital that is not now profitable in the United States is finding its way over to Canada.

But recurring to Mr. Johnson's letter: On the 1st of September the number of men employed had been cut down to 17,046 men. On October 1 they had been reduced to 14,623, and on December 26, the day after this letter was written, the total number of men employed in the Baldwin Locomotive Works in Philadelphia had been reduced to 10,464. Here you have cold facts. Nine thousand men, skilled mechanics, building locomotives, the weather vane of progress throughout the world, had been laid off and had become wanderers on the streets or had sought employment in other places. Said Mr. Johnson:

It is, of course, impossible for us to know during what period this reduction of employment will continue. If the Interstate Commerce Commission should grant the advance of rates requested by the railroads, I think it would stimulate all of the industries of the country dependent upon railroad prosperity; otherwise I can foresee only further reduction of force after January 1.

That is no newspaper report. That is no political statement. That is an actual statement of actual facts taken from the books of the company.

Mr. BALTZ. Mr. Chairman, will the gentleman yield? Mr. MOORE. Yes.

Mr. BALTZ. I understand the gentleman to say that a good many men are out of employment in his district. Different conditions exist in my district. I hold in my hand a copy of the Washington Times which says that the foundries and factories at Granite City, Ill., will employ 8,000 men.

Mr. MOORE. I have observed that some of the newspaper reports are one way and some another. The newspapers want to be hopeful. I have heard them denied back and forth since the discussion began; but in answer to the gentleman I will say that the letter that I have produced is a letter from a business man stating actual facts, according to the books, and there is no denving it.

The CHAIRMAN. The time of the gentleman from Pennsyl-

vania has expired.

By unanimous consent Mr. Moore was granted leave to re-

vise and extend his remarks in the RECORD.]

Mr. MOORE. What Mr. Wanamaker had to say about the worries of manufacturers during the holidays, Mr. Johnson said in another form on December 22 in an address to the New England Society at Philadelphia. A part of Mr. Johnson's address is so directly to the point that I take advantage of the leave to extend my remarks by inserting it here. He said:

leave to extend my remarks by inserting it here. He said:

It is apparent that a new principle has come into the spirit of our Government—that men shall be made honest by statute rather than by the individual conscience. The tacit principle underlying both legislation and administration is that the alms and acts of individuals are evil and that goodness and wisdom are to be found only in the representatives chosen by the mass. These representatives act as monitors to control the wicked constituents from whom they derive their power.

It is a principle as old as civilization that that government is strong which is composed of strong men. In feudal days that nation was strongest which held the strongest feudal lords. In modern days that nation is strongest in its own resources and in the contest for the world's trade which has within it the strongest business units. We are reversing that principle by insisting that so far as it is in the power of Government to do it, the business interests upon which our greatness as a Nation rests shall be made small and weak; that whatever individual or whatever corporation is permitted to prosper, it will inevitably do evil to the community. It is not considered sufficient to control the misuse of power when it occurs, but we must go further and forbid the possession of power. That which other nations are striving to create we are bent upon destroying. Efficiency as a theory is extolled, but efficiency leads to success. Success is offensive to the spirit of the times, and is therefore condemned. The muckrakers have sowed the wind, and those who by intelligence and industry have developed the material interests of the country are reaping the whirlwind.

Thus, despite the New Year's prophecy of Mr. Wanamaker,

Thus, despite the New Year's prophecy of Mr. Wanamaker, we find two of the leading business minds of the Nation, one a merchant and the other a manufacturer, agreeing that trade conditions were unsatisfactory, notwithstanding they would each like to have made a more favorable report.

There was no such worry during the year 1912, when the Payne tariff law was in operation. It came along in 1913, after a Democratic tariff law had been put upon the statute books, and was aggravated by the prospect of a Democratic currency law. In addition a wasteful series of inquisitorial investigations had been instituted, to the great annoyance of legitimate business everywhere.

Though we closed our eyes and ears to it, we could not fail to observe that the tariff law was operating against existing industries in the larger centers of population, and that the currency law was calculated to take away from those centers much of the money upon which large enterprises had been conducted. Moreover, it was evident that investigations were directed principally against those who had been successful in business and that constant investigations were undermining confidence and the stability of industrial institutions. Under these conditions it was natural that business should halt, as Mr. Wanamaker clearly indicated it had halted. And it was notable that while it did halt in the United States it developed in

Canada, in Great Britain, and in Europe. The only satisfaction our own people got out of it was the knowledge that they were aiding foreign workmen to obtain more work and better wages, while our own cost of living, with a reduced wage in the United States, continued to increase. The economic results of Democratic legislation up to date are, therefore, not as helpful or as hopeful as gentlemen upon the other side of the House would have us believe.

Mr. MOON. Mr. Chairman, I move that the committee do

now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Post Office appropriation bill (H. R. 11338), and had come to no resolution thereon.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Tulley, one of its clerks announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 1087. An act authorizing the exchange of certain lands within the Fishlake National Forest, Utah;

S. 2903. An act for the relief of Judd McKelvey; and S. 1214. An act to amend sections 2380 and 2381, Revised Statutes of the United States.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 9321. An act to amend the act approved May 9, 1888, as amended by the act of June 11, 1896.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

8.1087. An act authorizing the exchange of certain lands within the Fishlake National Forest, Utah; to the Committee on

the Public Lands.

S. 2903. An act for the relief of Judd McKelvey; to the Committee on the Public Lands.

S. 1214. An act to amend sections 2380 and 2381, Revised Statutes of the United States; to the Committee on the Public

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 9321. An act to amend the act approved May 9, 1888, as

amended by the act of June 11, 1896.

WITHDRAWAL OF PAPERS.

By unanimous consent, leave was granted to Mr. Hawley to withdraw from the files of the House, without leaving copies, papers in the following cases, no adverse reports having been made thereon:

Daniel C. Derby, H. R. 24650, Sixty-second Congress, Amos Dahuff, H. R. 1004, Sixty-first Congress, and H. R. 28485, Sixty-second Congress,

Peter Deardorf, H. R. 28353, Sixty-second Congress. John McArthur, H. R. 27346, Sixty-second Congress.

W. R. Wells, H. R. 21396, Sixty-second Congress.
Charles W. Clark, H. R. 1943, Sixty-second Congress.
Papers in the cases of H. R. 1920, Sixty-second Congress, and H. R. 25699, Sixtieth Congress.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. WEBB, Mr. FITZHENRY, and Mr. VOLSTEAD, indefinitely, on account of taking testimony on the subcommittee of the Judiciary Committee concerning Judge Emory Speer, of Georgia.

The SPEAKER. The Chair desires to ask leave of absence, indefinitely, for the gentleman from South Carolina, Mr. Rags-DALE. Is there objection?

There was no objection.

ADJOURNMENT.

Then, on motion of Mr. Moon (at 6 o'clock and 18 minutes p. m.), the House adjourned until Monday, January 19, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting a communication from the president of the Civil Service Commission submitting an amended estimate of appropriations under the title "Salaries, Civil Service Commission" (H. Doc. No. 607); to the Committee on Appropriations and ordered to

be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting a copy of a communication of the Secretary of War submitting estimates of deficiencies in appropriations required by the Board of Managers of the National Home for Disabled Volunteer Soldiers (H. Doc. No. 608); to the Committee on Appropriations and ordered to be printed.

3. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig Juno, in the case of the Insurance Co. of North America v. The United States, and the case of the Insurance Co. of the State of Pennsylvania v. The United States (H. Doc. No. 609); to the Com-

mittee on Claims and ordered to be printed.
4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on survey of the St. George Sound, Fla., to the Rio Grande section of the proposed continuous inland waterway from Boston, Mass., to the Rio Grande (H. Doc. No. 610); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:

By Mr. HARDY: A bill (H. R. 11807) to provide for the rapid defense of Gulf coast ports; to the Committee on Naval

By Mr. DILLON: A bill (H. R. 11808) to secure cooperation between the Interstate Commerce Commission and the State railway boards and commissions of the several States in correlating, changing, and establishing of intrastate rates, charges and fares which indirectly affect interstate commerce in the transportation of passengers and property by public carriers, and providing for procedure relative thereto; to the Committee on Interstate and Foreign Commerce

By Mr. MANN: A bill (H. R. 11809) authorizing the Secretary of War to grant permission to the South Park commissioners and to the Illinois Central Railroad Co. for the erection of bulkheads and other obstructions to navigation, and for other

purposes; to the Committee on Interstate and Foreign Commerce. By Mr. FRANCIS: A bill (H. R. 11810) to determine the standard route of rural carriers and to fix their compensation and equipment allowance; to the Committee on the Post Office and Post Roads.

By Mr. SINNOTT: A bill (H. R. 11811) to amend section 6 of the reclamation act of June 17, 1902, and for other purposes; to the Committee on Irrigation of Arid Lands.

By Mr. JOHNSON of Washington: A bill (H. R. 11812) granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric-transmission lines across the Vancouver Military Reservation, in the State of Washington, and repealing an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric-transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912; to the Committee on Military Affairs.

By Mr. GILLETT: A bill (H. R. 11813) to establish a library post; to the Committee on the Post Office and Post Roads.

By Mr. GODWIN of North Carolina: A bill (H. R. 11814) authorizing a survey of Hoods Creek, in Brunswick County, N. C.; to the Committee on Rivers and Harbors.

By Mr. BALTZ: A bill (H. R. 11815) authorizing the payment of pensions monthly; to the Committee on Invalid Pensions. By Mr. JOHNSON of Washington: A bill (H. R. 11816) au-

thorizing the construction of a bridge and approaches thereto across the Columbia River at or near Vancouver, Wash.; to the Committee on Interstate and Foreign Commerce.

By Mr. PARK: A bill (H. R. 11817) to establish an experiment station in Grady County, Ga., to standardize the grades of table sirup made from sugar cane and to study the use and value of the by-products of sugar cane; to the Committee on Agriculture.

By Mr. DYER: A bill (H. R. 11818) to provide for the monthly payment of pensions, and for other purposes; to the Committee on Invalid Pensions.

By Mr. STAFFORD: A bill (H. R. 11819) to authorize the payment of salaries to injured postal employees and of an allowance to certain persons in case of death; to the Committee on the Post Office and Post Roads.

By Mr. HARRISON: A bill (H. R. 11820) to provide for the survey of the Chickasawhay River in Mississippi from the Cherry; to the Committee on Invalid Pensions.

mouth of said river to Shubuta, Miss.; to the Committee on Rivers and Harbors.

By Mr. EDMONDS: A bill (H. R. 11821) to provide for the survey of Pensauken Creek, N. J.; to the Committee on Rivers and Harbors

By Mr. MONTAGUE: A bill (H.-R. 11822) to acquire, by purchase, condemnation, or otherwise, additional land for the post office, courthouse, and customhouse in the city of Richmond, Va.; to the Committee on Public Buildings and Grounds.

By Mr. STEVENS of Minnesota: A bill (H. R. 11823) to authorize and direct the Secretary of War to transfer a public building at St. Paul, Minn., to the Secretary of the Treasury, to remodel and rearrange public buildings at St. Paul, Minn., and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. TAGGART: A bill (H. R. 11887) to establish a bureau for the study of the criminal, pauper, and defective classes;

for the study of the criminal, pauper, and defective classes, to the Committee on the Judiciary.

By Mr. LINTHICUM: Resolution (H. Res. 375) providing information on currency law; to the Committee on Printing.

By Mr. HARDY: Resolution (H. Res. 376) authorizing the Committee on the Merchant Marine and Fisheries to have printed 2,500 copies of volumes 1, 2, and 3, and 3,400 copies of volume 4 of the Proceedings of the Committee on the Merchant Marine and Fisheries in the Investigation of the Shipping Combination; to the Committee on Printing,

By Mr. HILL: Resolution (H. Res. 377) authorizing the Speaker to appoint a committee of five to investigate conditions in the coal fields of Colorado; to the Committee on Rules.

By Mr. BURNETT: Resolution (H. Res. 378) for the consideration of H. R. 6060; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:
By Mr. ADAIR: A bill (H. R. 11824) granting an increase

of pension to John W. McKinley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11825) granting an increase of pension to Hamilton G. Gullett; to the Committee on Invalid Pensions. By Mr. ANTHONY: A bill (H. R. 11826) to correct the mili-

tary record of Charles Rayfield; to the Committee on Military Affairs.

By Mr. ASHBROOK: A bill (H. R. 11827) granting an increase of pension to Alexander Harrison; to the Committee on Invalid Pensions.

By Mr. BALTZ: A bill (H. R. 11828) granting a pension to Alexander Lamont; to the Committee on Invalid Pensions.

By Mr. BEALL of Texas: A bill (H. R. 11829) for the relief of the heirs of J. C. Lankford; to the Committee on War Claims.

By Mr. BULKLEY: A bill (H. R. 11830) for the relief of

Samuel Schmitz; to the Committee on Military Affairs. By Mr. CAMPBELL: A bill (H. R. 11831) granting an increase of pension to Augustus W. Beswick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11832) granting an increase of pension to

Charles W. Peet; to the Committee on Invalid Pensions. By Mr. CANTRILL: A bill (H. R. 11833) granting an increase of pension to William H. Brewen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11834) granting an increase of pension to Ed N. Wilson; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 11835) granting an increase of pension to James E. Waters; to the Committee on Invalid Pensions.

By Mr. FARR: A bill (H. R. 11836) for the relief of Henry Murcer, United States Army, retired; to the Committee on Military Affairs.

Also, a bill (H. R. 11837) granting a pension to Rachel Thomas; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11838) granting an honorable discharge to William H. Thomas; to the Committee on Military Affairs. Also, a bill (H. R. 11839) granting an honorable discharge

to William Ham; to the Committee on Military Affairs. By Mr. FERRIS: A bill (H. R. 11840) for the relief of R. G.

Arrington; to the Committee on the Public Lands. By Mr. FITZHENRY: A bill (H. R. 11841) granting a pen-

sion to Francis M. Phares; to the Committee on Pensions.

Also, a bill (H. R. 11842) granting a pension to Mary I.

Seltzer; to the Committee on Pensions.

Also, a bill (H. R. 11843) granting a pension to Mary C.

Also, a bill (H. R. 11844) granting a pension to Barbara Hamilton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11845) granting a pension to John W. Ferris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11846) granting an increase of pension to William W. Elder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11847) granting an increase of pension to Sylvanus G. Popple; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11848) granting an increase of pension to Harmon McChesney; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11849) to correct the military record of

William Schroeder; to the Committee on Invalid Pensions. By Mr. FRANCIS: A bill (H. R. 11850) granting an increase of pension to James F. Charlesworth; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11851) granting an increase of pension to Martin Van Hughes; to the Committee on Invalid Pensions.

By Mr. GOEKE: A bill (H. R. 11852) granting a pension to James Lee Cochrun; to the Committee on Pensions.

By Mr. GREEN of Iowa: A bill (H. R. 11853) granting a

special pension to Catherine McCombs; to the Committee on Invalid Pensions.

By Mr. HILL: A bill (H. R. 11854) granting an increase of pension to Monroe F. Kirby; to the Committee on Invalid

Also, a bill (H. R. 11855) granting an increase of pension to

Also, a bill (H. R. 11856) granting an increase of pension to Also, a bill (H. R. 11856) granting an increase of pension to Samuel S. Thompson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11857) granting an increase of pension to

Margarett Reese; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Connecticut: A bill (H. R. 11858) granting an increase of pension to Henrietta N. Blodgett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11859) granting a pension to Frank Smith, alias John Lynch; to the Committee on Invalid Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 11860) granting a pension to Cora Hawkins; to the Committee on Invalid Pensions. By Mr. J. R. KNOWLAND: A bill (H. R. 11861) granting a pension to Edward F. McKeon; to the Committee on Pensions. By Mr. LANGLEY: A bill (H. R. 11862) granting an increase of pension to Edmond Moore; to the Committee on Invalid

Pensions.

Also, a bill (H, R. 11863) granting an increase of pension to

Thomas Eversole; to the Committee on Invalid Pensions.

By Mr. LEE of Georgia; A bill (H. R. 11864) for the relief of the trustees of Pea Vine Academy, Walker County, Ga.; to the Committee on War Claims.

Also, a bill (H. R. 11865) for the relief of the trustees of Pea Vine Church, Walker County, Ga.; to the Committee on War

By Mr. MAPES: A bill (H. R. 11866) granting a pension to Marion B. Eldred; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11867) granting a pension to Susan J. Stockwell; to the Committee on Invalid Pensions.

By Mr. MORRISON: A bill (H. R. 11868) for the relief of Thomas J. Gardner; to the Committee on Military Affairs.

By Mr. OLDFIELD: A bill (H. R. 11869) granting an increase of pension to James B. Pate; to the Committee on Invalid Pensions.

By Mr. RAINEY: A bill (H. R. 11870) for the relief of Charles W. Callaway; to the Committee on Claims.

By Mr. RAUCH: A bill (H. R. 11871) granting an increase of pension to Allen W. King; to the Committee on Invalid Pensions. By Mr. ROGERS: A bill (H. R. 11872) granting a pension to Minnie Newton; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 11873) granting a pension to Susan A. Phillips; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 11874) granting a pension to Samuel Adams; to the Committee on Pensions.

Also, a bill (H. R. 11875) granting a pension to George W. Gaby; to the Committee on Invalid Pensions.

By Mr. WHITE: A bill (H. R. 11876) granting a pension to Henry Kehl; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 11877) granting a pension to John Owenby; to the Committee on Invalid Pensions.

(H. R. 11878) granting a pension to C. Albert Also, a bill Lyle; to the Committee on Pensions.

Also, a bill (H. R. 11879) to remove the charge of desertion standing against the record of William Jones; to the Committee on Military Affairs.

By Mr. SUTHERLAND: A bill (H. R. 11880) granting an increase of pension to Granville Lanham; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Colorado: A bill (H. R. 11881) granting pension to Josephine L. Graham; to the Committee on Invalid Pensions.

valid Pensions.

By Mr. TEN EYCK: A bill (H. R. 11882) for the relief of John V. Behan, administrator; to the Committee on Claims.

Also, a bill (H. R. 11883) for the relief of heirs of Sarah E. Clopton, deceased; to the Committee on War Claims.

By Mr. TREADWAY: A bill (H. R. 11884) granting an increase of pension to John Weir; to the Committee on Pensions.

By Mr. WHITE: A bill (H. R. 11885) granting an increase of pension to Albert Forsker: to the Committee on Invalid Pension to Albert Forsker: to the Committee on Invalid Pension to Albert Forsker: pension to Albert Foraker; to the Committee on Invalid Pen-

By Mr. WINSLOW: A bill (H. R. 11886) granting a pension to Peter Crosby; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANSBERRY: Memorial of the General Assembly of the State of Ohio, favoring the passage of the bill known as the volunteer retired list; to the Committee on Military Affairs.

By Mr. ASHBROOK: Petition of the Socialist Party of

Doylestown, Ohio, favoring an investigation of labor conditions

in the Michigan copper mines; to the Committee on Rules. By Mr. BARCHFELD: Memorials of Wolfe Tone Society, of Pittsburgh, Pa., and the General Sullivan Branch of the American Continental League, of Pittsburgh, Pa., against appropriating money for the celebration of 100 years of peace among English-speaking peoples; to the Committee on Foreign Affairs.

Also, papers to accompany House bill 11526, granting a pension to Mary S. Salisbury; to the Committee on Invalid Pensions.

By Mr. BARTHOLDT: Petitions of Hane Height Local, of St. Louis, Mo.; Local Hazel Hill, of St. Louis, Mo.; and W. G. Pierce, of St. Louis, Mo., favoring investigation of strike conditions in Michigan; to the Committee on Rules.

Also, petitions of Relief Society for Political Nationals in Russia; the Carl Marx Educational Club, of St. Louis, Mo.; Polish Council, of the Polish National Alliance, St. Louis, Mo.; American Association of Foreign Language Newspapers of New York City; and the Italian Journal, of New York City, protesting against Burnett immigration bill; to the Committee on

Immigration and Naturalization.

Also, petitions of A. J. McBride, of Atlanta, Ga.; Ell Torrence, of Minneapolis, Minn.; and George W. Martin, of Brookfield, Mo., favoring erection of a peace monument at Gettysburg; to the Committee on the Library

Also, petition of citizens of Painted Post, N. Y., favoring enactment by Congress of a national cooperative rural bank act;

to the Committee on Banking and Currency.

SENATE.

Monday, January 19, 1914.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Almighty God, we come before Thee to make mention of all Thy marvelous gifts of providence and grace to us. we are not unmindful of the infinite goodness of our heavenly Father. The light that shines along our pathway comes from Thine own hand. Thy blessings are multiplied to us day by day. And yet we come and out of the depth of our conscious poverty to seek God's richer and higher blessing, believing that the consciousness of our limitations and our poverty is but the prophecy and promise of the realization of our ideals, the height of the riches to which we may attain through Thy grace.

Guide us this day as Thou wilt, that we may fulfill the duties of the day as in God's sight and be enriched with Thy spiritual

grace and blessing. For Christ's sake, Amen.

The Journal of the proceedings of Saturday last was read and approved.

OMER H. PORTER ET AL. V. UNITED STATES (S. DOC. NO. 369).

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the cause of Omer H. Porter, George F. Porter, Annie Porter Mason, Edward B. Porter, and Albert B. Porter, heirs at law of Albert G. Porter, deceased; The Union Trust Co. of Indianapolis, executor of Benjamin Harrison, deceased, and Mary L. Fishback, sole legatee of William P. Fishback, deceased, v. United States, which, with accompanying paper, were referred to the Committee on Claims and ordered to be printed.

GEORGETOWN BARGE, DOCK, ELEVATOR & RAILWAY CO. (S. DOC. NO. 370).

The VICE PRESIDENT laid before the Senate the annual report of the Georgetown Barge, Dock, Elevator & Railway Co. for the year ended December 31, 1913, which was referred to the Committee on the District of Columbia and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had agreed to a concurrent resolution providing that the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 20th of January, 1914, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such com-munications as the President of the United States shall be pleased to make them, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 9321) to amend the act approved May 9, 1888, as amended by the act of June 11, 1896, and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of Glens Falls Branch, American Continental League, of New York; of Bunker Hill Branch, American Continental League, of Philadelphia, Pa.; of Commodore Barry Branch, No. 311, American Continental League, of Brooklyn, N. Y.; and of Patrick Henry Branch, American Continental League, of Philadelphia Pa., remonstrating against any appropriation by Congress for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. GRONNA. I present a petition signed by a large number

of citizens of Osnabrock, N. Dak., relative to the restriction of immigration into this country. I ask that the petition, with one signature, be printed in the Record and that it be referred to

the Committee on Immigration.

There being no objection, the petition was referred to the Committee on Immigration and ordered to be printed in the RECORD, as follows:

OSNABROCK, N. DAK., December 30, 1913.

Hon. Asle J. Gronna, Washington, D. C .:

We, the undersigned citizens of Osnabrock and vicinity, do by this petition wish to express our firm belief in the necessity of a national law bearing upon the restriction of immigration into this country; that we believe in the liliteracy test as provided in the Burnett-Smith immigration commission bill now pending before the House of Representatives; and that we further believe that a man that can read and write is better fitted for earning a living and better qualified for participation in our public affairs than one that can not.

Therefore we urge upon you to use your influence at every available opportunity in favor of the aforementioned bill and that you support its final passage by your vote.

JORGEN SATHER (And others).

Mr. GRONNA presented a petition of sundry citizens of Fargo, N. Dak., praying for the enactment of legislation to further restrict immigration and remonstrating against the enactment of legislation making Columbus Day-October 14-a legal holiday, which was referred to the Committee on Immigration.

He also presented a petition of the International Association of Machinists, of Devils Lake, N. Dak., praying for the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture and horticulture and to limit the issuing of injunctions in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Gackle, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on

the District of Columbia.

Mr. NELSON presented petitions of sundry citizens of Hennepin County, Minn., praying for the enactment of legislation providing a literacy test for immigrants to this country, which were referred to the Committee on Immigration.

He also presented a petition of Frederick Keye Camp, Department of North Dakota, United Spanish War Veterans, of Fargo, N. Dak., praying for the enactment of legislation granting pensions to the wives and minor children of Spanish War Veterans, which was referred to the Committee on Pen-

He also presented petitions of the Socialist Party of Ottertail County, Minn., of the Socialist Party of Albert Lea, Minn., and of the Federation of Labor of Chicago, Ill., praying for an investigation of the conditions existing in the mining district of Michigan, which were referred to the Committee on Education and Labor.

Mr. BURTON presented a petition of sundry citizens of Wapakoneta, Ohio, praying for the adoption of the so-called literacy-test clause in the immigration bill, which was referred

to the Committee on Immigration.

Mr. JOHNSON presented a memorial of sundry citizens of Knox County, Me., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. PENROSE presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation to prohibit the sale of convict-made goods, which was referred to the Committee on Education and Labor.

He also presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation to amend sections 1, 2, 3, and 8 of an act to protect trade and commerce against unlawful restraints and monopolies, which

was referred to the Committee on the Judiciary.

He also presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation to provide a supertax on incomes to meet the cost of naval construction and other purposes, which was referred to the Committee on Finance.

Mr. PERKINS presented a memorial of sundry citizens of San Joaquin County, Cal., and a memorial of sundry citizens of Santa Cruz County, Cal., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented petitions of the Federated Brotherhood of the Monterey Peninsula, of Pacific Grove, Cal., and of California Branch, American School Peace League, favoring the suspension of the naval programs of the great powers for one year, which were referred to the Committee on Naval Affairs.

Mr. SMITH of Michigan presented a memorial of sundry citizens of Alden, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

COURTS IN NORTH CAROLINA.

Mr. OVERMAN. From the Committee on the Judiciary I report back favorably with amendments the bill (S. 1745) providing for the establishment of a term of the District Court for the Eastern District of North Carolina at Wilson, N. C., and I submit a report (No. 159) thereon. I ask unanimous consent for the present consideration of the bill.

Mr. SMOOT. I should like to ask the Senator if it is a

unanimous report from the committee?
Mr. OVERMAN. It is.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It directs that a term of the District Court for the Eastern District of North Carolina shall be held at Wilson on the first Monday in April and October.

The first amendment of the Committee on the Judiciary was

to strike out the proviso beginning in line 5 of section 1 in the

following words:

Provided, That the city of Wilson shall provide and furnish at its own expense a suitable and convenient place for holding the district court at Wilson until a courthouse shall be constructed by the United States.

The amendment was agreed to.

The next amendment was to strike out section 2 of the bill in the following words:

That the clerk of the court for the eastern district shall maintain an office at Wilson in charge of himself or a deputy, which shall be kept open at all times for the transaction of the business of the court.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MARTINE of New Jersey:

A bill (S. 4055) granting a pension to Violet Burd Grubb; to the Committee on Pensions.

A bill (S. 4056) for the relief of Patrick Howe (with accompanying papers); to the Committee on Military Affairs.

By Mr. OVERMAN:

A bill (S. 4057) for the relief of John Pool and others (with

accompanying papers);
A bill (S. 4058) for the relief of Hamilton Perryman and

A bill (S. 4059) for the relief of B. H. Harrison; and A bill (S. 4060) for the relief of Elizabeth Muhleman, widow, and the heirs at law of Samuel A. Muhleman, deceased; to the Committee on Claims.

By Mr. NORRIS:

A bill (S. 4061) providing for the establishment of a Bureau of Farm Loans in the Department of Agriculture; to the Committee on Agriculture and Forestry.

By Mr. BURTON:

A bill (S. 4082) granting an increase of pension to Henry Pratt; to the Committee on Pensions.

A bill (S. 4064) granting an increase of pension to Asa J. Alexander (with accompanying papers);

A bill (S. 4065) granting an increase of pension to Thomas A. Harvey (with accompanying papers);

A bill (S. 4066) granting a pension to Clara A. Perry Estes (with accompanying paper)

A bill (S. 4067) granting an increase of pension to Israel A. Gardner (with accompanying paper);

A bill (S. 4068) granting an increase of pension to Charles E. Low;

A bill (S. 4069) granting a pension to Freden M. Joyce (with

accompanying papers); and
A bill (S. 4070) granting an increase of pension to Sewell B. Harriman (with accompanying papers); to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 4071) granting an increase of pension to Helen E. Sturtevant; and

A bill (S. 4072) granting an increase of pension to Fitz W. Patterson; to the Committee on Pensions.

By Mr. WEEKS:
A bill (S. 4073) for the relief of Hiram D. Rogers; to the

Committee on Claims. By Mr. PENROSE:

A bill (S. 4074) to purchase an oil painting entitled "The Death of Brevet Lieut, Col. Alonzo H, Cushing, at Gettysburg"; to the Committee on the Library.

A bill (S. 4075) to correct the military record of George W. Parker (with accompanying papers); to the Committee on

Military Affairs

A bill (S. 4076) providing additional compensation for rural delivery carriers for maintenance of horses, buggies, and such other equipment as is recessary in the discharge of their duties; to the Committee on Post Offices and Post Roads.

A bill (S. 4077) for the relief of Mary E. Goodley; to the Committee on Claims.

A bill (S. 4078) granting an increase of pension to Ellis P. Woodward;

A bill (S. 4079) granting a pension to Almira E. Sheldrake; A bill (S. 4080) granting an increase of pension to Peter Sheplar;

A bill (S. 4081) granting an increase of pension to Theodore Labar

A bill (S. 4082) granting an increase of pension to Susanna B. Bragg

A bill (S. 4083) granting an increase of pension to Charles E. Snyder:

A bill (S. 4084) granting an increase of pension to Margaret McPherran;

A bill (S. 4085) granting a pension to Catherine Berkebile; A bill (S. 4086) granting a pension to Anna M. Reed; A bill (S. 4087) granting an increase of pension to William

Roup; A bill (S. 4088) granting an increase of pension to Cerelle

Shattuck;
A bill (S. 4089) granting an increase of pension to Isaac P. Whitesides (with accompanying papers):

A bill (S. 4090) granting an increase of pension to William Rodgers (with accompanying papers);
A bill (S. 4091) granting an increase of pension to Robert B.

Adams (with accompanying papers); and A bill (S. 4002) granting an increase of pension to George W. Taylor (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 4093) granting a pension to Mary Griffith; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 4094) authorizing the construction of a bridge and approaches thereto across the Columbia River at or near Vancouver, Wash.; to the Committee on Commerce.

By Mr. OVERMAN:

A joint resolution (S. J. Res. 100) authorizing the Joint Committee on Printing to publish a bulletin of committee hearings; to the Committee on Printing.

GOVERNMENT OF THE PHILIPPINE ISLANDS.

Mr. OVERMAN. I introduce a joint resolution requesting the President to consider the expediency of effecting a treaty with European powers providing for the neutralization of the Philippine Islands, and to provide an independent government there when established. I ask that it may be read and referred to the Committee on Foreign Relations.

The Joint resolution (S. J. Res. 90) requesting the President

The joint resolution (S. J. Res. 90) requesting the President to consider the expediency of effecting a treaty with European powers providing for the neutralization of the Philippine Islands, and to provide an independent government there when established, was read the first time by its title and the second time

at length, as follows:

Resolved, etc., That it is the purpose of the United States to cease exercising sovereignty over the Philippine Islands as soon as may be with justice to them and honor to the United States, and that it is the preference of the United States to accomplish this purpose by establishing an independent government in said Islands; that in pursuance of

such purpose and preference the President is respectfully requested to consider the expediency of opening negotiations with the Governments of Great Britain, Germany, France, Russia, Italy, Spain, and Japan with a view of effecting a joint treaty with such Governments by which it shall be provided that an independent government in the Philippine Islands, when established by the United States, shall be recognized and preserved; that pending the establishing of such independent Philippine government the Philippine Islands shall be neutral territory; that such Philippine government, when established, shall agree that it will maintain equality of trade relations toward all the signatory powers, and that, in the event of war between any of the nations of the earth, it shall be neutral; that such concessions as may be made the United States in the establishment of such independent government shall be recognized by all the signatory powers.

The VICE PRESIDENT. The joint resolution will be re-

The VICE PRESIDENT. The joint resolution will be referred to the Committee on Foreign Relations.

THE NORTH AMERICAN INDIAN.

Mr. PENROSE, I introduce a joint resolution providing for the appointment of a commission to consider and report upon the Rodman Wanamaker Expedition of Citizenship to the North the Rodman Wanamaker Expedition of Chizenship to the North American Indian, and for a report upon the information secured by Dr. Joseph K. Dixon, leader of the expedition, and empower-ing the said commission to report a bill upon the entire reor-ganization of Indian affairs. I ask that the joint resolution be referred to the Committee on Indian Affairs, and I invite the special attention of the committee to it.

The joint resolution (S. J. Res. 101) providing for the appointment of a commission to consider and report upon the Rodman Wanamaker Expedition of Citizenship to the North American Indian, and for a report upon the information secured by Dr. Joseph K. Dixon, leader of the expedition, and empowering the said commission to report a bill upon the entire reorganization of Indian affairs, was read twice by its title and referred to the Committee on Indian Affairs.

RAILROADS IN ALASKA.

Mr. CUMMINS. I send to the desk an amendment which, at the proper time, I shall propose to Senate bill 48, the Alaska railroad bill. I ask that it may be printed and that it lie on the table

The VICE PRESIDENT. That action will be taken.

OMNIBUS CLAIMS BILL.

Mr. BANKHEAD submitted an amendment intended to be proposed by him to the omnibus claims bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Claims.

Mr. PENROSE submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committeee on Claims and ordered to be printed.

LAWS ON TRUSTS AND MONOPOLIES.

Mr. CHILTON. I ask to have printed as a public document a compilation entitled "Laws on Trusts and Monopolies, Do-mestic and Foreign, with Authorities." I think the compilation should be referred to the Committee on Printing for consideration, and I ask that that action be taken.

The VICE PRESIDENT. The matter will be referred to the Committee on Printing.

PROPOSED APPOINTING COMMISSION.

Mr. WORKS. Mr. President, I desire to give notice that next Monday immediately after the close of the morning business I shall, with the permission of the Senate, submit some remarks on the subject of patronage and in support of Senate bill 2679. providing for a commission to recommend appointments to office, and for other purposes.

JOINT MEETING OF THE TWO HOUSES-PRESIDENT'S ADDRESS.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (No. 30) of the House of Representatives, which was read:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 20th day of January, 1914, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

Mr. BACON. I move that the Senate concur in the resolution of the House.

The motion was agreed to.

BAILROADS IN ALASKA.

The VICE PRESIDENT. The morning business is closed.

Mr. CHAMBERLAIN. I send to the desk a letter from Mr.

James Deitrick, who for many years has been engaged in railroad construction not only in the United States but abroad,
and is now contemplating a trip to South America for the purpose
of constructing railroads there. In talking with him the other day I asked him something about Alaska, as he had been there a number of times, and he promised to address me a letter on Senate proceed to the consideration of the Alaskan railroad bill.

the subject of railroad construction in Alaska. I have received the letter, and I ask that it may be read by the Secre-

There being no objection, the Secretary read as follows:

THE COSMOS CLUB, Washington, D. C., January 19, 1914.

RE ALASKA BAILROAD.

MY DEAR SENATOR: Some of my friends have asked me, as a railroad man of considerable general experience in this and foreign countries, to write you my views upon the construction and operation of a
railroad in Alaska.

I have crossed Alaska during the summer months, during the winter
months, and in the spring, and feel that my observations were sufficient to werrant my giving an opinion.

First, I will call your attention to a country having similar climatic
conditions as well as similar agricultural, mineral, timber, and other
features:

RUSSIA AND SIBERIA.

RUSSIA AND SIBERIA.

Northern Russia and Siberia resemble Alaska about as much as the State of Ohio resembles the State of Indiana, all conditions of climate, lands, and resources being on a par.

Take as an example what the Government of Russia has accomplished by railroad construction and operation within such a zone. Siberia was looked upon in early times as a glacial, moss-covered Arctic region, a sort of dumping ground for the criminal class, and of no especial use save for its mineral wealth. But the men of Siberia found that the soil would produce even a greater return to the acre the year than the soils in the rich Volga River Valley in southern Russia. It was not long before the people of Siberia were petitioning the Government for transportation. The great Siberian Railroad was ultimately constructed across the so-called ice-bound north. The Government created a good-reads department and operated stage lines in all directions to connect outlying districts with the railroad. Several million people eventually moved from western and southern Russia into Siberia. Finally the 5,000 miles of railroad across Siberia could not cope with the business offered to it by the farming class, not to mention the coal, mineral, and other business demanding transportation facilities. In order to furnish relief to the shipping the Government built a railroad north to a port on the Arctic Ocean. Great warehouses were erected and wheat and other products are shipped to this Arctic port. When the Arctic Ocean opens to shipping in the summer the ships proceed to the port and take away the products for the markets of Europe. Even with this new port and the construction of branch railroads which make the trans-Siberian railroad practically a double-track road, though separated by several miles in their parallel operation, the business increased to such a great extent that to-day the Russian Government is building another system of railroads across Siberia. Two ports upon the Arctic have railroad communication. The Trans-Siberi

Alaska, also informed me that if Russia owned Alaska again a thousand million dollars would not tempt her people to part with that country.

The above facts give you an idea of conditions now existing in a similar country in all respects to Alaska, and where railroads have made it possible for the farmer, miner, and merchant to upbuild the

similar country in all respects to Alaska, and where railroads have made it possible for the farmer, miner, and merchant to upbuild the land.

The Government department in charge of ways and means of communications guards with effort and close attention the upbuilding and upkeep of "post roads" which serve the people and furnish communication with the railroad.

Alaska, with a railroad starting from some good port—as close to the United States as possible—and built across the country to the Bering Straits, will be opened to farmers, miners, and others and will develop in the same way the railroads have developed Canada and Siberia. Wheat and other farm products, within a single year after the railroad is put in operation, will bring in more revenue to the farmers there than the cost of the road, and the valuable products will increase each and every ye.r.

The railroad will pay operating costs, upkeep, and fixed charges the same as do the Government railroads in Siberia. Being a Government road it would not be overcapitalized, and there would be no necessity of increasing rates in order to pay dividends.

It will be important to have a department in charge of "post roads," their upkeep, and development in order to give the many small and large valleys a means of communication for the farming class and other developers of the opportunities offered in Alaska. In a few years' time the agricultural interests of the valleys will demand branch lines to connect with the main road. Some day in the near future the acreage of Alaska will furnish shipping for this railroad in as great a tonnage the year as a like acreage does here at home. Give Alaska the railroad and you will soon be told that your judgment was proper and that no one can understand why it had not been done years ago.

Personally I have no interest in Alaska, but I can assure you that if the bill is passed so that the country can be opened to development I shall be one of the first to take up a farm there and cultivate the soil.

I shall be one of the first to take up a fail that the soll.

I call your attention to a former time in the Senate, when a Senator was in favor of permitting the Canadian boundary to take in the now great producing States of Oregon and Washington, the Senator intimating that the frozen bit of the Northwest was of no use or value. I fear that there are among your colleagues to-day men as unfamiliar with the vast domain of Alaska and the necessity of Government railroad construction therein as was the Senator who wanted to give away Oregon and Washington.

Give Alaska a chance for development and our people will go there by the thousands, as they are going to a similar zone in Canada to-day.

Very respectfully,

James Deitrick.

Hon. George E. Chamberlain, The Senate, Washington, D. C.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. JONES. Mr. President, arguments sustaining this legislation and the bill now pending providing for the Government construction of railroads in Alaska have been so fully and so ably presented by the Senator from Oregon [Mr. CHAMBERLAIN] and by the Senator from Montana [Mr. WALSH] that it seems work of supererogation on my part to attempt to add anything to the subject. They have presented the facts regarding Alaska, its resources, possibilities, climate, and needs so fully and clearly that there is nothing left to be said. nothing now were it not for the fact that my State and people are so vitally interested and because I have been striving to bring about legislation of this character for so long. I can do no more now than to emphasize some of the things they have said and state some conclusions which they have abundantly established, in the hope that some Senator who may not have been present when they spoke may gain some information about Alaska that he does not now possess. I had laid out for myself a great deal of the ground so well covered by them. much of which I shall omit, and shall endeavor not to repeat

any more than may seem absolutely necessary.

On the 11th day of August, 1911, I introduced in the Senate a joint resolution directing the President to make a survey for a railroad or railroads to connect the coal fields of Alaska with tidewater. This was the first legislative step, so far as I know, looking toward the construction of railroads in Alaska by the

Government.

Pending the consideration of this resolution, the Secretary of the Interior, Mr. Fisher, made a visit to Alaska and reached the conclusion that the Government should construct railroads in Alaska if we would have the Territory opened up and its various resources, agricultural and mineral, developed in a broad and comprehensive way, so that the home demand there might be supplied by home productions and coal furnished not only for local consumption, but also for naval and other governmental purposes.

On January 29, 1912, I introduced a bill providing for the construction of a railroad to the Matanuska coal fields and for surveys looking to the extension of such road to the interior of Alaska to navigation on the Tanana or Yukon. This bill was referred to a subcommittee of the Public Lands Committee, and a majority of that committee, Senator CHAMBERLAIN and myself, submitted a favorable report on the bill to the full committee, but on account of the press of other matters it was Provision, however, was made for a commission to investigate and report on the needs of Alaska and the best routes and systems of railroads for its development. That commission was appointed by President Taft, acted promptly, submitted its report, and the same was sent to Congress by President Taft with a strong message urging Government construction of railroads, and the report is the basis for this legislation.

I desire to say here, Mr. President, that I am glad this legislation has not in any sense partaken of a partisan character. The legislation as now pending was, in fact, initiated by a Republican President and a Republican administration; it is now pending with the recommendation of a Democratic Presi-The bill is now being considered, as important legislation in this body ought always to be considered, by the Senate and by its Members entirely free to act upon it without party bias, and to vote upon it as their opinion and judgment may warrant. Mr. President, promptly upon the opening of this Congress Senator CHAMBERLAIN and I introduced bills, fundamentally the same, looking toward Government construction in Alaska, and, as he stated, these bills were referred to a subcommittee, parts of each were taken, with suggestions from the War Department, and a substitute bill prepared and submitted to the full committee, which, after consideration, further amended it and reported it favorably to the Senate.

It is a source of much satisfaction to me that what I really contemplated in 1911 is nearing fruition in the bill which is now under consideration by the Senate.

At this time I can not refrain from testifying to the earnest and valuable work of Senator Chamberlain in connection with this important legislation. He has been actively supporting it while his party was in the minority in this body as well as now, when it is in the majority. The people of Alaska, the pioneers who have been looking so long and so anxiously for legislation of this kind, are greatly indebted to him for his earnest, persistent efforts and work in their behalf, and I desire to express

publicly the appreciation of his good work which I know they feel.

Some are shocked at a proposal that the United States should build railroads, and will vote against this bill solely because of their opposition to the general proposition. Government construction of railroads, however, is not a new proposition in the world's progress. Of the 52 leading nations of the earth to-day all but four own their railroads to, a greater or less extent. In 47 different countries in 1905 government mileage amounted to 217,175 miles, while in the same countries private mileage amounted to but 99,951.

The modern trend is all in this direction. New conditions demand new methods of treatment. It would be strange if those influences which have led and are leading to Government ownership among other people should not lead in the same direction in our own country. The people themselves are making history to-day. They are determining what is best for them and what they determine is best they are going to do. Why not? They are affected by results. Their good should be the ultima Thule of all legislation with such limitations as they have imposed

upon themselves.

Government construction of railroads may be very undesirable under some conditions. It may be desirable under others. Where and when desirable we should not hesitate to adopt such a policy. While I have been inclined against Government construction and operation of railroads, I will confess that I do not look upon it with that fear and trembling with which I viewed it some time ago. In my judgment, every step we are taking looking to the regulation and control of railroads and railroad corporations is leading inevitably to Government ownership. We can not avoid it if we would and we will soon have to face the proposition squarely. The people are coming slowly but irresistibly to this view, and on a question of this kind the mature, deliberate judgment of the people will be right. These great properties and investments can not continue indefinitely to be controlled and managed by those having no pecuniary interest in them, and if the public is going to regulate and control their operations and fix the charges for the services rendered and if methods of operations continue to demand additional regulation, the public will eventually be compelled to own them. I am not convinced that the great benefits that would come to the people from Government construction, ownership, and operation of railroads will not far and away overbalance the evils that result therefrom. Even the political domination of civil-service employees, so much feared by my friend from Mississippi, can not be much worse-I do not believe so bad-than the domination of the railroads, not only in politics but in business, which we have experienced in the past.

A few more illustrations of the fruits of private ownership similar to that of the New Haven Railroad will bring this subject very quickly to the attention of the people and will greatly accelerate the tendency toward Government ownership of railroads. I want to present a few facts with reference to the New Haven Railroad situation, which vividly portray what may result from private ownership, control, and manipulation.

In 1911 the deficit of this railroad company amounted to \$1,267,540; in 1912 to \$929,989; and in 1913 it passed its dividend entirely. Its capital increased from \$39,083 per mile to \$103,424 per mile; its bonds and debts increased from \$37,177 per mile to \$116,326 per mile; its debts in the aggregate increased from \$136,000,000 to \$492,000,000 in seven years; and its stock feil from \$225 to less than \$70 a share. The capitalization of the New Haven road was \$93,000,000 on 2,040 miles of railroad. That was increased to \$417,000,000, with an increase of only 50 miles in its railroad mileage. In 28 months 70 persons were killed and 420 were injured.

These facts alone show that private ownership and private operation of railroads are not the greatest success in the world. The people must pay upon the enormous increases of stock and bonds; and they suffer from the lack of proper administration

and care

Independent, however, of the general proposition of Government construction and ownership of railroads I am convinced that it is not only desirable, but absolutely necessary, not only from the standpoint of the development of Alaska but also from the standpoint of the national good, that this legislation should be enacted. It is an entirely different proposition from the general question of Government ownership. Our action with reference to it will not be considered and can not be taken or urged as a precedent for Government ownership of railroads in this country, where we have settlement, business, and great development. This is evident from the fact that the action which the Government has taken in the past with reference to matters of a similar character is not and has not yet been urged as a precedent for Government ownership of railroads. This is

plain to those who know the history of Government activities, Ten years ago the Government laid a cable from the United States to Alaska and constructed a telegraph system over the Territory. It has operated them continuously since their completion, and yet at no time has the Government been charged with beginning a policy of Government ownership of telegraph lines by so doing. The Panama Railroad has been owned and operated by the United States ever since the construction of the Panama Canal began, and this has not launched the Nation upon a policy of Government ownership of railroads. The policies pursued by the United States in Panama, Cuba, Porto Rico, Hawaii, the Philippine Islands, or Alaska have never in the past, nor will ever in the future, indicate the policy of the Government as to the United States. The conditions in these places are peculiar to themselves and the policies pursued must meet their peculiar conditions. Alaska has high mountains along the southern coast, and the passes that penetrate them are so narrow and few that a railroad, when built, creates a monopoly to the territory tributary to that pass. This territory tributary is thus oftentimes extensive and possessed of great wealth. It is to prevent monopoly from thwarting and hindering the development of Alaska that has prompted the people of the United States and Alaska to urge the building of the railroad by the people themselves, just as the Government was urged in the past to lay the Alaska cable and build the telegraph system now connecting every part of the Territory.

This proposition rests upon its own merits and upon the conditions peculiar to itself and the Territory which it affects. Alaska is not developing. There are fewer white people there to-day than there were 10 years ago. Its coal is undisturbed, its mineral lands are idle, and its permanent development neglected. Of course its coal and minerals will keep for future generations. Its agricultural possibilities might be left for those who are to come hereafter, but we want to see the development of that land of tremendous possibilities begin during our lifetime. Those who have gone there are entitled to consideration. They are looking to us for relief. They hope to welcome their friends to that land in whose future they have so much confidence. They want development made possible, and so do we.

This bill is one step in that direction. It is the first step, and, in my judgment, an absolutely necessary one. Transportation rests at the basis of all permanent growth. It is the first essential to the unlocking of the vast storehouse of wealth in that land of the midnight sun. Of course, we can not stop with this legislation. Transportation alone will not suffice, but, when that is assured, the others also must be taken. We believe that when we work out the fundamentals of the proper system of transportation we must and will work out the problem of the proper opening of the coal and oil fields and the proper distribution of the agricultural and other resources, and a prosperity and civilization will be produced in that land that will mark the legislation as the most constructive enacted by Congress in many years.

Objection is urged because provision is not made in this bill for the disposition and opening up of coal lands. two questions are very closely connected the solution of the transportation problem will inevitably lead to the solution of the other. The responsibility will rest upon Congress, it will rest upon us, and to postpone this legislation because of the fear that it will not be followed by proper legislation looking toward agricultural development and the opening of the coal mines is to confess our impotency. I am not ready to do that myself. I know that with proper care, proper study, and proper investigation we can and will frame and pass legislation following this which will open up the natural resources of Alaska and make them available under restrictions which will promote the general welfare. I would be glad to solve that problem in this bill, but we have not the information necessary. That subject has not been studied as it should be studied.

The committee has not yet had an opportunity to give it the consideration and investigation it ought to have. committee has considered the railroad proposition, and deemed it wise not to complicate it with the other problems that are of such great importance; but I wish to assure the Senate that the Committee on Territories expects to take up the coal situation, study and consider it carefully, and frame legislation that will take care of it. We believe we can do it better after Congress has acted on this matter than we can by considering it in connection with this measure itself. At any rate, we have not considered it, we have not investigated it as we should, and it would be very unwise to attempt to legislate upon it in this measure.

What is Alaska, and what are its possibilities? The Senator from Oregon, in charge of this bill, and the Senator from Montana have clearly, fully, and ably set forth the character of the climate, its products, resources, and wealth in detail; and I shall not repeat what they have so well said, more than

may seem absolutely necessary.

Alaska is the property of the wealthiest nation on earth.

It has an area of about 590,000 square miles, or one-fifth of the area of the United States. Its nearest point is separated from the United States by several hundred miles, and it is reached only by steamship transportation. It is surrounded by water, except on its eastward side. But little of this vast area has passed into private ownership. It is practically all the virgin property of the United States, to do with as sees fit. As the Senator from Mississippi said the other day, no constitutional question can arise with reference to our power and authority to act upon this proposition. We can do as we please and deal with it as any other owner can deal with his own. This makes the problem of Government construction of railroads an entirely different one from the Government construction and ownership of railroads in the United States through a thickly settled and well-developed section and for the benefit almost entirely of private property, and when the purpose would be service rather than development. Whatever benefit comes to the property through which the road may pass is a benefit to the property of the United States. resources are made available are resources of the United States. Whatever wealth comes from the enhancement of property becomes the wealth of the United States. Such a road is built by the owner of property for the benefit of that property. No lines of commerce are connected with Alaska, no great arteries of trade pass through it, no prosperous people surround it. But 30,000 white people inhabit this vast expanse, and but few of them have title to any portion of this great territory; and only 60,000 souls of all races and classes can be found within its borders. Under the circumstances, the United States, as the owner, is fully justified in taking such steps as may be necessary best to open up and improve this property without regard to the general question of Government ownership.

What is the character of this great land, which seems to be shunned by human kind? Is it the cold, frozen, bleak, icy, snowy country of the popular belief? Is it the land of horrors which seems to haunt my friend from Mississippi? Not at all. The Endicott Mountain Range runs east and west to the north of the Arctic Circle. North of this range lies about one-fourth of Alaska, and this is the Alaska of popular belief. South of this range lies three-fourths of Alaska, in area greater than all of the States of the Union east of the Mississippi and north of the Ohio River and Mason and Dixon's line, and—to quote the commission—just "as capable of general development as many well-settled and rich countries." To the south is the coastal range of lofty mountains, stretching in a great arc from British Columbia out into the Alaska peninsula. Between these two mountain ranges lies what may be termed interior Alaska, the greater part of which is mineral, with the two great natural valleys of the Yukon and Kuskokwim separated by a low divide, with surprising agricultural possibilities. These two great valleys are designated as "regions characterized by broad, open bottom lands and great rolling uplands."
a description which would not sound so forbidding here in the States.

Mr. DILLINGHAM. Mr. President-

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Vermont?

Mr. JONES. Certainly.

Mr. DILLINGHAM. I should like to call the Senator's at-

tention to the great Yukon Valley, with which he is now dealing, as I understand, and ask him if he has taken into consideration the fact that that great valley is frozen to a depth of from 40 to 150 feet?

Mr. JONES. Certainly. That phase of the matter is discussed very thoroughly by the railroad commission and by the agents of the Agricultural Department. All the testimony goes to show that while it is true that in a virgin condition the land is frozen probably to a depth of 30 or 40 feet, or perhaps even more, when the land is cleared or when the moss is taken away it begins to thaw, and each season it thaws to a greater depth, and that the frozen soil below is to a certain extent a benefit to the country, in that the moisture comes up when it is needed. That phase of the matter is considered by all the agents and commissions that have reported upon the agricultural possibilities of Alaska.

I think the suggestion that is in the Senator's mind, that by reason of that fact Alaska is absolutely useless as an agricultural country, is met in that way. I did not intend to go into the matter very much in detail, because the Senator from Oregon [Mr. Chamberlain] and the Senator from Montana [Mr. Walsh] went into those particular phases of it fully.

Mr. DILLINGHAM. I do not want to interrupt the Senator's

remarks.

Mr. JONES. It is no interruption at all.
Mr. DILLINGHAM. But I notice on the part of everybody
speaking of Alaska that they speak of it as a great agricultural area. I went the whole length of the Yukon River 10 years ago, and I found, as the Senator has suggested, that the ground was covered with what they call the tundra, which is nearly 2 feet in depth and is composed of decayed vegetable matter and some grass. When that is removed—which, of course, requires a large amount of laber—as the Senator says, the ground will thaw from 3 to 5 feet in depth, and then, being thrown up in ridges, you can raise the hardy vegetables, like turnips, cabbage, lettuce, and radishes, red currants, and things of that kind, but under adverse circumstances. I made up my mind that enough of that class of vegetables could be raised to supply the mining camps that might be established there, but I was convinced that it would be utterly impossible ever to make an agricultural area of that region in the sense in which we speak of agricultural areas in other sections of the country.

Mr. JONES. Probably I would agree with the Senator in that

respect.

Mr. DILLINGHAM. The winters there are fully eight months in length, the sun not rising until 10 e'clock in the morning and darkness coming on about 3 in the afternoon. In the summer, on the contrary, during the 100 or 125 or 130 days when navigation is open the sun shines 23 hours in the day, and produces the effects to which I have already alluded.

I interrupted the Senator simply to interject the remark that when we speak of Alaska as a great agricultural area I think

we are going beyond the bounds of probability.

Mr. JONES. I think it is a great agricultural area. I think there is no question about that. Of course, however, nobody will contend that Alaska has agricultural possibilities like Illinois or Indiana or Ohio or the rest of the great agricultural sections of this country. I believe, just as the Senator has stated, that there are possibilities there of agricultural development that will at least very largely supply whatever local markets may develop in that country. If that is done, it will mean a great deal.

I desire to say that on this map the territory colored in blue

is agricultural territory, as it is referred to in Alaska.

Mr. DILLINGHAM. In that connection, if it will not interrupt the Senator, I think the territory colored in blue south of the great coast range of mountains is an entirely different proposition from that colored in blue north of the coast range of mountains.

Mr. JONES. Mr. President, there is substantially none of it south of the coast range. This is the great part of it up here [indicating on the map]. The agricultural land along the coast, south of the coast range, is not so good agricultural land and has not such a good agricultural climate as that in the interior.

Mr. DILLINGHAM. Yes; but it has 12 inches of rainfall,

while the interior has not.

Mr. JONES. That is true. It has too much rainfall.

Mr. DILLINGHAM. It has too much.

Mr. JONES. The interior rainfall, while it is not very high, comes very largely at a time when it is needed. Furthermore, the lack of rainfall is largely compensated for by the moisture coming up from below.

Mr. CLARK of Wyoming. Mr. President—
The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Wyoming?

Mr. JONES. Certainly.

Mr. CLARK of Wyoming. I wish to get the views of the Senator clear in my own mind. I take it, from the colloquy that has just occurred between the speaker and the Senator from Vermont, that so far as the agricultural part of Alaska is concerned, the view of the Senator is that the necessity for transportation there is the transportation that will so serve the development of what agricultural resources they have that it will bring those resources within striking distance of the mining centers. In other words, the Senator believes that the basic industry to be served by whatever the Government may do there will be the development of the mineral interest rather than of the agricultural interest. Am I correct about that?
Mr. JONES. That will be the greatest interest developed

from a money standpoint, but I consider that there is a necessity for the development of these two industries in Alaska. I

think I have covered that matter in another part of my remarks.

Mr. CLARK of Wyoming. What I am trying to get at is that the Senator hardly believes the development will bring about a large export trade in agricultural products from Alaska.

Mr. JONES. No; I do not think it will. I do not look for very much export. There may be some. One gentleman who has been in Alaska for two years as a Government official states in an interview that in his opinion in the very near future the country up there will support a billion reindeer, and that reindeer meat is just about as good as beef; and he suggests that in the future reindeer development up there may have a great deal to do with taking care of our meat problem. I simply state that, however, for what it is worth. It has been demonstrated that the reindeer multiply very rapidly, and his suggestion may not be as wild as it seems.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the

Senator?

Mr. JONES. Certainly. Mr. CHAMBERLAIN. While it may be true, as the Senator says in answer to the questions of the Senator from Wyoming, that agricultural products for export may not be raised in Alaska, the Senator must concede that it is estimated by the Agricultural Department and other departments of the Government that there are 100,000 square miles in Alaska that are susceptible of cultivation.

Mr. JONES. Yes; I was going to refer to that a little later. Mr. CHAMBERLAIN. And that it will furnish homes to hundreds and thousands and tens of thousands of people who

have recently been invited to Canada, into a country which is practically of the same class and character as Alaska.

Mr. JONES. Just in that connection I desire to say that in the near future, instead of 30,000 people, I think Alaska will have a million or five million or eight or ten million people. If it does have a development of that kind in population, of course, they will require a great amount of agricultural products, and I think the supply of agricultural products for a population of that kind will be very largely produced in Alaska. That indi-cates the extent of the agricultural development which I believe will take place.

Mr. CLARK of Wyoming. What I wanted to find out from those who have studied the matter, as the Senator from Washington and the Senator from Oregon have, was whether or not we have agricultural possibilities up there such as the agricultural possibilities of Canada and the United States.

Mr. CHAMBERLAIN. If I may be permitted to answer the Senator, if we are to believe at all the reports of the Agricultural Department, through its agents up there, we have in Alaska just as great possibilities and just as great opportunities

for settlement as are offered by Canada.

Mr. CLARK of Wyoming. I understand, and it is fortified by what the Senator from Vermont [Mr. DILLINGHAM] gives as his personal observation, that there is a vast difference between the ease with which that country can be developed and the farming possibilities of the United States and Canada. The Senator from Vermont states that there is a coating of some sort-he calls it the tundra-a foot or 18 inches or 2 feet in thickness that has to be removed before you get down to the ground to be cultivated at all, and that in the absence of that removal the summer sun will not thaw out the ground sufficiently so that it can be made available. If that be true, it seems to me that to compare the agricultural possibilities of Alaska with the possibilities of Canada or of the United States is a comparison that can not be properly made.

I wish to say that I do not minimize in the least the prospective value of Alaska. I think it is immensely valuable. I do not, however, agree with the Senator from Washington that in a very few years we will have a million inhabitants there, because I have lived for 25 or 30 years in a part of the country that I think is better than Alaska, and we have not yet a million inhabitants there.

Mr. JONES. The Senator's State has not the minerals that Alaska has.

Mr. CLARK of Wyoming. We have some of them.

Mr. JONES. Yes, some of them; that is true, but by no means all nor such abundance.

Mr. CLARK of Wyoming. I see that, according to the estimates here, there are about three or four hundred square miles of coal deposit in Alaska. I call the attention of the Senator to the fact that the known coal deposits in the single State in which I live are more than 30,000 square miles in extent.

Mr. JONES. The known area of all kinds of coal is far greater than three or four hundred square miles.

Mr. GALLINGER. Mr. President, will the Senator permit an interruption?

Mr. JONES. Certainly.

Mr. GALLINGER. Some years ago I made a little run into Alaska, but I did not get beyond the then capital of the Territory, Sitka. I came away with the feeling that the agricultural possibilities which were then talked of in Alaska were rather visionary, to say the least. Unfortunately, I did not visit the inland territory which the Senator is discussing, and personally I know nothing about it.

I am going to ask the Senator whether, during the 47 years of our ownership of Alaska, any farms, as we understand the term in the United States, have been taken up, and whether or not the production of those farms is such as to give encouragement

along the lines of the Senator's argument?

Mr. JONES. They have been.
Mr. GALLINGER. One other thing, Mr. President, and that is as to the matter of Canadian immigration, which is always mentioned in connection with the Alaskan discussion. truth is that in the last six years Canada has received only 23,000 more immigrants than we have received from Canada, and during the year 1913, 54,000 Americans who had gone to Canada returned to the United States. The tide of immigration seems now to be in our favor rather than against us. So I think we exaggerate the idea that our people are leaving the United States in great numbers and going to Canada because of superior advantages there.

Mr. JONES. I think the number of those who have gone into Canada is much greater than the Senator has suggested. I can not give a detailed statement, but my impression has

been different.

Mr. GALLINGER. I will give the statement, which I think is official. In the last six years 618,000 Americans emigrated to Canada, but in the same period 594,000 Canadians moved to the United States, leaving Canada the gainer over us of only 23,000, whilst, as I said, during 1913 over 54,000 Americanborn residents of Canada gave up their residence there and returned to this country. That Mr. BORAH. Mr. President-That, I think, is authentic.

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Idaho?

Mr. JONES. Certainly.

Mr. BORAH. I should like to ask the Senator from New Hampshire from what source he secured the data which he has just given the Senate?

Mr. GALLINGER. I regret that I did not note on the clipping that I have the newspaper from which I took it, but I think it is from one of the leading newspapers of Philadelphia. I am not certain as to that, but this newspaper makes the statement as covering the last six years, Canadian figures." That is the authori "according to official That is the authority for the figures that I have given. I have not verified it, I will say to the Senator. think the clipping is from the Philadelphia Inquirer, but I am not quite positive as to that.

Mr. BORAH. I have made some investigation myself with reference to the number of people who leave this country every year and go to Canada, and it has averaged during the last five years close to 100,000 a year.

Mr. GALLINGER. Yes; this clipping gives the number at

618,000 in the last six years, a little over 100,000 a year. Mr. BORAH. That is about right. Now, the Senator says people have left Canada and come to this country in large numbers. We are receiving a great many people from Canada, but they enter different lines of business from that which the people who leave here and go to Canada enter when they go to Canada. We are losing agriculturists, farmers, in very large excess of any other class of people, and those who come here from Canada enter into commercial lines of industry, and so forth.

But that is not what I rose to say. I see that the country has been agitated for the last day or two considerably over the fact that Canada has disclosed a desire to have immigrants. Our conduct toward the settler during the last 8 or 10 years arouses our interest when we find another nation upon the face of the earth that seems to want to have some settlers, and seems disposed to treat them right when it gets them. We have acted as if we did not want settlers; we have treated them as though they were a menace.

If the committee which has charge of this matter want to know why the agriculturist, the farmer, the settler leaves the United States and goes to Canada, they will not confine themselves in their investigation to what is published in some news paper, but they will go further and find the manner in which Canada administers her public-land laws and the manner in which she treats her settlers as compared with the manner in

which we have administered our public-land laws during the last 10 years and the manner in which we treat our settlers. There they will find the real reason why the home builder has left by the hundreds of thousands and gone from the United States into Canada. They moved across to Idaho and Montana and that western country in search of a home, and finding there, as I said, adverse conditions, they have gone on to Canada, and not by reason of articles published in newspapers. Let us treat our settlers with the consideration that Canada treats hers and we will have no trouble in holding our people.

Mr. GALLINGER. Mr. President, just one word. I quite agree with the Senator from Idaho as to the more liberal land laws of Canada, and I agree with the Senator that that is beyond a doubt one reason for many of the farmers in our agricultural States going to Canada. That is beyond doubt true; but I think that a great many of them are being disappointed in Canada. The fact that 54,000 Americans last year who had gone into Canada, and largely of that class have returned, would indicate that they did not find Canada is the El Dorado that had been pictured to them. It is true that the drift of immigration from Canada is to a very considerable extent into our industrial centers rather than to our farms.

But I rose, Mr. President, simply to put in the RECORD what is not altogether a newspaper clipping, but is from official figures furnished by the Canadian Government to show that we are exaggerating rather the movement of population from this country to Canada and not taking into proper consideration the fact that there is a countermovement which during 1913 apparently is in our favor. That is all I desired to put in the RECORD.

Mr. SMITH of Michigan. Mr. President—
The VICE PRESIDENT. Does the Senator from Washington

yield to the Senator from Michigan?

Mr. JONES. Certainly.

Mr. SMITH of Michigan. I should like to make an observation with reference to the remark of the Senator from New Hampshire. He says that Canada is not an El Dorado. Of course, nobody contends that it is, but it has unusual advantages for immigrants. It furnishes a constantly enlarging domestic market, which Canadians protect with very great vigor and constancy, and gives ready access to the American market, which is not protected with any constancy or vigor at all. In other words, an immigrant going from the United States to Canada annexes forthwith all the rights that the Canadian has in his own market and gives up none of the rights of an American citizen in our market.

Canada may not be an El Dorado, but it enjoys the most unique distinction of any country on the globe. It borders the most prosperous Nation on the earth, having the best markets to be found anywhere in all the world. They may assert their undivided allegiance to the British Crown and enjoy unrestricted commercial opportunities on our American soil. This course is a latter-day favor that has been bestowed upon the Canadian citizen, and, strictly speaking, it is not so generously bestowed upon other countries because many of them are not within walking distance of our principal American cities. I was struck by the use of the words "El Dorado" b

distinguished friend from New Hampshire. Canada has the soft and alluring El Dorados beaten to a standstill. There is not a perfumed El Dorado under any favored sun of the world that comprehends the blissful and unrestricted privileges of

Canadian citizenship.

Mr. GALLINGER. Because of our legislation, of course.

Mr. SMITH of Michigan. No, Mr. President; not so much because of our legislation, but because of Canadian legislation, which is vastly more sensible and helpful to her citizens than our legislation is to our own.

I beg pardon of the Senate for obtruding my observations, but the words "El Dorado" rather shocked my sensibilities. have said what I have not as bearing particularly upon the exploitation of Alaska, but as bearing particularly upon the present exploitation of the United States by the people of Canada.

Mr. GALLINGER. Mr. President, if the Senator from Washington will permit me, I think this very likely can be explained so as not to make it appear quite as much to our discredit, if I may use that term, as the simple reading of the little clipping would indicate. With the Senator's permission, I will ask that the Secretary read a clipping that I took a day or two ago from Washington newspaper concerning the tillable land of the I think it has a little bearing upon the necessity United States. of our appropriating money to add to our agricultural area.

The VICE PRESIDENT. The Secretary will read as re-

The Secretary read as follows:

SMALL PART OF LAND IN UNITED STATES UNDER CULTIVATION.

Only 27 per cent of the tillable land of the United States is under cultivation, according to estimates of the Department of Agriculture.

The United States, exclusive of foreign possessions, contains about 1,000,000,000 acres. Of this area about 60 per cent is estimated to be tillable. Nincteen per cent, or 361,000,000, is estimated to be non-tillable, but valuable for pasture or fruit. The remaining 21 per cent is of no use in agriculture.

Mr. JONES. I should like to ask the Senator from New Hampshire, while I do not consider it especially bearing on this bill, yet in view of the fact which he brought out that so many of our people have gone into Canada and so many of their people have come to this country, the difference showing a balance against us, if he has any information as to the number of Canadians who have come to this country and have gone back to Canada

Mr. GALLINGER. I will say I have not, but beyond question a great many go back temporarily, at least, from the industrial

centers. There is no doubt of that.

Mr. SMITH of Michigan. Up until a year ago there was a very decided movement of Canadians in this direction, but during the last year I think that many of them have gone back and revoked their preliminary declaration of intention, because

of the advantages which they get on their side of the border.

Mr. JONES. Mr. President, I desire to say to the Senator from New Hampshire that I do not attach so much importance to this legislation from the standpoint of keeping our people from going to Canada. I doubt if it will prevent a great many from going there, because they go there by reason of the induce-ments offered by Canada and the conditions there, and they go because of the hardships of the administration of our laws in this country and for other reasons which would not be met by this bill.

In regard to the agricultural developments to which the Senator refers, I did not intend to go into details, yet my recollection is that the testimony shows that two or three thousand acres of land in that territory—the Tanana and Yukon—have been actually put under cultivation, not in one farm but in different farms; that they have been very successful and very productive, and those who are taking care of them, by reason of the situation, proximity to mining camps, and so forth, have found it to be a profitable business. I do not look upon this matter as indicating that people would go to Alaska for the agricultural possibilities there independent of anything else. If Alaska develops, however, in its mineral way, as we expect it will develop, people will go there to develop agricultural products to supply the local demand. That is what will happen.

Mr. GALLINGER. The Senator is very kind in yielding. I simply want to supplement what I said with the suggestion that it occurred to me that if 10 or even 5 enterprising men had gone into Alaska Territory and taken up farms, by purchase or otherwise, and had succeeded in making them reasonably profitable in the raising of agricultural products, it largely sustains the Senator's argument, because if 5 men can do it 5,000 men can do it. That is the reason why I made the inquiry. It seemed to me that in the 40 years of our ownership of Alaska there must have been some experiments made in that direction.

Mr. JONES. That is true. Homesteaders and others have

demonstrated this very thing beyond question.
Mr. CHAMBERLAIN. Will the Senator yie Will the Senator yield to me for a

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Washington yield to the Senator from Oregon?

Mr. JONES. Certainly.
Mr. CHAMBERLAIN. The Senator from Vermont [Mr. Dil.-LINGHAM] spoke of having formed a very unfavorable impression as to the agricultural possibilities of Alaska from a hasty trip which he made through the country, and the Senator from New Hampshire [Mr. Gallinger] also says that when he visited the capital of Alaska he got the same impression with reference to the agricultural possibilities as did the Senator from Vermont. I want to say in this connection that a man passing hastily through a country can not possibly form any accurate opinion as to the possibilities of the country in respect of its

Especially a country of 590,000 square miles.

Mr. CHAMBERLAIN. I want to illustrate that by a circumstance that happened not very many years ago. The Senator from Wyoming [Mr. CLARK] will remember about it. I never investigated it to ascertain the accuracy of the statement, but it is currently reported out there that in the eighties

Mr. Villard, interested in the Union Pacific and other transcontinental lines, had undertaken to consolidate them under the name of the O. & T .- the Oregon & Transcontinental lineand he took German bondholders out there who were interested in the line for the purpose of securing their further invest-ments. They came through Oregon—they came through the Senator's State, I doubt not—and, judging from a hasty trip in the sagebrush country, apparently worthless, unloaded their securities and depreciated the stock so that the road practically went into the hands of a receiver. As a matter of fact, since that time, not only the State of the Senator from Wyoming but all the western States through which railroad lines have run, have been developed rapidly, and the lines have become a paying proposition. I want to say in this connection I very much doubt if Wyoming itself would have developed with the same rapidity if Government-aided roads had not been built. My own State would not have been developed so rapidly had it not been for the assistance rendered by the Government.

Mr. JONES. In line with what the Senator just said, if you go along that road in my State in certain sections and look out of the car windows, you see nothing but a desert and sagebrush, but just over and on the hills there is as fine wheat land as

there is in the country.

Mr. CLARK of Wyoming. What the Senator from Oregon and the Senator from Washington say as to what a man might think from superficial examination about the possibilities for future development is true, but I was trying to get a correct idea as to the agricultural land in Alaska. We are told that there are hundreds of thousands of acres, if not hundreds of thousands of square miles, of rich agricultural lands in Alaska.

Mr. JONES. It is not exactly described as rich agricultural

land.

Mr. CLARK of Wyoming. It is not perhaps so stated in terms, but that impression gets out. I wanted to develop, if I could, from the knowledge the Senator has, from his study, and that of the Senator from Oregon [Mr. CHAMBERLAIN]. whether that is land such as we describe as rich agricultural land in Canada or the United States.

I am free to confess in regard to the resources of Alaska that I have not the same idea of the brilliant future that some others While I concede the tremendous possibilities of that Territory, I am not carried away by the enthusiastic description of some of its mineral resources. I think they are great; I think there is a wonderful future before the Territory; but I think we might get onto a sane basis in considering the possi-bilities rather than a fanciful basis.

Mr. JONES. I have never visited Alaska except as the Senator from New Hampshire [Mr. Gallinger] has done. I got to the capital, Sitka. Of course, along that line I saw nothing that indicated any great agricultural possibilities, as far as that is concerned; but unless we disregard the statement of every Government expert, every agricultural agent, and every commission that we have sent to Alaska, and the testimony of those who live there, we must believe that there is a territory of about 100,000 square miles that is capable of reasonable agricultural development, such as I suggested to the Senator from New Hampshire a moment ago; not like the plains of Illinois, possibly not like the plains of Wyoming, but a country which, with the mining population there, will lead to people going in and cultivating a small tract at a time, gradually increasing the quantity in order to supply the domestic or local demands. There will not be the broad wheat fields we find in Minnesota and other States, nor the great cornfields, nor anything of that kind. I do not pretend anything of that sort; but I do claim that the reports here show, and the results of work by people actually in Alaska and on the ground show, that Alaska has agricultural resources that are capable of supplying possibly all the probable local demands, even if the population increases as I expect it to increase.

Mr. CLARK of Wyoming. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Wyoming?

Mr. JONES. Certainly.

Mr. CLARK of Wyoming. I want to make my position perfectly plain to the Senator from Washington.

Mr. JONES. I think I understand the Senator's position. Mr. CLARK of Wyoming. It is my notion that we ought not to act by a skip and jump into legislation of this sort, but waiving a matter which I personally can not waive and which the Senator from Mississippi [Mr. Williams] is willing to waive, there is a practical side to this proposition which we ought to look at. Here is a proposition to spend \$100,000,000— Mr. JONES. Well, not exactly that. I will say to the Seua-

tor that the committee this morning agreed to an amendment

which will be reported by the committee providing that the President can not contract for nor spend more than \$40,000,000.

Mr. CLARK of Wyoming. I am glad to hear that; but there is no question that if we begin in this development we will carry it through. That has been the universal history of legis-

lation of that kind in this country.

I do not take so very much stock in what experts tell us about the development of a country. I would rather take the word of a practical man, like the Senator from Washington [Mr. Jones], if he had examined the possibilities there, than all the expert testimony that could be produced. We have expert testimony of the enormous value of the Bering coal fields; we have expert testimony supported by chemical analysis; and it is true that the chemical analysis shows that it is better than the Pocahontas coal for steam purposes and for naval purposes; and yet in a practical test the Bering coal absolutely fails and shows itself to be worthless as fuel for naval pur-

If the Senator from Washington will bear with me, as perhaps some excuse for my heresy in these matters, I want to call attention to an article in the last issue of the Army and Navy Register. The Committee on Naval Affairs in the House of Representatives, I think, have had this matter of Alaska coal under consideration. We must bear in mind that one of the prime motive powers behind this bill, or one of the reasons urged for its passage, is that it is a great military necessity, in that we must have coal for our Pacific Fleet; and it was stated here on the floor only the other day that we shall have an inexhaustible supply of coal in Alaska for our fleet, but here is what occurred—and I want to put this into the RECORD just now, for I think it is authentic and will not be disputed. The Army and Navy Register says, in regard to a hearing before the Naval Committee of the other House:

In the hearing of Rear Admiral R. S. Griffin, engineer in chief, it was stated that preliminary tests of Alaskan coal from the Bering River district have been discouraging to officials, who hoped they might develop a new fuel supply for the Navy. The Bering River coal tested has fallen so far under expectations in practical use as to be of no value; but from the Matanuska fields and other sections of the Bering district, from which coal is yet to be tested, the Navy is hoping for better results.

Here is the point to which I desire to call particular atten-

Chemical tests of the Bering River coal indicated that it contained a higher efficiency of thermal units than the Pocahontas coal of West Virginia—

Which is the best, as I understand, that we have-

but when put to actual tests in the Navy, notably aboard the cruiser Maryland, it developed only 43 per cent of the same efficiency and caused a great deal of trouble. It made great clinkers, which clogged the furnaces and covered the grate bars with a molten substance like tar, which shut off the draft and hampered steaming. Congress has appropriated \$75,000 for experiments with coal from the Matanuska district, and those will be carried on.

Of course it is hoped that further experiments will develop somewhere in Alaska a character of coal that can be used for naval purposes; but I simply read this to show that we can not depend for practical purposes upon scientific examinations, for all the properties of the coal are there which indicate that it is the equal of or better than the Pocahontas coal, but when we come to test it, we find that in practical application it does not measure up to the standard. So, I say, I would rather have the practical knowledge that might be gathered by a man like the Senator from Washington than information from all of these other sources.

The thing that troubles me personally, however, about the matter is whether we are not going too fast, whether we ought not to make experiments before adopting, as a whole, the policy of railroad building in Alaska at an expenditure of at least \$40,000,000.

Mr. JONES. Mr. President, we have been experimenting in Alaska for a great many years. We certainly have not been going very fast, but we have been experimenting. We have done more; and, as I remarked a moment ago, there are men in Alaska who have actually farmed and cultivated land therethey have been there for years; they have taken up homesteads, and they have actually demonstrated what can be done. They have made a success of it. It is not the same result that comes from the trial of this coal in these fields, taken under conditions that make it very questionable whether it was anything like a fair test or not; but men have actually demonstrated in that territory, where they have resided, that agricultural products can be raised and can be raised successfully.

Mr. CLARK of Wyoming. Can the Senator make a statement from personal examination?

Mr. JONES. No; I have not been in Alaska, and I regret that I have not been there, so that I could give the Senator the benefit of my personal examination.

Mr. CLARK of Wyoming. Can the Senator tell us how extensive have been those operations?

Mr. JONES. As I said a moment ago, my recollection is that there is something like two or three thousand acres in the Tanana and Yukon Valleys which have been actually cultivated, probably a portion of several different homesteads. Of course that does not sound very big, but yet that demonstrates very

largely what can be done in a good portion of that Territory.

Mr. CLARK of Wyoming. It would make a little difference whether they were what might be called experimental farms or whether they were farms in the ordinary sense of farms as we use the term in this section of the country.

Mr. JONES. These are the farms of homesteaders and not any kind of experimental stations at all.

Mr. WALSH and Mr. CLARK of Wyoming addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from Washington yield?

Mr. JONES. I yield to the Senator from Montana, because I think he is going to give an answer to these questions just asked.

Mr. WALSH. Mr. President, the point suggested by the Senator from Wyoming [Mr. CLARK] is very pertinent here. course, the results of experiments conducted by experimental stations are not by any means of so persuasive a character as the results obtained by men who actually go out and farm. It is exceedingly pertinent, as I suggested, to inquire whether these opportunities have thus far been availed of by actual settlers. Let me read what Dr. Brooks tells us about the matter. He is speaking now about experimental stations and their work, and then he continues to show the facts to be as the Senator from Washington [Mr. Jones] now tells us. He says:

What perhaps will carry still greater weight with the average person is the fact that there have been a whole lot of very successful ranches in the vicinity of Fairbanks, where there is a local market. I think this committee has seen photographs of some of the agricultural operations in the vicinity of Fairbanks, and perhaps I need not dwell on that. I do not think there is any question that the Tanana Valley has an agricultural future. I do not mean to imply that we are going to export wheat from Tanana or going to have any crop export for at least a long time to come; but I do believe that the country is capable of supporting the population and that, with the mining development, the farmer will come to furnish the food supply for the mine operators.

I want to add to that the testimony of Mr. Joslin, of Fairbanks.

Mr. DILLINGHAM. From whose testimony has the Senator from Montana been reading-from that of Judge Wickersham? Mr. WALSH. No; I have been reading from the testimony

of Dr. Alfred H. Brooks, chairman of the commission, who has himself spent years in Alaska investigating its mineral resources as the representative of the Geological Survey. I shall now read from the testimony of Mr. Joslin, who resides at Fairbanks. He says:

banks. He says:

The clearing of farm lands about Fairbanks is going on rapidly. I believe that last year the area of land under cultivation at Fairbanks nearly doubled all that had been cleared and cultivated up to that time. And there is an enthusiasm about it. The yield of those crops is a matter of amazement and surprise to the men themselves who are producing them, because there, as everywhere, it was the supposition that the land was worthless for farm purposes. But either from the fact that the soil is new and has the elements in it that produce growth in great abundance or from the fact that there is during the growing period 24 hours of daylight, one or both must be the cause for the amazing production of that land.

Senator Hyrchcock. Has the production been sufficient to make any appreciable difference in the shipping in of supplies?

Mr. Joslin. Yes; it has stopped the shipping of fresh cabbage. They raise all they use. In the matter of turnips they raise all they use. I will say, Mr. President, that the evidence is here that they

I will say, Mr. President, that the evidence is here that they raised a hundred thousand bushels of potatoes there last year.

In two years more there will probably be no more shipped in. In the matter of hay they have reduced the quantity shipped in some, but not a great deal. Lettuce and tomatoes are all produced locally. Tomatoes are grown largely in hothouses, although they have been givened outdoors. ripened outdoors.

Senator HITCHCOCK. You are speaking of the neighborhood of Fair-

Mr. Joslin. I am speaking of the neighborhood of Fairbanks. It undoubtedly a grain-producing country and will produce grain as good as any.

Mr. President, this is the testimony of Mr. Joslin, who, as I have said, lives at Fairbanks, and we may assume, as a matter of course, that he is inspired more or less by local pride in the testimony which he gives, and particularly in reference to the hopes that he expresses concerning the future, but Dr. Brooks has no interest at all to blas his mind; he is a Government official, going there upon official business to state the conditions.

Mr. GALLINGER. If the Senator from Washington [Mr. Jones] will permit me, I want to thank the Senator from Montana [Mr. Walsh] for putting that into the Record. I had not read the hearings, and hence was ignorant as to the facts which the Senator has brought out. It seems to me that

they very strongly substantiate the position the Senator from Washington has taken, and practically force us to the conclusion that there are great agricultural possibilities there, which I did not know before as a matter of fact.

Mr. JONES. I will say to the Senator—
Mr. WILLIAMS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wash-

ington yield to the Senator from Mississippi?

Mr. JONES. In just a moment. I will say to the Senator from New Hampshire that there are other statements in the record, placed there by different speakers in the form of letters from farmers in that country, showing substantially the same facts as described in the testimony read by the Senator from

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Washington what is the longest growing period in any part of Alaska owned by the United States?

Mr. JONES. Well, in the interior my understanding is that the growing period is three or three and a half months, but

Mr. WILLIAMS. The longest growing period in any part of Alaska that is owned by us is four months, is it not?

Mr. JONES. I should judge so.

Mr. WILLIAMS. And in the interior portion it runs from two to three and a half month's, does it not?

Mr. JONES. Possibly three and a half months.

Mr. WILLIAMS. So that they can not raise anything that can not be planted and mature within those respective periods?

Mr. JONES. Yes; but the Senator must understand that the sunshine and heat contained in those two and a half to three and a half months is much greater than in a similar time here, because the period of sunshine is much longer.

Mr. WILLIAMS. I understand that when the sun shines 21 hours a day, we will say, it does hasten growing very much more than when it shines only 12 or 14 hours.

Mr. JONES. There is not the checking when the sun is not

shining that results here, either.

Mr. WILLIAMS. In every part of Alaska where there is any agricultural product at all there is some checking from frost, for it becomes very cold when the sun goes down.

Mr. JONES. It is not very cold at night during those two

or three months.

Mr. WILLIAMS. When we get to the country of eternal summer sunshine we are up in the Arctic regions.

Mr. JONES. I do not know whether or not the Senator was here when I first began, but I said that in the Arctic regions of Alaska there were no agricultural possibilities.

Mr. WILLIAMS. That is the reason I mentioned that. It

is not a debatable question at all.

Mr. JONES. And I am going to give to the Senator in just a few moments, if he should not have to retire, certain facts in regard to the temperature and climate of Alaska which I

would like him to hear.

I want to say, before the Senator from Vermont has to leave, with reference to the suggestion he made a moment ago as to the soil being frozen and all that sort of thing, that I am told—I have not been there; I have not visited that country myself, but I am told by very reliable persons who I have no doubt were stating the fact—that in this part of the valley of the Susitna shown here by this blue portion [indicating on the map] there is an enormous amount of agricultural land which is not frozen at all; that is, that it thaws out to the bottom in the summer time, and there is not that 30 or 40 feet of frozen soil which the Senator referred to in his suggestion this morning. This thaws out rich alluvial soil in that country, This thaws out entirely, and there is a very

Mr. DILLINGHAM. Where does that land lie with refer-

ence to Mount McKinley?

Mount McKinley is here [indicating on the map], Mr. JONES. Mr. DILLINGHAM. It lies south, then, of Mount McKinley? Mr. JONES. It lies south of Mount McKinley, and much of it to the north of this range which goes around here [indi-

Mr. CHAMBERLAIN. The coast range?

Mr. JONES. There are several thousand square miles of agricultural territory in there, and it is through there the indications are that one of the lines may run.

Mr. DILLINGHAM. But it is true, I suppose, that in the

Tanana Valley frost is found in the ground.

Mr. JONES. I think that is true.

Mr. DILLINGHAM. Yes; I have been so informed by Maj.
Richardson in conversation.

Mr. JONES. I think my contention with reference to the

were brought out clearly by those who have preceded me, and I did not intend to bring them out, yet I am very glad that the interruptions have occurred so that the matter might be made clear to those who may not have heard the other speakers.

With reference to the experiment to which the Senator from Wyoming [Mr. Clark] referred in regard to the Bering River coal, I will say to the Senator that the result of that experiment was very disappointing to me, and yet it was not entirely unexpected, because I have here a letter from a former Member of the House of Representatives that was sent to me away back in September, in which he states that information has come to him that the coal that was obtained from the Bering fields for the purpose of this experiment was not fit; that it contained a great deal of impurities; that it was gathered up in a very careless, reckless sort of way; and that, from the information which he had, he was satisfied that such experiment would not demonstrate the character of the coal there.

That is a suggestion made many months ago. I have heard some other suggestions in reference to the manner in which that coal was gotten together, which, if true, would make the experiment or demonstration valueless. I will say that I have not been able as yet to read the testimony of Admiral Griffin. I did talk with him over the telephone the other morning and he said that the Navy had nothing to do with the gathering of this coal; that when it was delivered to them it was very impure and constituted a very poor sample with which to experiment. So that enough has come to me to raise a question in my mind as to whether there has yet been a fair demonstration as to the steaming possibilities of that coal; and I feel pretty confident that when a fair test is made, when the coal is gotten out through such means as it should be, the chemical analysis will be verified and sustained.

Mr. CLARK of Wyoming. Mr. President, the Senator hopes that that may prove to be the case no more than I do.

Mr. JONES. I know that, Mr. CLARK of Wyoming. But they are still, according to Admiral Griffin, conducting those experiments. wanted to inject into the Senator's speech was whether or not it would not be a good plan to proceed a little slowly until those experiments have an opportunity to run their full length. can not see why this experiment should not have been a fair one. It was conducted, whether by the Navy or not, by those under Government employ who were interested in making, if , possible, a satisfactory test.

Mr. JONES. The experiment was carried on by the Navy,

but the coal was gathered by the Bureau of Mines.

Mr. CLARK of Wyoming. Yes, by the Bureau of Mines; which, of course, would be interested in getting. I suppose, an average sample of the coal there. I presume we will have all of that testimony printed to-day or to-morrow, or, at least, be-fore the passage of this bill. I tried to get it on Saturday last, but it was not then printed, and I was told it would be printed in the first part of this week.

Mr. JONES. I simply made the suggestion, because it shows that there were intimations given out quite a while ago that in the gathering of this coal proper steps were not taken, and there have been some definite charges with reference to—

Mr. CLARK of Wyoming. Of course I would not intimate that that might be said to be a sort of a hedge thrown out.

Mr. JONES. No; not at all. They are statements which have been made by some of the employees who were on that expedition. I know what credence is to be given to them. of that kind, and there may be absolutely nothing to them

Mr. CLARK of Wyoming. Of course the Senator is aware of the fact that the chemical analysis of coal is not conclusive evidence of what the coal may do in practical operation.

Mr. JONES. Certainly; that may be so. Mr. CLARK of Wyoming. That is the point I wanted to get at.

Mr. JONES. Furthermore, I know that the Bering River mines are not really developed as mines. Whatever coal was gotten out was taken from very near the surface, if not on the surface; and my understanding is that the coal is better when you go farther in than that which you gather from the surface.

Mr. KENYON. Mr. President-

The PRESIDING OFFICER. Does the Senator from Wash-

ington yield to the Senator from Iowa?

In just a moment. Furthermore, I want to say-and I think I cover this point a little further on-that it is not solely the coal that we are after by building this railroad, and that, so far as I am concerned, if there were no coal there I would still be in favor of building the railroad because of the agricultural situation is understood, and I am very glad this interruption has come. While I thought that many of these details other resources that are there, and the necessity for their development. Coal is an important resource, but there are many others as important, if not more so.

Mr. KENYON. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington now yield to the Senator from Iowa?

Mr. JONES. I do.

Mr. KENYON. Apropos of the suggestion of the Senator from Wyoming [Mr. CLARK]. I am a little curious to know the relative proportion of the Bering coal fields to the coal supply of There are other coal fields there, are there not? Alaska.

Oh. yes.

Mr. KENYON. Furnishing coal that can, without question, be used by the Navy?

Mr. CLARK of Wyoming. Not without question. Mr. JONES. I would not say without question. Mr. KENYON. I had assumed that there were.

Here [indicating on the map] are the Mata-Mr. JONES. nuska coal fields, which are larger than the Bering coal fields. Here they are. These, as I understand, are the only two coal fields where it is known that there is any anthracite coal. There are tremendous areas of other coal. The black squares here indicate where coal is found in Alaska. You will see that it is almost all over the map and extends away up into the Arctic region; but the two fields here are the only fields where anthracite coal, or steaming coal for the Navy, is supposed to be found.

Mr. KENYON. Have the experiments spoken of by the Sena-

tor from Wyoming been made as to the other coal?

Mr. CLARK of Wyoming. No; but we have appropriated for making them.

Mr. KENYON. It is a matter of hope?

Mr. JONES. I will say to the Senator that an expedition is now getting coal out of the Matanuska field for experimental testing in the Navy. It has not yet come out. We sion for that in a bill passed just a year or two ago. It has not yet come out. We made provi-

Mr. KENYON. I had always supposed there was no question that the coal deposits of Alaska embraced the character of coal that could be used by the Navy, and that was a very strong argument in my mind in favor of the bill, though I did feel, as the Senator from Washington does, that if there were no coal there at all I should favor the bill for the purpose of developing the other resources.

Mr. JONES. As I say, these two fields—the Matanuska field, which we know definitely now has, I think, about 75 square miles, and the Bering field, which has about 50 square miles it is hoped and confidently believed contain anthracite coal that will be good for steaming purposes; but those are the only fields where anthracite coal is found. The other fields contain lignites.

Mr. KENYON. Some of the arguments I have rend here favoring the bill have made a very strong point of the fact that it would provide coal for our Navy in times of emergency, am sorry if that argument is shattered.

Mr. JONES. It is not absolutely shattered; but I will say it did get a pretty hard blow from the experiments which were made the other day-I shall have to admit that-although, as I say, I do not believe it was a fair test or is to be taken as in any way conclusive. The general reports are, too, that the Matanuska coal is better than the Bering coal. The Bering coal is very much crushed, and from the development that has taken place there it is very difficult to get samples for a supply of coal from which you can get a fair test. From what I have heard, from the suggestions that have been made, and from what Admiral Griffin told me, I am satisfied that the coal that was furnished was not that which would bring about a fair test of the coal at all. Of course, however, it was brought out and was tested, and the admiral has stated the result of the test, and it is not what we had a right to expect from previous testimony and experiments.

Mr. President-Mr. CHAMBERLAIN.

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Oregon?
Mr. JONES. Certainly.

Mr. CHAMBERLAIN. I think that test showed that it only took a little more of the Bering River coal than it did of the Pocahontas coal; but the complaint the Navy Department makes against it is that it formed clinkers, and it took more men to handle it in the fireroom than it did in the case of the other

Mr. CLARK of Wyoming. No; the difficulty in regard to the formation of clinkers was, not that it took more men to fire the coal but that it prevented combustion in the proper way to produce steam for the purpose desired.

Mr. JONES. I have not yet seen the testimony and do not

know exactly what it shows.

CLARK of Wyoming. I just read it in the Army and Navy Gazette. I did not have the official report, of course.

Mr. JONES. Mr. President, I was referring to the great interior country between the two mountain ranges, and especially in the valleys of the Yukon and the Kuskokwim. proceed.

This is the portion of Alaska which, it is expected, will be traversed by the railroad system likely to be constructed under this legislation. My friend the Senator from Mississippi [Mr. WILLIAMS] has been called out. I am not surprised at it, because we have been delayed here quite a while, and I know he is on very important committees that require his attention away from the Chamber. I know that he would not have gone except because he had to. I want to refer now, however, to the climatic conditions of the Territory, and I should have been glad if he had been present.

What are the climatic conditions of this Territory? In the coastal region, from Katalla to Seward, the lowest temperature recorded is 14° Fahrenheit below zero. That has been beaten right here in the city of Washington within the last 15 years. The highest is 82° Fahrenheit, and that has been exceeded many times here also. The snowfall in the mountains is no greater than in the Rockies and the Cascades. In the Cook Inlet country the highest recorded summer temperature is 87 Fahrenheit and the lowest 40° below zero—only 6° colder than that recorded at St. Albans, Vt., on the morning of January 13, 1914, and 3° less than that recorded at Harrisville, N. Y., on the morning of the 14th. I have often seen accounts in the papers giving as low temperatures as this in many sections of the country represented by some of the most conservative and wisest Senators on this floor. The lower Susitna and Matanuska Valleys have a milder climate than the Cook Inlet sec tion and less precipitation, the temperature ranging from 12° below zero in the wintertime to 84° above in the summer.

Twelve degrees below zero does not sound very forbidding or very dangerous to many of the Representatives from certain sections of this country. Along the Copper River it is about the same—mild and humid in the coastal regions, but colder in the interior. At Kennicott, at an elevation of 2,000 feet, the snowfall is about 4 feet, and the extremes of temperature recorded are from 31° below zero to 76° above. This is not a very extreme range. In the upper Yukon Basin the snowfall is from 3 to 5 feet, with a minimum temperature of 70° below zero to the maximum of 90° above recorded. These temperatures, with the clear, dry conditions existing, are not at all disagreeable, but are most healthy. I have known many persons who have gone into Alaska, both before they went in and after they came out, and almost universally they have appeared much healthier on coming out than they were when they went in. This confirms the report of the Alaska Railroad Commission, from which I shall read at this point. I wish my friend from Mississippi could hear this and would accept it as guilelessly as he accepts glacial magazine articles:

as he accepts glacial magazine articles:

The experience of those long resident in Alaska has shown the climate to be very healthful. No extremes of cold or heat occur along the Pacific seaboard. The excessive rains characteristic of many parts of this district are, to be sure, disagreeable, but experience demonstrates the fact that they have no adverse effect on health. It must be remembered, too, that the excessive precipitation is by no means universal in this maritime belt. It has been shown that at Skagway, for example, the total precipitation is less than 30 inches and at Seward about 54 inches. Probably the most trying feature of the coastal climate is the strong winds which blow in the winter from the valleys traversing the coastal barrier.

The Cook Inlet and Susitna regions have a climate similar to that of the interior, and warmer summers than those on the coast, with less precipitation. The same holds true of the Copper River Basin. Of the Yukon it may be said that the summers are cool and that bright, clear weather prevails most of the time. The aridity of the climate makes the extreme temperatures of winter easy to resist. All who have lived in this inland region are agreed that the winter climate is far more healthful than in many parts of the States where the temperature is higher but where there is an excess of humidity. Residents of the interior have no fear of the extreme cold that often prevails during the winter months. The winter journey between Fairbanks and Valdez is made by men, women, and children and offers no serious hardships except when storms are encountered.

Alaska possesses in abundance every natural resource necessary to support a large population. The foundation of all permanent prosperity is agriculture; and while Alaska may not become a competitor of the States, its agricultural resources and possibilities are sufficient to sustain a population of several million of people. This is the conclusion of every impartial Government expert, agent, and officer who has gone there, and is the opinion of almost everyone who knows anything about The Agricultural Department, after a very careful Alaska. study, estimates that over 100,000 square miles, or more than 64,000,000 acres, are capable of tillage or grazing. Much of this lies in the territory expected to be traversed by the railroads to be constructed under this bill; and the opinion of the experts and others as to the possibilities is fully confirmed by the actual experience of countries of Europe similarly situated, with substantially the same climate and the same agricultural char-

Norway, extending from latitude 58° 30' to 70° 30' north, has a population of over 2,000,000, with 402,000 acres cultivated to cereals out of a total area of 76,226,000 acres. Sweden, extending from latitude 56° 30′ to 68° north, has a population of 4,919,260, with 4,113,900 acres cultivated to cereals out of a total area of 101,563,000 acres. In all the countries and Provinces of Europe similar to Alaska in latitude, climate, and agricultural possibilities, there is a population of over 11,000,000 people, and large amounts of wheat, rye, barley, oats, potatoes, hay, and other vegetables are produced, while millions of horses, sheep, hogs, goats, reindeer, and other valuable animals are raised.

Mr. DILLINGHAM. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Vermont?
Mr. JONES. Certainly.
Mr. DILLINGHAM. I simply wish to ask the Senator whether, in any of the countries he has named, there is found the great subterranean depth of frost that is found in the Yukon Valley porth of the mountains?

Valley north of the mountains?

Mr. JONES. I can not say as to that, but I think from the climatic conditions there they would have that condition. I do

not know, however.

Mr. DILLINGHAM. I understand that is not the case, and I

do not think it is.

Mr. JONES. But all the experts of the Agricultural Department, as I suggested a moment ago, who have investigated the matter, find as a matter of fact that that is really a benefit instead of a detriment under the conditions there. That is to say, if we did not have that condition, with the small rainfall there is there, it probably would be a sort of arid country, and nothing at all could be produced.

Mr. NORRIS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. Certainly. Mr. NORRIS. The last remark of the Senator impels me to ask him whether or not, if there were farming and tilling of the soil that is frozen beneath, in time the frost would all come out?

Mr. JONES. Probably in some sections it would not; but to a great extent it would come out, I think, to such a depth that it would not be noticed thereafter.

Mr. NORRIS. When that occurred, would there be danger of their not being able to raise crops, on account of the slight rainfall?

Mr. JONES. I think not, because the reports show that what rain they do get comes very largely in the period when they most need it.

Mr. NORRIS. I understood both the Senator from Washington and others to say that this was really a benefit-and I have no reason to doubt it—and that they get some moisture from it; but the idea occurred to me that if, eventually, by farming a good many years they should exhaust the moisture that is coming up from below, they would then have to resort to irrigation, or something of that kind, because there would not be sufficient rainfall.

Mr. JONES. Possibly there might be something of that kind, although, as I said, I doubt if they would exhaust it. I do not know how far it would thaw out, but probably not more than 10, 20, or 30 feet, and then from that they would get the benefit, although that is merely conjecture. I do not know what the fact would be.

Mr. NORRIS. Of course, if it is necessary for the purpose of raising a crop that they should get the benefit of the frozen ground beneath, it seems to me it will be only a question of time until that source of supply will be exhausted, unless it is replenished through being connected with some underground

Mr. JONES. That would be true if it were necessary; but, as I understand it, it is not necessary. The rainfall they do get comes in the season of the year when they need it. As the Senator knows, 11 or 12 inches of rainfall coming at the proper season of the year would be really sufficient for such

crops as they would raise there.

Mr. DILLINGHAM. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wash-

ington further yield to the Senator from Vermont?

Mr. JONES. Certainly.

Mr. DILLINGHAM. I simply want to remark that I do not understand by what system of reasoning it can be claimed that the frost is to be removed from the ground to a depth greater than has already been mentioned simply from its being cultiwhat they have been in the past, eight months of intensely cold weather, during which time all of the land that has been opened to cultivation in the previous season will be again frozen solidly.

Our scientific people have a scientific explana-Mr. JONES. tion as to why, after it is cultivated each year, the thawing out

is greater than otherwise.

Mr. DILLINGHAM. I read all of the scientific treatises before I went to Alaska, and I did not find materializing the

conditions which I found in the reports.

Mr. JONES. Furthermore, it seems to be actually demonstrated by those who have been in there cultivating the soil that it does thaw down farther each year. How far it will finally thaw out, of course, I do not know. I can not say, and they do not know. They have never thawed it all out yet. That, I think, is certain; but it has gone down deep enough to show that it leaves a sufficient space above for cultivation, and that, by reason of the capillary attraction bringing up the moisture from below, it is really a benefit in connection with the rainfall.

Mr. DILLINGHAM. I found, however, that in a majority of instances where they were taking gold from the ground it was done by having a steam boiler there and a pipe leading from it to a hollow pipe that was driven into the ground, and the ground was all thawed by the use of steam for the purpose of taking out the gold.

Mr. JONES. Oh, yes; in taking out gold they dig down the earth as they go and take out the dirt. It is not left to exercise capillary attraction or to thaw out by reason of the loosening of the soil above.

Mr. WORKS. Mr. President——
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from California?

Mr. JONES. Certainly.
Mr. WORKS. I should like to ask the Senator from Washington whether, if the idea suggested by the Senator from Nebraska [Mr. Norris] should prove to be correct, there is any reason why the land should not be irrigated?

Mr. JONES. None, so far as I know. I suppose the rivers there have sufficient fall so that water could be taken out for irrigation purposes during the senson when it is needed.

Mr. WORKS. Out in California we think irrigated land is quite valuable.

Mr. JONES. Yes; and we think farming by irrigation is about the ideal farming.

Summing up the situation with reference to agriculture, and so on, I desire to read from the report of the commission. They make this report after a pretty thorough investigation, not only by going up there personally, but also by gathering together all the data they could secure from individuals and other persons

interested. I give this simply as their conclusion. Mr. NORRIS. The Senator refers to the railroad commis-

Mr. JONES. Yes; our railroad commission, that we sent up there. They say:

there. They say:

The agricultural areas of this province, including land suitable for tillage and grazing, are large. While estimates of the extent of these lands can be little more than guesses, it is conservative to say that the Susitna and Matanuska Basins include 2,000 to 3,000, the Tanana 3,000 to 4,000, and the Kuskokwim 2,000 to 3,000 square miles of agricultural lands lying less than 1,500 or 2,000 feet above sea level. More complete data may show the agricultural lands of the province to exceed the above by many thousand square miles, but in any event the above figures will show that this is an important field for the pioneer farmer when rallways have opened up the land, and thus transportation furnished to the local markets. It should be noted that there is also some agricultural land in the Kenal Peninsula, where there are many gardens and several ranches.

The above-described lands, where not timbered, are in many places covered by the luxuriant growth of grass which gives evidence of their fertility. Their adaptability to growing of potatoes, as well as forage crops, has been proven in many places. It has been shown elsewhere in this report (see pp. 51-53) that in the Tanana and in parts of the Yukon Basin, barley, oats, and rye can be matured. Also that the experiments in growing of wheat at Fairbanks and at Rampart have been a success. Conditions for agriculture are certainly as good in the lower Susitna Basin as in the Fairbanks district, for if anything, the growing season will be longer. Taking it all in all, the Susitna Valley offers an excellent field for agricultural development, and probably the best in Alaska. It is also fair to assume that the conditions in the upper Kuskokwim Basin are similar to those in the Tanana Valley. In addition to the fillable lands there are extensive tracts of grass lands, in the Susitna and other valleys tributary to this route. Large areas of reindeer pastures are found in this region above the limit of good grass. This is notably true along the inland fron

It will be seen that this commission goes even further in its suggestion than I went, and they think there is a possibility of The winters in the future undoubtedly will be just exporting agricultural products from Alaska. I desire simply

to say here that through the kindness of the Rules Committee of the Senate, room 115, over in the Senate Office Building, has been placed at the disposal of some who have come down here to display the resources of Alaska, and there you can see agricultural products, vegetables, grains, and grasses, actually raised in that Territory, together with a mining exhibit. I would be very glad if Senators would visit that room.

Mr. NORRIS. What is the number?

Mr. JONES. Room 115 of the Senate Office Building.

I have here also the report of Seth Mann, personal representative of the President on a tour through Alaska under the auspices of the Alaska bureau of the Seattle Chamber of Commerce from June 21 to July 29, 1913. This gentleman was selected by the President and the Secretary of the Interior to go with this expedition, if I might call it that, in order that he might have first-hand information to submit to the President and the Secretary of the Interior and to give aid in making up their minds with reference to what should be done in Alaska. This report has not yet been printed, I think, but I have been furnished with a copy of it, and I desire to read what Mr. Mann says with reference to the agricultural expectations of Alaska. He is not an interested party, and we must conclude that he has given his honest impressions. Mr. Mann says:

has given his honest impressions. Mr. Mann says:

The agricultural possibilities of the interior of Alaska are a revelation to one who visits the great valleys of the Yukon and the Tanana for the first time. There are agricultural lands also in the valleys of the Copper River, the Susitna, the Kuskokwim, the Innoko, and the Koyukuk Rivers. Great level stretches are visible from the boat as one steams down the Yukon and the Tanana. The land is covered with a thick growth of small timber, consisting of spruce, birch, poplar, cottonwood, and aspen. Owing to the freezing of the soil in the winter season the trees in this section have very shallow roots, reaching down only about a foot or so below the surface of the soil. The trees are small and valueless, except for fuel. They are easily uprooted, and when the clearing is completed the covering of moss and tundra, about a foot in thickness, must be removed and the soil exposed to the summer sun. The initial expense in preparing the ground is in many places considerable, reaching as high as \$125 per acre.

Right here some suggestion was made that it is very difficult

Right here some suggestion was made that it is very difficult and expensive to cultivate this land or put it in a condition for That is true, of course, but nevertheless that does not and will not deter a great many of our people who are seeking lands for homestead purposes from going into that country when they are satisfied that the local market will justify it and going to the expense of clearing these lands. Take it in our western country. The initial cost, in a great many cases, of agricultural land in putting it in a state for cultivation runs from \$50 to \$100, and even more, for every Take the ground beyond the west side of the mountains after the timber has been cut off, left with the stumps, brush, and so on, it costs a very large amount to reclaim it, but nevertheless that does not deter people from taking up the land and making their homes on it and gradually clearing it away. You can clear land at much less expense in that way than can be done by hiring people to do it or something of that sort. The matter of expense will not deter people from going into that country and reclaiming this land and getting it in shape for cultivation and cultivating it if mining development takes place as we expect. I read further:

expect. I read further:

But when once prepared for cultivation the long periods of sunshine during the summer months operate like intensive cultivation and bring about rapid germination and quick maturing of the crops. * * Excellent strawberries are grown and vegetables are raised without difficulty. The growing of various grains is as yet largely in the experimental stage. But crops of wheat, oats, barley, and rye are matured on the Government farms. The summer season is short for the maturing of wheat, but there is much less difficulty with the other grains mentioned. Some hay is cut by individual farmers. The interior of Alaska is more favorable for agricultural purposes than the regions along the coast, since there is more sunshine in the interior and more cloudy and rainy days upon the coast. However, the city of Juneau is supplied with vegetables from local farms situated from 1 to 12 miles away from the town.

Here is really his conclusion with reference to agriculture.

Here is really his conclusion with reference to agriculture. I have omitted quite a number of sentences with reference to it, because it is not necessary to read them, but this is his conclusion:

It does not appear that Alaska will ever export the products of agriculture, but it seems fair to assume, with the growth of population which will result from the building of railroads, roads, and trails, and the development of the mineral resources of the Territory, that larger areas of arable lands will be brought under cultivation and that the needs of the people of Alaska will be supplied from its own fields.

While Alaska can not compare with many other countries in agricultural resources and possibilities, there is no known country on the face of the earth, outside of the diamond section of Africa, than can compare with it in mineral resources, possi-bilities, and richness. It is a veritable wonderland. What it bilities, and richness. It is a vertable wonderland. What it already has produced we know, but what it may produce we hardly dare imagine. It is a mineral storehouse of amazing wealth. Since 1880 over \$248,330,000 worth of minerals have been taken out, of which \$228,200,000 is gold. Mineral wealth

is not confined to any particular locality; but in the far frozen north, in the sands of the seashore, in the valleys of the rivers, in the mountains of the coast is found gold-gold almost everywhere-and with the opening of the country to transportation there is every reason to believe that thousands of square miles of placers and millions of tons of quartz will be discovered and made to give up their millions of the precious metal that so greatly affects the world's prosperity and development. known and certain possibilities are almost beyond belief.

I simply want to call attention to this map. These red squares [indicating] indicate where gold has been discovered, and they show the discovery of gold practically all over the Territory south of the Endicott Mountain.

Between the Yukon and the Tanana is a territory of about 40,000 square miles that will surely be made accessible to railroad transportation under this bill. This territory already has produced over \$74,000,000 of gold. The Geological Survey has made a rough calculation of the probable placer resources of the Seward Peninsula district.

That is away out here at Nome in this part of the Territory [indicating]. They estimate the area of gold-bearing gravels there at 210 square miles, containing from \$260,000,000 to \$325,-000,000 of gold. The Seward Peninsula district is only about half the area of this Yukon-Tanana district, but is apparently no more mineralized, so that it may be asserted with reason that the Yukon-Tanana region may contain double the estimated gold of the Seward Peninsula district, or from five to six hundred million dollars in gold. Quartz mining has just begun, the quartz production in 1911 being \$120,000 and that for 1913 \$450,000. With railroads to take in supplies at almost all seasons of the year, with reduced freight rates, with the large increase in population that must necessarily follow with increased prosperity, the developments in quartz-bearing ores that will take place must be very great.

California during the last 60 years has produced \$1,500,000,000 in gold, and yet the reports of the Geological Survey and actual results would indicate that this Yukon-Tanana section alone will produce from its placers almost half that amount of gold and may equal it in production from its placers and quartz mines. In Koyukuk, on the Forty Mile, and in the Iditarod are indications of placer grounds equal in area to all those of California and rivaling the same in richness, and yet all these discoveries have been made without railroads and almost without trails. What will the harvest be when all of the country is prospected and opened up?

Since 1901 Alaska has produced over 110,000,000 pounds of copper, of the value of \$16,580,000. This has come from a few properties in nearly the same territory, about which and through which the railroad already has been constructed. Alaska's copper resources have hardly been touched, and we can confidently expect that with access to the different sections of the Territory new discoveries will be made and new copper properties developed. Silver, tin, lead, marble, gypsum, petroleum, and iron ores have been discovered in greater or less quantities, and what the future may develop no one can tell. Some iron ore already has been discovered, and if any considerable quantity should be found its influence upon the industries and development of the Pacific coast can only be measured by the developments which have taken place in Pennsylvania and other eastern States.

As in the case of gold, so do we know that there are almost inexhaustible veins and fields of coal, ranging from poor lignite to the highest grade of anthracite. There is coal enough in sight to supply not only local needs but also to supply all governmental purposes on the Pacific coast for many years, and thereby save the cost of transportation from the Atlantic to the Pacific, which amounts to from \$5 to \$8 a ton, and which in times of peace amounts to from \$500,000 to \$1,000,000, and in war from \$6,000,000 to \$10,000,000 more per annum than if supplied from Alaska.

In addition to these vast resources and products, which come from the interior as well as the coast, and which will furnish direct tonnage to any railroad we may build, there are other valuable resources which already have added much to our material wealth and which, with the impetus that will be given to the population by the construction of railroads, will be further largely increased, and which will assist in supporting an increased population. The fisheries of Alaska already have produced almost two hundred millions of wealth and can be made inexhaustible. Over \$75,000,000 worth of furs have been taken out, and this industry is capable of greater production through an indefinite period. With agricultural territory surpassing that of Norway, Sweden, and the other countries of Europe similarly situated; with more gold than all the rest of the United States; with more coal than Pennsylvania, West Virginia, and Ohio; with more copper than Michigan and the other copper-producing States of the Union; with more fish and furs than all the rest of the United States, human vision can scarcely compass the possibilities of the future of Alaska.

If Norway can support over 2,000,000 people with 402,000 acres of agricultural land in cultivation, what population will Alaska support when its 64,000,000 acres are cultivated and grazed and its mineral and other resources fully developed? With 30,000 white people there now, and with practically no railroads, the trade between this country and Alaska both ways is over \$60,000,000 a year. What it will reach with the growth that should come and the increase in population that should take place with railroad construction, and the results that must come from legislation which will surely be enacted, making available to human industry its tremendous resources, we can only guess; but that it will reach hundreds of millions we can confidently assert.

This whole matter is summed up by our commission at page 135, and I want to read their conclusion, which, I think, is clearly sustained by the showing that has been submitted:

clearly sustained by the showing that has been submitted:

The data presented shows that the United States possesses in Alaska a frontier Territory of great size and of wonderful industrial possibilities. The commission believes that its climate is favorable to permanent settlement and to agriculture; that its mineral resources are vast and as yet but little exploited; that its population is sparse, but only by reason of its inadequate transportation facilities; and that its people are of the same type of hardy ploneers that have carried the United States frontier to its present limits.

This is an imperfect and inadequate presentation of the princely domain belonging to the United States which it is important should be improved and developed and which should and can be made the homes of millions of thrifty, hardy, industrious, prosperous, intelligent, happy, and contented American citizens. Can this be done best by the Government or by private enterprise and exploitation?

If this Territory is so rich in resources and possibilities, why not leave its development to private capital and individual effort, say some. Simply because they are so vast and the conditions such that instead of these resources being disseminated among the many they would inevitably become the property of or controlled and monopolized by the few.

Why does not private capital open it up now, we are asked. Because much of the Territory is withdrawn from entry, and especially are the coal lands withdrawn from private acquisition.

"Then," some say, "all that is needed is to open the coal lands to private entry; this would open up Alaska as it should be opened." No doubt if these coal lands were opened to entry by which title could be secured by private parties, railroads would be constructed, but they would be constructed not to develop Alaska generally, but for the purpose of exploiting this particular resource and to and through particular properties. We can not open the coal lands of Alaska to entry as heretofore. Public sentiment will not permit such action if we wanted to do it. Private railroads in Alaska mean private monopoly in transportation and the exploitation of individual property to the neglect of any development except that which will enrich private property. This will not come about by reason of unreasonable rates. The Interstate Commerce Commission might insure reasonable rates, but it can not compel the building of railroads nor their extension into any certain territory nor connection with any certain property. Railroads might be built, but they would be built only as the Copper River Railroad was built. That railroad was built for a distance of nearly 200 miles, but it does not develop Alaska. It was not built for that purpose. It was built for a specific object and to a specific point.

The Alaska Syndicate owned or controlled the Kennicott copper mines, possibly the richest copper mines in the world. They wanted to get the ore out and they built the road for that purpose, and for no other. It was not built to develop Alaska or as a general transportation line, but to enrich the Alaska Syndicate, and that would be the purpose and object of any other private roads that might be built there, even if we should throw open the resources of Alaska to private enterprise. These people are not to be condemned for acting in this way. were looking after their own interests. They were doing what all of us would do if we had the means and opportunity. Whether this meets with our approval or not, it is a condition that confronts us and we might just as well recognize it. For my own part, I believe that the withdrawal of these lands made by President Roosevelt and renewed and confirmed by President Taft was wise and in the interest not only of the people of the United States, but of the proper ultimate development of Alaska

By the preservation of these properties the United States is in a position to enter upon a broad and comprehensive plan for

the utilization of these great resources. To say that we can not do it efficiently is to confess the incompetency of the greatest and wealthiest Nation in the world.

Private enterprise can not afford to put in a railroad where it should be placed to bring about the greatest development. It must depend upon freights for its compensation or else it must own much of the property to which the railroad has access. Interest charges would be too high, returns would be too long delayed, or freight charges would have to be made beyond the power to pay. Open it up to private entry and private railroad building and private interests will take it, will enrich themselves, and railroads will be built where they will bring the greatest return and give the greatest advantage and control. That is human nature as well as modern business. That was the theory upon which the Copper River Railroad was built, and that was the theory on which it was proposed by the same in-terests to build to the Bering River coal fields. It would not go there until it could tie to itself the resources of that district. It bound by contract those who expected to own these coal lands to give it—I quote now from the contract—"the exclusive right to purchase for the period of 25 years the entire run-of-mine coal mined from said property," as provided in their contract, and its policy was to prevent the building of other railroads by other parties. That is the character of the development we would have had if these withdrawals had not been made. They were wise, patriotic, and farseeing acts of statesmanship. Whatever private rights had been initiated should, of course, be protected and safely guarded.

But, as I said, the record, which is before us, in reference to the Copper River Railroad shows that they would not build to this territory until they could secure for themselves the exclusive right to the coal mines. Furthermore, they were determined that no other railroad should be built in that territory if they could prevent it.

There is testimony in this record that would be very interesting. I understand that the Senator from Montana [Mr. Walsh] called attention to it the other day. I was not able to be present, and so I may repeat in this connection some things that he read, but I think it presents a very striking fact that should be kept in mind in connection with the possibilities of private capital building railroads into this territory and what policy would be pursued by it, and what any interest independent of the Alaska Syndicate would have to contend with.

Mr. Ballaine, of Seattle, appeared before our committee. He was interested in the original building of the Alaska-Northern Railroad and apparently had negotiations with those interested in the Copper River road. He tried to get them to take over this other road and had them investigate it. For that purpose he had conferences with Mr. George W. Perkins, who was connected with the interests controlling the Alaska Syndicate, On page 36 of the hearings I read from Mr. Ballaine's testimony:

After the Canadian owners of the reorganized Alaska Central had taken over the property, I entered into negotiations with J. P. Morgan & Co. to ascertain whether they would back me in a project to build a narrow-gauge railroad, taking over the railroad from Seward, changing it into a narrow gauge, and extending it as a narrow gauge on into the Tanana Valley. I had my negotiations directly with G. W. Perkins.

He then goes on to state what offers he made to Mr. Perkins, Then he says:

Then he says:

In the summer of 1909 they sent A. N. Grey, the traffic and tonnage expert for Morgan & Co., to make that investigation. In July of that year Mr. Perkins himself went up to Alaska. I met him by appointment at Seward. He was at Seward for several days on the first trip. He then went to the westward, and on his return a week later he was in Seward several days longer. Mr. Grey's Investigation and Mr. Perkins's investigations, according to Mr. Perkins's statement to me, resulted in their finding resources along the route from Seward through the Sustina Valley to Tanana River better and more varied than they had expected. Mr. Perkins told me in Seward, and later in Seattle, that he would favor the financing of the road on the plans that I had proposed in the event that he could get the consent of the Guggenheim brothers to do so.

The record will show that the Alaska Syndicate practically controls the important transportation lines existing and proposed in Alaska, and that by reason of their control over such a tremendous amount of wealth in the country they are able absolutely to dominate the situation in Alaska, and whether a railroad would be built under private enterprise would depend very largely upon whether they would give their consent or not—

And could make satisfactory arrangements with the Canadian owners for a conversion of their securities into securities of the proposed new company. He explained to me that the Alaska Syndicate at that time was owned by Morgan & Co. and by the Guggenheim Bros., and that they had an agreement by which the firm of J. P. Morgan & Co. should not engage in any other Alaskan railroad enterprise or mining enterprise without the consent of the Guggenheim Bros. He agreed with me that he should recommend favorably their taking up this plan, not alone on account of its merits, but because the firm of J. P. Morgan & Co. and their friends held one-third of the stock in the Sovereign Bank of Canada, which at that time was going through liquidation,

The Sovereign Bank had failed in consequence of the failure of Frost & Osborne. It held nearly all of the bonds of the Alaskan Central Railroad and nearly all of the stock. It was Mr. Perkins's opinion, as he expressed it to me, that through that arrangement they might be enabled to come out whole in their investments in the Sover-

might be enabled to come out whole in their investments in the Sovercign Bank.

By appointment I met Mr. Perkins in New York about the 20th day
of November. 1909, when I expected to close negotiations. He informed
me then that the Canadian owners were having difficulty in getting
their bondholders to agree to the proposed exchange.

Later in the winter, or possibly in the spring, Mr. Perkins told me
that the Guggenheim Bros. had refused to give their consent to the
plan for Morgan & Co. to take over the financing of this project as a
narrow-gauge railroad from Seward through the Susitna Valley to the
Tanana on the ground that they regarded the Tanana Valley as their
field.

That simply exemplifies the condition in which Alaska would be if left to private development. The field would be divided up and certain interests would regard certain parts of the Territory as their field, and this tremendous organization, this tremendous aggregation of capital, would practically dominate the · whole Territory.

Mr. Perkins told me at the same time that Morgan & Co. were not prepared to encourage any railroad building in Alaska until the Government issued patents to coal claims then pending.

I asked Mr. Perkins: "Do I understand from this that if I or any other individual, or any company, should go to some other bank or banker to raise money for building a railroad from Seward through the Sustina Valley to the Tanana I should meet with the opposition of the owners of the Alaskan Syndicate?"

He replied: "We could not allow a railroad to be built through the Sustina Valley into the Tanana. There will be no more railroad building in Alaska until the coal fields are opened."

Mr. KENYON. Who said that? Mr. JONES. Mr. Perkins. That illustrates exactly what the condition would be there if left to private interests and private development. It takes such a large and powerful interest to build the necessary railroads in Alaska that it can practically control the building of railroads where it wants them; it can practically prevent their building where it does not want them. That would be the result if we left it to private enterprise and private exploitation.

Mr. KENYON. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Iowa?

Mr. JONES. Certainly. Mr. KENYON. Does not the Senator think that this applies to Alaska differently from any other part of the country? Is it not the case now that railroad building is practically impossible without the consent of some gentlemen in New York?

Mr. JONES. I think that is probably true, but it is especially true of the Territory of Alaska. They have done just exactly what the Nation should do, develop its own property. That is what they built the Copper River Railroad for. They would never have built that line if they had not owned the Kennicott copper mine; and they built that road not for the traffic that would come to it from development, as I said a moment ago, but they built it to take out their own ore from their own mines. The Government of the United States should pursue the same Alaska belongs to it. It owns practically all of it now and it should take whatever steps are necessary to bring about a wise and broad development of its own property.

Mr. KENYON. I do not want to interrupt the Senator. I know our conversation would not interfere with the floor very

Mr. JONES. Not a bit. Mr. KENYON. There is the point right there which has troubled me about this bill. I am for the bill and shall vote for it, but the roads that are now to be constructed by the President under the authority of the bill are going to increase to a large extent the value of the railroads already there owned by the Morgan and the Guggenheim interests. That is true, is it not? It must of necessity do so.

Mr. JONES. I doubt if that would result in a very great in-

crease; possibly in some.

Mr. KENYON. I know it. It must of necessity do that. Mr. JONES. I will say to the Senator that it is a fact and

this will answer one part of his question-

Mr. KENYON. I should like to be cleared up on that point

Mr. JONES. The committee had a meeting this morning and we have agreed to submit to the Senate an amendment which will provide in effect that if the President should find that the line of Government railroad that is desirable should include a portion of existing lines the President must acquire the existing lines before proceeding with the construction of the Government line; and if he does not deem it wise to acquire them, then the construction of the Government line must begin at tidewater and proceed to whatever point he desires to reach.

Mr. KENYON. That is a very wise amendment, and solves a difficulty that has been in my mind.

Mr. JONES. I thought it would. Mr. KENYON. Because if we should increase the value of this property by the expenditure of Government money and then turned around and condemned it, we would be paying an additional amount to them by virtue of the very money that the Government has spent.

Mr. POINDEXTER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to his colleague?
Mr. JONES. Certainly.

Mr. POINDEXTER. I should like to ask the Senator from Iowa, because I know he has given a great deal of attention to the subject, what he would think about a plan by which, in case a route was selected which included private lines now constructed, the Government should complete the system and not buy the private line at all, but through its control of public-service corporations of that kind compel a reasonable through rate between the Government part of the line and the privately owned part of the line so that the public would get the benefit of the completed route without having to buy the privately constructed road?

Mr. KENYON. That has been the suggestion that has satisfied my mind in voting for the bill, because the Government through the Interstate Commerce Commission could do that, it having been held, as I understand, that the railroads in Alaska come under the domain of the Interstate Commerce Commission; but it seems to me that the other plan is far better and saves any controversy that there might be over the

rate question.

Mr. JONES. The committee had in the bill a provision covering the suggestion of my colleague; but in considering the matter this morning we concluded that this would really be better from a governmental standpoint. For instance, just to make clear the point-I think the Senator from Iowa understands it, however—the Copper River Railroad runs here from Cordova [indicating]; and we want to get a line into the Tanana or the Yukon. If the President, after investigating the whole matter, concludes that it would be wiser for the Government to have a line from Cordova or from some point here [indicating], going up this way [indicating], following the line of the Copper River road up the Tanana or Yukon, then, before he enters upon the construction of any other portion of this road, he must acquire this part of the line [indicating], so that the line from tidewater will be absolutely and wholly a Government line. While I feel satisfied that the Government, through the Interstate Commerce Commission, could possibly regulate and insure reasonable rates on this road, I believe that would be better to have the Government own the entire line and control it as it sees fit, without having to enter into an arrangement or an agreement that might bring up controversies, and all that sort of thing, between it and a private line. At any rate, we thought it was wiser to do that, and that kind of an amendment will be presented to the bill for the consideration of the Senate. It is but fair to say that this suggestion came to the attention of the committee through a suggestion in an amendment proposed by the senior Senator from Iowa [Mr. CUMMINS].

Mr. President, if we were to turn Alaska over in its entirety to the Alaska Syndicate you would see railroads built so quickly that it would make your head swim. It would be done broadly and systematically, too; every resource and every section would be taken into account. We are not going to turn Alaska over to the Alaska Syndicate, nor to any private interest, and we should do with it as they would do with it if they owned it, and that is one of the purposes of this bill, and this bill is one

step in that direction.

The greatest recompense from the building of this road must come from the settlement of the country, the building of homes, the opening of the mines, and the making of the latent wealth of the Territory a part of the potential wealth of the country. of the Territory a part of the potential wealth of the country. That becomes the Nation's return rather than the freight rates; just as the copper from the mines became the real return to the Alaska Syndicate from the Copper River Railroad rather than freight rates, because practically no freight has been developed along the line. Private capital would have to pay a very high rate of interest to secure the money necessary to build railroads of any extent in Alaska, while the Government can secure this money at a very low rate of interest. Private capital, even if it could secure money, would build its road to particular properties which it owned or which it could control regardless of the interests of others or of other sections. The Government, owning practically all of the territory and resources of Alaska, can determine upon the line which will not

only promote the development of certain territory and certain properties, but work into a general plan and system of trans-

portation for the entire Territory.

In my judgment the Nation would profit by the building of a road from the coast to the Tanana or the Yukon if it allowed the same to be used free of any freight charges whatever. Nor We spend every would this be, in fact, any unusual procedure. year as many millions of dollars as it would take to build such a road for the making of transportation lines for the use of which no charge whatever is made, and we shall no doubt pass a bill at this session of Congress providing a large appropriation for the purpose of improving and in some instances possibly making almost new lines of water transportation.

"But," it is said, "why should you not provide steamship lines also for fear some monopoly will meet you at the seashore?" The right to go to the seashore on equal terms is worth something. You would not have that under private ownership; you will have it under Government ownership.

Mr. CHAMBERLAIN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Oregon?

Mr. JONES. Certainly.

Mr. CHAMBERLAIN. Right in that connection I desire to say, respecting the independent water lines, that the citizens of Portland now have incorporated and are preparing to equip a line of steamers up to Alaska, in view of the possibility of this bill passing. They may put them on anyway in competition with the line already established if this bill fails of passage.

Mr. JONES. But the chances are that, if this bill fails of passage and they put them on, they will be in the hands of receivers in the very near future; but with equal opportunity to connect with railroads from Alaska they could maintain

themselves.

The water companies must meet you on equal terms, too, and that is some advantage. The steamships, monopoly owned or otherwise, must come to a common port. They can not discriminate in that respect. Their rates can be regulated with reasonable satisfaction. Furthermore, water routes are free. There would be ample and equal docking facilities, and, in my judgment, under such conditions there would be such sharp competition that reasonable rates would be insured. If this should not develop, then I would not hesitate to favor an extension of the Government railroad by the ownership and operation of steamship lines. I doubt either the wisdom or the necessity of taking such action, however, at this time. If the resources of Alaska can be brought to the seashore on equal terms and with equal opportunity, water transportation will be secured under such

conditions as to insure fair and reasonable rates.

In that connection I desire to say that Senate bill 133, which I introduced, provided for the development of the mines by the Government to supply Government needs and authorized the President to procure every facility that might be necessary to carry coal wherever the Government needed it and desired it; under that bill it was contemplated that the President, if necessary to deliver coal for governmental purposes, might secure whatever vessels were necessary. That provision was reported to the full committee by the subcommittee, of which the Senator from Oregon [Mr. Chamberlain] and I were members; but the full committee felt that we ought not to complicate the proposition of securing railroads in Alaska with that provision and also the provision with reference to mining coal. Therefore it was left out, not because the members of the committee were opposed to the proposition, but because we felt that this important step of the Government building of railroads in Alaska should not be complicated with other propositions, and that it would be best to go at this work a step at a time.

But it is asked, "In what way would you open the coal mines? You make no provision for that in the bill." While that is an While that is an important matter and one that must be dealt with, it is not necessary to deal with it in this bill nor to discuss it in connection with this measure. We must solve that problem. It is one that needs much study and investigation, and more study and investigation, so far as I am concerned, than I have been able to give it thus far. There are many different propositions None of them have been fully considered, but when we have made provision for transportation, then we can consider this question from every standpoint. I have no doubt but that a wise and proper solution will soon be reached. already said, it seems to me that too much emphasis has been placed on the coal resources of Alaska and the need for their development, and we have overlooked the other purposes and even greater purposes of this bill. We do not propose to build these roads simply to get coal. If that were the sole purpose we could build a line to the Bering River fields, equip it, construct docks and terminals and make a harbor for not to exceed

\$4,000,000, and have access to all the coal we need for many years to come, not only for Government purposes, but to supply the needs and demands of the Pacific coast. If there were no coal fields to be developed, I would still be in favor of this bill, because of the possibilities of development in agriculture, the opening up of other minerals, and in the aid it would give in

getting people and supplies into the interior.

In the bill which I introduced I provided for the reservation of a certain coal area and its development by the Government. I am inclined to believe that it would be a most valuable demonstration in many ways for the Government to open up and develop a mine in the anthracite fields in Alaska. It would give some valuable and reliable information as to the cost of mining, how it should be done to prevent waste and explosions, and just what wages could be paid to those who toil, and yet permit the coal to be sold at a reasonable price to the consumer, with absolutely equal privileges and opportunities in transportation to all. With good transportation facilities I also believe that a fair leasing system can be devised that will prevent monopoly, insure development, and furnish coal to the consumers at fair rates as well as compel mining under the best possible conditions and prevent waste. I have an open mind on this question, however, and do not shrink from the Government operation of these mines, and see much to be gained by it. It should be given more study and consideration than it has had or than can be given on the floor of the Senate. Let those who are in favor of this step not complicate it with other considerations which we can and will settle properly in the near future.

it is urged, "you give too much power to the President; Congress should have more control over the details." do not think so. Congress can not go into the details. it would result in confusion, controversy, and indefinite delay. We can safely depend upon the President of the United States no matter who he may be and no matter what party he may belong to to act wisely and patriotically. This is not a party matter and should not be treated as such, but the sole endeavor should be to carry out the objects and purposes of Congress and to develop Alaska in the way that would best promote the pros-perity of that Territory and the welfare of the people of the United States. This is a business matter and must be carried on in a business way. If we give the President full power to carry on the work, within certain broad limits, he will see that it is done, and if those who are placed in charge of it are directly responsible to him for the manner in which they do their work it will be well, expeditiously, and economically done.

The Panama Canal has been an unqualified success, and, in my judgment, this enterprise will be equally successful if we do not unwisely hamper the agency that has to carry it out. We must not forget that legislation is rigid. If it does not suit it can not be undone except by legislative action. If the President makes a mistake he can correct it. Unless we are fully satisfied upon a proposition we should not put it in this

bill but leave its solution to the President.

In my judgment the building of the Panama Canal has been the success that it has been because we have given to the President almost absolute authority with reference to it. He has been unhampered in the details. We furnished the money and he has done the work.

Mr. GALLINGER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from New Hampshire?

Mr. JONES. Certainly.

Mr. GALLINGER. In connection with the estimate of the cost of the proposed railroad system in Alaska, it may not be amiss to suggest that while the building of the Panama Canal has been a remarkable success, the first estimate of cost was \$135,000,000, and I believe it has cost something like \$400,000,000.

Mr. JONES. That is true. In fact, we find that most of the work on rivers and harbors, on irrigation, and all similar projects has cost more than had been originally estimated for, A man hardly but that is not unusual in private enterprises. ever makes an estimate and builds a house but that it costs much more than his original estimate. The increased cost of much of the Government work is largely due to the fact, also, that we do not make the money available as it should be. is especially true of irrigation works and river and harbor The result is that these projects are not carried on economically at all.

Mr. NORRIS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Nebraska?
Mr. JONES. Certainly.
Mr. NORRIS. I should like to inquire of the Senator with

regard to the provision in the bill which gives the President

the power to lease the railroad after he has constructed it, whether, in his judgment, it would not be better, after the Government has built the railroad, for the Government to

operate it as well?

Mr. JONES. I will say to the Senator that I think so. bill which I introduced provided for the operation, by the Government, of the railroad until otherwise provided by Congress. The bill that was reported by the subcommittee to the full committee provided the same thing; it had no provision for leasing When the full committee, however, got together, they decided that some provision of that kind should be put in. will say to the Senator that this morning the committee, in considering the matter further, decided to recommend that, instead of 10 years, a lease might be made for 20 years, on the theory that, if we were to have leasing at all, 10 years would amount to nothing, that no lease could be made for that period of time at all: and so, if we are going to have a leasing provision, they thought it wise to put in one that would probably be effective. Personally, as I have said, I would much prefer that we should leave out any provision for leasing. I think the Government ought to operate the railroad until Congress, at least, provides otherwise, and we will have abundant time hereafter to make any provision that may be necessary. Personally, I am inclined to think that the Government could operate the railroad better than it could be run under a lease, and, so far as I am concerned, I am inclined to favor Government operation.

Mr. NORRIS. Mr. President, I agree with what the Senator has said. It seems to me that, instead of putting a provision in this bill permitting the President to lease the proposed railroad, we ought to omit that part of it and let the road be operated by the Government. If operation by the Government proves to be a failure, we can easily provide by legislation that the road may be leased; but, on the other hand, if the President leases it for 20 years, there will be no opportunity to have a practical demonstration whether or not the Government can

properly operate the railroad.

Mr. JONES. The Senator's opinion is exactly in accord with my own, but not with that of a majority of the committee; and that proposition, of course, will be for the Senate to pass upon when it comes up.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Kansas?

Mr. JONES. Certainly.

BRISTOW. I was unable to attend the committee meeting this morning because of other duties, and I want to inquire if it has been suggested that instead of the Government operating the road by any direct governmental agency it simply authorizes the road to be operated by the Panama Railroad Co. Mr. JONES. That was not suggested this morning at all.

Mr. BRISTOW. The Panama Railroad Co. is a corporation, the stock of which is owned by the Government of the United States; it is now operating a railroad, and has been doing so since we acquired that railroad some 10 years ago. It is also operating a steamship line. It seems to me that we could authorize the Panama Railroad Co. to operate this additional railroad merely by an extension of its power and authority. I do not know whether it is necessary for Congress to act along that line; but I think the President would have ample authority to authorize the Panama Railroad to construct and operate this additional line.

Mr. JONES. I was going to suggest to the Senator that I am inclined to think that, under the broad powers given the President in this bill, he might do that; that is, he might use that agency to carry out the purposes of the proposed legislation.

Mr. McCUMBER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wash-

ington yield to the Senator from North Dakota?

Mr. JONES. Certainly.

Mr. McCUMBER. I should like to ask either of the Senators if the Panama Railroad Co. were authorized to operate the proposed Alaska railroad, who would pay any deficiency that might result? In the inability of the freight and other rates to pay the interest and operating expenses, who would pay them?

Mr. BRISTOW. Well—

Mr. McCUMBER. I do not believe anyone will claim that the Government will ever operate that railroad at a profit; and, the Government owning the mines and using its own mines, there will never be enough there to make any railroad pay. Mr. KENYON. Might not the profits from the operation of

the Panama Railroad pay for it?

Mr. McCUMBER. There will be very little profit in the operation of the Panama Railroad after the construction of the Panama Canal is completed and all the traffic is carried

through the canal and not over the railroad. In all probability the railroad will then be torn up.

Mr. NORRIS. Now, Mr. President—
Mr. BRISTOW. The Senator is not, if he will permit me-The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. I had yielded to the Senator from Kansas.

Mr. BRISTOW. The Senator from North Dakota is not cor-ct as to that. There is no intention to tear up the Panama rect as to that. Railroad. It will be run as an electric line. Ample provision has been made by utilizing the waste waters from the Chagres River as they go over the Gatun Dam to provide electricity for the operation of the canal and the operation of the railroad.

Mr. McCUMBER. Then the railroad will be operated be-cause the expense of the power will be borne by the Government in operating the canai, which leaves the matter in just the same condition, namely, that the company itself can not make the

railway pay its expenses.

Mr. BRISTOW. I think the Senator is simply imagining that, because I have not any doubt at all that the railroad company will be very profitable, and that, if the Government did not desire to keep the control of it and to operate it itself, there would be abundant opportunity to dispose of that right. I am perfectly willing, so far as I am concerned, to take my chances with the Panama Railroad Co., the stock of which is owned by the Government of the United States, successfully operating a railroad in Alaska without loss to the Government.

Mr. McCUMBER. It is very easy, Mr. President, for the Senator to take the chance, inasmuch as the Government will have to pay the expenses, and not the Senator. I was considering whether a business man would take his chance where he had to pay the expenses out of his own pocket. I confess I can not see anything in Panama-and I have been there-that would justify any great outlay or expenditure in operating a railroad. Of course if it can be operated by electric power that is furnished by the Government, that will take away a considerable portion of the operating expenses. Under those circumstances, the little passenger traffic from one city to the other—and that would be practically all its business—might be sufficient to pay for operating an electric line.

Mr. BRISTOW. If the Senator will permit me, I will say that I never have heard a single one of the members of the Isthmian Canal Commission express any doubt as to the advisability of maintaining the railroad, or express any doubt that

it would pay after the canal was completed.

Mr. NORRIS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. Certainly. Mr. NORRIS. I should like to say, in that connection, that I read last night the last report of the directors of the Panama Railroad Co. I think I have it on my desk and if I have not I have it at my office. They have taken action on this very subject, and it is their opinion that the Panama Railroad Co. will pay after the canal is in full operation.

Mr. GALLINGER. How well is it paying new?

Mr. NORRIS. It is paying now. If I had the report here I could give the Senator the figures. They make money now, but even though that were not true it is something that can be charged up to the Government operation of the Panama Railroad Co., because everybody knows that if it does not pay, it will be because the Government has put in competition with it a great canal which the Government has constructed.

Mr. McCUMBER. But, Mr. President, that is the reason I think it will not pay unless the Government furnishes the power. Of course you can make almost any kind of a railroad pay if you do not have to pay the operating expenses. If somebody else will furnish the motive power to drive the transportation vehicles from one end of the line to the other without any cost, I imagine that it will pay. While I admit that the passenger traffic from Colon to Panama, over that 30 miles, would pay for an electric railway, I do not think, and I do not think anyone else will claim, that the local traffic would pay to operate that railroad if it were itself compelled to pay all of its operating expenses and pay the usual price for the power that would be generated by the Government works at the Gatun Dam.

Mr. NORRIS. The usual price for electricity probably will not prevail there. As I understand, the price for the electricity that the Government may furnish the railroad company will be very low, but I do not know that any definite figures have been given out.

Mr. McCUMBER. Of course, the Government could make the price as low as it desired, so long as the Government is backed by the taxing power and can make the people pay taxes to pro-

Mr. NORRIS. But the \$400,000,000 was not spent for the purpose of developing electric power. The power is but an incident to that great dam. It would be there and would run to waste if it were not used, and those using the power as an incident to the other great development of course ought not to be taxed with the interest on the entire investment. No one would want

Mr. McCUMBER. We are getting away a little from the subject concerning which I asked my question, which was who would pay the operating expenses of this railway up in Alaska? The Senator and I will probably live to see the day, if the railway is put in operation, when we will have to vote a certain amount in excess of the earnings of any kind of a railroad which may be constructed in Alaska.

Mr. NORRIS. I take it that no man can tell now just what the future will bring; but, if that should be true, then the particular clause in the bill giving the President authority to lease the road will never become operative because no one would

Mr. McCUMBER. No one would ever lease it, in my opinion, and pay the interest on the investment.

Mr. GALLINGER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from New Hampshire?

Mr. JONES. Certainly.

Mr. GALLINGER. Mr. President, I differentiate between the Government building a railroad in Alaska and the Government going into the ownership and operation of railroads in the United States proper. I think there is room for different action as to those two propositions. I do not know how well the Panama Railroad is prospering, whether it is paying a profit to the Government or whether it is sustaining a loss. I have not looked into that. I have in mind one governmental effort to build a Government railroad. It was not by the United States Government, but by the great State of Massachusetts. State built a railroad through the Hoosac Tunnel and tried to operate it, but lost money year by year. It was a very short line, but it cost a good deal of money to construct it; and the result was that the State of Massachusetts leased that line and afterwards sold it to the Fitchburg Railroad Co., and it is now in private ownership. Under State control it was a lamentable failure; and I have some fear that, whether we build railroads in Alaska or go into the ownership of railroads elsewhere, we will find that they will not be operated as successfully as they were under private ownership.

Mr. NORRIS. How did that road pay after the State lost it?

Mr. GALLINGER. I do not know. It became a part of a great system. When the question of Government ownership is up for discussion, as it doubtless will be a little later on, I have some views that I shall want to present to the Senate in my usual brief way. Some of us have ridden on railroads owned by the Government in other countries, and we have a vivid recollection of what kind of service those railroads render their passengers. I do not want to see our railroads become as poor in equipment and as inefficient in management as some

that I have ridden on abroad.

Again, there are experiments going on, and not only experiments but actual governmental operation of telegraph and telephone lines in England. On that point I have some statistics which I think are rather startling as to what is happening However, that will come later; we doubtless will have that subject up after a little; but I rose simply to say that I think we may squarely differentiate between building a railroad and even running a railroad in Alaska, where the Government owns almost the entire territory, and in going into the ownership and operation of railroads in the States of the Union.

Mr. JONES. Mr. President, I agree with the Senator thoroughly in that, and, furthermore, I admit that the question as to the desirability of the Government operating a railroad is a debatable one. Whatever agency is selected by the Presi-dent to operate this road, if he does select an agency to operate it, of course any deficiency that occurs will have to be made good by the Government of the United States so long as it keeps control of the operation of the road. Whether or not the Panama Canal Railroad Co. would be a good agency I am not prepared to say. The matter had never occurred to me and has not heretofore been suggested. As I said, I think we should not provide in this bill for leasing. We should simply provide that the railroad may be operated under the control of the President until Congress otherwise provides. The committee, however, thought that we ought to put in the bill this limited

vantageous proposition were submitted; and there is argument for that. I do not fear to trust him with this power. I am sure he will use it wisely.

Mr. DILLINGHAM. Mr. President-

Mr. JONES. I yield to the Senator from Vermont.

Mr. DILLINGHAM. I simply want to ask a question. have not had an opportunity to look through the hearings had before the committee, but I understand that some evidence given as to the probable revenue that might be derived from the amount of coal transported. I was wondering whether anybody had ever made any estimate as to the income that may be derived from any other tonnage than that of the coal mines

Mr. JONES. I do not think there is any estimate of that kind in the hearings; I do not remember it now, and I have looked through the hearings pretty carefully. About the only definite information we have concerning the probable tonnage is with reference to coal; and that depends very largely upon the Government's requirements and what might be brought out for the Government itself. It is based on the needs of the Government, which is now transporting coal around from the Atlantic to the Pacific.

Some say Congress should place a limit upon the expenditure to be incurred. Others say that if it is wise to give the President the great power which we do give him in this bill, we should be willing to allow him to be the judge of the expenditure. I can hardly agree with this latter contention. believe we should limit the amount to be expended and the mileage to be constructed, and within those limits give the President full and unrestricted authority. Congress should control the limit of expenditure. If the limit does not permit of the construction of as many miles of railroad as we desire. I do not believe there would be any difficulty about providing additional money to carry on the needed work. As I said to the Senator from Wyoming [Mr. CLARK], the committee will report an amendment to the bill definitely limiting the right of the President to contract for or expend more than we provide for in the bill, so as to make that limitation certain.

We want a railroad from tidewater to connect with water transportation on the Yukon or the Tanana and, in my judgment, we also should have connection with transportation on the Kuskokwim. If \$40,000,000 and a thousand miles of railroad will not make such connection, then Congress will provide anything additional to do it. I would have no special objection to authorizing the President to contract for the construction of not to exceed a thousand miles of railway, if we should determine that it is advisable to construct that much; but I believe it wiser to limit not only the mileage but the expenditure, confidently believing that Congress would take care of the situation

Some would have us designate the route for the railroad or limit the discretion of the President in this respect. this would be a mistake. We do not and we can not know the engineering difficulties or advantages of any of the particular lines or routes; and it seems to me that for this reason it would be very unwise for Congress to attempt to settle such matters of detail The President can safely be trusted to secure the services of most capable and experienced engineers. as private interests do, and accept the matured and careful consideration and judgment of engineers as to the routes to be

Mistakes, of course, may be made. They are made on private orks. They will have to be corrected. The President, howworks. ever, is not nearly so apt to make a mistake in acting upon the advice of his engineers as we would be now, with the little information we have, in attempting to fix definitely the line of road which we authorize to be built. I would rather trust him in this matter than myself, with the information I now have, although I confess that on this particular point I have a pretty strong view as to what should be done, and I do not hesitate to say that the road we should build should be along the general line of the Alaskan Northern route to the Tanana or the Yukon, with a main branch to the Matanuska coal fields, a main branch to the Kuskokwim, and a line to the Bering River fields, leaving the Copper River Road, at least for the present, as it is.

Mr. President, I have the utmost confidence in the President, his integrity, his honesty, his patriotism, and his purpose and intention to do that which he believes will be for the best interests of the people of Alaska and the people of this country. While it is true that we are intrusting him with a great deal of power and authority under this measure, I am perfectly willing to intrust to him full authority to act in carrying on this great work within the limit of mileage and expenditure fixed by us. I do not believe we can carry it on successfully by limiting plan of permitting the President to lease the road if an ad- his power. I do believe he will carry it on successfully if we give him the power to act practically as private interests would act in connection with a development of this kind.

The Senator from Mississippi ridicules the idea that these railroads can be constructed for anything like the amount suggested in this bill. He apparently bases this assumption on a magazine article, from which he seems to have the impression that these railroads will be built entirely through steep canyons, over lofty mountains, across icy glaciers, around fjords, and amid mighty volcanic and geologic disturbances, too stupendous for words, which he seems to think are now going on. The trouble with the Senator from Mississippi is that he has not followed his usual fair and logical course of reasoning, but has allowed his opposition to Government construction to sway his judgment, and he seizes upon the conditions described to sustain that opinion, regardless of the fact that those conditions do not exist in connection with the present problem.

These roads will not be constructed under the conditions sug-

gested by him. They would penetrate the coastal range on a water grade through the Copper River and Susitna Valleys, and would, therefore, have to surmount only the one major

summit of the Alaska Range between their termini.

This summit has an elevation of less than 3,000 feet-not a very high pass, not a very lofty mountain. Many railroads in this country pass over mountains through passes where the elevation is far greater than this. My recollection is that the Marshall Pass, for instance, has an elevation of about 11,000 feet. The amount fixed in this bill is based upon carefully considered estimates made by learned, experienced engineers of great reputation and skill.

The Senator says that what Alaska needs is dirt roads to connect with the railroads already constructed, and that by the expenditure of about \$7,000,000 greater good will come to Alaska than by the expenditure of the money proposed in the construction of railroads. If the Senator knew the character of the railroads built and their location, he would not make a suggestion of this kind. Furthermore, he overlooks the vast extent of Alaska and the insignificance of these railroads.

I want to call attention to the location of the railroads referred to by the Senator from Mississippi [Mr. WILLIAMS], which he thinks, with a few wagon roads, would furnish proper

development for Alaska.

The White Pass & Yukon Railroad is away down in southeast-ern Alaska. Only about 20 miles of it are in our own territory, and it passes over this way [indicating on the map] into the mountains. It is largely in British territory. There is no wagon road that could be built and used that would be of any special benefit, even if connection were made with this road.

The Yakutat Southern Railway is a little railroad right in here [indicating on the map] on a peninsula and is only 9 miles long. It simply connects a fish cannery on the coast with another point on the coast opposite the fishing grounds and furnishes no connections whatever that would be of any benefit to any

country that might be served by a wagon road.

The Copper River & Northwestern Railway begins here [indicating on the map] and runs up in this direction for 195 miles. It extends from Cordova to the copper mines of the Alaska Syndicate and does not pass near any agricultural territory or other territory that would lead to any special development by the construction of wagon roads other than possibly the discovery of copper properties, which could not be handled successfully by wagon transportation in competition with railroad transportation.

The Alaskan Northern Railway, which comes in here from Seward through the Kenai Peninsula, is now 71 miles in length. Wagon roads, to be of any benefit in connection with it or to reach coal property or agricultural property, would have to be 75 or 100 or more miles long, and would be of but little service, because the railroad is not doing very much business, and unless it is extended considerably it will have to shut down. In fact, I understand that it is now shut down.

The Tanana Valley Railway is a narrow-gauge railway up near the Tanana Valley, running out of Fairbanks. It is 46 miles long, extending from Fairbanks to the mining territory.

The Seward Peninsula Railway, 80 miles long, from Nome to Shelton, is in a territory with no agricultural lands, but simply placer and quartz mines.

The Pay-Streak branch, 61 miles, is simply a branch of this

road in the same territory.

The Council City & Solomon River Railway, 321 miles long. is also in the Seward Peninsula, near Nome, and no special benefit would come from the construction of wagon roads there. The same is true of the Wild Goose Railway, 5 miles in length,

which is located in the same territory.

So the connection of wagon roads with the existing lines of railroad, to which the Senator from Mississippi referred, would railroad to that part of the country.

do very little toward the development of this 590,000 square miles of territory; \$7,000,000 spent as suggested would be largely wasted. Any substantial development in Alaska can come only from the construction of some main trunk-line rail-

Our western country was not opened up and its resources made available until the railroads were built. A vast domain was donated to the companies to induce them to construct trunk lines-a domain which, when the road was constructed. was equal in value to its entire cost. No suggestion was made that the Government should first have wagon roads, but wagon roads came with the building of the railroads; and that will be the result in Alaska. You build trunk-line railroads, and branch lines will be built, and the people and communities also will construct wagon roads to meet their demands and necessities; and they should have assistance in doing this from the National Government.

They need, it is true, dirt roads in Alaska; but they need railroads first, and the supplying of that need will go a way toward the construction of necessary wagon roads. you get trunk lines of railroads going from somewhere to somewhere you will be justified in talking of wagon roads, spurs, and branches, but not before.

He says, also, that in a country where beans cost \$1 a pound as they did in the Chesana district, what we need is wagon

The Chesana district is one of the most inaccessible districts on the face of the earth, away over here [indicating on the map], away from any railroad, almost surrounded by lofty mountains, and as a matter of fact in a territory very much of the character that the Senator from Mississippi has the impression that all of Alaska is. The wonder is that these things do not cost more there, rather than less.

Mr. President, the physical condition of Alaska is such that it has a great bearing on the proposition involved. As a matter of fact, it seems to me it should almost determine us in our

course with reference to this measure.

I want to call the attention of the Senate to the map and to the indications there. The red spots represent the places where gold has been already discovered. You will note that they extend almost all over the Territory of Alaska south of the Endicott Mountain Range. They show very graphically the extent of the gold discoveries, and indicate very clearly the possibilities for the discovery of gold in Alaska. The black spots indities for the discovery of gold in Alaska. The black spots indicate where coal has been discovered. You will note that this area goes clear up to the north, away beyond the Arctic Circle. The whole Territory is dotted with black spots, indicating actual discoveries of coal.

As I said a while ago, there are only two of these fields where anthracite coal is produced, the Bering field and the Matanuska field; but the supply of lignite and bituminous coal is almost inexhaustible, and almost beyond belief. Some veins have been found exposed in different parts of this territory 20 feet thick, and my recollection is that there are some claimed to

be 40 feet thick.

Along the southern coast of Alaska the harbors are open theentire year. They are free from ice and impediments of that The mountain range running around the coast in the form of an arc shuts out railroad building to the interior except where there are breaks through the mountains made by rivers, and they are very few in number. The place where the Copper River breaks through is one. Here, where the Susitna and other rivers come through on the way to Seward, is another. Over here, at Iliamna Bay, is another going over to the Kuskokwim.

The interest or the power that controls these two or three entrances to the interior of Alaska controls practically all of the development of that Terrtory and of that country. If the entrances and the passes to the interior country are controlled by private railroads, the development of the interior of the country will take place just as they see fit to permit it to take place. While it is true that if railroads are built somewhere to the interior through these passes we can control the rates that are charged for the transportation of products and material over those lines, we can not compel the railroads nor the interests or companies building them to build to any particular section

of this country.

For instance, the Copper River Railroad was built to the Kennicott mines over here because it owned those mines. We can control the rates that will be charged from that point to the coast, but we can not compel the company to build a line from this point, Chitina, up to the Tanana or the Yukon. We can not do it; and until the company sees fit to do it of its own accord. if we leave this matter to private enterprise, we shall have no

The same is true with reference to the line through here [indicating on the map] from Seward. A company has been trying for years to build a line from Seward to the Matanuska coal fields, and they have been professing that they would go on to the Tanana, but they have not been able to get the money necessary to carry on the construction. The indications now are very clear that they can not get it. I have read some testimony that indicates why they can not get it; that the great interest that controls this road-not a local interest, but one which has its ramifications all over the United States in every line of industry, including banking, smelting, mining, railroads, navigation, and all that sort of thing-will not permit the building of a railroad through there until it wants it done. It will not permit any company to get the capital necessary to put a road through there until it wants it done.

So it is most desirable that these passes should be used, not for the exploitation of particular property but to provide the widest, the broadest, and the most comprehensive development for this great inland territory.

On the Kuskokwim River and on the Yukon River and their tributaries there are about 5,000 miles of water transportation; but in order to avail of that water transportation vessels must come away around through the ocean and through the Aleutian Islands, and up into the Bering Sea, I think, about 2,000 miles, to Nome, and then they must connect there with boats going up the river that can go up and come down only about three months in the year. For instance, to get to Fair-banks, this point in the interior [indicating on the map], they must ship their goods by vessel away around to Nome and then transfer to boats going up the river. If a vessel leaves and gets to the mouth of the river a little bit late, transportation being about to close, your goods may get up to some point on the river and then be frozen in there, and you must until the next season before they can go on up to Fairbanks. On the other hand, if your products start out from Fairbanks and get frozen in along the river somewhere below, they may have to wait until the next season to get up.

So you can see the difficulties under which access to the interior is secured. The building of a railroad from some point on this coast to the Tanana or the Yukon will furnish a transportation route the whole year around into the interior country, because these roads will not be interfered with by snow nearly so much as are some of the roads in this country.

With reference to rates, my friend from Mississippi, referring to this almost inaccessible point away over here at Chesana, one of the most inaccessible points on the face of the earth [indicating on the map), spoke about the high rates for getting products in. That does not apply to the coast harbors. points have water transportation from Seattle, Tacoma, and San Francisco the whole year around, the voyage being about 1,000 miles in length. The rates are not very high. We all know that water transportation is cheap under ordinary conditions. The high rates in here [indicating on the map] come from the long haul over here and up the river and from the fact that the transportation lines on the Yukon River are practically controlled by the same transportation lines that go around here [indicating on the map], and they can fix almost any rates they see fit to charge. Of course, after you get to a point on the river where you have to take articles into the interior by trail or otherwise, the transportation charge is high. If you have a railroad from some of these harbors to the interior, you will have without question, much lower rates than now. The low have, without question, much lower rates than now. water rates to the coast will be increased only by the reasonable rates for railroad transportation.

Mr. NORRIS. Mr. President-

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. Certainly.

Mr. NORRIS. Is not that also true of the transportation companies that run from the southern outlet there down to Seattle and other Pacific coast points?

Mr. JONES. To a greater or less extent that is true with reference to them. I do not mean to say that the lines here are entirely free from monopoly; but, of course, if we can get railroad lines down here to the coast that are free from monopoly, to that extent we shall have exempted the traffic to the interior from the exorbitant charges of monopoly.

Mr. NORRIS. Yes; but they are still subject to monopoly

between those coast points and the western points?

Mr. JONES. Yes; unless, with equal opportunity to get to we should develop independent transportation or nes. That matter was brought up while the Senator had to be out this morning, and was referred to.

Mr. NORRIS. I shall not go into it now, then.

Mr. JONES. The committee deemed it rather unwise to adopt at this time the amendment suggested by the Senator, believing that if we should give all interests an equal opportunity to get to the coast and meet transportation lines there on equal terms, and have equal opportunities in the ports, that would encourage independent lines to build ships and operate The Senator from Oregon [Mr. CHAMBERLAIN] called attention to the fact that now, in Portland, a company has been organized with the intention, if this bill is put through, of putting on an independent transportation line of vessels. we thought the adoption of the amendment at this time was unwise, although that does not indicate how the members of the committee feel with reference to the Government putting on ships. We thought it best not to complicate at this time the situation with reference to this bill by incorporating in it that provision.

If the Government controls the entrances to the interior, and has a transportation line into the interior, it will build the lines with a view to bringing about the greatest possible development, and not for the purpose of exploiting any particular property there. Every man who has developed an industry or a mine or an interest within the territory served by these railroads will know absolutely that he will be treated upon an equality with every other man. He will know that he can carry on his business upon that basis and in that way.

It seems to me it is absolutely essential that the railroad facilities for the interior shall be dominated and controlled by the Government of the United States. If they are not they will be dominated and controlled by private interests for profit, for the development of their own particular properties and their own particular interests, and for the development of any section of the country that they especially want to have developed.

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Missouri?

Mr. JONES. Certainly.
Mr. REED. I do not want to be understood as at all opposing this bill because I ask this question; but if the argument is sound that if the United States owns this road everybody will be treated fairly, and that it is necessary for the development of this country that the Government shall own the road, to the end that all interests may be treated fairly, can the Senator tell me why the same argument would not apply to the United States as well as to a Territory of the United States?

Mr. JONES. That argument will apply, to a greater or less

extent, to the United States.

Since the Senator is in favor of having this railroad up in Alaska, where very few people live, built by the Government, may I ask him if he would be willing to favor the acquisition by the Government of the railroads in the United

States, where a great many people live?

Mr. JONES. If the Senator had been here when I began my remarks—and I know he would have been here if he could have been-he would understand my position on that point.

Mr. REED. I have been unavoidably absent from the Cham-

Mr. JONES. I know it. I know there are committee meetings that keep Members away from here almost all the time. stated my position clearly with reference to that matter in the first part of my address.

Mr. REED. That was at a time when I was absent.

Mr. JONES. I am not nearly so much shocked now at the proposition of Government ownership of railroads in this country as I was a few years ago.

Mr. President, nature has pointed the way for railroads in Alaska, but has restricted the available routes to two or We must not permit these routes to be controlled by private interests, but must preserve them for all time for the equal use of all the people and interests of Alaska. That can be done only by Government lines constructed directly by the Government and wholly controlled by it.

Mr. President, we have not hesitated in the past to aid in the construction of railroads into new and undeveloped sections. Enormous grants of land have been made for this purpose. In some cases the Nation could have afforded to build the road and turn it over to the country free, if it had held to its own land. These acts have been usually criticized. I have no doubt but that the Congress and the President acted honestly and patriotically in passing and approving them. It is more easy to look back and see mistakes than it is to look forward and avoid them. We are negligent, however, and unwise, and justly subject to censure, if we do not profit by the experience of the past. Knowing what I do now, if we were confronted with the propositions of 50 years ago, I would vote unhesitatingly to build roads to the West and keep our public lands.

I hope the step we take now will not be hereafter regarded as a huge blunder. It is our duty to initiate a wise, broad, and comprehensive system of improvement for Alaska. Let us preserve forever free from private monopoly the two or three avenues by which transportation lines can enter the interior from the magnificent open harbors of the southern coast and keep those harbors and their terminal and dockage facilities open to all, under fair and equal conditions. While recognizing that much of the industrial development in Alaska must be done by large aggregations of capital, let us see to it that the trunkline railroads are built so as to promote general development and not private exploitation, and that every interest, great or small, shall have exactly the same opportunities when it reaches this railroad line. Let us see to it that water transportation lines are not destroyed or wholly dominated by railroad interests, as they have been in other sections, and as they are to a certain degree in Alaska to-day. Railroad and water lines should complement each other where not active competitors, and made to serve the interests of the Territory and the people.

All this can be secured only by Government lines. This is a duty and function of government that we must not in this case delegate to private interests. The people have a right to expect us to regard their interests as a whole, and we must not

betray their trust.

Mr. President, Alaska is a continental domain of over 375,000,000 acres, owned almost wholly and absolutely by the United States, with unquestioned authority and abundant wealth and credit to do whatever is necessary to develop its vast agricultural resources, and make available to the industry and energy of our citizens the incalculable mineral wealth of every character and description. Railroad transportation is the first necessary step to people that land with a brave, hardy, and industrious race who in time of peace will add to the Nation's wealth, and in time of war be a mighty bulwark of defense. With the construction of main lines on a broad and comprehensive plan, securing to every individual equal opportunities and to each section service without discrimination, and connecting the interior water systems with the open ports in the south so that commerce, trade, and travel may flow be-tween that Territory and the people of the United States from the year's beginning to the end, will come an expansion of the fishing and fur industry, the peopling of the agricultural sections with hardy pioneers raising cereals, grasses, horses, cattle, sheep, reindeer, and other valuable animals not only for local needs but for export, the discovery of new mines of gold, copper, silver, iron, and other minerals, together with coal of the highest grade, not only for consumption in the local industries but also for the operation of our Navy and the maintenance of our national defense, and an increase in the already large trade between that country and this that will mean prosperity to the people there and stability and wealth to the people here

The result will confound those who anticipate a confirmation of their views of the evils of governmental activities, and will bring intense satisfaction to us who believe it to be wise statesmanship and patriotic wisdom to use the Nation's wealth to make available its natural resources under equal conditions to Our action on this matter will mark an epoch in constructive legislation, will mean real and substantial benefit to the individual citizen in the present and the future, will promote contentment and satisfaction among the people, and will add

to the stability and glory of the Republic.

I desire to ask unanimous consent to have printed at the conclusion of my remarks a copy of Senate bill 133, which I introduced, a copy of the bill reported by the subcommittee to the full committee of the Senate, and a copy of the bill as reported by the full committee to the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is given.

The matter referred to is as follows:

A bill (S. 133) to provide for the construction of railroads in Alaska, and for other purposes.

and for other purposes.

Re it enacted, etc., That the President of the United States is hereby authorized, through the Alaska railway commission, hereinafter provided for, or otherwise, to cause to be surveyed and located such main lines for railroads from points on tidewater to the interior as will, in his judgment, best promote the settlement of Alaska and develop its resources, together with such branch lines as he may deem necessary; and when such line or lines are located he is hereby authorized to cause to be constructed, completed, and operated thereon (until otherwise provided by Congress) a standard-gauge railroad or railroads, with the necessary equipment, docks, wharves, and terminal facilities. That the President is authorized for the purposes aforesaid to employ such persons as he may deem necessary and to fix their duties, powers, and compensations.

persons as ne may deem necessary and compensations.

SEC. 2. That to enable the President to construct the railroad and works appurtenant and necessary thereto, as provided in this act, there is hereby created the Alaska railway commission, to be composed of not more than five members, who shall be nominated and appointed by the President, with the advice and consent of the Senate, and who

shall serve during the pleasure of the President, and one of them shall be manned by the President as chairman of said commission. Of the seneme of the president as chairman of said commission. Of the science of engineering, and may be officers of the United States Army and Navy from the active or retired lists. Said commission, of the science of engineering, and may be officers of the United States Army and Navy from the active or retired lists. Said commission and the science of the commission of the same shall have been otherwise fixed by Congress. In addition to the members of said commission the President is hereby authorized, through the said commission, to employ in the ascertainment of the operation of the same, any of the engineers of the United States Army at his discretion, and law with the commission of the same and the said of the said commission, subject to the approval of the President. The official salary from the amount of salary or compensation provided for or which shall be fixed under the terms of this act. Said commission shall in all matters be subject to the direction and control of the President, and required either by law or by the order of the President, full and complete reports of all their acts and doings and of all money received and charles of the said of the sai

(Subcommittee print.)

A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Be it enacted, etc., That the President of the United States is hereby authorized, through the Alaska railway commission, hereinafter provided for, or otherwise, to cause to be surveyed and located such main

these for railroads from points on tidewater to the interior as will, in his judgment, best promote the settlement of Alaska, develop its rote the Army, Navy, and other Government services; of troops, arms, and munitions of war; of the mails, and for other Government and public mess, together with set the mails, and for other Government and public mess, together with set the constructed completed, and the control of the co

terms as may be fixed by the commission and approved by the Presi-

terms as may be fixed by the commission and approved by the President.

Sec. 6. That the Secretary of the Treasury is hereby authorized to borrow, on the credit of the United States, from time to time, as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditure), the sum of \$40,000,000, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States, in such form as he may prescribe, and in denominations of \$20 or some multiple of that sum, redeemable in gold coin at the pleasure of the United States after 10 years from the date of their issue, and payable 30 years from such date, and bearing interest, payable quarterly in gold coin, at the rate of 3 per cent per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority: Provided, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all the citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$1,000,000, to be used for carrying out the provisions of this act, including the expense of preparing, advertising, and issuing the bends herein authorized, to continue available until expended: Provided, That so much of the said sum of \$1,000,000 as shall have been expended shall be reimbursed to the Treasury out of the first proceeds of the sale of said bonds.

Sec. 7. That there is hereby created a redemption fund in the United States Treasury, to be known as the "Alaska railways redemption fund," into which shall be paid 75 per cent of all moneys derived from the sale or disposal of any of the public lands in Ala

(Calendar No. 53.)

A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

A bill. (8. 48) to authorize the President of the United States to locate construct, and operate railroads in the Territory of Alaska, and for other purposes.

Be it enacted, etc., That the President of the United States is hereby authorized and directed to cause to be located such main lines for railroads from points on tidewater to the Interior as will, in his judgment, best promote the settlement of Alaska, develop its resources, and provide adequate and suitable transportation for coal for the Army, Navy, and other Government services; of troops, arms, and munitions of war; of the mails and for other Government and public uses, together with such branch lines, feeders, sidings, switches, and spurs as he may deather the settlement of the suitable state of the suitable state of the settlement of settlement of the settlement of the settlement of settlement of the settlement of the settlement of settlement of the settlement of settlement of settlement of settlement of the settlement of settlement of settlement of settlement of settlement of settlement of set

merce laws relating to the transportation of employees and their families shall be in force as to lines constructed under this act.

SEC. 4. That any line of railroad designated and constructed under the provisions of this act may connect with the line of any railroad existing or which may hereafter be constructed in Alaska, or with any steamship line for joint transportation of freight and passengers, and in such case the lines thus connected shall be operated as a through route with through rates upon a fair and reasonable apportionment of revenue and expenses.

steamship line for joint transportation of freight and passengers, and in such case the lines thus connected shall be operated as a through route with through rates upon a fair and reasonable apportionment of revenue and expenses.

SEC 5. That the Secretary of the Treasury is hereby authorized to borrow, on the credit of the United States, from time to time, as the proceeds may be required to defray expenditures authorized by this act—such proceeds when received to be used only for the purpose of meeting such expenditure—the sum of \$40,000,000, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States, in such form as he may prescribe, and in denominations of \$20 or some multiple of that sum, redeemable in gold coin at the pleasure of the United States after 10 years from the date of their issue, and payable 30 years from such date, and bearing interest, payable quarterly in gold coin, at the rate of 3 per cent per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority: Provided, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all the citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, be sum of \$1,000,000, to be used for carrying out the provisions of this act, including the expense of preparing, advertising, and issuing the bonds herein authorized, to continue available until expended: Provided, That so much of the said sum of \$1,000,000 as shall have been expended shall be reimbursed to the Treasury out of the first proceeds of the sale of said bonds.

SEC 6. That there is hereby created a redemption fund in the United States Treasury, to be known os the

Mr. POINDEXTER. Mr. President, the Senator from North Dakota [Mr. McCumber] informs me that he is prepared to speak at this time. In view of that fact, I will yield to him and will submit what remarks I have to make upon the bill

after the routine morning business to-morrow.

Mr. McCUMBER. If the Senator from Washington desires to go on I should prefer that he would do so. I will take the floor now only with the understanding that it is his desire that I should proceed.

Mr. POINDEXTER. I yield that the Senator may proceed

Mr. McCUMBER. Mr. President, I wish very briefly to express on this most important measure some of the reasons why I am not prepared as yet to raise the socialistic flag as a party banner under which I am to operate in the future, and to present to the Senate certain reasons against even the advisability on the part of the Government, by means of an appropriation or other capital, for pressing a railroad system in Alaska at the present time.

This bill presents two features, one of which is obnoxious to my conviction of governmental functions and duties, and the other of which presents no justification for its enactment.

The bill is the first great step into the realm of paternalism. It is the beginning of the paternalistic or socialistic idea of complete Government ownership of all public utilities. It is a step from which there is no receding. Each step into the pater-nalistic field will necessitate a further step for the protection of the first. I can not understand how anyone can fail to draw the same conclusion which I draw with reference to the full import and meaning of this great step. Neither can I understand how anyone who votes for it, who supports it, can by any possibility of reasoning raise his voice against paternalism. It inevitably leads to this end. Government ownership of Alaska railways must necessarily ultimately mean Government ownership and operation of the coal deposits, which alone, if anything, can justify or excuse it, will justify the expense of the construction and operation of this contemplated railroad. And when the Government owns and operates the roads, owns and operates the mines solely for its own use and profit, introduces paternalism to that extent, what is left for the public which is to put up for the whole expense? If I believed in Government ownership of railways, steamship lines, and all public utilities, I certainly should support this measure as the beginning of that new governmental policy and function. But believing that the prime function of government and its one duty is to govern people who do produce, leaving all production in the hands of the people, I can not but view with extreme disfavor this first socialistic step.

No one can point to a single fact that will justify Government ownership. There is no question but that in every instance it costs the Government from 50 to 100 per cent more to perform any given work than it costs private individuals to accomplish the same result. We have abundant proof of this in the fact that there is not a single irrigation project in the United States that has not cost from 50 to 200 per cent more than even the Government estimate. And as the people are the Government, these facilities cost the people from 50 to 200 per cent more than they would cost the same people to accomplish the same thing through private effort and cooperation. It necessarily follows that the charges for the use must be proportionately higher to meet the investment when construcproportionately higher to higher the investment when construc-tion or operation is carried on by the Government. And the people themselves must pay this higher price for its use. If they do not pay it directly, they must pay it in added taxes. Nor do we stop there. It costs the Government of the United States fully 100 per cent more to operate any line of business

than it costs any private concern to operate a similar line of business. And as the operating expenses must be paid out of the earnings, the cost to the people must again be practically doubled. Therefore, instead of Government ownership and operation being a benefit to the people, it is a curse to them and not only adds so much more to their burdens but also deprives them of their lawful opportunities. The fact that the burden is distributed over all the people does not make it less a burden.

It is estimated that these contemplated railways will cost from \$40,000 to \$45,000 a mile. Making an allowance for the usual difference between Government estimate and Government fulfillment, an allowance that can now be figured with considerable accuracy by reason of many opportunities to make the computation, we will find that these railroads will cost us from \$75,000 to \$100,000 a mile—a wholly unnecessary burden upon the people, and a burden from which they will never receive any proper return upon the investment.

Government ownership of railways, followed by Government ownership, as it must be, of other public utilities means that the army of employees, organized as they always will be, will become the complete masters of the Government and the Government but the subservient tool to the interests of this great That army will be powerful enough to dictate every policy of Government. No man in any district in the United States would be strong enough to make his race as a Member of Congress if his ideas of the value of the wages of these Government employees did not correspond with their idea of the worth of their services. Whenever the Government puts itself in the position of owner of public utilities, it becomes the prev of an organized class of people, which will result in legislation against the mass of the unorganized people of the country.

We can not deceive ourselves as to this final result. only question is whether we want such a condition. If we do want it, then we ought to raise the socialistic flag and candidly admit that we are serving that army. The greatest injustice in the labor field of to-day lies in the disproportion of labor wages. The wages of one class, through organization, are so far above those of the ordinary laborer, so far above the farm laborer, that the latter always suffer an enormous disadvan-The report of the Agricultural Department of 1912 shows that the average farm earnings for farmer, wife, and adult laborer is scarcely more than 20 cents net per day, as against the more than \$6 per day of the ordinary mechanic, and this without reference to the smaller number of hours in the latter trade. The farmer and wife and children who receive less than 25 cents per day net for their labor must purchase products enhanced twenty times his wages.

It is well known that the wages for clerical service in the departments in Washington are a trifle more than double the wages of the same kind of service in the same lines of business outside of the Government.

Mr. REED. Mr. President

Mr. McCUMBER. Now, apply this to the 2,000,000 people already engaged by private enterprise in public-utility trades and business and you can get some idea of the injustice that must necessarily result to the balance of the people

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield, Mr. President.

Mr. REED. The Senator has made a very interesting statement to the effect that the wages paid to Government employees in Washington are a trifle less than twice the amount paid for similar work elsewhere. I wish the Senator would tell us where that condition is to be found.

Mr. McCUMBER. In every department in the city of Washington where the average of the clerks are now getting over The average price paid now throughout the \$1,200 per year. country is less than \$600 per year for the same kind of serviceless than \$50 a month,

Mr. REED. I do not want to interrupt the Senator too much; he is speaking largely from memoranda; but I will have to challenge that statement, if he will permit me to do it,

Mr. McCUMBER. I will allow the Senator to challenge it, but that will not change my conviction of the fact that it is but that will not change my conviction of the fact that it is true, because I have made an estimate of the prices paid for similar labor throughout the country, and I find that it is a trifle less than one-half of the amounts paid by the Government.

Mr. REED. Mr. President, of course the Senator wants to be accurate. I know that.

Mr. McCUMBER. Certainly.

Mr. REED. I beg to suggest to him that it will be necessary to revise his figures very thoroughly. I will take the matter

to revise his figures very thoroughly. I will take the matter of the pay of the Capitol police. It is probably not equal to the pay given in any of the large cities of our country.

Mr. McCUMBER. Yes; but that is not the case in the de-

partments at all.

Mr. REED. I started—

Mr. McCUMBER. I spoke of the salaries paid in the departments, and I must ask the Senator to keep within the limits of my assertion if he desires to challenge my statement.

Mr. REED. The first statement of the Senator was, I thought, that broad. I will take the matter of the pay of stenographers in the city of Washington. A first-class stenographer here gets from \$900 to \$1,200 a year.

Mr. McCUMBER. Where? Mr. REED. In the city of Washington. Mr. McCUMBER. In the departments, the Senator means?

Yes. Mr. REED.

Mr. McCUMBER. From \$1,200 to \$1,400 a year.

Mr. REED. The Senator is in error. There are plenty of

them who get only \$900 a year.

Mr. McCUMBER. And plenty of them get over \$1,400 a year. Mr. REED. There are a few who may be experts who get that much. The same class of work in the city where I live when I get home occasionally, when permitted to go-receives fully that much pay. On the average, a good stenographer makes fully \$1,200 a year, and many of them more.

Mr. McCUMBER. I can get just as good in my part of the

country for \$50 a month.

Mr. REED. Many incompetent ones, of course, get less, the

pay grading down.

Mr. McCUMBER. I am afraid we are getting a little bit

from the main subject.

Mr. REED. The pay received by clerks to Senators is, in my

opinion, on an average, less than men of the talent required would receive in any first-class business house.

Mr. McCUMBER. Once again, Mr. President, the Senator has abandoned the field in which I said the prices paid are double what they are in private lines of business. Senators secure for clerk and clerks to committees the very best persons they can find in their States, and they are not under the departments at all.

Mr. REED. The pay received in the Government Printing Office is about on a level with the pay received in the six or seven first-class cities of the United States. That is my recollection from some investigations that were had here at the time the Government Printing Office was under discussion. The pay received by clerks in the Pension Office, in my opinion, is less than would be paid for similar services and similar experience in any first-class business house,

Mr. McCUMBER. Mr. President, I am afraid I can not yield to the Senator to make an address upon his view of a question in which I differ so materially, and in each instance it is but

an assertion.

All the Senator has given is an assertion. Mr. REED.

Mr. McCUMBER. But the Senator from North Dakota has

Mr. REED. Oh, certainly, Mr. McCUMBER. The Senator from North Dakota will yield the floor to the Senator from Missouri either to correct a statement or to call attention to any statement that he thinks is erroneous, but if the Senator asks to divert me from the discussion of Alaskan railways and to take up an hour upon this one little side issue, I am afraid I can not yield the time.

Mr. REED. I should like to ask, for my information, as I go about looking it up, with what part of the country has the Senator compared the salaries paid here in Washington?

Mr. McCUMBER. Mr. President, I do not need to go out of the city to compare the salaries. If the Senator will go down here to one of these department stores and ascertain what they are paying for their girl clerks, he will find it is from four to five dollars per week, and if he will compare that with the hundred dollars a month paid by the Government he will get some idea of the difference between the qualifications and pay of the clerks in one of the department stores and the amount paid by the Government. But I will admit that that presents probably the two extremes and not the average.

If I go down here in the city and learn the sums they are paying for the same kind of clerks in the offices of patent attorneys and other attorneys' offices for stenographers and clerks who do the same kind of work that is done by the Government, I will find that they are paying about one-half. If I go into the Middle States and make the same comparison, I will find that the same labor is employed for about one-half and the hours of service are very much longer. But I do not want to take too much time in debating a disputed question on that

particular point.

Mr. REED. I hope the Senator will permit me to make this observation: Of course, if he made up his figures by taking the wages of girls in department stores and comparing the sums paid them, which notoriously, all over the country, are starvation wages

Mr. McCUMBER. I stated that those were the extreme

Mr. REED. And are a disgrace to our civilization; and if he overlooked also the fact that the ladies are not required in the department stores to pass examinations and to show certain educational qualifications, and that is the kind of comparison which runs through his figures, I think it is easy to understand it.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from New Hampshire?

Mr. McCUMBER. I yield to the Senator.
Mr. GALLINGER. If the Senator will permit me, I want simply to suggest to the Senator from North Dakota that in stating that the average wage paid in the department stores of Washington is from four to five dollars a week, it is considerably below the real average wage paid, as has been shown in hearings that we had when I was chairman of the Committee on the District of Columbia. They are inadequately paid, beyond a doubt, but the wage is not as low as the Senator from North Dakota has stated.

Mr. McCUMBER. I have known of their attempting to get work where the wages offered them have been even as low as \$4

a week

Mr. President, as an indication of what I have been saying I call attention to the arbitration made but a short time ago by the Interstate Commerce Commission of wages of railway employees. The wages were advanced. The railways defaulted in their dividends. They have now made a demand for an increase of freights. That demand will be allowed. The public the ordinary laborer whose wage, hour for hour, is not one-half of that of railway employees-must pay this added freight. The farmer must pay it out of his meager net earnings. No Interstate Commerce Commission sits in judgment upon what he shall receive for his products, for his labor; but, on the contrary, lest he might make enough to approach within 100 per cent of that received by the railway employees, our gates are thrown open to the importation of all the agricultural products of the world. This is but one example of what we may expect from Government ownership of railroads. The unorganized populace will be compelled to pay enormous tribute to the organized sections.

Let us double, as we probably would in a very few years, the labor expense of operating all the public utilities in the What would be the cost, then, to the balance United States. of the people? We would drive every business into a condition in which it would have either to ask for a receivership or to come also under the governmental arm, and the public would finally become but the servants employed by the Government

itself.

No one will deny that we can not expect the same personal interest, the same curtailment of expenses, the same unfailing watchfulness when the Government has to pay the bills as when we must pay them ourselves. Government ownership of railways, telegraph lines, and other public utilities means bad service, extravagance, and a menace to the rights of all the

If it is said that I am too pessimistic about the power of a great organization in the shape of employees under Government

ownership of railways controlling Congress and governing its action at the expense of the people in general, I need only call attention to the fact that where the influence is not pressed directly upon Congress in the shape of a demand for a raise in wages, yet it is so great that this very Congress has passed an act subversive of constitutional right and privilege, declaring the exemption of one class of American people from the same laws and responsibilities that are imposed upon other classes, and an attempt to revive the same obnoxious doctrine during the present session.

If Congress becomes so subservient to class influence with its present infinitesimal power and organization as compared with that class power whenever the Government becomes the direct employer, what must we expect under Government ownership of railways, telegraphs, telephones, water supply, and every other

public utility?

These reasons alone are sufficient to justify me in voting against the measure.

NO NECESSITY FOR GOVERNMENT RAILWAYS IN ALASKA.

Leaving the question as to whether the Government should enter into private business in competition with its citizens, the question arises whether or not there is any justification for the construction of these contemplated lines of railway. There has never been a time in the history of this country since railroads began to be built when there has not been sufficient private capital and enterprise to build every railroad wherever the prospect of development would justify the construction of a line. The same rule holds good as to Alaska. Capital will seek investment wherever it can find an opportunity for a proper return. The Government can not, however, tie up the resources of that great country and expect to make any railroad pay. Alaska is essentially a mining country at the present time. The agricultural industry is infinitesimal. There is no justification for any development of agriculture there further than that which is necessary to support its own population. If the railroads which are already constructed can not, because of the withdrawal of lands from acquisition by the people, be made to pay running expenses, if all projected lines have been abandoned because of this action, if half the roads have already become bankrupt, how is it possible for the Government to operate a railroad line which will cost twice as much as a privately constructed railroad, which will cost about twice as much to operate as a privately constructed railroad? How is it possible for the Government to make such a railroad pay?

But you say the Government can open up these lands. Mr. President, I reply that if the Government can open up the lands the Government will not need to build the railways. Private capital will build them and operate them just as rapidly as the development of the country will justify their construction and

operation.

The figures which we received in the opening address on this subject, figures culled from the report of the Alaska Railroad Commission, are deceptive. The purpose of their quotation is that we may draw an inference that these products are from sections of Alaska that have no proper transportation facilities. The total of mineral products—including coal, gypsum, marble, and tin, sea food, and furs—from 1868 to 1911 were \$429,500,000 in round numbers. Of this the fisheries alone were \$214,000,000, or one-half of the entire product. I do not anticipate that it needs railroads to get to the fish. The entire gold and silver product was \$123,000,000 in round numbers, of which the Yukon Valley produced \$74,000,000 worth. And the Yukon is navigable its whole length. The copper was all produced on the coast, and the sea fur-bearing animals were along the coast. So that all but a few million dollars worth of all of these products came from those portions of Alaska now having water or railway transportation facilities.

But you say that you want to get at some of the gold in the interior of the country. Why should the Government go into the exploitation of the resources of a country for the purpose of developing its gold fields? We can not eat gold. It can not be used for clothing. The great proportion of it can only be used for coinage. We simply add so many dollars to the bulk of the coin of the country or of the world, which to the same extent diminishes the purchasing value of the same coin. You might as well say that it would be profitable for the Government to go into a territory and cut down the trees and make yardsticks, that we may have a greater number of sticks for measuring our goods, as to suppose that the people get a direct benefit by the gold mining, or at least that portion of it which is to be used for coinage only. The man who mines it, of course, gets the benefit. If we increased the product of gold—if we doubled it to-morrow—there would be no question in the minds then of any Senator but what we would also almost double the price of every commodity. So the world

itself would not be benefited. The man who has dug out the gold and can immediately have it made into gold dollars re-ceives the benefit. I simply make the suggestion that there is nothing in the Government opening up gold mines alone in that

section of the country.

Mr. President, I have been very much impressed by an article written by W. D. Boyce, who is the owner of two or three Chicago papers. The principal one, I think, is the Chicago Blade. He is an extensive traveler, and has been all over Alaska; he has written up the conditions and the history of that country. His book, lately published, on South America, I think, is one of the most instructive that has ever been issued. The little pamphlet he has printed, after traveling 8,000 miles over Alaska and for the very purpose of presenting the question of the advisability of the construction of railroads through that country, is certainly worth reading. I want simply to quote a few paragraphs. I want first to give a couple of para-graphs under the heading of "A statesman's indifference." The author says:

The Government at Washington at that time-

Referring to the date of the purchase of Alaska-

Referring to the date of the purchase of Alaska—

The Government at Washington at that time knew about as little regarding the Pacific coast, and especially the northwest Pacific, or Puget Sound country, as it does about parts of Alaska and the needs of the people of the whole of Alaska to-day. Indeed, the great and wise Daniel Webster stated frankly in the United States Senate that he didn't know anything about the country west of the Rocky Mountains and, further, he "didn't give a d——n."

That is about the position, through lack of information, taken by the last national administration with reference to Alaska. If each Member of Congress could take six months or a year off and travel from 15,000 to 20,000 miles in Alaska, he would intelligently understand that country's needs. But about the time he had fitted himself to legislate for the 32,060 white people (equal to about one-sixth of the population of the constituency of a Member of Congress) he might fail of reelection and the new Representative or Senator would have to do it all over again or guess at it.

He then speaks of the "bottling up." of the coal fields

He then speaks of the "bottling up" of the coal fields.

He then speaks of the "bottling up" of the coal fields.

Coal is found in several explored sections of Alaska, ranging in quality from lignite to anthracite. As only one-fourth of Alaska is geologically known, and only a very small part of this area by detailed surveys, any estimate of the enormous quantity of coal available is purely speculative. The United States Geological Survey, in a recent publication, states that it is probably safe to say that the minimum estimate of Alaska's coal resources should be placed at 150,000,000,000 tons and that the actual tonnage may be many times that amount. This estimate, stated to be a minimum one, would provide for an output of 10,000 tons daily—the present output of all the coal mines in British Columbia—for over 40,000 years. This being true, I can see no good reason for reserving, conserving, or "bottling" it up. The coal to-day being used by the United States Government for the supply of our naval and revenue vessels in Alaskan waters and as fact for the northern Army posts is brought from Australia in Norwegian vessels at a cost of about \$15 per ton, while the billions of tous of Alaskan coal remain undeveloped and tied up by our Government's policy.

I come, now, directly to his report on "Alaska's railroadspresent and future policies." He says:

present and future policies." He says:

Seriously speaking, the 32,000 white people in Alaska are scattered over a territory one-fifth the size of the United States. The winters, except for a small strip of country along the southeast coast—affected by the warm Japan current—extend over eight months of the year. Nevertheless, Alaska is a wonderful country in many ways, and I have never met with a braver, stronger lot of men—two-thirds of the population are mea—any place in the world. They come from everywhere, but especially from the Pacific coast and gold-producing States; some from Australia, Canada, and the coid countries of Europe.

Keep in mind all the time, however, that it is over 1,500 miles from Ketchikan, the southeast corner of Alaska, to Cape Prince of Wales, on Bering Strait, northwest of Nome. And again, it is over 1,500 miles from Unalaska and Dutch Harbor in the southwest corner of Alaska, to the Arctic Ocean north of Fort Yukon.

While Alaska is not equal to a country 1,500 miles square, it is just as difficult to serve from a transportation standpoint, and nearly all of its service must be by rail as compared with water, except a few fishing towns and ports on the south and southwest coasts, as the rivers as well as the Bering Sea and Arctic Ocean are frozen for eight months and sometimes more each year.

I traveled over \$,000 miles in Alaska and found the population of 32,000 whites pretty evenly divided between the inland and coast, and was impressed with the impossibility of our Government acting fairly toward the whole of Alaska, undertaking the question of transportation, to say nothing about the enormous expense and loss if attempted. As near as I can calculate—

And this is what I desire to call to the attention of the Senate

And this is what I desire to call to the attention of the Senate

it would cost \$200,000,000 to serve 20,000 of the 32,000 Alaskans with railroads at an annual loss of \$30,000,00 a year or equal to \$1,500 a year pension for each man, woman, and child brought within the transportation belt. from one who has made a most careful investigation-

Under another heading, "Impossible to serve them all," he explains this.

explains this.

Of course, for \$50,000,000 5,000 people could be served, but the rates and percentage would remain the same, and the remainder of the people, entitled to equally as good treatment, would be disappointed, and they would have a just cause to complain.

Now, as to traffic or tonnage to be developed by the Government in spending millions of dollars for railroads. It seems doubtful if any great amount of freight could be secured aside from coal, and the cost of mining the coal, with labor in Alaska from \$4 to \$6 a day, the quality of the coal, and the long water haul after the railroad has

brought it to the Alaskan coast—Alaska's coal is in the interior—must all be considered. Always remember that steam coal at Seattle, the nearest market, 1,200 miles distant by water, is selling at about \$3 a ton; that the only thing Alaskan timber is really good for is to be used as firewood, and that the whole northwest Pacific coast has an abundance of such fuel; and, furthermore, that the Panama Canal, from a commercial standpoint, is expected to supply California with cheap coal in order that vessels may have a cargo both ways and reduce the carrying charges on American bottoms using the canal and loaded with Pacific coast fruits, grains, and lumber for eastern and European ports.

If the Alaskan coal fields were fully opened up and were as extensive and as cheap to mine as claimed, and the rail-and-water haul as cheap as on the Atlantic coast, then less coal would go through the Panama Canal and there would be empty bottoms going west and double charges

Canal and there would be empty bottoms going west and double charges for cargoes coming east.

However, I am getting away from Alaska, though not from what affects Alaska. Cut off as it is from the United States, with Canada in between, but with a splendid navigable ocean and an inside course back of islands, which enables vessels to sail from Seattle to Skagway on waters equal to a big deep river that widens out to lakes here and there, the coast-town transportation by water from the southeastern port of Ketchikan to Seward, 800 miles to the northwest, is ideal and open the year around. On this coast line of 800 miles we find more or less prosperous towns, with 50 per cent of the total population of Alaska.

In other words, that 50 per cent now have their water transportation and their ports that are always open.

Nearly ever coast town that has a port open the year around is claiming to be the only point from which to reach the interior of Alaska. It is perfectly natural that each of these points should wish to benefit from the building of a railroad, although the deadest towns I was in, like Skagway, Cordova, and Seward, had railroads. Only while the money was being spent building these roads did the towns show great activity.

There are eight railroads in Alaska. Six have failed, and only four are being operated at all, and but part of the year. I will tell you about the only two that have never gone into the hands of a receiver, although they have never paid the stockholders anything.

It is well, Mr. President, for us to stop here one moment and contemplate what this means. With the assured knowledge that it will always cost the Government a great deal more to build and operate a railway than it will cost any private corporation, we yet find that when operated with all of the economy of private enterprise six of them have already gone into bank-

A MONOPOLY THAT MAKES NO MONEY.

The White Pass & Yukon Route, from Skagway, Alaska, to White Horse, in the Yukon territory, Canada, is 110 miles in length. Twenty miles of the line is in the United States. In 1897, when the Dawson placer deposits were discovered, thousands of men sailed from all over the world to Skagway, winter and summer alike, and hundreds lost their lives on the White Pass through snowslides and exposure. Then this railroad was quickly and well built by English capital and the trail destroyed by blasting for its construction. There followed a rate of 20 cents a mile per passenger, with any old rate for freight. The same rates are still in effect, and, as the company owns the boats on the Yukon River for some 1,200 miles, passengers and shippers are up against the same monopoly of internal traffic, both in the Yukon territory and Alaska. Yet even at the prices named the company is unable to pay a dividend.

Even at the passenger rate of 20 cents per mile

Even at the passenger rate of 20 cents per mile.

The trains and boats are good, the best to be found anywhere in Alaska, and passengers are treated like human beings, but there is not enough business.

The trains and boats are good, the best to be found anywhere in Alaska, and passengers are treated like human beings, but there is not enough business.

And there will not be enough business to make this contemplated railroad pay. Taking the next railroad:

The Copper River & Northwestern, the only other road in Alaska not in the hands of a receiver, is owned and operated by the Guggenheims and Morgans, and runs from Cordova to Kennicott, 196 miles, to reach a number of rich copper properties, especially the Bonanza group of mines, owned by the same interests. The Copper River & Northwestern road is well kept up, and is the only standard 4-foot 8½-inch gauge road in Alaska. All the others are narrow gauge.

Next, we have the many times "busted." failed, and confiscated Alaska Northern. It starts at Seward, and is built north 72 miles to Nowhere. This is known as the Frost road, not because it was such a "frost." or is located in Alaska, but on account of the promoter's name being Frost. It was built by Canadian capital, and broke the bank in Canada that backed it. Frost himself has but recently been tried criminally by the United States courts. However, he was acquitted, and although his reputation as a promoter is quite bad, it is generally believed he was so handicapped by United States Government regulations, and the conservation of coal lands he hoped to open in Alaska, that he never had a chance to win, even if on the square.

Owing to the inability of this road to pay the United States Government ax of \$100 a mile each year it has been closed down and about 1,000 people in Seward and along the lines completely put out of business. The road could not earn the tax. The receivers for the railroad company offer to let the people living in Seward and along the line operate it free of rent for tracks and equipment, but the United States Government said, "No taxes, no run," and there you are. No wonder they sing all over Alaska the song, "Bottled-up Alaska"!

The Nome & Seward Peninsula Railroad, the most northe

built long before there was really anything for them to haul, unless, like the Guggenheims and Morgans, they created their own tonnage by an investment many times the cost of building the railroads.

My theory is—

Here is the conclusion of a careful man, after investigation, with no interest to subserve one way or the other

that if Alaska really contains the ore and coal to warrant building rallroads, and our Government will take the "lid off" so that capital can invest with reasonable hope of returns, the railroads will follow as a natural result. Otherwise it is my conviction that they should never be constructed just to accommodate and enrich a few people or boom a town at the expense of the people of the entire United States.

I think, Mr. President, that that is a concise, true, and accurate account of railroad conditions.

Mr. DILLINGHAM. Will the Senator tell me from whom he is reading?

Mr. McCUMBER. W. D. Boyce, who is the proprietor and editor of the Chicago Blade and a number of other Chicago papers, and who, as I have stated, has just made a trip of over 8,000 miles in Alaska for the very purpose of arriving at some

conclusion upon this question. Another one of the reasons given, Mr. President, for the construction of this railroad is that it will develop the great agricultural interests of Alaska. Just for whom they are to o developed I have not yet ascertained. If the agricultural products are to be hauled upon the railway, they must be exported somewhere, and I can hardly conceive of exporting cats, wheat, and barley, even if it be possible to raise them in Alaska at all successfully, with labor which costs from \$4 to \$6 a day and with their long winters, when in the interior of the United States and in the open markets of the world our oats are selling at 23 and 24 cents a bushel, our barley at about 32 cents a bushel, our wheat at sixty-odd cents a bushel, and our flax at a price only about half of what it was worth a few years ago. Mr. President, there can be no possible excuse for building railways for any agricultural interest in Alaska. The only agricultural interests that can be subserved there are the little patches of potatoes and vegetables that can be utilized in the mining camps. I want to give an estimate of the agricultural interests in Alaska from the same author. "Farming in Alaska." he says: Under the head of

ests in Alaska from the same author. Under the head of "Farming in Alaska," he says:

"Gold is where it is found," is an old and true saying. Finding it does not, however, depend on climate, soil, elevation, or favorable natural conditions. This is not true of farming. Agricultural products require congenial surroundings, although through the development of seed and intelligent handling of soil and crop we are now growing grains, fruits, and vegetables in many parts of the world heretofore unthought of, Man can not eat gold, timber, or coal. He must have foodstuff, plenty of it and cheap.

Before I went to Alaska I knew about the gold and fishing and furs and shooting, but was ignorant as to the agricultural possibilities and products. After covering thousands of miles and seeing nearly every developed spot where anything that grows to eat is at its best. I am satisfied that it is a poor country for a farmer, and always will be. Should you succeed in getting a small patch cleared up at a place where there was a "boom on" you could get fancy prices for one or two years until the boom was over. Except for the long summers and nightless days in Alaska it would be impossible to grow anything. No warmth comes from the soil or beneath the surface. As far down as a shaft has ever been sunk, over 2.000 feet, you find ice. This ice was not made by freezing from the top down. For millions of years the country has been built up from the bottom, ice on ice that never thawed out in the summer. The moss that grows nearly everywhere is a complete protection from the sun, and when you sink a pick through it you think you have struck rock. Clear off this moss, other vegetation, or scrub timber and you have the frozen earth. The sun will draw out the ice and frost about one foot the first year. Break this up and the next year it thaws out deeper, until after a number of years the frost, on account of the long days, will disappear by June 1 down 2 or 3 feet.

Where alfalfa has been tried it turns yellow as soon as the roots strik

Think of it-\$125 per acre for land up in Alaska, a country a fifth as large as the United States, with people sparsely settled all over that country, when you can buy better land in a thickly settled country, where you have a near market, for from \$40 to \$75 an acre.

Mr. DILLINGHAM. May I interrupt the Scuator? Mr. McCUMBER. Certainly.

Mr. DILLINGHAM. I wonder if Mr. Boyce, in his discussion of Norway and Sweden, calls attention to the influence of the Gulf Stream, after passing the coast of Great Britain, upon

agriculture in those countries?

Mr. McCUMBER. He does not; he has not done so in this pamphlet, at least. Then, again, he touches upon the land laws—and I assume that those laws will be the same after we have built this railroad as they are now, unless we change them in self-defense-

LAND LAWS ALL AGAINST FARMERS.

Again, the Government land laws are all against you, and it is practically impossible to secure title to a homestead. Little or no land has been surveyed. You must make at your own expense a private survey, costing from \$300 to \$700 for each claim, and take the chances then of the Government issuing you a deed. I heard nothing but complaints from all the poor people who had been led to believe Uncle Sam was willing to give them farms in Alaska.

It is possible that the industrious, plodding foreigner from the far north countries of Europe and Asia can work out something in the next century in this land. I here quote the United States homestead law on nowing up—

next century in the

And I want Senators to think of this-

Each homesteader may take up 320 acres. Here is how he can

prove it up:
"That at least one-eighth of the area embraced in the entry was continuously cultivated to agricultural crops—

That is, one-eighth of 320 acres, or 40 acres-

other than native grasses, beginning with the second year of entry; and that at least one-fourth of the area embraced in the whole entry was so continuously cultivated with the third year of entry."

Under this law not a whole claim of 320 acres has yet been lawfully proved up in Alaska—

Not a single claim.

Not a single claim.

One-fourth of 320 acres is 80 acres; at a cost of \$125 an acre to put in the first crop, the farmer would have invested \$10,000 in clearing the land—the price of a good lowa farm,

As I have heretofore stated, it is impossible for Washington. D. C., to legislate for Alaska. Congress can not enact wise legislation for a country so far away.

Agriculture in Alaska, at its best, should follow as an adjunct to other occupations. Methods suitable in one part of the country may be unsuitable in others. Bottom lands producing a rank growth of grass may be too cold and sour for root crops until thoroughly broken up and cultivated, so as to let in the air and assist decomposition of the dead vegetation, which takes place but slowly in ground saturated with water. with water.

And so forth.

I will not further follow the line of agriculture, because it is dealt with, Mr. President, to a great extent in the hearings before the Senate committee, and the only conclusion that any reasonable man can draw from those hearings is that it must ultimately be a failure so far as raising anything more than sufficient to support a few mining towns is concerned.

Mr. LANE. Mr. President, I should like to ask the Senator if he has been over to room 115 and seen the exhibit of Alaskan

vegetables and grain?

Mr. McCUMBER. I have not; but I remember seeing, 40 years ago, exhibits of the wonderful production of arid lands and deserts, and the land from which the exhibits came has not been taken or cultivated yet. I have not a great deal of confidence in a mere exhibit that can be produced in a certain little spot. Those exhibits will be explained, or at least their equiva-lent, before I get through. I have no doubt that in a small section of Alaska you may, under some conditions, raise an enormous crop at an enormous expense.

Mr. POINDEXTER. Mr. President—
The VICE PRESIDENT. Does the Senator from North Da-

kota yield to the Senator from Washington?

Mr. McCUMBER. I yield.

Mr. POINDEXTER. The Senator is no doubt familiar with the history of North Dakota, and I should like to ask him if it is not true that in the early days, when that country was first explored and first settled, it was regarded as of very little

value as an agricultural State?

Mr. McCUMBER. Well, Mr. President, if the Senator could have gone down to New Orleans when they held their great exposition, I think in the latter seventies or in the early eighties, he would have found that the products of North Dakota on exhibition were the most promising and wonderful in the world. Possibly many a poor man went to that country, thinking he could raise them very easily, and had to learn through hardships, and in most cases through abandoning the property and a new and more careful class coming along, those exhibits were rather deceptive in regard to the usual products and conditions of the country. I am always afraid of the overadvertising of the agricultural products of any

country.

Mr. POINDEXTER. I agree with the Senator in that re spect; but that does not overcome the fact that North Dakota has become one of the most bountiful agricultural portions of the earth, and it is common knowledge that the same doubt and distrust of the agricultural possibilities of the land have

been prevalent in every new country and in every portion of this country that has been settled.

Mr. LANE. I should like to ask the Senator if, in the early days, upon the old maps, North Dakota was not marked down as part of the "Great American Desert"?

Mr. McCUMBER. Oh, yes.

Mr. LANE. I think I used to see it marked in that way on

the map

Mr. McCUMBER. I do not know whether it reached that far east or not; but we had a Great American Desert. I remember that, even as late as right after the war, Gen. Hazen, who had traveled up in that country, made a report to the effect that it was worth nothing, and nothing could be produced upon it. The fact, however, that somebody made a misstatement as to something that we can easily investigate; the fact that it was said that nothing could be produced upon the very land where, if a spade was put down into it 3 feet, the black loam soil would be found, in a country where you can raise almost any kind of a crop; the fact that somebody did not have enough judgment at that time to foresee a great possibility, does not indicate at all that we can raise crops on barren stones, or in the mountains, where there is no soil, or around the North Pole, where there is neither land nor soil nor anything else.

There are some things that are within the reach of possibility.

and many things that are entirely without it.

Mr. POINDEXTER. I do not want to interrupt the Senator further than to say that his description is not at all applicable to Alaska. Of course, there are frozen regions in Alaska, and there is rock; but there is also a vast extent of land where you do not have to put the spade down into the ground to see the black soil, because it is black on the surface, and it is black for many feet down below.

Mr. McCUMBER. That is true at home.

Mr. POINDEXTER. There are vast areas of soil in Alaska

just as fertile as anything in North Dakota.

Mr. McCUMBER. I do not want to be misunderstood as saying that, there are not agricultural possibilities in Alaska. There are undoubtedly great agricultural possibilities there, even in the Yukon Valley. I insist, however, that there will be no occasion for the development of those products, certainly not for the use of this country, for centuries to come, and that there is nothing to indicate any necessity or opportunity for any great development for the present years, even in sufficient quantity to fill the demands of the mines,

Now, I want to take up for a little while the matter of the mineral resources of Alaska, and I am now going to quote quite

considerably from the hearings.

First, I wish to speak of the coal we are going to get up there. It has been asserted that we shall need that coal for our Navy, and yet it has been demonstrated that it is absolutely unfit for use in the Navy. It may be, and I will not say at this time that that is not the case, that the construction of boilers and furnaces in our ships will be so changed that they may be able to use to advantage a character of coal that they are not able to use at the present time, but that is all speculative.

The acknowledged authority on the mineral resources of Alaska, I think all will admit, is Dr. Alfred H. Brooks, of the United States Geological Survey. I wish to call attention to his evidence, on page 514 of the hearings, before the Senate committee. He says with respect to coal in the Fairbanks district:

In regard to fuel in this district, we have—about 50 miles south of Fairbanks and within 20 or 30 miles of the proposed route from Cordova, or along the proposed route from Seward—the Nenana coal field. The Nenana coal field is a field where there is an enormous amount of lignite

We do not use lignite coal in our vessels.

We do not use lignite coal in our vessels.

Mr. Wickersham. Have you seen this picture over here [indicating]?

Mr. Brooks. I did not take that photograph. I am a little skeptical about the picture of a coal bed.

Mr. Wickersham. How thick is that bed?

Mr. Brooks. I have measured coal about 20 feet in thickness in this field. That is about the workable limit of commercial mining. so I prefer to think there is no coal quite so thick as indicated by the picture, because I do not think it would be worth much. But whatever may be said about the thickness of any individual bed, there is an enormous amount of coal in the field. Our party made an estimate on the basis of the actual coal in sight—and our surveys were not detailed—of some 9.000,000,000, tons, which is more lignite coal than we estimated in all Alaska at the time we made the reports of the conservation commission. There is an abundant supply of coal there. So far as we know, it is all lignite—a fair grade of lignite—and can be used to advantage in local industries. It should be used, because they no d fale at Fairbanks very badly, and will need it much worse before only years have passed, because the timber supply has been rapidly used up by the local needs of the community.

It will be observed that the coal here discussed would furnish

It will be observed that the coal here discussed would furnish the local market, and the coal from the mines on the coast would therefore not come into the market and would not furnish any tonnage from the interior for the contemplated railways.

On page 520 of the Senate hearings on Senate bill 48 Dr. Brooks describes the only two coal fields producing high-grade bituminous coal in Alaska, the Matanuska and the Bering River,

To take up the question of coal first, we have here in the Matanuska Valley a coal field which aggregates 80 and possibly 100 square miles. The coal is of the same general character as that of the Bering River field. So far as we know, there is little to choose between the two. The analysis would indicate that the Bering River coal might be better for steaming purposes and the Matanuska coal a little better for coking; but I do not believe that the evidence on this is sufficient, because there has not been enough mining to permit of a fair test of the coal. So that from our present consideration we have got to regard the two coal fields as very much on a par as to quality. The Bering River field seems to be somewhat smaller than the Matanuska field is a bituminous—it varies from a low-grade to a high-grade bituminous—oil varies from a low-grade to a high-grade bituminous coal. Also there is some anthracite in the eastern end of the field. Of that we do not know very much, but, in any event, I think the Alaska anthracite is less valuable than the steaming and coking coal.

Mr. Wickersham. How does the anthracite coal of Alaska compare with that in Pennsylvania?

This has been gone over several times, and it has been indicated that it is of such wonderful quality.

Mr. Brooks. It is not quite as good as the best of the anthracite of Pennsylvania, as far as we know it. There have been only a few analyses made of it.

Mr. Wickersham. How does the bituminous coal compare?

Mr. Brooks. Some of the bituminous coal is as good as our best bituminous coal of the East; that is, the famous Pocahontas, New River, and Georges Creek coal of the Eastern States.

Mr. Wickersham. Those are the naval coals?

Mr. Brooks. Those are the naval coals?

Mr. Wickersham. Do you think the coal of Alaska is equal to that standard?

Mr. Brooks. So far as the aborded.

standard?

Mr. Brooks. So far as the chemical composition goes; yes, sir. In the physical composition it leaves much to be desired, so far as we know; that is, the percentage of lump coal would be very much smaller. In regard to Navy use, I will say that if there was a large coal-mining industry producing a large quantity of coal, the lump coal could be used by the Navy and the finer coal consumed by other industries. If you mined only enough for the Navy, you would have to take it as it came, and it might then be found to contain too large a percentage of slack for Navy use.

Mr. Broesidont they did two it and to be hellow of the Mays.

Mr. President, they did try it under the boilers of the Maryland, I think, and after they had given it a very thorough test the report was that its value was not to exceed about 75 per cent of the value of the coal in the Pennsylvania fields, and they recommended against its use. I think there has already been read to the Senate—at least, it is in the Congressional RECORD of about a month ago-the report on that test, in which it was stated, however, that they would make a further chemical test at Annapolis and see what could be done. I have here a copy of the letter of December 27 relating to that test. It is as follows:

Hon. James S. Davenport, M. C.,

House of Representatives,

My Dear Mr. Davenport: The preliminary report of the test of Bering River washed and screened coal at the Engineering Experiment Station. Annapolis, Md., notes that under similar conditions Bering River coal produced only about 75 per cent of the power gotten with the Pocahontas.

The department therefore pages with recreet that the Power River.

the Pocahontas,
The department therefore notes with regret that the Bering River coal samples have thus far proven unsuitable for naval use.
Franklin D. Roosevelt,
Assistant Secretary of the Navy.

Mr. POINDENTER. Mr. President-

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Washington?

Mr. McCUMBER. I do.

Mr. POINDEXTER. I only want to state that I have in hand here, and probably will present at some later time—I do not desire to interpolate it into the Senator's remarks—a very careful detailed statement from a man with whom I am personally acquainted who was present when the coal was mined with which the test was made of which the Senator speaks. He was present when it was mined and helped to get it out. His statement goes on to show that no care whatever was taken in taking out the coal, that they cut out rock and shale and coal and left it lying out in the weather all winter before it was taken down to the harbor where the ship was, and that it was not at all a fair representation of the coal of the Bering River fields.

Mr. McCUMBER. Of course I can have no information upon that subject. From my knowledge of the activities and the influence upon the subdepartments of the Government, however, I have found that when the administration wanted anything it could generally find a report corresponding with its judgment of the necessity of the thing, and I should suppose that the attempt naturally would be to get as good coal as they possibly could get out of these mines when the desire was to prove that it was efficient for that purpose. It may be, however, as the Senator says, that they were careless in mining it and did not get the best coal that could be obtained.

Mr. POINDEXTER. I have no knowledge in regard to it, of course. I only stated the substance of the report I have. I should be loath to think, however, that the Senator's insinua-tion is well founded—that the Government authorities would willfully try to make a favorable or an unfavorable report upon an investigation of this kind.

Mr. McCUMBER. I dld not say they would willfully do so. The desire is generally the father of the result, and I have generally found that where it was possible to establish the fact they did so. The fact that it was impossible to establish what they desired to prove in this instance indicated to me that the chances were very strong that they could not find anything upon which to base a judgment that was favorable.

Mr. POINDEXTER. According to that argument, if they desired to get an unfavorable report they would have the same facility for getting it that they would have for getting a favor-

able one.

Mr. McCUMBER. Oh, yes. Mr. POINDEXTER. I do not suppose the Senator knows, and I am sure I do not know, whether they desired one thing or the other. They were just as likely to have desired an

unfavorable report as to have desired a favorable one.

Mr. McCUMBER. No; I think not. I think the desire is always to conform to the wishes of the administration.

Mr. POINDEXTER. I do not think this administration has

expressed any wishes in regard to the Bering River test.

Mr. McCUMBER. It has expressed, I think, some wishes in regard to an Alaskan railway, and the justification of an Alaskan railway is to secure coal for naval use.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator for a moment?

Mr. McCUMBER. Certainly.
Mr. CHAMBERLAIN. Speaking of the coal situation and the test to which the Senator is now referring, permit me to say that in 1903 Lieut, Arthur Crenshaw, of the Navy, was requested by the equipment officer of the navy yard at Puget Sound to test some of the coal from the Bering River field. Mr. McDonald, who had a mining claim up in the Bering River field, brought out 30 tons at his own expense and delivered it on board the Nebraska, and a test was made of the coal mined by a miner who had a claim and was interested in developing

Mr. McCUMBER. In this case the coal was produced by the owner himself?

Mr. CHAMBERLAIN. By the then owner of the mine. Mr. McCUMBER. I have had some like experiences with gold

produced by the owner of a gold mine.

Mr. CHAMBERLAIN. The Senator assumes that every man is dishonest. I believe in giving a man credit—

Mr. McCUMBER. Oh, no; I am simply assuming that this man would naturally select the very best coal with which to make the experiment.

Mr. CHAMBERLAIN. Will the Senator permit me to state the result of that experiment, just for a moment?

Mr. McCUMBER. Yes.

Mr. CHAMBERLAIN. The lieutenant reported that this particular coal was smokeless and of fair steaming quality; that it did not clinker, and, as he said in the letter to his superior officer, that it would stand very little working. He said the coal must be fired very lightly and worked with a light hoe, as it would not stand slicing.

Now note what he said in reference to quantity. He said that 15.2 tons of Katalla coal was used to a boiler as compared with 18.7 tons of contract coal to a boiler during the same period of time. In other words, it took less of the Bering River coal than it did of the eastern coal which he mentioned.

On the strength of that report of a lieutenant of the Navy, I am advised-though I do not know this of my own knowledgethat Admiral Cowles ordered from Mr. McDonald 2,000 tons for further experimenting; and the only reason it was not furnished was that in the meantime Mr. McDonald's claim was held for cancellation.

Mr. MoCUMBER. What year was that?

Mr. CHAMBERLAIN. 1908. That was coal that was mined by a miner.

Mr. McCUMBER. Yes.

Mr. CHAMBERLAIN. In the test recently made of Bering River coal the coal was not procured by a mining man.

Mr. McCUMBER. Personally, I have very little confidence in a mere chemical test. The chemical test, of course, will indi-

cate the amount of carbon, the amount of heat that may be obtained from the coal; but there are a great many other conditions, such as the rapidity with which it will be consumed, and many other things, that have a direct bearing upon its value as a heat-producing agency. In my opinion no way has yet been devised to determine its real value except the practical method, which is to put it in the furnace under the boilers of a great ship and test it there. That has been done, and it has proven a failure.

It may be, as I have indicated before, that we shall change the construction of the furnaces, boilers, and so forth, so that this coal may be used to advantage. Still, with both of these reports, that on the chemical test and that on the practical test, against the use of the coal, both of them agreeing that it can not be properly used by the Navy, does not the Senator think we had better at least make a few more tests, under proper conditions, before we spend \$40,000,000 to build a railroad to bring that coal to the coast for the purpose of using it in the vessels of our Navy?

Mr. CHAMBERLAIN. May I interrupt the Senator a

moment?

Mr. McCUMBER. Certainly; I am always pleased to yield. Mr. CHAMBERLAIN. I wish to say that if a general average were taken between the report made in 1908 and the report made recently, the coal would be equal to the Pennsylvania coal, anyway. I want the Senator to understand, however, that we are not urging the construction of this road simply as a Its purpose is to develop other resources in coal carrier. Alaska and incidentally the coal as well.

Mr. McCUMBER. Mr. President, a general average sometimes becomes a necessity; but when we can get the absolute result by a practical test, taking the general average between the best and the poorest tests that have been made will hardly

be a safe and reliable course.

The Senator has suggested that we are to use this railroad system for other purposes. I suppose the next thing will be mining purposes outside of coal. I have already discussed the possibilities of agriculture in Alaska, and I will now give some attention to the subject of mining. I shall rely entirely upon the evidence that was taken before the committee.

The principal production of placer gold in Alaska has been from the Yukon Basin and the Seward Peninsula. The figures to the end of 1911 are as follows: Yukon Basin, \$74,118,534; Seward Peninsula, \$60,349,700. That peninsula and the Yukon, of course, have transportation, one from the coast itself and the

other from the Yukon River. It is, however, transportation that is open during only four or five months of the year.

We come now to quartz mining. Quartz mining, as I understand, is carried on in the coastal region and assumes very large proportions. In that region is situated the celebrated Treadwell mine, which is one of the very largest gold mines in America. In this region also is the southeastern Alaska field, which has been quite a large producer and is growing rapidly, more than any other part of Alaska; but the railways contemplated would not in any way contribute to the development of this region, because the transportion is wholly by ocean.

The only other quartz so far discovered is found in the Yukon Basin, and up to the present time there has not been sufficient development there to determine whether or not they will ever become producing mines. Dr. Brooks, on page 514 of the hear-

ings before the Senate committee, says:

In the vicinity of Fairbanks, within the last four or five years, there have been developed a number of auriferous lodes, and while it is too early to make a statement as to lode mining, I think it is promising. One man has been working four or five years, and there are a number of other properties where considerable work has been done. There has been some little gold output, but probably the lode-gold production does not exceed \$200,000 or \$300,000 in value.

Senator Walsh. How many of these quartz mines are in actual operation which you have visited?

Mr. Brooks. The most of the mining developments, Senator, have taken place since I had a chance to study that district in any detail. I was in there last fall with the commission, and I think we visited about 4 or 5 mines, but Dr. P. S. Smith, of the survey, of my staff, spent some time in there, and I think he visited some 15 or 20, but I think of those 15 or 20 there were only 5 or 6 that had the stamp mills. I think about 2,000 quartz claims have been staked. Of course you know what that means in a new district.

Senator Walsh. That would not signify anything to me.

Mr. Brooks. I realize that. But one mine has been operated for zeveral years—for three or four years.

Senator Walsh. Have you visited that one?

Mr. Brooks. Yes, sir; I have been there two or three times. I was there last year. The vein is small, but it is rich. I have no knowledge of what profits may have been made out of it, but if it could have been worked at a reasonable cost it would have been very profitable.

We would judge from this that it was quite an extensive

We would judge from this that it was quite an extensive

Senator Walsh. How many men do they employ there?

Mr. Brooks. I judge, at the time of my visit, there may have been 10 or 15 men.

Senator Walsh. How large is the mill?

Mr. Brooks. I think they have three stamps. I can not be sure of that. I should have to refer to my notebook.

Mr. Wickershiam. Five stamps, is it not? They are only small outflitted in think that they stamps is the most of any of the mill. They are only small outflitted in think that they stamps is the most of any of the mill. They are only small outflitted in the district. I think that they stamps is the most of any of the mill. They can be senator Walsh. You say the vein is small?

Mr. Brooks. Yes, sir; all veins in that district so far developed have been small. They run up to perhaps 2 feet and, in some cases, 25 feet. Of course, they swell out locally. I think in this particular property the vein widens out to 5 feet in places.

Mr. Brooks. Yes, sir; that is, the mines have been developed. There have been other ores found, but there has been nothing done with them. Senator Walsh. You would a good deal rather see low-grade ore and the stamps. I should it were going to invest money in a mining plant. If I were going to mine ore at Fairbanks I should want a very high, grade ore.

Senator Walsh. You would want it big, would you not?

Mr. Brooks. I should like it big, but it would have to be of high value. I would say, in that connection, there have been some larger will be a property of which I do not remember several years ago I visited a property of which I do not remember the name, but there was a pretty well-defined vein 10 or 15 feet wide. I do not know the values, but the owner told me it was not high enough to work under the conditions with which he was confronted

Mr. Brooks. Grade in the way have been any developed so far; Senator Walsh. Those which have been developed?

Mr. Brooks. I do not think there had been any developed so far; senator walsh. Those which have been developed?

Mr. Brooks. So a ton before you could hope to do anything with them at limit of the could have been sm

On page 530, he testifies as follows:

Senator Hitchcock. Do you figure that the development of transportation facilities will make available great bodies of low-grade ores which are now impossible of development?

Mr. Brooks. There is evidence of the presence of large bodies of low-grade gold placer gravels, which could be developed if mining costs were decreased. As to the possibility of developing low-grade ores, I do not think any have yet been found which are sufficiently developed to give an assured tonnage.

Yet we are going to spend \$40,000,000 to develop those veins of low-grade ore!

Mr. President, I do not wish to take up the time of the Senate to discuss the copper question. About all that has been found is in the vicinity of the coast, as shown by the evidence on page 530 and discussed on pages 509, 511, and 512 of the hearings.

I wish now, before closing, to take up again a little of the

evidence on the agricultural question, because we are asked to spend \$40,000,000 on a railway—it will be \$160,000,000 before we get through—to develop the agricultural interest in Alaska in connection with the mining interest. I want to turn to the testimony of Prof. Charles V. Piper, of the Department of Agriculture at Washington. Prof. Piper in his testimony in the hearings before the Senate committee testified as I shall read. I will call attention to pages 548, 550, 552, and 556. I first read from page 548:

So far as railways into the interior are concerned, any great amount of agricultural freight in the future would have in the main to come from and on account of possible grain production—that is, the production of other things like dairy products, or even meats, would not yield any very great amount of freight.

Then, if we can not take it in meats or in vegetables, let us see what we may expect in agricultural products as freight upon this railroad. He proceeds:

upon this railroad. He proceeds:

The most interesting experiment stations, so far as this problem is concerned in Alaska, are those at Rampart, which has been conducted since about 1900; Fairbanks, where the experiment station has been in existence since 1907, I believe; and Copper Center, on the Copper River, where an experiment station was conducted from 1902 to 1906. At the first two of these interior stations—Rampart and Fairbanks—spring-sown oats and spring-sown barley have yielded good crops practically every year they have been tested. Fail-sown rye and fail-sown wheat mature, but there is usually considerable winter kilking, especially in the wheat, due to too thin snow protection from the severe cold. At both of these stations a large amount of time has been spent in the endeavor to breed up hardler varieties of all these grains better suited to the conditions in Alaska. There can be little doubt that varieties of these cereals will be developed better adapted to the region than any w. now possess. However, among the numerous varieties tested, a good many varieties of oats and barley have succeeded, as I have stated. The ryes have done very well, and some fail-sown wheats have given very good results. Spring-sown wheats, I think, in no case have matured. At Copper Center the results have not been as favorable. During the six years that the station was conducted spring-sown grains—that is, oats and barley—matured perfectly only one season.

Certainly you can not expect that these grains will ever be raised in that country in the near future for any exporting business.

I read now from page 550:

I read now from page 550:

Senator Jones. What is your estimate, Judge, of the cost of clearing land at Fairbanks?

Mr. Wickersham. It does not cost much. Do you know, Mr. Joslin, what they figure on down there?

Mr. Joslin. The report of the farmer for the experiment station for 1911 showed \$200 an acre.

Mr. Wickersham. That was up there in that heavy timber?

Mr. Joslin. Yes; up in that beavy timber.

Prof. Piper. That was also about the cost at Kenai on lands covered with light timber.

Mr. Ballaine. That is heavy timber—very heavy timber—at Kenai. Prof. Piper. I would not call it very heavy.

Mr. MacKenzie. I have had a little experience in clearing land up in the interior of Alaska, and if you can get a burn on the ground and kill those trees, the roats will lie on top of the frost, and in two or three years you can go along there and almost kick them out. It is very casy. Of course, if you do it in one season, it is a very expensive yestem.

and kill those trees, the roots will lie on top of the frost, and in two or three years you can go along there and almost kick them out. It is very easy. Of course, if you do it in one season, it is a very expensive system.

Prof. Piper. At any rate, whether you put it at \$100 an acre or \$50 an acre, you can still get good farm lands in the United States at \$50 an acre. However, I would not give too much weight to that, because the pioneer is attracted to public land that he can homestead, even if it costs \$200 an acre to clear. The \$200 an acre for clearing it is based, I suppose, on wages to the ordinary laboring man of \$5 and \$6 a day, and if a farmer clears the land himself he saves that \$5 or \$6 a day. So that it is really the high cost of labor that makes the apparent high cost of clearing that land.

Mr. Chubbuck, on the basis of his reconnoissance in Alaska, has given expression to conservative views regarding the future possibilities of grain raising in the interior of Alaska very much, I think, like the ideas I have presented.

Senator Wallsh. Who is Mr. Chubbuck?

Prof. Piper. Mr. Chubbuck is a member of the Bureau of Plant Industry, and spent the years 1909 and 1910 making an agricultural reconnoissance of Alaska. His report has not yet been published, but will be shortly. Mr. Chubbuck really should have appeared before this committee, because he personally has gone over these lands in the interior of Alaska, and my knowledge is second hand.

Senator Jones. Where is Mr. Chubbuck?

Prof. Piper. He is out West at the present time.

Again, ou page 552 he says:

Again, on page 552 he says:

In general, my impression of the whole interior country is that here will be successful homesteads wherever there is a local market for the produce-

Not a market for produce to be exported-

I am somewhat skeptical about there being in the near future any surplus produce, either of potatoes or potato products or of cereals, which will be exported.

Therefore, so far as developing Alaska for agricultural purposes is concerned, the evidence is quite clear that there will be no business for railways to get a haul out of agricultural products, and about the only haul they will have will be hauling them into the interior, because of the excessive expense of raising them there.

Mr. President, I do not think that I am justified in taking up any more of the time of the Senate in the discussion of this subject. I think I am clearly right upon the general proposition that the worst policy on earth for this Government to enter into is the policy of getting into competition with its own people, and making its own people not only pay the expenses in a tax for its failure in properly doing business, but also to deprive the people of the opportunity which otherwise would be theirs. That alone is sufficient to keep me out of the socialistic field, and to keep this country out of it, so far as one vote will go in

and to keep this country out of it, so far as one vote will go in keeping it out of that field.

But in addition to that, I am morally certain that it is merely burning up \$40,000,000, at least under the first appropriation, and it will be the means of wasting many times \$40,-000,000 before we get through with the experiment. The only good I can possibly see in the whole project will be the possibility, yes, the probability, that its complete failure will call

to the attention of the American people the danger of Government ownership and operation of railways, and it will put off

that socialistic time for at least a few years longer.

Mr. BRANDEGEE. I wish to ask the Senator from Georgia
[Mr. Bacon] if he desires an executive session this afternoon?

Mr. BACON. I will say to the Senator from Connecticut that there has been a very general expression among Senators to that end, and I will now move that the Senate proceed to the consideration of executive business.

Mr. KERN. Will the Senator from Georgia withhold the motion that I may submit a report from the Committee on Privileges and Elections?

Mr. BACON. Certainly.

SENATOR FROM MARYLAND,

Mr. KERN. Mr. President, I desire to make a privileged report. The Committee on Privileges and Elections, to which was referred the credentials of BLAIR LEE as a Senator from the State of Maryland, have considered the same, and I am directed by that committee to submit a report (No. 160) thereon. I ask that the report be printed in the RECORD.

The VICE PRESIDENT. That action will be taken.

The report is as follows:

[Senate Report No. 160, Sixty-third Congress, second session.] CREDENTIALS OF BLAIR LEE AS SENATOR FROM MARYLAND,

[Senate Report No. 160, Sixty-third Congress, second session.]

CREDENTIALS OF BLAIR LEE AS SENATOR FROM MARYLAND,

Mr. KERN, from the Committee on Privileges and Elections, submitted the following report, to accompany Senate resolution 247:

The committee on Privileges and Elections, to whom was referred the credentials of BLAIR LEE as a Senator from the State of Maryland, have considered the same, and submit the following report:

In this case the governor of the State of Maryland has certified, under the seal of his State, as follows:

"That at an election held on Tuesday, November 4, 1913, pursuant to the law of the State of Maryland and a writ of election issued by the governor of that State in compliance with the provisions of the seventeenth amendment to the Constitution of the United States by the electors in said State having the qualifications requisite for electors of the most numerous branch of the State legislature, BLAIR LEE, of Montgomery County, was by said electors duly chosen a Senator from said State in the Senate of the United States to fill the vacancy in the unexpired term of Isidor Rayner.

"That at said election so beld as aforesaid on Tuesday the 4th day of November, 1913, the candidates for the said office of United States Senator were BLAIR LEE, Democrat; Thomas Parran, Republican; George L. Weilington, Progressive; Finley C. Hendrickson, Prohibitionist; and Robert J. Fields, Socialist, each of said candidates having been duly nominated in accordance with the primary-election law of said State.

"That the name of each of said candidates was placed upon the ballots at the said election, held as aforesaid on Tuesday, November 4, 1913, as required by the laws of said State, and the returns from said election having been duly canvassers in accordance with law, the result of said election has been declared and certified by said board as follows:

"That—

Votes, BLAIR LEE received.

BLAIR LEE received 112, 485
Thomas Parran received 73, 300
George L. Wellington received 7, 033
Finley C. Hendrickson received 2, 405
Robert J. Fields received 2, 982
all of which appears from the certified copy of the report made by the board of State canvassers, and hereto annexed, which I certify to be full, true, and correct, as follows:

"DECLARATION OF THE RESULT OF THE ELECTION OF 1913 FOR THE OFFICE OF UNITED STATES SENATOR.

"[Made by the State board of canvassers.]

"We, the undersigned, constituting a majority of the board of State canvassers of the State of Maryland, in pursuance of the power and authority vested in us, under and by virtue of the provisions of section 85 of the election law, do hereby certify that at an election held in said State on Tuesday. November 4, 1913, for a United States Senator to fill the unexpired term of the late Senator transfer at the senator to fill the unexpired term of the late Senator Isidor Rayner, it appears from the certified copies of the returns of said election that—

Votes. BLAIR LEE received
Thomas Parran received
George L, Wellington received
Finley C, Hendrickson received
Robert J, Fields received

"We therefore determine and declare that Blair Lee, having received the greatest number of votes cast for the several candidates for said office, has been and is duly elected United States Senator to fill the unexpired term of the late Senator Isidor Rayner.

"In witness whereof we have hereunto set our hands this 20th day of November, 1913.

"ROBERT P. GRAHAM,
"Scoretary of State,
"EMERSON C. HARRINGTON,
"Comptroller of the Treasury,
"MURRAY VANDIVER,
"State Treasurer.

"C. C. MAGRUDER, "Clerk of the Court of Appeals."

Included in the same certificate of the governor is a copy of the writ of election issued by him on the 2d day of August, 1913, which is as follows:

"WRIT OF ELECTION.

"To the people of the State of Maryland, and to the members of the several boards of supervisors of elections of Baltimore City and the several counties of the State, and to the sheriffs of Baltimore City

and the several counties of the State, and to the board of police commissioners for the city of Baltimore, greeting:

"Whereas a vacancy now exists in the term of a United States Senator from Muryland, caused by the death of the late Senator Isidor Rayner; and

"Whereas I have heretofore, by virtue of the authority vested in me by the Constitution of the United States, temporarily appointed Senator William P. Jackson to occupy a seat in the United States Senate 'until the next meeting of the legislature' of this State:

"Therefore, I, Phillips Lee Goldsborough, governor of the State of Maryland, acting by and under the authority and direction contained in the seventeenth amendment to the Constitution of the United States, hereby issue, publish, and declare this my writ of election for a special election to be held throughout the State of Maryland on Tuesday, the 4th day of November. 1913; and I do hereby direct that a special election shall be held on that day in order that there may be chosen at said election a Senator of the United States from the State of Maryland to fill said vacancy and to represent the State of Maryland in the Senator Isidor Rayner was originally elected.

"And I further order, declare, and direct that the Senator to be chosen by virtue of this writ shall be nominated and elected in conformity with all the provisions of the general election laws and Statewide primary election laws of this State made and provided for the nomination and election to an office filled by the vote of all the registered voters of the State of Maryland.

"To this end and as authority and direction therefor have you then and there this writ.

"Witness my hand as the governor of the State of Maryland.

"Great seal.]

"P. L. Goldsborough.

"Robert P. Graham,

"Robert P. Graham,

" By the governor:

"ROBERT P. GRAHAM, "Secretary of State."

Your committee holds that the certificate of the governor of Maryland sets forth all the facts necessary to show the election of Blair Lee in substantial conformity to the provisions of the seventeenth amendment to the Constitution of the United States and in accordance with the laws of the State of Maryland and to entitle him to a seat in the Senate of the United States.

The facts in the case, about which there is no dispute, are as fol-

substantial contormity to the provisions of the seventeenth amendment to the Constitution of the United States and in accordance with the Senate of the United States.

The facts in the case, about which there is no dispute, are as following the seventeenth of the seventeenth of the seventeenth of the seventeenth of Maryland in January, 1910, for a term of six years, ending March 4, 1917.

On November 25, 1912, Senator Rayner died, and four days later the governor of Maryland, in pursuance of the constitutional provision that "If vacancies happen by resignation or otherwise days make temporary appointment until the next meeting of the legislature, etc.," appointed William Pursual Jackson, who, upon presenting his credentals, was sworn in as Senator.

The first session of the Legislature of Maryland since that time began on January 7, 1914.

On May 31, 1913, the seventeenth amendment to the Constitution of the United States went into effect by the proclamation of the Secretary of State.

The seventeenth of the seventeenth amendment to the Constitution of the United States went into effect by the proclamation of the Secretary of State.

The sevential seventeenth of any State in the Senate the executive authority of such State shall issue writs of election to fill such vacancies, provided that the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature any direct."

In obedience to this constitutional requirement and active many direct."

In obedience to this constitutional requirement and active the provision of the State in the Senate the executive threat of the state in the Senator should be held on Tuesday, November 4, 1913, and that the Senator should be nonlinated and elected in conformity with a the certain should be nonlinated and elected in conformity with a the certain should be nonlinated and elected in conformity with a the senator should be nonlinated and the seventeenth and continual to the seventeenth

As already stated, all political parties participated in the election, and it is a matter of gratification that all have acquiesced not only in the action of the governor in calling the election but in the result.

The Republican governor of Maryland who ordered the election has not hesitated to certify to the election of a Democratic Senator, and your committee is unable to discern any reason why this election of a United States Senator by the people of a sovereign State—an election conceded to be fair in all respects—should be questioned here.

It is contended by Senator Jackson that if the election of Mr. Less should be found to be valid in all respects, yet he would not be entitled to a seat in this body until the 7th of April, 1914, that being the day fixed by the statute of Maryland for the adjournment of the legislature of that State, which is now in session. His contention is that although section 3, Article I, of the Constitution, under which his appointment was made, provided that "if vacancies happen by resignation or otherwise during the recess of the legislature of any State the executive thereof may make temporary appointments until the next meeting of the legislature; and in case of a failure by the legislature to elect, until the end of the session of that legislature; and that under the last clause of the seventeenth amendment, which provides that "this amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution," his right to a seat in this body can not be challenged until the expiration of the extreme limit of time which he might have held his seat if the seventeenth amendment had not been adopted.

The committee gave much consideration to these contentions, but have been unable to yield their assent thereto.

Under the provisions of the Constitution which were in force at the time of Senator Jackson's appointment, his tenure of office was most uncertain of duration.

First. The governor, immediately after mak

Under the provisions of the Constitution which were in force at the time of Senator Jackson's appointment, his tenure of office was most uncertain of duration.

First. The governor, immediately after making the appointment, might have called the legislature in special session, which might have proceeded to the election of a Senator, in which event Senator Jacksson's term would have ended immediately upon the presentation and approval of the credentials of the person so elected.

Second. If the Legislature of Maryland, in regular session, having the power so to to, should elect a successor to Senator Rayner at the time fixed by the Federal statute in force prior to the adoption of the seventeenth amendment, the person so elected would be entitled to his seat here as soon as the Senate could pass upon his credentials, or Third. According to the construction contended for, in the event that the legislature in regular session should fail to elect a Senator, the Senator might have held office until the end of that session.

Senator Jackson's term might have been a very short term, as in the event of an election at a special session of the legislature; it might have been prolonged until an election by the legislature in regular session, or it might be still further prolonged to the end of the session of a legislature that had failed to elect. But in any event he could only hold until the vacancy was filled by an election, or until the body having the duty to elect had failed in its duty and adjourned without performing it. In no event could he hold the office after a valid election had occurred. Now, when the seventeenth amendment was adopted and became operative, the legislature could no longer elect a Senator, so that Senator Jackson's term could not be limited by a legislative election, and such being the case, the position that he should now hold office until a legislature which has no power to elect shall fail to elect and adjourn without electing is not regarded as tenable.

Your committee is of the opinion tha

Mr. KERN. Mr. President, I am directed by the Committee on Privileges and Elections to submit the following resolution, which I ask may be read.

The resolution (S. Res. 247) was read, as follows:

Resolved, That BLAIR LEE was duly and legally elected a Senator of the United States from the State of Maryland at a regular election held in that State on the 4th day of November, 1913, and that the said BLAIR LEE, having presented proper credentials from the State of Maryland, is now entitled to take the oath of office as a Senator of the United States from the State of Maryland.

The VICE PRESIDENT. The report and accompanying reso-

lution will be placed on the calendar.

Mr. CLAPP. Mr. President, I did not happen to be in the committee when this election case was voted upon, but I desire to state that I am in favor of seating Mr. Lee. I will not file any written views at this time, but will probably discuss the matter when it comes up for consideration.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 20 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, January 20, 1914, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 19, 1914. COMPTROLLER OF THE CURRENCY.

John Skelton Williams, to be Comptroller of the Currency.

HOUSE OF REPRESENTATIVES.

Monday, January 19, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

We thank Thee, O Lord our God, for the peace and quiet, with its uplifting influences, of the Sabbath; for the light of this day, filling the earth with its glory; for the hopes and glorious aspirations which fill our hearts; for the joy of living. Quicken, we beseech Thee, by all the influences at Thy command, every noble impulse within us and thus lift us day by day toward the perfected manhood, in Christ Jesus our Lord. Amen.

The Journal of the proceedings of Saturday, January 17,

1914, was read and approved.

JOINT MEETING OF THE TWO HOUSES OF CONGRESS.

Mr. UNDERWOOD. Mr. Speaker, I have received a communication from the President, stating that he desires to deliver a message to the Congress on Tuesday next, and with that in view I offer the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Alabama sends up a

privileged resolution which the Clerk will report.

The Clerk read as follows:

House concurrent resolution 30.

Concurrent resolution providing for a joint session of the two Houses of Congress to receive communications from the President of the United States.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 20th day of January, 1914, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

The SPEAKER. The question is on agreeing to the resolution. The question was taken, and the resolution was agreed to.

On motion of Mr. UNDERWOOD, a motion to reconsider the vote by which the concurrent resolution was passed was laid on the

The SPEAKER. This is Unanimous Consent Calendar day, and the Clerk will report the first bill.

AMENDMENT TO LAWS RELATING TO THE PUBLIC HEALTH SERVICE.

The Clerk read as follows:

A bill (H. R. 6827) to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," approved August 14, 1912.

The SPEAKER. This bill is on the Union Calendar, and the Clerk will read the bill.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That the act approved August 14, 1912, chapter 288, entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," be amended by the addition of the following section thereto:

"SEC. 3. That the officers of the Public Health Service may enter upon the property of all common carriers, when engaged in interstate commerce, for the purpose of ascertaining whether the vessels, vehicles, trains, carriages, or conveyances of any and every kind, and depots, premises, and property of every description belonging to such carriers are, while such carriers are engaged in interstate commerce, kept by them in a sanitary condition. And the Secretary of the Treasury is authorized to make all such reasonable rules and regulations as may be necessary to secure the keeping of such vessels, vehicles, trains, carriages, or conveyances, and depots, premises, and property of every kind, in a sanitary condition by such carriers while engaged in inter-

state commerce, and to direct, through the Solicitor of the Treasury, the institution of all such legal proceedings in the district courts of the United States as may be necessary to compel the observance of such rules and regulations by said carriers."

The committee amendment was read, as follows:

Page 2, line 9, strike out the word "is" and insert "and the chairman of the Interstate Commerce Commission are."

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MADDEN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Georgia what is the purpose of changing the title of the present law from "the Public Health and Marine-Hospital Service" to "the Public Health Service"?

Mr. ADAMSON. That has already been done; that was done

last year.

Mr. MADDEN. Then there is not any purpose to amend the title?

Mr. ADAMSON. This bill does not make any change in that; this bill simply adds the authority in the Secretary of the Treasury to keep things clean and healthy. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole House on the state of the

The SPEAKER. Is there objection to the present considera-ation of this bill? [After a pause.] The Chair hears none The gentleman from Georgia asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. Is there objection? [After a pause.] The Chair hears none. The question is on the committee amendment, which the Clerk will report.

The Clerk read as follows:

Amend page 2, line 9, by striking out the word "is" and inserting "and the chairman of the Interstate Commerce Commission are."

Mr. MANN. Will the gentleman yield for a question? Mr. ADAMSON. Certainly.

Mr. MANN. As I understand, at the present time the Public Health Service does, in fact, make certain recommendations or regulations without authority of law which this would give.

Mr. ADAMSON. And they have no power to give effect to

the recommendations.

Mr. MANN. I understand, and I appreciate the point of view of having this in connection with the chairman of the Interstate Commerce Commission.

Mr. ADAMSON. Does not the gentleman from Illinois think-

Mr. MANN. Will it not be apt to lessen the effective value

by putting that in, though?
Mr. ADAMSON. Mr. Speaker, answering that, we thought that due regard for the probable necessities of transportation would make it advisable that the Secretary of the Treasury confer with the chairman of the Interstate Commerce Commission as to any regulation that might be regarded as at all drastic.

The SPEAKER. The question is on agreeing to the committee amendment.

The question was taken, and the committee amendment was agreed to.

Mr. MANN. Mr. Speaker, I move to strike out the last word, for the purpose of asking another question. I see that the bill provides that the Secretary of the Treasury may direct, through the Solicitor of the Treasury, the institution of all such legal proceedings in the district courts of the United States. I do not recall how far the Secretary of the Treasury may be authorized, through the Solicitor of the Treasury, to commence proceedings relating to tax matters. Is it not unusual to provide that proceedings in the Federal courts shall be instituted through the Solicitor of the Treasury instead of through or under the direction of the Attorney General? It would seem to me it would be desirable to have the Secretary of the Treasury request the Attorney General to cause to be instituted the necessary proceedings, for the reason that the Attorney General has the power to direct the district attorney, through whom proceedings ought to be commenced. The Solicitor of the Treasury does not have that authority, and any proceedings commenced by the Solicitor of the Treasury would, I take it, have to be commenced by himself, whereas the Attorney General may direct the district attorney in any of the districts of the United States to commence proceedings.

Mr. ADAMSON. Mr. Speaker, speaking personally, inclined to think that the plan suggested by the gentleman from Illinois would be the regular plan, but whether the only proper one or not I do not say. I confess that the only reason this provision is put in this way is that the Secretary of the Treasury thought it would be more directly under the control of the

department.

Mr. MANN. It would still be under the control of the department; but suppose it were necessary to institute proceedings against a railroad in California, it would necessarily be done by the district attorney there. The Solicitor of the Treasury can not direct the district attorney of California, but the Attorney General may direct him to proceed. If the gentleman has no objection, I will offer an amendment.

Mr. ADAMSON. What does the gentleman suggest there?

Mr. MANN. Mr. Speaker, I move to amend, on page 2, lines 15 and 16, by striking out the words "direct, through the Solicitor of the Treasury, the institution of all" and insert in lieu thereof the words "request the Attorney General to cause to be instituted," so that it will read:

And to request the Attorney General to cause to be instituted such legal proceedings in the district courts of the United States as may be necessary,

And so forth

Mr. ADAMSON. I have no objection to that. The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 2, lines 15 and 16, by striking out, in line 15, after the word "to," the following:
"Direct, through the Solicitor of the Treasury, the Institution of all" and insert in lieu thereof the words "request the Attorney General to cause to be instituted."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to. The SPEAKER. The question is on the engrossment and third reading of the amended bill.

The bill as amended was ordered to be engrossed and read a

third time, was read a third time, and passed.

On motion of Mr. Adamson, a motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks. announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 3638. An act providing for the issuance of patent to

Joe Joubert.

The message also announced that the Senate had passed without amendment the following concurrent resolution:

House concurrent resolution 30.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 20th day of January, 1914, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

PUBLIC LANDS, MONTROSE, COLO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 5993) authorizing the city of Montrose, Colo., to purchase certain public lands for public park purposes.

The Clerk read the bill, as follows:

The Clerk read the bill, as follows:

A bill (H. R. 5993) authorizing the city of Montrose, Colo., to purchase certain public lands for public park purposes.

Be it enacted, etc., That the city of Montrose, Montrose County, Colo., is hereby authorized to purchase, and the Secretary of the Interior is hereby directed to convey to said city for public park purposes, for the use and benefit of said city, the following-described lands, or so much thereof as the said city may desire, to wit: The south half of the southwest quarter, the southwest quarter of the southeast quarter of section 9; the southeast quarter of the southeast quarter of section 8; the east half of the northeast quarter and the northeast quarter of section 16; all in township 47 north, range 7 west of the New Mexico principal meridian, containing 640 acres, more or less: Provided, That this act shall be subject to all the conditions and the same provisions as are contained in section 2 of an act entitled "An act granting public lands to certain cities and towns in the State of Colorado for public park purposes," approved June 7, 1910 (36 U. S. Stat., p. 459).

Sec. 2. That the portion of said act of June 7, 1910, which authorizes the said city of Montrose to purchase the northwest quarter and the south half of the northeast quarter of section 14, township 49 north, range 9 west of the New Mexico principal meridian, containing 240 acres, more or less, be, and the same is hereby, repealed.

Also the following committee amendments were read:

acres, more or less, be, and the same is hereby, repealed.

Also the following committee amendments were read:

In line 4, page 1, after the word "authorized." insert the following:

"for a period of five years and after the passage of this act."

On page 1, strike out all of lines 10, 11, and 12 down to and including the word "seventeen."

In line 14, page 1, and line 1, page 2, strike out the words "northwest quarter" and insert in lieu thereof the words "west half."

In line 3, page 2, strike out the words "six hundred and forty" and insert in lieu thereof the words "six hundred and forty" and insert in lieu thereof the colon after the word "less" to a period, and strike out all the remainder of section 1, beginning with the word "Provided."

On page 2, after line 10, insert the following:

"Sec. 2. That the said conveyance shall be made of the said lands to the said city by the Secretary of the Interior upon the payment by

the said city for the said land, or such portions thereof as they may select, at the rate of \$1.25 per acre, and patent issued to said city for the said land selected to have and to hold for public park purposes, subject to the existing laws and regulations concerning public parks, and that the grant hereby made shall not include any lands which at the date of the issuance of patent shall be covered by a valid, existing, bona fide right or claim initiated under the laws of the United States: Provided, That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found in the land so granted, and all necessary use of the land for extracting the same: And provided further, That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and that if the said land shall not be used as a public park, the same, or such parts thereof not so used, shall revert to the United States."

That the figure "2" in line 11, page 2, be changed to "3,"

The SPEAKER. Is there objection to the present consideration of the bill.

There was no objection.

The SPEAKER. The bill is on the Union Calendar.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Colorado [Mr. TAYLOR] asks unanimous consent that the bill be considered in the House as in the Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The question is on the first amendment, which the Clerk will report.

The Clerk read as follows:

Line 4, page 1, after the word "authorized," insert the following: "For a period of five years and after the passage of this act."

The SPEAKER. The question is on agreeing to the amendment.

Mr. MANN. Mr. Speaker, I move to strike out the word "and" in the amendment. It plainly does not belong there.

The SPEAKER. The gentleman from Illinois [Mr. Mann] moves to strike out the word "and" in the amendment. The question is on agreeing to the Mann amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question is on agreeing to the amendment as amended.

Mr. MONDELL. Mr. Speaker, I offer a substitute amendment.

The SPEAKER. The gentleman from Wyomnig [Mr. Mon-DELL] offers a substitute.

Mr. MONDELL. It is: "For a period of one year after the passage of this act."

Mr. TAYLOR of Colorado. Mr. Speaker, I would like to make this suggestion to the gentleman from Wyoming: There are some filings on a portion of this claim; that is, on a portion of this land. There is, for instance, an old homestead filing that has been abandoned because the land is worthless, and the there will have to institute contest proceedings respecting that town will have to institute contest proceedings respecting that one and other filings, and it may take two or three years before they can clear off these old abandoned entries on the land so as to get a title that would be good. The committee, upon the showing of the city, deemed it reasonable that they ought to be given sufficient time to clear off the records and get title to it.

Mr. MONDELL. Does my friend from Colorado think it is good policy, ordinarily, to tie up a thousand acres of public land for five years, during which period it can not be disposed of in any way, and at the end of which time the city may conclude

that it does not want it?

Mr. TAYLOR of Colorado. Oh, no; I do not think that. I would just put in the limit here to the effect that as soon as they can expeditiously get off these old rights that are obsolete and get a clear title they should be given title. That is all they ask.

Mr. MONDELL. They ought to be able to do that within a

year or two years at the outside.

Mr. TAYLOR of Colorado. The gentleman knows that you can not get a case like that through the General Land Office within a year.

Mr. MONDELL. Under this administration?

Mr. TAYLOR of Colorado. I think so.

Mr. MONDELL. Oh, they are improving down there. I think

Mr. TAYLOR of Colorado. Let us make it two years. Mr. MONDELL. Well, I have no objection to that.

Mr. TAYLOR of Colorado. Let me suggest to the gentleman that the original act had no limitation at all.

Mr. MONDELL, Mr. Speaker, I desire to withdraw my substitute and propose in lieu of it to strike out the word "five" and insert the word "two."

The SPEAKER. The Clerk will report the substitute offered

by the gentleman from Wyoming.

The Clerk read as follows:

Amend the amendment by striking out the word "five" and inserting e word "two."

The SPEAKER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question is on agreeing to the amended amendment.

The amendment as amended was agreed to.

The SPEAKER. The Clerk will report the next amendment. The Clerk read as follows:

Amend, page 2, by striking out all of lines 1 and 2 and line 3 up to and including the semicolon.

The SPEAKER. The question is on agreeing to the amend-

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amend, lines 5 and 6, by striking out the words "northwest quarter" and inserting the words "west half."

Mr. MANN. Mr. Speaker, I suggest to the gentleman that he insert the word "the" before the words "west half."

Mr. TAYLOR of Colorado. before the words "west half." Yes; insert the word "the"

The SPEAKER. Without objection, the word "the" will be inserted.

There was no objection.

The SPEAKER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

The SPEAKER. The Clerk will report the next amendment. The Clerk read as follows:

Amend, lines 8 and 9, by striking out the words "six hundred and forty" and inserting the words "five hundred and twenty."

The SPEAKER. The question is on agreeing to the amend-

The amendment was agreed to.
The SPEAKER. The Clerk will report the next one.

The Clerk read as follows:

Amend by striking out all of the proviso beginning in line 9.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

The Clerk read as follows:

Amend by inserting the following:

"Sec. 2. That the said conveyance shall be made of the said lands to the said city by the Secretary of the Interior upon the payment by said city for the said land or such portions thereof as they may select at the rate of \$1.25 per acre, and patent issued to said city for the said land selected, to have and to hold for public park purposes, subject to the existing laws and regulations concerning public parks, and that the grant hereby made shall not include any lands which at the date of the issuance of patent shall be covered by a valid, existing, bona fide right or claim initiated under the laws of the United States: Provided, That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found in the land so granted, and all necessary use of the land for extracting the same: And provided further, That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and that if the said land shall not be used as a public park, the same, or such parts thereof not so used, shall revert to the United States."

The SPEAKER. The question is on agreeing to the amend-

The SPEAKER. The question is on agreeing to the amend-

Mr. MONDELL. Mr. Chairman, I desire to ask the gentleman from Colorado what is meant by the language in lines 22 and 23. page 2, in the amendment, as follows:

Subject to the existing laws and regulations governing public parks. What is that intended to accomplish? What laws are re-

Mr. TAYLOR of Colorado. Mr. Speaker, the gentleman from Wyoming is familiar with the fact that we have now a general public-park law, allowing any city or town to locate 160 acres of public land within 3 miles of the municipality for public-park Many towns throughout the West are trying to obtain a public park. There are a number of cities and towns in Colorado that have no public land within the 3-mile limit. On June 7, 1910, I secured the passage of a bill by Congress which provided that 14 cities and towns in Colorado might locate specified tracts of public lands for parks beyond the 3-mile limit. The city of Montrose was one of those cities and it was granted

for any purpose whatever. Now, the city asks by this bill that that law be repealed and that it be allowed to take this piece of ground, which is several miles from the other, in lieu of the land that Congress gave them for a park in 1910

When we passed that general bill before for the 14 Colorado cities and towns, this section 2 was inserted as a proviso applicable to all of those towns. It was at that time considered very carefully by the Public Lands Committee and adopted by Congress as appropriate language for a public-park bill. In this bill as I introduced it the grant is made subject to those same conditions, by reference; but the committee thought we ought to incorporate the specific language that had been used heretofore rather than refer to it in that way. This language is simply the language that Congress adopted in the other public-park bills, and makes this grant subject to the rules and regulations concerning public parks generally throughout the United States.

Mr. MONDELL. Mr. Chairman, I am familiar with the legislation to which the gentleman refers. There are also various bills relating to national parks, and the difficulty with this language is that it does not sufficiently identify the particular legislation that the committee evidently had in mind, under which they desire to bring this grant. It strikes me that it will be very confusing indeed. Language which might properly have been carried in a bill relating to the grant of park lands or the sale of park lands and containing references to other legislation, may be entirely inadequate in legislation that contains no such reference. I suggest to the gentleman that in my opinion no one reading this language would understand or could possibly definitely know what legislation is referred to. This language either ought to go out of this bill, which is complete in itself, or the gentleman should identify in particular the legislation to which he refers.

Mr. TAYLOR of Colorado. Let me suggest that this language was adopted in the park bill by the Public Lands Committee when the gentleman from Wyoming [Mr. Mondell] was chairman of that committee, and he helped to frame that measure.

Mr. MONDELL. I just remarked to the gentleman a moment ago that language contained in a general public-park bill, containing reference to other legislation, identifies the reference; but there is nothing in this bill to identify the reference to other legislation, and there is a variety of park legislation on the statute books, some of which ought not to apply to this grant.

Mr. TAYLOR of Colorado. I have no objection to this language being cut out, or to other language being substituted which will make it more specific.

Mr. MONDELL. I do not insist on it, but I do not under-

stand how anyone can interpret it.

Mr. TAYLOR of Colorado. The committee thought if we made it subject to the general regulations as to public parks that was I am not insisting on the language at all.

Mr. LENROOT. The criticism which the gentleman from Wyoming makes, if it be a criticism, is directed to the publicpark bill itself, because that is just as indefinite as this, this being the identical language of section 2 of that bill. Mr. MONDELL. I thought the gentleman heard me say a

moment ago that language contained in a public-park bill, with reference to other legislation, identifies the reference, but there is nothing here to identify by this reference any specific legislation, and there is a variety of legislation on the subject of parks. Legislation on the subject of parks is not confined to the bill which the gentleman has in mind.

Mr. LENROOT. No; neither was it in the general law which the gentleman speaks of. That refers to other legislation,

without identifying it.

Mr. MONDELL. I do not recall that. That may have been true; but if that was true, then it was a mistake at that time, and it is equally a mistake at this time.

Mr. TAYLOR of Colorado. I have no objection to this bill being subject to all the usual regulations concerning public I do not think that provision does any harm.
MONDELL. Well, Mr. Speaker, I shall not offer an

Mr. MONDELL. amendment, although I think it is a mistake to have such indefinite language presented in legislation in the House.

Mr. TAYLOR of Colorado. The committee thought the language was general and broad enough to cover everything.

Mr. MONDELL. Mr. Speaker, I think there are serious objections to some provisions in this amendment, but I imagine they are not objections that perhaps would appeal to many Members of the House, and therefore I do not propose to offer an amendment, but I want to make this suggestion: Page 3 of the bill contains a proviso which reserves to the United States 640 acres about 15 miles from the town. By an error on the part of some one, however, the descriptions were wrong, and the city was given land that was utterly unfit for a park or also limits the title so that the city never can convey the tract, and has a reversionary provision in case that the lands are not used for park purposes. In other words, the title is a mighty

The SPEAKER. Has the gentleman from Wyoming an amendment to offer?

Mr. MONDELL. Mr. Speaker, I move to strike out the last

Mr. TAYLOR of Colorado. Let me suggest-

Mr. MONDELL. Just a moment. This is a grant to the people collectively; it is not an individual grant. It is a grant to a municipality. Now, my opinion is that a grant to a municipality of mineral land, known to be such, for other than mining purposes ought not to be made, or lands in which there is any reasonable probability that they contain mineral. Does the gentleman think-and, of course, he is familiar with these lands-that they contain oil or coal?

Mr. TAYLOR of Colorado. No; I do not think that there is one chance in a million of their containing oil or coal or any other kind of mineral. But, at the same time, the city only wants it for park purposes, and that is all we are giving them. The inhabitants are satisfied with it, and the Committee on Public Lands was willing to give them the land, subject to these reservations, for park purposes. If they want to beautify this tract, and build roads out there, and plant trees, if they can get them to grow, the committee thought it was along the commendable lines of health-promoting, by an outing place.

Mr. MONDELL. The gentleman, without realizing it, has made an argument that proves that the limitations should be stricken from the bill. Here is a piece of almost worthless mountain land which the people desire for a park, if they can get trees to grow on it, and they can, probably, some of the trees indigenous to the soil, in spite of the rocks and barrenness and want of moisture, and the city is to pay \$1.25 an acre for the land, and yet it is to be sold under a title that is so vague and indefinite that it is bound to be very unsatisfactory. While there is no mineral on the land, all sorts of prospectors can chase over it for the purpose of prospecting, or pretending to prospect, for mineral. Under this title, if some Federal official should conclude that the city was not doing just what it ought to do in improving the tract for park purposes, a suit could be brought to recover title, and I do not know but that by action of the Interior Department, without suit, the title could be brought in question if not extinguished. I do not believe it is wise, I do not think it is reasonable, I do not think that it is necessary in the interest of the people, and I think, eventually, it will be regretted on the part of the beneficiaries, if you can call people who receive a title like that beneficiaries, to issue a title like this.

In the first place, let us have a report as to whether the land probably contains mineral—the geologists of the Government are able to pass on that—and if it does not, give them a title in fee. In dealing with the people in their collective capacity, as when we deal with municipalities, I do not think we ought to deal with them in this miserly and niggardly way.

Mr. TAYLOR of Colorado. I agree with the gentleman from Wyoming quite largely in what he says, but this is a condition and not a theory that confronts us. The city wants the park, and it is willing to accept this kind of a title if it can not get any better, and it can not from our committee

Mr. MONDELL. I suppose they are willing to accept it, because they can not do any better.

Mr. BRYAN. Mr. Speaker, will the gentleman yield? Mr. TAYLOR of Colorado. I will.

Mr. BRYAN. Referring to the word "they," in line 20 of the amendment, page 2, to whom does that refer? I think the word "they" should be changed to "it." Otherwise it makes the Secretary and the city cooperate. Mr. Speaker, I move to amend by striking out the word "they" and substituting the

The SPEAKER. The Clerk will report the amendment.

The Clerk rend as follows:

On page 2, line 20, strike out the word "they" and insert the word "it."

The amendment to the amendment was agreed to.

SPEAKER. The question is on the amendment as

Mr. MANN. Mr. Speaker, I am not willing that the play of words between the gentleman from Colorado and the gentleman from Wyoming shall go unchallenged as the sense of the House. Both of these distinguished gentlemen, representing the views of their localities, probably believe that the public lands should be turned over as far as possible to the people who have it in the States without any regard whatever for the rights of the rest of the people of the United States.

Mr. TAYLOR of Colorado. That is hardly a fair statement.

Mr. MANN. It is an absolutely true statement, according to my experience in the House. It is very certain that a bill like this would not easily pass through the House except for the idea that the land is not taken for speculative purposes, that the people ask for the land for park purposes realy and not speculative purposes; and if gentlemen from the West should decline to permit the reservation to the Government of the United States of the mineral in the land, of the coal, oil, and gas, these bills would not pass at all.

Mr. TAYLOR of Colorado. I realize that.

Mr. MANN. The gentleman from Colorado realizes that; the gentleman from Wyoming [Mr. MONDELL] realizes that; but he has become so saturated with the idea that the Government ought to reserve nothing to itself that he always makes the speech he has just made, and I usually follow it with this. [Laughter.] The people of the United States have a right to reserve-and I am very sure they will insist, through Congress, that the Government shall reserve—the minerals upon these lands which are given for park purposes or for other public purposes of that kind, notwithstanding the opinion of my very

distinguished friend from Wyoming. [Applause.]
Mr. MONDELL. Mr. Speaker, I move to strike out the last two words. The gentleman from Illinois [Mr. Mann] who has just taken his seat and I do not disagree anything like as much as one would judge from the statement he has just made. The gentleman does not intend to misstate my position or that of the gentleman from Colorado [Mr. TAYLOR]; but I think, without intending to do so, he does misstate our posi-My position is that, in the first place, mineral lands should not pass to municipalities for park purposes unless there is some very extraordinary condition which would warrant it, and in that case there should unquestionably be a reservation, unless it is transferred to the people collectively as a municipality for mining purposes. I would agree in such a case with my friend from Illinois; but these tracts are not mineral. If they contain any mineral, it is some mineral substance the presence of which can not be known at this time, and the probability is that they contain no mineral. The trouble with these grants, with such a multitude of reservations, is that it gives an entirely unsatisfactory title that in the future is almost certain to lead to complication and diffi-

Mr. BRYAN. Mr. Chairman, will the gentleman yield for a

question?

Mr. MONDELL. Just one moment. Very frequently we have had bills before the House attempting to perfect titles of so indefinite and unsatisfactory a character as to be valueless for the purposes for which they were desired. I now yield to the gentleman from Washington.

Mr. BRYAN. I wanted to ask the gentleman to whom these titles are unsatisfactory-to the Congress and the people whom we represent or to the parties who are getting the deeds?

Mr. MONDELL. Mr. Speaker, if the gentleman from Washington can differentiate as a representative of the people of his part of the State of Washington from the people of the country generally and assume that in some way we must always present a hostile front and attitude toward any particular body of American citizens-and, if that is his view, it is a view that I can not understand, and therefore it is difficult for me to answer his question. It is good public policy to have titles, no matter who may possess them, of such a character that they will be satisfactory to the party who holds the title. The public does not gain anything by a reservation of a nonexisting

As to the reversionary clause, it does seem to me that we are stretching things when, after charging the municipality composed of the public collectively \$1.25 an acre, we also insert a reversionary clause which may make a good deal of trouble in the future. I do not disagree with my friend from Illinois [Mr. Mann] in the general public policy half as much as he would have you think, or perhaps as he thinks, but I do think that it is a mistake in dealing with municipalities, particularly with regard to lands like this, to adopt a policy which is un-American and which will be unsatisfactory, and when I say that I have no reference particularly to the beneficiaries, to the grantees, but to the people generally.

Mr. NORTON. Mr. Speaker—

The SPEAKER. For what purpose does the gentleman rise?

Mr. NORTON. I move to strike out the last three words. The SPEAKER. The gentleman moves to strike out the last three words.

Mr. NORTON. Mr. Speaker, I represent a State in which we have had a great deal to do during the last few years with the laws and regulations reserving coal rights to the Government and a great deal to do with the men who have been sent

out from Washington by the Geological Survey to examine public lands and classify them. Now, it seems to me that the provisions for the classification of public lands and the methods of those engaged in the work borders on the height of the ridiculous, and I believe if the policy and desire of this Government is to conserve to the Government the coal, oil, and other minerals in the public lands, then we should have a general statute reserving all coal, oil, and minerals in all public lands. I am convinced that such a general statute should have been enacted by Congress years ago. I have never been able to determine for myself why in the name of common sense such a law has not been long ago placed upon our statute books. Now, in this particular case there are many reasons why all of these mineral rights should be reserved to the United States.

If this Congress was to pass a law giving this land for park purposes to the city of Montrose without any reservation to the Government, why there would at once be a very great demand for a similar grant from almost every town to-day adjacent to public lands. I hope that in this Congress a general statute will be passed reserving all coal, oil, and other minerals in all public lands to the United States. It is ridiculous to see the manner in which some of the cassifications of public lands are now made throughout the West. Many young and inexperienced and newly graduated mining engineers who are sent out there tell one they can determine to a positive accuracy by examining the surface whether there is coal 500 feet under the surface or whether there is a large quantity of oil 1,000 feet below the surface. They even appear in the United States land offices throughout the West and testify to such ridiculous I say again, it is the height of the ridiculous that such conditions should exist. If this Congress wants really to conserve the coal, oil, and other minerals in our remaining public lands, the enactment of a general statute for the purpose is the best manner in which to do it.

The SPEAKER. These pro forma amendments are withdrawn, and the question is on agreeing to the amendment as

amended.

The question was taken, and the amendment as amended was agreed to.

Mr. MANN. Are there any other committee amendments? The SPEAKER. Yes; one more, and the Clerk will report it. The Clerk read as follows:

Amend, page 3, in line 13, by striking out the figure "2" and inserting the figure "3."

The question was taken, and the amendment was agreed to. Mr. MANN. Mr. Speaker, I move, in line 13, page 3, to strike out the word "said" and insert the word "the."
Mr. TAYLOR of Colorado. All right; that is in the same line?

Mr. MANN. Yes.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 3, in line 13, by striking out the word "said" and inserting the word "the."

The question was taken, and the amendment was agreed to. Mr. MANN. Mr. Speaker, I move to strike out the last word, would like to ask the gentleman in reference to a technical

description. In lines 4, 5, and 6, page 2, it reads as follows:

The northwest quarter and the west half of the northeast quarter, the north half of the southwest quarter and west half of the southeast quarter of section 16.

Should not that be "the northwest quarter" and a comma, and "the west half of the northeast quarter," and so forth,
Mr. TAYLOR of Colorado. Yes; I think there ought to be a

comma there.

Mr. MANN. Instead of the word "and"?

Mr. TAYLOR of Colorado. I think that is correct; There should be a comma after the word "quarter," in line 4. Because it means the northwest quarter of section 16, not the northwest quarter of the northeast quarter. I move, in line 4, page 2, to strike out the word "and" and insert in lieu thereof a comma.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, line 4, page 2, by striking out the word "and" and inserting a comma after the word "quarter."

The question was taken, and the amendment was agreed to. The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. TAYLOR of Colorado, a motion to reconsider the vote by which the bill was passed was laid on the table.

FAYMENT OF CERTAIN CLAIMS FOR CONSTRUCTION OF CORBETT TUNNEL.

The next business on the Calendar for Unanimous Consent was Senate joint resolution 74, appropriating money for the

terial, and cash furnished in the construction of the Corbett Tunnel.

The Clerk read as follows:

The Clerk read as follows:

Resolved, etc., That there be, and is hereby, appropriated, out of any moneys in the reclamation fund in the Treasury, supplemental and additional to the appropriation made in public resolution No. 56, Sixty-second Congress, the sum of \$15,750, or so much thereof as may be necessary, for the payment of and to be paid to those persons who have presented claims remaining unpaid on account of labor, supplies, materials, or cash furnished to the contractor or the subcontractor and used in the construction of the Corbett Tunnel, including the spillway, connected therewith, as a part of the Shoshone irrigation project, in the State of Wyoming, under any contract or contracts let for that purpose by the Government of the United States; and the Secretary of the Interior is hereby authorized and directed to forthwith, and as soon as may be, investigate, hear evidence about, determine, and declare the several amounts due and remaining unpaid, if any, and account thereof, and to whom so due, and to certify the amounts due to the Secretary of the Treasury, who is hereby authorized to pay the several amounts so ascertained to the persons entitled to the same: Provided, That no such claim not now filed shall be considered: And provided further, That the Secretary of the interior shall deduct from the amounts to be certified for payment hereunder and under the said resolution No. 56, Sixty-second Congress, to each claimant a proportionate sum to cover the expense of and fair compensation for the person or persons through whose time and services this matter has been laid before Congress, except such claimants as have agreed with such person or persons for compensation; and such deductions shall be certified for payment to such person or persons in like manner as other claims.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Mr. Speaker, reserving the right to object, I will say to the gentleman several gentlemen in the House have asked me, whom I do not see to be now present, to object to the passage of this bill in case they were not here. I am inclined to do it on my own account, however.

Upon what basis, may I ask the gentleman, is it proposed by an act of Congress to take out of a fund which has heretofore been appropriated for the payment of claims a sum of money

now as attorney's fees or agent's fees?

Mr. STEPHENS of Mississippi. If the gentleman will permit, we do not propose to do that with this bill. Mr. MANN. That is what the bill proposes to do. I do not

know what the gentleman proposes.

Mr. STEPHENS of Mississippi. I do not understand it that way. Now, Mr. Speaker, in answer to the gentleman I will say this: That the bill does provide that the Secretary shall withhold or deduct a certain part as attorney's fees. clause was put in for this reason: The gentleman will remember, I presume, that in the last Congress a bill similar to this passed providing for an appropriation of \$42,000 with which to pay these claims. After that bill passed, certain other parties, who had made no effort whatever to secure their money theretofore, also filed claims. The original amount of the claims was \$42,000—the amount first appropriated. Then, after it was seen these claims were to be paid, the other claimants filed their claims to the amount of \$15,000. Now, the committee thought this, that in view of the fact that this first appropriation of \$42,000, which is still in the Treasury and still unpaid, because of the fact that the department refuses to make any payment until the whole matter can be settled, that in view of the fact that these first parties had been active in their efforts to secure their money, had gone to certain expense, the parties who had gone to no expense whatever, but had come in at a later date, should also be required to share in the expense of the proceedings.

Therefore, taking that view of it, the Senate passed the resolution with that language in it, and the House committee followed the action of the Senate, thinking it just and proper that

it should be done.

Mr. MANN. Mr. Speaker, I remember this case very distinctly. We passed it at one time and the President vetoed it. voted to pass it, I think, over the presidential veto, but I think we did not succeed in doing that.

Mr. STEPHENS of Mississippi. It lacked only two or three

Mr., MANN. Subsequently it was passed in another form and became a law. I remember the case very distinctly. who came here from my home locality making the claim, gave me the information and stated to me in positive language that she did not expect any compensation for the service she was rendering; that there were a large number of claims in which she was not interested, but she hoped to get enough out of this to save her home, upon which a mortgage had been placed because of the failure of the parties who had done work to pay their supply bills, and so forth and so on. There was no pretense that, after Congress or before Congress should pass a bill, anybody would come in afterwards and want any part of that money as attorney's or agent's fees. It was proposed to pay this money out of the reclaimed fund. There was grave doubt payment of certain claims on account of labor, supplies, ma- about the advisability of paying it at all, but Congress finally

ordered it paid. True it was thought it might possibly pay the full amount, although there was no guaranty of that. Now comes the proposition, which seems to me absolutely monstrous, that after Congress has appropriated the money for these claims, upon the special pleading of the parties interested, we should now propose to turn around and take it away from the people to whom it belongs and pay it to somebody else as If the Government wants to pay Mrs. McDonald, that is all right. Let them pay it. There is no reason why the Government should pay Mrs. McDonald out of the money we appropriated to the other people. I do not think we ought to I think we have been buncoed in this whole business. We had tears shed before us, our sympathies were played upon, until we made provision for the payment of these claims under conditions which have not existed as to the payment of claims anywhere else. And finding that so easy, they now propose to add to the amount and put it in their pockets.

The SPEAKER. Is there objection to the consideration of

the bill?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects, and the bill will be stricken from the calendar. The Clerk will report the next bill.

DISPOSAL OF PORTION OF FORT BIDWELL INDIAN SCHOOL RESERVATION.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11006) authorizing the disposal of a portion of the Fort Bidwell Indian School, Cal.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to cause to be surveyed, appraised, and conveyed by patent to R. R. Baker, P. H. Trendt, Mary E. Manning, Mrs. Fred. Schadler, S. S. Garrett, A. C. Lowell, and Harry Watson, of Fort Bidwell, the tracts of land in Modoc County, in the State of California, now a part of the Fort Bidwell Indian School (formerly the Fort Bidwell Military Reservation), being a part of section 17, township 46 north, range 16 east, Mount Diablo base and meridian, which are severally inclosed and actually occupied by the above-named parties, respectively, said tracts not to exceed in all 2 acres: Provided, That the cost and expense of surveying and appraising said lands shall be added proportionately to the appraised price thereof: Provided further, That the persons named shall pay the appraised price, including the cost of surveying and appraisement, to the proper district land office within 90 days from receipt of notice of such price, or their rights to make such purchase shall be forfeited: Provided further, That the value of the improvements placed on the land by the occupants shall not be included in the appraised price of the land.

The SPEAKER. Is there objection?

The SPEAKER. Is there objection? Mr. STEPHENS of Texas rose.

Mr. MANN. Reserving the right to object, Mr. Speaker, I would like to ask a question. Of course the gentleman from California [Mr. Raker] knows that this bill does not belong on the Union Calendar. It is a Private Calendar bill. Mr. STEPHENS of Texas. Mr. Speaker, I make no objection

to that, but I desire to ask the gentleman whether or not the Indian school children have been protected by this bill? This bill proposes to cut off, as I understand, something like 200 acres of land out of the amount of land that the school is now using for school purposes. What I desired to ask was this, Whether or not the superintendent of this Indian school-Fuller, I believe, is his name-and the Commissioner of Indian Affairs have passed upon this bill and recommended its passage?

Mr. RAKER. Mr. Speaker, in response to the question of the gentleman from Texas [Mr. STEPHENS], I will say that this bill was originally recommended by the superintendent of the Fort Bidwell Indian School, and it is also favorably recommended by the Commissioner of Indian Affairs, and also favorably recommended by the Secretary of the Interior. 2 acres of this land is inclosed now by these five separate parties, and has been inclosed for 40 years, on which there is a row of trees about 2 feet in diameter along the border. Two of the parties have barns along the line which would be cut and another has a garage.

The department tried to dispose of it under the act of 1884, but it can not; and this bill provides that the parties shall pay the price of appraisement and provides that the Government shall be at no expense, so that the Government might build a new fence along the line where the road has been running, to my personal knowledge, for over 30 years. It is only to clear up the titles as they now actually exist-that is, the improvements and fences. The money to be derived will go into the Indian fund.

Mr. STEPHENS of Texas. Has the bill the approval of the

Secretary of the Interior?

Mr. RAKER. It has the approval of all the departments.

The SPEAKER. Is there objection?

Mr. MILLER. Reserving the right to object, Mr. Speaker—
The SPEAKER. The gentleman from Minnesota [Mr. Mil-LER] reserves the right to object-

Mr. MILLER. I would like to inquire of the gentleman from California if the land that is proposed to be conveyed by this bill to these respective parties is not now a part of an

Indian school and belongs to the Indian school service?

Mr. RAKER. It is a part of the old Fort Bidwell Military

Reservation.

Mr. MILLER. I understand that.

Mr. RAKER. I will go right on. Now, the land, which embraces some seven to ten thousand acres, is turned over for the use of the Indian school at this time. The department is trying to build a new fence, and after starting to build the new fence they found, after it was surveyed many times, that the line cuts along the lands of these people, taking off a lot of trees and cutting through the barns of two of these parties and through the garage of another. They want to move the fence along the line of the road as it now exists and as it has existed for many years, and these parties are willing to have the land appraised and pay the appraised price and pay the cost of appraisement to which the Government may be subjected in going through with this work.

Mr. MILLER. I understand that. Their attitude is very The question now is, Does the Indian school need this

Mr. RAKER. I want to say that it is half a mile between this land and the Indian school. There is a great deal of alfalfa raised there, and down at the lower end are 320 acres of the finest land there is in the country, formerly grown over with sagebrush and willows, that I have been trying for years to have cleaned. Now they have it practically cleaned up, and have about a thousand acres of tillable land for raising vegetables and grain and alfalfa; and then there is a range back in the mountains, also about 400 acres of as fine timber land as there is in the State of California, still belonging to this reservation.

Mr. MILLER. I find nothing in the report of the committee as to whether or not the school needs this land for agricultural

purposes

Mr. RAKER. The gentleman will find by reading the report of the superintendent, Mr. Fuller, that he recommends it. The Commissioner of Indian Affairs also recommends it, and it is recommended also by the assistant commissioner, and also by the Secretary of the Interior, Franklin K. Lane. Mr. GRAHAM of Illinois. Is the gentleman from Minnesota

through?

Mr. MILLER. I was not quite through.

Mr. GRAHAM of Illinois. I wanted to make a suggestion to my friend from Minnesota. Is not the fact that it has been in use for 30 years or more pretty strong inferential proof that it is not needed for Indian purposes?

Mr. MILLER. I think that is possible, but I think I have

the right to ask that question.

Mr. GRAHAM of Illinois. I do not deny the gentleman's

Mr. RAKER. In answer to the question, I think if the gentleman will read pages 2 and 3 of the report

Mr. MILLER. I have read the report.

Mr. RAKER. If the gentleman will read the statement signed by Superintendent Fuller, that is a sufficient answer to the gentleman's question.

Mr. MILLER. No; it is not sufficient. The Indian Office does not state in any place, nor does any official of the Government state, that this land is not needed for Indian purposes.

Mr. RAKER. I know; but a statement of the facts leads to that inevitable conclusion. Here are 1.000 acres of arable land. Here are about 2 acres along the border—that is, 1.18 acres in one piece and eighty-two one-hundredths of an acre in the other-that have been used by these settlers for over 40 years-30 years to my knowledge. Now, that certainly shows that the land is not necessary for Indian purposes.

Mr. MILLER. As a matter of fact, this is actually Indian land that it is proposed by the bill to transfer to these parties.

Mr. RAKER. No; it is not Indian land. It belongs to the Fort Bliss Reserve, which is now being used by the Government for Indian school purposes. It does not belong to the Indians. It belongs to the Government, and the Government can at any time abandon that school if it so desires and then dispose of the land as it sees fit.

Mr. MILLER. Oh, yes; the Government could convey the title to all the Indian lands in the United States to the King of Great Britain, if it chose to do so.

Mr. RAKER. This is not Indian land. Mr. MILLER. It is land, however, that by special act of Congress is reserved for Indian school purposes.

Mr. RAKER. Yes. Mr. MILLER. Therefore it is a part of the Indian school service of the country.

Mr. RAKER. No; it is not. Mr. MILLER. I do not know what the gentleman would call

it, then.

Mr. RAKER. If it was in the Indian Service, if it was sold the money would go into the Indian fund. What was done was simply to take over a part of the Fort Bidwell Reservation and say, "We will use the grounds and buildings and water works for the purposes of an Indian school," and it has been so used for 10 years.

The SPEAKER. Is there objection?

Mr. MILLER. Reserving the right to object, I should like to ask how this bill comes to be reported by the Committee on Public Lands when, under the rules of the House, it should have gone to the Indian Committee, where it belongs.

Mr. RAKER. It was referred to the Committee on the Public

Lands by the Speaker.

The SPEAKER. It is too late to raise that question now.

Mr. MILLER. I am not going to raise it.

Mr. RAKER. The land in question is still public land.

Mr. MILLER. I should like to say this: I notice that there are three bills on this calendar to-day reported from the Public Lands Committee, not one of which belongs to the Public Lands Committee, but every one of which should have gone to the Indian Committee. They deal with Indian lands. I am not going to object to this, because I think the bill is meritorious; but I think that practice ought to be called to the attention of

the House, and it ought to be discouraged.

Mr. RAKER. I should like to make a statement about that. A bill turning over 10 acres of this tract for cemetery purposes was introduced last year and sent to the Public Lands Committee. All the departments went over it, and the bill finally passed; and it was conceded by all that this title remained in the Government and that the land was Government land, just like any other reservation, except that by resolution it was temporarily set aside for an Indian school. Therefore the jurisdiction belongs to the Public Lands Committee. That jurisdiction was not questioned in the House, but the question was raised in the committee, and it was determined in the committee that that legislation properly came before the Public Lands Committee.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I should like to make this suggestion: Whether this bill belongs to the Public Lands Committee or the Indian Committee is, of course, question that can not now be raised. However, it deals with land which is being occupied for Indian school purposes. addition to that, the bill was reported to the House on December 22 last, and was placed on the Unanimous Consent Calendar, although the report was not available until last Saturday

In addition to that, the bill, when reported to the House, was placed, by whoever had charge of it-I do not know at whose suggestion-on the Union Calendar, although it is a private bill which belongs on the Private Calander, and if it were on the Private Calendar could not be placed on the Unanimous Consent Calendar. A bill has to be very meritorious to be first referred to the wrong committee, then reported by the gentleman on the committee who introduced the bill, it being his own committee, and reported for weeks before the report is printed-the report not being printed until the day before the bill is called up in the House-and then placed upon the wrong calendar and brought up under a rule under which it could not be brought up if placed on the right calendar. Yet I do think the bill is all right, and I shall not object. [Laughter.]

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that this bill may be considered in the House as in Committee of the

The SPEAKER. The gentleman from California asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. RAKER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

PROCEDURE OF UNITED STATES COURTS.

The next business on the Unanimous Consent Calendar was the bill (H. R. 10946) to regulate the judicial procedure of the courts of the United States.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 269 of the act approved March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to

the judiciary," be, and the same is hereby, amended so as to read as

follows:

"SEC, 269 That no judgment, decree, or order shall be set aside or reversed, or new trial granted by any court of the United States in any case, civil or criminal, on account of any error which does not injuriously affect the substantial rights of the party complaining. The trial judge may, in his discretion, in any case submit to the jury the issues of fact arising upon the pleadings, reserving any question of law arising in the case for subsequent argument and decision, and he and any court to which the case shall thereafter be taken on writ of error shall have the power to direct judgment to be entered either upon the verdict or upon the point reserved, if conclusive, as its judgment upon such point may require."

Mr. RAKER. Mr. Speaker, reserving the right to object, I would like to ask whether or not the gentleman from New Jersey [Mr. McCoy] would have any objection to the following amendment to the bill. I will read it. After line 8, on page 2, as a new paragraph, insert:

The trial judge shall not charge juries with respect to matters of fact, but may state the testimony and declare the law.

Now, that is the constitutional provision in many of the States. It is the law in many of the States of the Union to-day that the judges shall not charge the jury respecting a matter of fact, but can fully and clearly state the testimony as presented before the jury, and upon that testimony can declare the law of the case. It is a proper provision, and it is a pro-vision that ought to be in the statutes in regard to the trial of cases in the Federal courts. The constitution of California makes this provision in section 18, article 4:

Judges shall not charge juries with respect to matters of fact, but state the testimony and declare the law.

In many of the States there is the same constitutional provision.

Mr. FITZGERALD. Mr. Speaker, I do not think that such a revolutionary change in the Federal practice should be made by unanimous consent to-day, however meritorious the bill itself

may be.

Mr. FINLEY. Mr. Speaker, I object to the bill.

Mr. McCOY. Mr. Speaker, I am going to ask my friend from South Carolina [Mr. FINLEY] to withdraw that objection.

out when there is more time and opportunity.

Mr. FITZGERALD. The bill as reported is all right.

Mr. McCOY. The bill passed the House at the last session. It has been considered at various annual sessions of the American Bar Association and has the approval of that association. It was considered in the Judiciary Committee in the Sixty-second Congress, which committee reported unanimously in favor of the bill. The Solicitor General, Mr. Davis, then a Member of the House from West Virginia, wrote the report which is adopted now as the report on the bill.

I have never heard a single objection raised by anybody to what is practically a clearing up of the practice in the United States court. I want to call the gentleman's attention to two of the decisions which are referred to in the report of the committee. One of them holds that where error is committed, the person who has secured the judgment is practically bound to show beyond a reasonable doubt that the defeated party could not have been injured. Some time after that the Supreme Court decided that the appellant was the person who had the burden of proof that the alleged error was harmful to him.

Now, in the absence of law, if I may say so, due to these two decisions, this bill steps in and makes certain what is now

uncertain.

Mr. FINLEY. Mr. Speaker, I will say to the gentleman that I am familiar with the facts and everything that has been stated here, and I do not think that an important amendment to the judiciary act should come up under unanimous consent, and I made the objection after mature deliberation.

EMIGRATION CANON RAILROAD CO.

The next business on the Calendar for Unanimous Consent was the bill (S. 541) granting to the Emigration Canon Railroad Co., a corporation of the State of Utah, permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, a certain piece of land now included in the Mount Olivet Cemetery, Salt Lake County, Utah. The Clerk read the bill, as follows:

The Clerk read the bill, as follows:

Be it enacted, etc., That the Emigration Canon Railroad Co., a corporation of the State of Utah, is hereby granted permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, that piece of land now included in the Mount Olivet Cemetery, Salt Lake County, Utah, particularly bounded and described as follows: Commencing at a point 169 feet east and 100 feet north of the southwest corner of the Mount Olivet Cemetery (formerly the southwest corner of the Fort Douglas Military Reservation), in Salt Lake County, Utah; thence northwesterly, rounding a 20 degree curve a distance of 351.99 feet, at a point on the west line of the said Mount Olivet Cemetery; a distance of 387.9 feet north from the southwest corner of said Mount Olivet Cemetery; thence south to a point 100 feet north of the southwest corner of said Mount Olivet Cemetery;

thence east a distance of 169 feet to place of beginning; containing in all seven hundred and sixty-two thousandths acre.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BROWN of New York. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in Committee of the

The SPEAKER. The gentleman from New York asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the amendment,

The Clerk read as follows:

The Clerk read as follows:

Strike out all after the colon in line S, page 1, and all on page 2 of said bill and insert the following:

"Commencing at a point 195.62 feet east and 100 feet north of the southwest corner of Mount Olivet Cemetery (formerly the southwest corner of the Fort Douglas Military Reservation), in Salt Lake County, Utah; thence rounding a 20-degree and 35-minute curve to the right a distance of 351.99 feet to a point on the west line of the said Mount Olivet Cemetery, said point being a distance of 366.94 feet north from the southwest corner of said Mount Olivet Cemetery, the center of said curve with a radius of 279.94 feet, being located at a point 279.94 feet east and 366.94 feet north from the southwest corner of said Mount Olivet Cemetery; thence south 266.94 feet to a point 100 feet north of the southwest corner of said Mount Olivet Cemetery; thence east a distance of 195.62 feet to place of beginning; containing in all 319,000 acres."

Mr. STAFFORD. Mr. Speaker I would like to ask the gen-

Mr. STAFFORD. Mr. Speaker, I would like to ask the gentleman from New York whether or not there is not a typographical error in the last line? Would it not be better to have it changed so as to read "three hundred and nineteen thousand the of an acro?"? sandths of an acre'

The SPEAKER. The Clerk informs the Chair that the bill

at the desk is correct.

Mr. MANN. Let us see about that print. Is it a star print? Mr. STAFFORD. May we have the amendment again read at the desk?

The Clerk again read the amendment.

Mr. STAFFORD. Would it not be better to have that "three

hundred and nineteen thousandths of an acre"?

Mr. BROWN of New York. That might clarify the bill, and, if the gentleman wishes, I would be very glad to accept such an amendment

Mr. STAFFORD. Then I offer that as an amendment. The SPEAKER. Without objection, the amendment will be agreed to.

There was no objection.

The SPEAKER. The question is on agreeing to the amendment as amended.

The amended amendment was agreed to,

The SPEAKER. The question now is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the

third time, and passed.

On motion of Mr. Brown of New York, the motion to reconsider the vote by which the bill was passed was laid on the table.

PATENTS TO TRANSFEREES OF CERTAIN TOWN LOTS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 4938) providing for the issuance of patents to transferees of town lots purchased from the United States at public sale in certain cases.

The Clerk read the bill.

The SPEAKER. Is there objection?
Mr. MILLER. Mr. Speaker, reserving the right to object, would like to ask a question or two of the gentleman in charge of the bill.

The SPEAKER. There does not seem to be anybody particularly in charge of it.

Mr. GRAHAM of Illinois. Mr. Speaker, Mr. Ferris is not present, and I am not sure that I can answer the gentleman's

Mr. Speaker, I notice this bill specifies the date, October 11, 1911, and that transfers made prior thereto are in one sense legalized by the bill. My inquiry is, What is there about that date that particularly affects these town lots?

Mr. GRAHAM of Illinois. I am not able to give a specific

answer to that question.

Mr. LENROOT. Mr. Speaker, if the gentleman will permit, I will say I was not present at the time the bill was considered, but I believe the reason why that date of October 11, 1911, was fixed is that the Secretary of the Interior issued an order to the General Land Office to complete all of these titles by furnishing proper instruments, and that is why that date is mentioned.

Mr. MILLER. Can either gentleman inform me whether or not the lots here referred to are lots that were sold from Indian lands adjacent to the city of Lawton?

Mr. LENROOT. I do not know.

Mr. MANN. Mr. Speaker, the gentleman from Oklahoma [Mr. Ferris], the author of the bill, is not present, and it is very evident that the bill can not be passed to-day in his absence. I suggest that someone on that side ask unanimous consent that it be passed over without prejudice.

Mr. GRAHAM of Illinois. Mr. Speaker, I ask unanimous

consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection, and it was so ordered.

SALE OF LAND TO LAWTON, OKLA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10258) authorizing the Secretary of the Interior to sell to the city of Lawton, Okla., a tract of land to be used for watershed and water-supply purposes.

The Clerk read the bill, as follows:

The Cierk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to sell to the city of Lawton, Okla., and issue appropriate conveyance therefor at any time within six months from and after the passage and approval of this act, for the sum of \$1.25 per acre, the following-described tracts of land: The west half section 1 and all of section 2, township 3 north, range 13 west, the same to be used by the city of Lawton as a part of the watershed and water supply: Provided, That in the event the lands above described cease to be needed or used for the purposes above mentioned, the same shall revert to the Government of the United States.

With the following committee amendments:

Page 1, line 8, after the word "half," insert the word "of"; on page 1, line 10, after the word "Lawton," insert "solely"; page 2, line 1, after the word "supply," insert "for said city and other public uses."

The SPEAKER. Is there objection?

Mr. MILLER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman in charge of this bill if this relates exclusively to lands belonging to an Indian reservation? Mr. GRAHAM of Illinois. Yes.

Mr. MILLER. And it is proposed to convey to the city of Lawton, Okia., for \$1.25 per acre, the area of land specified. How many acres, approximately, are there in this tract?

Mr. GRAHAM of Illinois. I am not able to answer that

question, either, but the gentleman from Oklahoma [Mr. Fer-RIS] stafed that it was very rough and broken land, of no practical use for any purpose.

Mr. LENROOT. About 1,000 acres.

Mr. MONDELL. Nine hundred and sixty acres, I will say,

it would be according to the description.

Mr. GRAHAM of Illinois. It is in the neighborhood of 1,000

Mr. MILLER. I have no purpose to object to the bill on my own account. Of course, this is a bill that should have gone to the Indian Committee, which committee has exclusive jurisdiction, under the rules of the House, of the disposition of all Indian lands. I am inclined to think that this is a very meritorious bill and regret that there is not some one here who can answer some of the Indian questions relating to it.

Mr. GRAHAM of Illinois. I might state there is an Indian school which gets its water supply from this reservoir.

Mr. MILLER. I understand; but where the statement is made by the department that the advantage accruing to the Indian school from the increased purity of the water consumed by it—a condition to follow the passage of this bill—is greater than the advantage to the Indians which would come from the sale of the lands involved and the money going into their treasury, is a refinement of reasoning that can not now have the indorsement of my judgment in my present benighted condition, as far as the facts disclosed are concerned.

Mr. GRAHAM of Illinois. One of the greatest advantages which the Indian school and others would receive from it would be in the prevention of the contamination of water by preserving this watershed from invasion or from any contaminating influence.

Mr. MILLER. Does not the gentleman think it would be advisable to have some expression from the Indian Service or the Indian Office as to the propriety of transferring these Indian lands? I say, at the outset, I am in sympathy with the purposes of the bill, and I would like to see an improvement in the water supply at any place; and anybody who has visited that section of Oklahoma knows that the improvement of the water supply is of serious moment. I have a little further curiosity in my mind in connection with the paragraph in the report which says the Reclamation Service contemplates an enlargement of its activities in that vicinity if the dam shall be raised in connection with this waterworks system. Now, just what part does that play in this project? What is its relationship in service to the Indian school there and the development of the Indian lands?

Mr. GRAHAM of Illinois. I regret I am not able to answer that question either. I would suggest to the gentleman that, if he desires it, I will ask that this go over until Mr. FERRIS returns.

Mr. MILLER. I will say to the gentleman I will not personally object to the bill, although these are features which I think ought to have been considered by the Indian Committee, and it is most unfortunate the bill did not receive some consideration from Indian sources.

The SPEAKER pro tempore (Mr. FITZGERALD). Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, for

what is it proposed to use this land? Mr. GRAHAM of Illinois. For no other purpose than as a

watershed. Mr. MANN. What are you providing in the bill "for other

purposes" Mr. GRAHAM of Illinois. Well, "for other purposes" re-

fers to water rather than use of the land, I take it.

MANN. Here the committee proposes to insert an amendment, "and other public uses." After having defined it shall be used for watershed purposes, when you put in "and other public uses," I think we are entitled to know what the other public uses are to be.

Mr. GRAHAM of Illinois. For other public uses, I take it, refers to the use to which the water will be put after it is collected in the reservoir. There is an Indian school in that vicinity adjacent to but not within the municipality. be supplied with water. The water supply is to be for said city and other public uses. The other public uses may be such as for the benefit of the school in the vicinity.

Mr. MANN. That is very bad grammar or rhetoric, I will say to the gentleman, "the same to be used by the city of Lawton solely as a part of the watershed and water supply for said city and other public uses." I will submit that any grammarian on earth will say that the meaning of that was that it was to be used as a watershed, water supply, and other public

Mr. GRAHAM of Illinois. I take it the word "solely" was inserted there to obviate the difficulty the gentleman suggests, that it is to be used solely as a part of the watershed.

Mr. MANN. For the purposes named in the bill. I ask for information. I do not know that I have any objection to the city of Lawton using whatever it pleases.

Mr. RAKER. Will the gentleman from Illinois yield? Mr. GRAHAM of Illinois. Yes.

Mr. RAKER. In answer to the gentleman from Illinois [Mr. Mann], the purpose of that is, first, that they may furnish water to the military reservation and school, and the matter was fully explained before the committee that for other public purposes was so there should be no question they could use the water for these particular purposes and permit an irrigation project that is being formed or is formed to raise the dam at least 50 or 100 feet higher than it is and conserve the water that is there, and that they might use it in the city of Lawton, the military reservation, and the school. That it would permit them to raise the dam and use that water for these reclamation purposes.

I will say to my distinguished friend from Mr. MANN. California [Mr. RAKER] that if this water out there is no clearer than his explanation to me it will not be fit to drink. While I have no doubt his explanation is clear, I do not get it.

Mr. RAKER. I see. Mr. BRYAN. Do I understand that the gentleman figures that the putting in of this clause, "for other uses," meant a reservation for reclamation purposes? All these rights are transferred to the city of Lawton, and the Government of the United States has no rights reserved in behalf of the Reclama-

Mr. RAKER. They have a reservoir built, and a dam, and they use it for the city of Lawton and the school. They want this 960 acres to make their watershed larger, in order to keep the water pure and prevent it from being polluted. Now, the question involved as to other purposes is that the city of Lawton might not have the power under the act of Congress, if it did not say "for other purposes," to permit the reclamation people to join in with them and build up the dam another

hundred feet, and thereby use a part of this surface water.

Mr. GRAHAM of Illinois. Let me say to my colleague [Mr. MANN] that I am very sure it was the intention of the committee that the word "solely," in line 10, on page 1, would apply to the area only, and that this area proposed to be given

for watershed purposes should be used by the city of Lawton only for watershed purposes, and if the language does not convey that idea with sufficient clearness I know of no reason why it should not be changed to suit my colleague or anyone

Mr. MANN. What is the use of inserting the amendment at all, then? What good does it do at all in that case?

Mr. GRAHAM of Illinois. Does the gentleman mean the words "and other public uses"?

Mr. MANN. I mean the words "for said city and other public uses." If the gentleman is correct, why not simply say

to be used as part of the watershed and water supply' Mr. GRAHAM of Illinois. The question came in as to the use of the water for the Indian school and the military reservation. Mr. MANN. That would leave the city of Lawton to deter-

mine that

Mr. GRAHAM of Illinois. The committee probably did not

want it that way. Mr. MANN. The committee has left no provision in here for

water for the Indian school. They leave it to the city, I say.

Mr. RAKER. In addition to what was stated, the committee went over this matter thoroughly-

Mr. MANN. Then they ought to be able to tell us what it .

Mr. RAKER. I will tell you this time. [Laughter.] The grant being to the city of Lawton solely for municipal purposes, some one might raise the question that, this being a grant of Congress as it relates to these 960 acres, they could not dispose of any of the water that might come from this reservation for any other purpose except the city of Lawton, and to avoid that they put in those words "for said city and other public uses," in order that they might furnish it to these two places, namely, the Fort Sill Military Reservation and the Indian school, and then might permit the dam to be raised and the use of the surplus water for irrigation; and there would be no complica-tion then arising by virtue of this act upon this land, as it was intended to give it to the city of Lawton for its public uses and the purposes of the military reservation and Indian school.

Mr. MANN. Then, as I understand the gentleman from Call-fornia, this amendment, "for said city and other public uses," was intended because the rest of the bill provided that the land

should be used by the city of Lawton solely as a watershed?

Mr. RAKER. Yes, sir.

Mr. MANN. The word "solely" was not in the bill. The gentleman proposes to insert an amendment in the bill and then put in an amendment to it. The gentleman bases his whole argument upon the fact that the bill provided "solely," but "solely" is a committee amendment and not in the original bill.

The SPEAKER pro tempore. Is there objection?

Mr. MILLER. Mr. Speaker, reserving the right to object—Mr. MANN. I think we ought to have the gentleman from Oklahoma [Mr. Ferris] here to-day.

Mr. RAKER. I am trying to get him here just as hard as I can. That is what I am working on now. [Laughter.]

Mr. MANN. Pass it over until he comes.

Mr. RAKER. Mr. Speaker, I ask that the bill be passed over without prejudice for a few minutes, until the gentleman from Oklahoma [Mr. Ferris] arrives.

The SPEAKER pro tempore. That is not in order.

Mr. MANN. The gentleman from California means to pass it over on the calendar.

Mr. RAKER. I move that it be passed over without prejudice and retain its place on the calendar.

The SPEAKER pro tempore. It has been repeatedly decided that that is not in order, and the Chair will not entertain that motion.

Mr. RAKER. We did it on a prior bill this morning. Mr. MANN. Consideration has not yet been granted, the Speaker should understand.

The SPEAKER pro tempore. The gentleman from California [Mr. Raker] asks that this bill be passed over temporarily. Is there objection?

Mr. MANN. Temporarily—that is, for the day.

The SPEAKER pro tempore. Passed over for the day?

Mr. RAKER. Yes.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ACTION FOR DEATHS BY NEGLIGENT ACTS OCCURRING ON THE HIGH

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6143) relating to the maintenance of action

The SPEAKER. The Clerk will report the bill. The Clerk read the bill, as follows

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That whenever the death of a person shall be caused by wrongful act, neglect, or default occurring on the high seas, the Great Lakes, or any navigable waters of the United States the personal representative of the decedent may maintain a suit for damages in the district courts of the United States in admiralty for the exclusive benefit of the decedent's wife, husband, parent, child, or dependent relatives against the vessel, person, or corporation which would have been liable to a suit for damages by or in behalf of the decedent by reason of such act if death had not ensued.

SEC. 2. That the recovery in such suit shall be a fair and just compensation to the persons for whose benefit the suit it brought and shall be apportioned among them by the court in proportion to the pecuniary damage they may severally have suffered by reason of the death of the person by whose representative the suit is brought.

SEC. 3. That suit shall be begun within one year from the death of the decedent, unless during that period there has not been reasonable opportunity for securing jurisdiction of the vessel, person, or corporation sought to be charged: Provided, however, That after the expiration of a period of one year from the decedent's death the right of action hereby given shall be deemed to have lapsed within 90 days after a reasonable opportunity to secure jurisdiction has offered.

SEC. 4. That if a person die as the result of wrongful act, neglect, or default occurring on the high seas, the Great Lakes, or any navigable waters of the United States during the pendency in a court of admiralty of the United States during the pendency in a court of admiralty of the United States during the pendency in a court of admiralty of the United States during the pendency in a court of admiralty of the United States of a suit to recover damages for personal injuries in respect of such act, neglect, or default, the personal represent

With the following committee amendments:

With the following committee amendments:

On page 2, line 4, after the word "compensation," insert "for the pecuniary loss sustained."

On page 2, line 7, strike out the word "pecuniary."

On page 2, line 10, strike out the words "one year" and insert in lieu thereof "two years."

On page 2, line 15, strike out the words "one year" and insert in lieu thereof "two years."

On page 2, line 16, after the word "shall," insert "not."

On page 2, line 17, strike out the word "within" and insert in lieu thereof the word "until."

On page 3, line 5, strike out the word "taken" and insert in lieu thereof the word "take."

Mr. MCCOV. Mr. Speeker I should like to propose an amend

Mr. McCOY. Mr. Speaker, I should like to propose an amend-

ment. Mr. MANN. Mr. Speaker, reserving the right to object—
The SPEAKER. The gentleman from Illinois reserves the

right to object.

Mr. McCOY. I should like to have this amendment considered as adopted, subject to the right to object.

Mr. MANN. You could not adopt an amendment subject to the right to object.

Mr. McCOY. It is purely verbal. What I propose is this, that on page 2, line 7, the word "damage" be stricken out.

The SPEAKER. The Chair will state that consent has not been obtained yet. Is there objection?

I reserve the right to object. Mr. MANN.

The SPEAKER. The gentleman from Illinois reserves the right to object.

Mr. MANN. It seems to be a very important bill very much affecting the section of country that I come from; at least, around the Great Lakes. Apparently it does away with or supersedes the jurisdiction over damages that occur within the States upon the Great Lakes and transfers the jurisdiction to the admiralty courts of the United States.

I would like to know what is the reason for it, if it is urged by anybody other than the admiralty lawyers. I can very readily understand that the admiralty lawyers would like to increase their jurisdiction, and, if I were one of them, I would; but the gentleman knows that the same reason affecting the admiralty courts' jurisdiction of accidents upon the high seas, where no States have jurisdiction, would not apply to one of the Great Lakes where all of the bed of the lake is within some State.

Mr. McCOY. If the gentleman will permit, I believe that the bill is not intended to do what the gentleman thinks, and, in fact, it specifically provides that no jurisdiction shall be taken away from the State courts.

Mr. MANN. I understand it just gives it to somebody else? Mr. McCOY. Yes, if you please; but in these words. It

says, on page 3, line 17:

And in all suits in admiralty recovery for damages for death so caused shall be had only under the provisions of this act.

Mr. MANN. Of course, that is the only jurisdiction that ongress has. It has only the admiralty jurisdiction. Under Congress has. the Constitution we have jurisdiction over admiralty cases

Mr. McCOY. What it says, as I interpret it, is this: That if you go into admiralty, in case this bill passes, you can recover only under this bill; but it does not say that where the State courts have jurisdiction of the cause of action you shall go into admiralty, but you may, if you choose, go into the State court and recover there.

Mr. MANN. I understand it offers another admiralty jurisdiction—another chance to bring a suit—where they now have but one chance. What is the reason for that? If an accident but one chance. occurs on the high seas, you can not bring a suit anywhere else than in the admiralty court; but if an accident occurs on the Great Lakes, where anybody is liable, you can bring suit in the State in which the lake lies.

Mr. McCOY. I will say to the gentleman that, as I understand, the purpose of including the Great Lakes is in order to

bring about uniformity of jurisdiction in these cases.

Mr. MANN. The purpose of this bill is to bring in the Great Lakes and the rivers. There is no necessity for it, as I understand, as far as the high seas are concerned.

Mr. McCOY. The gentleman is wrong about that. an absolute necessity for it, because you will see that this bill will, if it becomes a law, create a cause of action for death on the high seas, where none now exists.

Mr. MANN. I thought a cause of action did exist for death

on the high seas.

Mr. McCOY. No. The primary purpose of the bill is to create a cause of action for death on the high seas due to negligence, where no cause of action now exists. Now, Mr. Speaker, just a word on that-

Mr. BRYAN. Those who suffered injury by death of their relatives on the Titanic are suing in some court of the United

States at this time, are they not, in admiralty?

Mr. McCOY. I understand they are making a desperate attempt to get some recovery, but so far without success. And I will say to the gentleman from Washington that in the very case of the accident to the *Titanic*, if this bill had become a law before that accident, there would be a right to recover damages due to the death of those who went down in that great disaster, and it is to correct the hiatus that there is in the admiralty law in that respect, and to make the law in admiralty the same as it is in all the States of the Union where they have adopted substantially Lord Campbell's act, that this bill is introduced. That is the primary purpose of it.

Mr. BRYAN. Another question: For instance, out on Puget Sound, if some one is hurt on a vessel going from one point to another on the Sound, the right to sue exists for three years,

I think, under our State law.

Mr. McCOY. This would not take it away. Mr. BRYAN. This provides a two-year limit.

Mr. McCOY.

Only in admiralty.

Would it not be permissible under this statute Mr. BRYAN. for either the defendant company that owned the boat or the plaintiff to ask that the case be transferred to the admiralty court?

Mr. McCOY. I understand there is no such thing as a transfer from a State court into the admiralty court. That only applies to transfers to the district court of the United States in a different sort of case. You can not transfer a case from a in a different sort of case. State court into an admiralty court unless perhaps in a proceeding to limit liability.

Mr. COX. Will the gentleman yield for a question?

Mr. McCOY. Yes.
Mr. COX. If I understood the gentleman correctly, in response to the inquiry of the gentleman from Washington [Mr. BRYAN] a moment ago as to the survivors of the Titanic disaster, the gentleman stated that if a bill of this kind had been in force in this country at that time the survivors could have recovered for their loss. Would not that have depended upon the ability of the survivors to get service upon the company?

Mr. McCOY. In that instance it would come up under a proceeding to limit the liability. They can get jurisdiction, as I understand it, and the District Court for the Southern District

of New York now has acquired jurisdiction of some phase of that situation. I can not speak with entire accuracy, but I understand that it is in a proceeding to limit liability. But even in a proceeding to limit liability-and that is where the question has come up twice before in the United States courtit has been held that unless peculiar circumstances exist the survivors of those who have met death because of negligence at sea have no right to intervene and be heard. I do not know just what the survivors of the *Titanic* disaster will be able to do. but if a bill like this had become a law before that disaster the survivors of the decedents specified in this bill would be able to join the survivors of the accident and recover damages for

the loss due to the death of such decedents.

Mr. COX. I understand. Now, let me put this inquiry to
the gentleman for information. No doubt the gentleman has
looked it up. If I understand the law of admiralty correctly, where death or injury occurs on the high seas under the existing law, without any reference to this proposed law, if a judgment is recovered and an execution issued, that judgment can only be collected out of the property; in other words, in a proceeding in rem. Am I correct in that?

Mr. McCOY. No; if they get jurisdiction in personam, they have the same judgment, for whatever it may be worth, that they can get in any case of injury not resulting in death.

Mr. COX. Not only against the vessel, but against any other

property of the corporation.

Mr. McCOY. The distinctive feature of admiralty is its jurisdiction in rem; and you can often get jurisdiction of the res, and realize, through attaching that, where you are absolutely unable to get jurisdiction in personam.

Now, you take it in a case of an accident at sea, where damages short of death have been inflicted, and you can recover in personam and in rem under the law as it exists to-day; but if death ensues, you can not recover, and this bill is to remedy that evil.

Mr. LENROOT. Is the gentleman entirely correct in saying that an action in personam is unlimited? Is it not limited, whether it be in rem or in personam, to the actual value of the property?

Mr. McCOY. Not if you get personal jurisdiction. Your

Judgment is good to whatever amount you may recover.

Mr. LENROOT. Up to the value of the property.

Mr. McCOY. No. As I understand, the difference h As I understand, the difference between actions in rem and in personam is this: The property of a nonresident, for instance, is attached in a State court. You get your judgment; you may get a judgment for \$10,000, and what you have attached may be worth only \$5,000. You sell the property and get \$5,000, but you can not recover the other \$5,000 in that court, nor can you go to any other court on the judg-ment recovered. Whereas, if instead of proceeding by attach-ment you had got personal jurisdiction in your suit and then got judgment, you would have a valid judgment for the full amount in that court on which you could sue in another State. It would be the same thing here if you got personal jurisdiction in admiralty. You get your judgment, and the judgment would go for the full amount and would be enforceable wherever rules are provided for enforcing any kind of a judgment. But if you proceed in rem merely by attachment, all you get is the value of the property

Mr. LENROOT. I have not so understood the law. But if that be true, what is the purpose of section 6, which provides that shipowners may avail themselves of the laws of limited

liability?

Mr. McCOY. Now, the gentleman is getting into another branch of the law. If they proceed under the limited liability they can limit the liability to the value of the ship and the freight, as I remember it, whether the action be in rem or in personam. There they proceed under the statutes of the United States for limited liability, and by surrendering the hull and freight they may limit the liability to whatever they are found to be worth.

Mr. COX. That is new to me as far as the law is concerned. Suppose this bill was the law and the person is injured on the high seas and he brings suit both in rem and in personam. Could the shipowner release himself from further liability by surrendering the ship and the freight?

Mr. McCOY. If you get him in admiralty he can do it. Mr. COX. Even with this law on the statute books?

Mr. McCOY. Yes.

Mr. COX. Does the gentleman think that is just and fair? Mr. McCOY. That is the admiralty law.

Mr. McCOY. That is the admiralty law.
Mr. COX. Does not the gentleman think that it ought to be amended?

Mr. McCOY. I do not think it could be amended easily. would not want to do it in this particular act. If such a thing

is to be suggested, I should like to have it submitted to the committee with full argument and full consideration. I have no practice in admiralty that is worth speaking about, but I should not want to say how far such a provision as that would go. I think that this is a meritorious bill.

Mr. COX. I think it is, unless section 6 destroys its usefulness. I doubt very much the justice of letting shipowners limit their liability by simply turning over the hull and freight.
Mr. PETERSON. That has been the law for 10,000 years.

Mr. COX. I do not know but that it has, but I do not think

it ought to be the law.

Mr. McCOY. I would not say that it would not be a good change; but here is the answer: If you can get personal jurisdiction of the shipowner by going into a State court you do not run up against any limited liability.

Mr. CAREW. But he could file a petition to limit his liability

in the admiralty court.

Mr. McCOY. I do not think he could if you get personal jurisdiction in a matter which would be within the jurisdiction of the State court. I do not think you could so limit the liability, but I would defer to the judgment of the gentleman from New York. This is to do for the law of the high seas what has been done in all the States, with differences in detail; that is, to provide a cause of action for loss due to death caused by negligence.

Mr. BRYAN. The gentleman stated that such jurisdiction as the State courts now hold over matters arising in Puget Sound waters, for instance, would still be retained by the State

courts?

Puget Sound is considered a part of the high seas under the law. It is an arm of the sea, and the bill says:

And where the death has been caused by wrongful act, neglect, or default occurring on the high seas suit for damages shall not be maintained in the courts of any State or Territory or in the courts of the United States other than in admiralty.

Harrington Putnam in his letter, which is made a part of the report, says:

Section 7 makes the act the law of the courts of admiralty of the United States, and, so far as the high seas are concerned, makes the remedy exclusive. This is for the purpose of uniformity, as the States can not properly legislate for the high seas.

I can not see where the jurisdiction of the State court would be retained.

Mr. McCOY. Puget Sound is not a part of the high seas. It is subject to admiralty jurisdiction, but the term "high seas" refers to that part of the ocean outside of the 3-mile limit.

Mr. BRYAN. Unless the gentleman is quite sure about that, think he is mistaken. The arms of the sea are deemed a part of the high seas. The 3-mile limit is a different proposition altogether.

Mr. McCOY. No; the high seas, as I understand it, are that part of the ocean outside of the 3-mile limit.

Mr. COX. The States have no jurisdiction.

Mr. McCOY. As I understand it, only the Federal Govern-

Mr. BRYAN. The gentleman will remember that when I first met him he was out investigating the Federal court at Seattle. The people of my State are very jealous of the jurisdiction of the State courts where we elect our judges, and they are very loath to divide in any respect the jurisdiction of the State courts in the waters of Puget Sound with the Federal court, and if I were called upon to immediately vote on this, I would vote "no," and for that reason I am going to object

Mr. McCOY. I will ask the gentleman to let the bill be con-

sidered and to bring his objection up in the Senate.

Mr. BRYAN. But I am not a member of that body. Mr. McCOY. I will say to the gentleman this, that he has such influence that he can get anything done over there that he desires. If the objection of the gentleman is a sound one, I say to him that I will go with him and I know that the gentleman from Massachusetts [Mr. Peters] will go with him to the Senate to have the correction made; but I am assured by Judge Putnam, than whom there is no higher authority in admiralty law in this country, that such will not be the fact, and the gentleman from Virginia [Mr. Montague], who has had a great deal of experience in these matters, assures me that the jurisdiction over Puget Sound would not be affected in any way by this bill and that Puget Sound is not a part of the high seas, although of course it is a part of the navigable waters of the United States for admiralty purposes.

Mr. BRYAN. Mr. Speaker, I will ask unanimous consent that the bill go over without prejudice. It is a matter of too much importance, and having been called to my attention, and the RECORD showing that it has been called to my attention, I would not want to let it be voted on without further investigation. The time to take up a matter of this kind is now. It is not next year or some time in the future in the Senate, and unless it goes over without prejudice I am going to object to its consideration. I do not want to throw it off the calendar, as I would do if I objected.

Mr. McCOY. The gentleman's objection is so perfectly sound and valid, if the basis of fact exists for it, that I think he will be perfectly safe to let the bill pass, and he knows me well enough to take my word for my assurance

Mr. BRYAN. If it were a favor to the gentleman, I would do it, but I am speaking for my constituents. If you let it go over without prejudice, it will come up again next Monday.

Mr. McCOY. This is a matter that has been hanging fire for a good many years. It has been opposed from sources which I do not care to name, people interested to oppose this kind of legislation-not on the same ground that the gentleman objects to it, but for other reasons-and it is the wonder of those practicing in admiralty that we have gone so long without Lord Campbell's act having been extended to the high seas.

Mr. BRYAN. I desire further time, and unless the gentleman

will permit it to go over I am going to object.

Mr. MONTAGUE. Mr. Speaker, will the gentleman kindly

state his precise objection?

Mr. BRYAN. Mr. Speaker, I ask unanimous consent that the matter retain its place on the calendar and go over without

The SPEAKER. The gentleman from Washington asks unanimous consent that the bill go over without prejudice. Is there objection?

There was no objection, and it was so ordered.

APPRAISERS' STORES BUILDING AT MILWAUKEE, WIS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7487) to authorize an additional appropria-tion for the erection of the United States appraisers' stores building at Milwaukee, Wis,

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That in addition to the sum of \$75,000 heretofore authorized by the act of Congress approved June 25, 1910, being chapter 383 of the laws of the Sixty-first Congress, second session, for the construction on a site in Milwaukee, Wis., already purchased by the Government for such purpose, of a suitable and commodious appraisers' stores building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and purpose of the United States Government appraising goods and merchandise imported from foreign countries and into Milwaukee, Wis., the additional sum of \$50,000 is hereby authorized, at a total cost, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed \$125,000, for which plans, specifications, and full estimates shall previously be made and approved according to law.

The committee amendments were read, as follows:

Page 2, line 4, strike out "\$50,000" and insert in lieu thereof "\$40,000." Page 2, line 7, strike out the figures "\$125,000" and insert in lieu thereof "\$115,000."

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FOSTER. Mr. Speaker, reserving the right to object, I observe there was an authorization for the building in Milwaukee for \$75,000 on a site already acquired by the Government. Now, as I understand, they undertook to let bids for the amount, but found they could not build for the \$75,000, and in the report from the Treasury Department the statement is made that the bids received exceeded the amount by nearly \$25,000. Now, if they only need \$25,000 for building this building, I would like to inquire why this bill provides for \$40,000; originally, \$50,000?

Mr. CLARK of Florida. Mr. Speaker, if the gentleman will notice the letter of the Assistant Secretary of the Treasury, Mr. Allen, the last paragraph, I think he will find the reason for that increase. The Assistant Secretary says:

The difference between the high and low bid for this work was \$25,000, and as the competition was keen and it is very probable the bids would be higher if the work were again placed on the market, it is estimated that an increase in the limit of cost of \$40,000 is necessary to construct the building as designed.

The committee acted upon that representation of the Assistant Secretary of the Treasury. Of course, the gentleman understands that this is \$40,000, or so much thereof as may be necessary, and only so much as may be necessary will be used. No more will be used than is absolutely necessary to construct this building.

Mr. FOSTER. Did the gentleman ever hear of an authoriza-tion of a certain amount and building being completed with a less amount?

Mr. CLARK of Florida. Oh, I think so.

Mr. ROBERTS of Massachusetts. The Library Building. Mr. FOSTER. I think it is a rare thing to find such is the

Mr. CLARK of Florida. It is rare, but it happens to be the case occasionally.

Mr. STAFFORD. Mr. Speaker, I think I can clarify the doubt in the mind of the gentleman from Illinois. This natter has been one which has received my personal attention for more than six years. First an appropriation for a site was obtained, and then a proposal for a building to cost \$125,000. The committee, through the action of one of the members of the subcommittee, cut that down to \$75,000. Under that authorization of the act of 1910 proposals were called for and the bids ranged from \$89,000 to \$115,000. According to the Assistant Secretary, who has charge of this matter, there will be \$10,000 needed for equipment, leaving only \$65,000 for the building proper. plans have been completed. It is not an ornate building. not proposed to increase the size as originally proposed, and the Assistant Secretary says that a one-story building could not be built for much less than a two-story building, as proposed, and it would not be as serviceable. With a limit of \$25,000 bids might have to be called for again, and we might be in the same predicament as at present. The difficulty, as the Assistant Secretary suggests, is that there might not be an adequate amount of money available to award the contract, and under the law, as the gentleman knows, we can not go ahead with this building, which is so much needed in Milwaukee at the present time, because there would be still lack of appropriation. It is not intended, by reason of the increase of this appropriation, to change the plans one iota, but to have available a reasonable amount, which will permit the Secretary of the Treasury to go ahead with the awarding of these contracts. Now the bids have been canceled, and the Secretary of the Treasury will have to call for new proposals.

If the new bids would again not come within the new limit of appropriation, why he would have to reject them again. This matter has gone through the hands of two Assistant Secretaries of the Treasury-the former Assistant Secretary of the Treasury, Mr. Sherman Allen, and the present incumbent-and these officials both recommend that \$40,000 should be allowed. I said to the Public Buildings Committee that I only wanted such an amount of money as would insure the building of this warehouse under the existing plans. It is merely a concrete basement building with a brick superstructure and with no ornate furnishings. When I found the bids were in excess of the appropriation, I went and called upon Mr. Assistant Secretary Allen and asked whether there was not some way whereby he might curtail the specifications so as to bring the bid within the \$75,000 appropriation, and he said that there was no possible way consistent with the Government service. On the strength of that I introduced this bill for \$50,000, and the Treasury recommendation is that \$40,000 would be the lowest possible amount. I know the gentleman is always guardful of the Public Treasury, and in this case it is not intended to increase the size, to increase the ornamentation, or to add anything to the original specifications, and we only want to build the

structure which was provided for in the act of 1910.

Mr. FOSTER. Let me ask the gentleman this question: I observe in the letter of Assistant Secretary Allen that he says the walls of this building have been designed so that they may support three additional stories. Now, in the authorization of a building for this purpose, why is it that the Treasury Department should go to work and put in a foundation which, of course, costs a lot of money, to support three additional stories

when it is contemplated to put in but one here? Mr. STAFFORD. It was contemplated originally to put in A one-story building will not be feasible for the purpose, and I know the gentleman will consider it is wise economy, with the increase of imports in Milwaukee, that we should not only increase the floor space but should provide a foundation so that the building will not be out of use, perhaps, in the course of 10 years. I yield to the gentleman, the chairman of the committee, to reply to that question and to show that it is good business economy to make such provisions in the plans and specifications.

Mr. CLARK of Florida. I want to say that one of the causes of extravagance in public buildings heretofore has been the fact that we have not builded for the future; that we have not made preparation for the growth of business and the growth of population, and it is the policy of this committee, so far as I have been able to ascertain from the membership, that in buildings in the future we propose so far as we can to erect them so that in the course of two or three years we will not have to tear down a perfectly good building, go to some other site, buy lots at extravagant prices, and construct new buildings at enormous figures. In this case, as in others, it is the design and the purpose of the committee to build a foundation so that, in case the business does increase, and the future demands larger and better quarters, we can build on top of what we already have without having to go to some other place.

Mr. FOSTER. I think the gentleman is right in his statement, so far as attempting to provide for the increased business in the future. I submit it is pretty hard to do that in cases where nobody knows what the future growth is going to be, and I think that sometimes the Government has built more than is necessary. They have overbuilt in some places and underbuilt in others. I think that the \$25,000 is as much as we ought to have here, and I would not agree to let it go through for

Mr. STAFFORD. I am very desirous to have this matter provided for, and, of course, do not wish to be unreasonable. It is barely possible we may be able to get bids within that amount. I hope that the gentleman may see his way clear not to object to the consideration of this bill.

Mr. FOSTER. I do not believe always in their opinions about these things. They did let the bids, and they were less than \$25,000, and now you are asking \$40,000. How do we

know that they can not let it for \$25,000?

Mr. STAFFORD. The great majority of bids submitted were above the \$25,000 limit, and to provide for the maximum would have required \$50,000. The highest bid is \$115,000, and, \$65,000 being available, would make it \$115,000. When I went before the committee I said I wanted them to use their best judgment as to what would be needed, and I would be satisfied. Here is the recommendation of the Secretary of the Treasury. The plans have been prepared. There has been no change in them. I will say to the gentleman that I wished to have the plans curtailed in such a way as to bring it within the original \$75,000 appropriation, but found it was not practicable.

Mr. FOSTER. I will say to the gentleman that, with build-

ings scattered from one end of the country to the other, it is very easy for anyone who has a building authorized to ask for

more than is really needed.

Mr. STAFFORD. I will say to the gentleman—

Mr. FOSTER. There are meritorious cases, and I do not say that this is not one of them, but I do not believe we ought Mr. STAFFORD. I quite agree with the gentleman—
Mr. FOSTER. And I do not believe we should give more money than the facts seem to indicate in necessary.

Mr. STAFFORD. The gentleman would not wish to have this appropriation placed at a figure where the bids would be in excess of the appropriation available. I do not insist on having any change made in the character of the construction or in the plans and specifications. I am only doing my duty in that particular, and wish to provide that this warehouse should be erected in accordance with the plans prepared some time ago.
Mr. FOSTER. Well, I think if the gentleman will make a

motion to do it, that would be all right. Of course, I do not know what the House might do, but I think \$25,000 vould be all right, because the lowest bid was less than \$25,000.

Mr. STAFFORD. No; it was only a couple of hundred dol-

lars under \$25,000.

Mr. FOSTER. Well, I say it is less than \$25,000.

Mr. STAFFORD. Will not the gentleman consent to

Mr. MOORE. Mr. Speaker, reserving the right to object— The SPEAKER. The gentleman from Pennsylvania [Mr.

MOORE] reserves the right to object-

I want to call the attention of the gentleman from Florida [Mr. CLARK] to that paragraph of the report which says that there is "an urgent need for an appraiser's storehouse building at Milwaukee, as shown by the fact that the basement of the Federal building is now used for that purpose and the odor arising from such imports as liquors and tobacco make it very disagreeable to the occupants of the building." I do not find anything in the official correspondence bearing out this statement, and I desire to ask if this information comes wholly from the committee?

Mr. CLARK of Florida. It is from information furnished to

the committee by the gentleman from Milwaukee.

Mr. MOORE. Information to the effect that in Milwaukee "the odors arising from such imports as liquors and tobacco are so disagreeable" that they ought to have a new appraiser's storehouse?

Mr. CLARK of Florida. Well, that is one of the reasons, If the gentleman is seeking to get the facts upon which the urgency of this measure rests, I will say this: That in the year 1910-

Mr. MOORE. I was wondering if the committee had direct information.

Mr. CLARK of Florida. In 1910 this building was provided for, because a need for it existed. Bids were asked, but there was not sufficient money to provide for the building. That was four years ago, and the urgency of the demand for it has grown greater all the time, and there is urgent need for the construc-

tion of this building right now. My information as to the odor arising from those articles coming up through the basement into the court rooms, and so forth, is to the effect that it makes very disagreeable to the occupants of the upper quarters.

Mr. MOORE. That does not appear either in the letter of the Assistant Secretary, Mr. Hamlin, nor in the letter of the former

Assistant Secretary, Mr. Allen.
Mr. CLARK of Florida. It appears in the hearings had by the committee, from the statement of the Representative from that district and other evidence submitted to it.

Mr. MOORE. The committee, then, does stand for the statement that the odors arising from the liquor and tobacco stored in the basement are disagreeable? [Laughter.]

Mr. CLARK of Florida. Yes. Does not the gentleman agree

with that?

Mr. MOORE. I will, if the gentleman himself vouches for it. Mr. CLARK of Florida. Does not the gentleman agree to it on his own account?

Mr. MOORE. I would probably not run away from it as

quickly as the committee.

Mr. CLARK of Florida. I judge the gentleman from Pennsylvania would not run away from a small quantity, nor would the committee [laughter], but we do not want to be deluged

Mr. MOORE. I wondered if the committee spoke of its own knowledge.

Mr. CLARK of Florida. I will answer no. Mr. MOORE. Very well. That is not the important ques-This bill provides that an additional appropriation shall be made for the convenience of the United States Government in appraising goods and merchandise imported from foreign countries. Now, is there any information before the committee that imports or exports that may have occasion to use the appraiser's storehouse in Milwaukee are increasing at all?

Mr. CLARK of Florida. We accepted the statement of the

gentleman from Milwaukee as to that.

Mr. MOORE. Is it not a fact that since the new tariff bill has been in effect both the imports and the exports have been decreasing throughout the country, and there is less occasion for the use of an appraiser's storehouse now than there was formerly?

Mr. CLARK of Florida. I do not think that is the fact. I do not think that is the testimony of the author of this bill.

Mr. MOORE. But the statements of the Treasury Department in the last few days indicate that there is a great falling off both in imports and exports, and hence it is probable that there will be a reduction of revenue on that account, and hence also there might not be as great a necessity for enlarging the

Mr. CLARK of Florida. Let the gentleman discuss that question with the gentleman from Milwaukee.

Mr. MOORE. I assume the gentleman from Florida does not

want me to object to the gentleman's bill? Mr. CLARK of Florida. I think not.

Mr. MOORE. I am not going to object to the gentleman's bill. I want to see the appraiser's storehouse filled up under the new administration, if possible.

Mr. BARKLEY. Does the gentleman mean to say that im-

ports have decreased under the new tariff law?

Mr. MOORE. Yes; that is true. According to the reports of the Secretary of the Treasury, imports have decreased.

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, I ask that this bill go over until next unanimous-consent day. I do not want to object to a bill that is right and proper, but I do not feel that I can give consent to the consideration of this bill to-day.

Mr. STAFFORD. I am confident that if the gentleman will examine the hearings and all the testimony that has been taken in this case he will come to the conclusion that \$40,000 is a reasonable amount; and under the circumstances I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. The gentleman asks that the bill be passed over without prejudice. Is there objection?

There was no objection.

JOE JOURERT.

The SPEAKER laid before the House the bill (H. R. 3638) providing for the issuance of patent to Joe Joubert, with Senate amendments.

The Senate amendments were read.

Mr. MONDELL. Mr. Speaker, I move that the Senate amendments be concurred in. They are not such amendments as under the rule would take the bill to the Committee of the

Whole. They have reference only to the descriptions of the land, and not the price.

The motion was agreed to.

COOPERATIVE AGRICULTURAL EXTENSION WORK.

Mr. LEVER. Mr. Speaker, I move to suspend the rules and pass the bili H. R. 7951, with the committee amendments as indicated in the printed bill, and with the additional amendments which I send to the Clerk's desk.

The SPEAKER. The gentleman from South Carolina moves to suspend the rules and pass House bill 7951 with the committee amendments, and also with the amendments which he sends to the Clerk's desk.

Mr. FITZGERALD. Let the Clerk read the bill. The Clerk read as follows:

A bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of

work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1802, and of acts supplementary thereto, and the United States Department of Agriculture.

Re it enacted, etc., That in order to ald in diffusing among the people of the United States useful and practical information on subjects relations of the States and the United States useful and practical information on subjects relation of the same, there may be haugurated in connection with the college or colleges in each State now receiving, or which may hereafter receive, the benefits of the act of Congress approved July 2, 1802, entitled and the mechanic arts "(12 Stat. Lu., p. 503), and of the act of Congress approved August 30, 1890 (26 Stat. Lu., p. 417), agricultural extension work which shall be carried on in cooperation with the United States or more such colleges have been or hereafter may be established the appropriations hereinafter made to such State shall be administered by such college or colleges as the legislature of such State may direct. The state of the such state shall be administered by such college or colleges as the legislature of such State may direct. The state of the such state shall be administered by such college or colleges as the legislature of such State may direct. The state of the such state shall be administered by such college or colleges as the legislature of such State may direct. The state of the such state shall be administered by such colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications, may be mutually agreed upon by the Secretary of Agriculture, or his representative, and the State agricultural college or colleges receiving the benefits of this act.

Sec. 3: That for the surpose of paying the expense of said cooperation from the such shall be submitted to appropriated, to such of said cooperation from the such shall be submitted of the such shall be payed to the such shall

Sec. 6. That on or before the 1st day of July in each year after the passage of this act the Secretary of Agriculture shall ascertain and certify to the Secretary of the Treasury as to each State whether it is entitled to receive its share of the annual appropriation for cooperative agricultural extension work under this act, and the amount which it is entitled to receive. If the Secretary of Agriculture shall withhold a certificate from any State of its appropriation, the facts and reasons therefor shall be reported to the President, and the amount involved shall be kept separate in the Treasury until the expiration of the Congress next succeeding a session of the legislature of any State from which a certificate has been withheld, in order that the State may, if it should so desire, appeal to Congress from the determination of the Secretary of Agriculture. If the next Congress shall not direct such sum to be paid, it shall be covered into the Treasury.

Sec. 7. That the Secretary of Agriculture shall make an annual report to Congress of the receipts, expenditures, and results of the cooperative agricultural extension work in all of the States receiving the benefits of this act, and also whether the appropriation of any State has been withheld; and if so, the reasons therefor.

Sec. 8. That Congress may at any, time alter, amend, or repeal any or all of the provisions of this act.

The Clerk read the proposed additional amendment.

The Clerk read the proposed additional amendment.

Mr. MANN. Evidently there is an omission in the amendment as read by the Clerk.

Mr. LEVER. If the Clerk will send the amendment to me I

will read it. Although it is in typewriting, it has been interlined. The additional amendment which I propose reads as follows

Amend, by striking out the period on page 22, line 15, after the word "direct," and insert the following:
"Provided further, That nothing in this act shall be construed to discontinue either the farm management work or the farmers' cooperative demonstration work as now conducted by the Bureau of Plant Industry of the Department of Agriculture."

Mr. HAUGEN. Mr. Speaker, reserving the right to object, I should like to suggest-

The SPEAKER. No objection is in order. No objection obtains in this proceeding.

Mr. FITZGERALD. Are there any more amendments?

Mr. LEVER. Mr. Speaker, let the Clerk report the other amendment.

The Clerk read as follows:

Page 3, line 21, after the word "the," strike out the word "additional"; and on line 22, same page, strike out the colon and insert in lieu thereof the following:

"In addition to the sum of \$480,000 hereinbefore provided."

Mr. FITZGERALD. Mr. Speaker, I demand a second. The SPEAKER. Is the gentleman from New York opposed to the bill?

Mr. FITZGERALD. I am.

The SPEAKER. The gentleman from New York [Mr. Fitz-GERALD], who is opposed to the bill, demands a second.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from South Carolina has 20 minutes and the gentleman from New York [Mr. FITZGERALD] has 20 minutes.

Mr. LEVER. Mr. Speaker, I yield to the gentleman from New Jersey [Mr. Townsend]. Mr. TOWNSEND. Mr. Speaker, I am heartily in favor of the Lever bill to provide for cooperative agricultural extension work between the agricultural colleges in the several States and the United States Department of Agriculture. I am in favor of this bill not so much because of the money aid it will provide for the diffusion of advanced agricultural education to the States which cooperate with the Government, as provided for in this bill, as because of the fact that under its provisions the States so cooperating with the Federal Government will have the very great advantage of instruction and practical demonstration in agriculture through actual field demonstration, which benefit the State could not derive in any other way. vast educational resources of the Federal Department of Agriculture will, under the operation of this bill, I firmly believe, stimulate a better character of farm work, which will result in better and increased crops, and not only will it do that-a result which is peculiarly desired in New Jersey-but it will result in the increase, and, I believe, a large increase, in the acreage of cultivated farms.

These two points are all of peculiar value to New Jersey, because my State has during the past 20 or 25 years developed so amazingly in its industrial side that not only has the relative importance of agriculture diminished but there has been an actual decrease in the agricultural production of the State. The reason for this is, of course, familiar to every student of the subject; the attraction of employment in industrial concerns, offering good wages, and the entertainments of cities has drawn from our agricultural population until, as I have stated, there has been an actual decrease in the number of farms and in

the acreage of cultivated farm land.

New Jersey's Legislature has recognized this fact and has been most generous in its appropriations in aid of the agricultural department of the ancient and honorable college at New Brunswick-Rutgers. I shall, in a later part of my remarks, give the figures of these appropriations for a term of years to show that the legislatures during those years have been liberal in the appropriations of money for the purpose which this bill

is designed to bring about in a much greater measure.

It is important for the people of New Jersey to consider, in respect to this most important subject, that while the population of our State increased from 1900 to 1910 more than 34 per cent, there was during that same decade a decrease of 3.4 per cent in the number of farms and a decrease of 267.109 acres, or 9.4 per cent, in our farm lands. A recent bulletin of the Census Bureau supplies even more striking reasons why the people of New Jersey should, through their Representatives here, support this Lever bill; and it furnishes a reason also why it should be assumed that whatever this bill requires of New Jersey in the way of assisting appropriations, that State will gladly make. The bulletin to which I refer shows that we are not as well off as to our farming results to-day as we were 30 years ago. In 1880 there were in New Jersey 34,307 farms, while to-day there are but 33,487. In 1880 there were in New Jersey 2,929,776 acres of farm lands, while in 1910 the acreage was 355,918 less. In other words, the percentage of our total land area in farms decreased from 1880 to 1910 more than 7 per cent, while our population in that time much more than doubled.

As I have intimated, the principal reason probably for this deplorable decrease in our agriculture is to be found in the amazing increase in our manufactures. In the city of Newark alone, part of which lies in my congressional district, there is invested in manufacturing more than \$160,000,000. These manufacturers employ 60,000 operators, who turn out annually finished product of a value considerable in excess of \$200,-Probably some of my colleagues on the floor here representing other manufacturing cities of New Jersey could give figures which would show in the same striking degree the enormous capital and labor employed in their cities. greatly increased city population has made a proportionately greater demand upon farm products during a time when, as I have said, the output of the farms has decreased instead of increased. The situation which is found in New Jersey quires some active and powerful incentive to bring up the farm product of the State more nearly to what it would be were farming operations carried on under those modern, scientific methods the Federal Agricultural Department is so

well equipped to teach.

The farming population of New Jersey is of a character peculiarly fitted to receive and be benefited by this proposed instruction. Four out of five farmers are native whites, 18.6 foreign-born whites, and only 1.4 of all the farmers in the State nonwhites. This practically all-white farmer population operate about 33,487 farms, two-thirds of which are between 20 and 174 acres in size and about one-fourth between 3 and 19 acres. I mention this fact to show that the great number of small farms lends itself to the plan of practical demonstration which would be carried out under the provisions of this bill. It will easily be seen that when the highly competent agents of the Agricultural Department travel through New Jersey to give their field demonstration these demonstrations can be witnessed and studied by a great number of farmers gathered at one point without the necessity of traveling a great distance for that purpose. A very beneficial purpose of the bill which can also be carried out in New Jersey under peculiarly favorable circumstances for the reasons just mentioned is the instruction in home economics. The instructors can gather large classes, because of the small average size of the farms, easily and without much trouble or expense to the women and children to be instructed.

Mr. Speaker, I have submitted the Lever bill to the distinguished gentleman who to-morrow is to be inaugurated as governor of New Jersey, James F. Fielder, I had already, in conversation with that gentleman, discovered his great interest in this question, and I feel warranted in saying that the provisions of the bill, when it shall become a law, will receive the earnest and sympathetic support of Gov. Fielder, and that he will have an intelligent legislature working in harmony with

as it affects New Jersey, and I am glad to say that Dr. Demarest heartily approves of this measure as one that is workable and

will bring about the desired results.

Mr. Speaker, New Jersey has 2,573,857 acres of land in farms. nearly 10 per cent less than it had 10 years ago, but of that acreage just mentioned but a fraction over 70 per cent is to-day what can be listed as farm land improved, a decrease of 5 per cent of farm land improved since the census of 1890. should like to see that percentage of farm land improved greatly increased, and I believe the provision of this bill will help to bring about that desired end. New Jersey has given liberally in this respect. From figures supplied by Dr. Demarest find that during the past five years the Legislature of New Jersey has appropriated a total sum of \$370,038.49 for the State experimental station, or an average annual appropriation of more than \$75,000. She will, I am sure, cooperate heartily, intelligently, and liberally with the Federal Government under the provisions of this act to extend and better the business of farming and to make easier and more attractive the home life of the farmer, his wife, and their children.

My State now spends annually millions of dollars for farm products, meats, vegetables, fruits, butter, and eggs brought to her markets from points beyond her borders. Her own farms could and should supply these products, thus increasing by those millions the prosperity of the farmer and his capacity to pur-chase the products of the State's industries, the articles of the

State's commerce. [Applause.]
Mr. LANGLEY. Mr. Speaker, I wish the gentleman from South Carolina would ask unanimous consent that all Members

may have the right to print on this bill.

Mr. LEVER. Mr. Speaker, I have had a number of requests for time, but have not the time to yield. I therefore ask unanimous consent that all gentlemen who desire to speak on this subject may have the right to print for five legislative days.

The SPEAKER pro tempore (Mr. Russell). The gentleman from South Carolina asks unanimous consent that all those who

speak on the bill may be permitted to extend remarks in the RECORD for five legislative days on the bill. Is there objection?

Mr. MANN. I object. Mr. LEVER. Mr. Speaker, I yield to the gentleman from Georgia [Mr. HUGUES].

WHY I SUPPORT THIS BILL.

Mr. HUGHES of Georgia. In supporting this bill I do so as a practical farmer, having been engaged in this occupation for

40 years.

Four years of this time I was president of the Georgia State Agricultural Society, the duties of which office carried me into almost every county of my native State-Georgia. During these visits I carefully considered and studied farm conditions both in the field and in the home. My conclusions were that education-education that could be applied-was the important ques-I found unrest on the part of the young man, who was dissatisfied with his surroundings, believing that the tiller of the soil was not getting just compensation for his labor. found that the adult farmer had accepted the aphorism that the farmer was "a hewer of wood and a drawer of water"; that the mother was burdened with the monotony of household duties, committed to her confines without restful diversion. She accepted the monotonous duties and seclusion with resigned fate. The daughter, without social contact, showing discontent. This I found to be the condition of ostracized farm life,

CONDITIONS IMPROVED.

I am happy to say, however, that within the last few years conditions are being changed and farm life with them. Good roads have eliminated distance, putting neighbor in closer touch with neighbor and the country home in touch with the town Telephones are connecting most homes. Churches are more accessible and social relations are made possible. Good school buildings have been erected, with capable school-teachers, under direct control of competent county school commissioners, who are visited and directed by the State school commissioner. The Rural Free Delivery carriers daily disseminate various kinds of literature—magazines, daily papers, and bulletins. Such improved agricultural conditions have caused the farm home to become enlightened and more cheerful, giving more happiness and contentment. The improved conditions have brightened the hope and aspiration of the father and son. But the young man, ambitious and determined to better his financial condition, is still dissatisfied with the financial results of his farm life. him, to the end that New Jersey may at the earliest possible time enter into this beneficent cooperative work with the Federal Government. I have also submitted this bill to the distinguished president of Rutger's College, Dr. W. H. S. Demarest, who would have much to do with the administration of the bill

become content the farm must become remunerative, with increased intellectual interest. In my opinion the passage of this bill will be a potent factor in consummating this end. I am in favor of education, and compulsory education if necessary, for it generates light. I favor academic, scientific, and industrial education.

GEORGIA'S EDUCATIONAL INSTITUTIONS.

Georgia is preeminent in her educational institutions, namely, the Georgia Normal and Industrial College for Girls, the Technological School, Mercer University, her State Agricultural College, for the establishment of which I rendered my best efforts and of which I have been a trustee since its organization. Her agricultural schools are situated or located in every congressional district. Her system of common schools is in operation throughout the State, and the great University of Georgia, in the classic city of Athens, has sent forth men of mark in every calling of life, some of whom within this very Hall of "our fathers' house" have electrified the Nation with their logic, eloquence, and statesmanship.

This advanced stand in education speaks well for Georgia,

This advanced stand in education speaks well for Georgia, but, alas, with all these institutions the farmer in Georgia—like the farmers North, East, and West—has been unable to get and use that practical information which would raise the standard of his occupation to the position it deserves. This information, which has been obtained by scientific research, is locked up in the vaults of our agricultural colleges, dormant and rusty. This bill is the key which will unlock these vaults and take this valuable information now had and to be obtained to the farmer on the land and by demonstration put it into the various agricultural channels where it will render great service and get results.

DEMONSTRATION NEGLECTED.

It may be asked why the various agricultural colleges of this Union have not inaugurated this great plan of demonstration and put it into effective operation. In the first place, I think they have neglected an important duty, relying too much on the graduates who were expected to return to the farm and employ their scientific information; and, in the second place, they have not been sufficiently equipped financially to undertake and conclude so gigantic an undertaking. The agricultural bulletins have disseminated much knowledge and information, but these have reached successfully only a very small percentage of the farmers of this country, and especially have they failed to comprehensively reach the great majority of the farmers who were most in need of practical information. This bill will reach and grasp this great majority—about 90 per cent—and will revolutionize the agricultural interest of this entire country.

DR. KNAPP'S GREAT WORK.

In my opinion Dr. Knapp, late of the United States Department of Agriculture, who extended this demonstration in the South, has accomplished more directly for the farmer than all other agencies combined. He has carried pent-up, inert, scientific information through his demonstrations to the man in the field. Wheresoever he has reached this man he has awakened his energies, his thoughts, his purposes, and that man is proceeding to-day with new life and brighter hopes. His land has been made to yield 100 per cent more and his profit has been correspondingly increased.

This bill proposes to put the Knapp demonstration plan into active operation in every county throughout the broad limits of

this Union on a larger and broader scale.

Just here permit me to say that the name of the late Dr. Knapp is stamped indelibly upon the hearts of the farmers of this country, especially those of the South, and a monument should be erected to his memory, the handiwork of every State.

HOW DEMONSTRATION HELPS.

Demonstration on the land proves the importance and value of scientific research. For the third district, which I represented in the Sixty-first and Sixty-second Congresses before Georgia was redistricted, I obtained from the United States Department of Agriculture, through Dr. Knapp, demonstrators, men who had qualified by reducing theory to practice, for 6 of the 15 counties of the district. They established in each of the 6 counties from 10 to 20 one-acre farms—and in one instance a farm of 100 acres—so distributed, as far as possible, to include the different classifications of soil. Each proprietor of these farms contracted with the United States Department of Agriculture to conduct these farms as directed by agents of the department as to preparation, fertilization, and cultivation. These farms were inspected weekly and a report made to the department after each inspection.

At first it was difficult to get the farmers to cooperate with the Government, but those who did readily saw by comparison and results that science was not a myth. Demonstration alone

could have convinced, and those who complied with the requirements of the Government to-day have adopted the Knapp system not only on one acre, but the entire farm. Under this bill that which was accomplished in these counties will be accomplished not only in the 15 counties which I represented there, but in every county in every State of this Union.

THE CASE OF A LARGE LANDOWNER.

Demonstration is effective and conclusive not only to the man behind the plow and with the hoe, but to the large farmer with his agents and supervisors. I know a large landowner conducting several farms, who has two sons that have remained on the farm and are his partners. They have attempted to be progressive along agricultural lines. They are members of the State agricultural society, attend the farmers' institutes, subscribe to the best agricultural publications, and apply to the State agricultural college for scientific information. They declare they have obtained better results and more practical information by and through the Knapp demonstration work than from any other source, and now they are conducting their farms exclusively on scientific plans which have been demonstrated.

NECESSITY FOR DEMONSTRATION UNIVERSAL,

Now, if demonstration is necessary for a class of farmers who are supposed to operate under progressive and advanced ideas, how much more necessary is it to the large majority of farmers—at least 90 per cent—who have neither the time nor inclination for study, who could not if they would, and would not if they could, solve the abstruse problems as set forth by bulletins, lectures, and agricultural trains.

Demonstration is necessary to every class of farmers. Experimentation is costly to our experiment stations in their efforts to hand results to the farmer in digested form, to save him the heavy cost of personal experiment, which is almost prohibitory to the individual farmer, all of whose time must be devoted to execution in order to successfully manage, control, and work his land. The agricultural college is the motor and demonstration the dynamo. To realize full force and power they are inseparable. This bill unites them and the spark is flashed.

BOYS' CORN CLUBS.

The boys' corn clubs of Georgia achieved remarkable results and planted a spirit of laudable ambition in the hearts of the young boys on the farm that is encouraging. Five hundred of these boys raised over 100 bushels of corn on 1 acre each in 1912, and 750 raised more than 80 bushels per acre. I have not the results of last year. This result was surprising not only to the fathers of these young men, but to the entire State, remembering that the average yield of corn per acre for the last 10 years was about 12½ bushels per acre in Georgia.

COOPERATION BETWEEN STATE AND UNION.

The Lever bill will cause such cooperation between State and Union, through the agricultural colleges, accelerating and intensifying agricultural education by the only method that can possibly reach the adult farmer. He will hear, but he must see to be convinced. Demonstration convinces, and arouses latent action and inspires hope, and progress is the result.

THE BOLL WEEVIL.

The cotton crop of the United States is a national crop, which directly or indirectly enters into every business in this great country. Its condition, from the planting of the seed until the time it is baled, is heralded throughout this country and cabled to every foreign land, for it not only keeps intact the gold reserve of this Union, but it clothes 60 per cent of the people of the entire globe. It reaches every home, whether the mansion or the cot. This great national crop is to-day being attacked by the increasing and indestructible boll weevil, first on the frontier of Texas, and gradually but surely marching toward all the Atlantic cotton States and due in Georgia this year; and if permanent demonstration is not inaugurated and pushed with all possible force and power before and after the weevil reaches the Atlantic cotton States millions of dollars will be lost to the producer, and millions of dollars of the loss will accrue to the consumer. If this bill is passed, this great destroyer will be met with the combined power of State and Nation, and the loss from the ravages of the weevil will be reduced to a minimum.

THE PEACH INDUSTRY

The peach industry is an important summer crop to many States of the Union. It is a crop conducive to health and wealth. It is being attacked by various destructive insects and fungi growths. This has cost the producers of this country millions of dollars. Many States have in operation departments of entomology, which, in connection with the United States Department of Agriculture, have carried their experiments to the peach orchard, consummating remarkable results.

PERMANENT DEMONSTRATION.

The passage of this bill will inaugurate a system of continued demonstration which no State alone can or will do, but by this united effort of the various States this summer crop will be preserved as an asset to the national wealth.

I could mention other important crops which suffer from disease and insects, the continued production of which at a profit to the producer depends upon scientific demonstration.

LANDS DETERIORATING IN FERTILITY.

Due to absence of scientific cultivation and rotation, the fertility of the soil has greatly deteriorated, and we are now forced to use commercial fertilizers to supply chemical ingredients which are necessary to plant life and soil preservation. This condition is recognized by all farmers. They realize their land has become less productive and that the soil must be impregnated with artificial fertility, but those farmers whose circumstances have been such that they have had no opportunity for scientific study do not know the fertilizer required to supply the deficiency in the different and varied soils.

This expert knowledge, which the farmers will be able to obtain under this bill through the demonstrations, will be to them just what the prescription of a physician is to the patient and the advice of a lawyer to the layman who is confronted with a legal question. Mr. Speaker, the need of a physician by a patient who is suffering from a malignant disease, the need of a litigant who is hard pressed in the courts for a lawyer, is no more imperative than is the need of the farmer for scientific demonstration. Under this bill it is anticipated, and it will be demanded, that a scientific man of practical experience, as a county commissioner of agriculture or a doctor of agriculture, be placed in every county to answer the calls of the farmer.

CONSERVATION OF THE SOIL.

The soil of this country, in the last analysis, is the storehouse of all wealth. Every living soul is dependent upon it. The very best thought of this Nation should be directed to its conservation.

We hear much of the conservation of our timber, our mineral lands, and our rivers and harbors. The soil is the mother of all, and by whom or when has a voice been raised and decisive active stand taken to conserve and perpetuate the soil?

active stand taken to conserve and perpetuate the soil?

In the hearings before the Agricultural Committee Dr. Soule, president of the Georgia State Agricultural College, said:

We have a great problem in this country, the conservation of our soil. That industry and science have practically developed hand in hand, but agricultural science has altogether outrun the practice of farming. In other words, our colleges to-day and the Department of Agriculture of the United States are in possession of thousands of fundamental facts that would increase crop production in this country were they placed within the reach of the farmer in a way which he could understand and apply.

This bill enlarges and perfects the Knapp plan, and will place within the reach of the farmer that which he can understand and apply

Demonstration deferred for whatever cause has been a mistake which should be corrected, and this bill will not only correct but inaugurate and put into execution, in no uncertain way, this great system of reaching every farmer.

THE NEGRO LABORER.

On the large plantations in the South negroes are the principal laborers. The older negroes, the heads of families, are generally renters and tenants; the younger, as a rule, wageworkers. Negro labor annually is growing less effective on the farm. The tenants, and especially the renters, are not only absolutely indifferent as to the care of the land and preservation of the soil, but destructive, remaining on one plantation until they have denuded the soil, then moving on some other plantation to rent and cultivate lands that have been kept in fair condition under the strict surveillance of the proprietor under the wage system.

The younger generation is congregating in cities as day laborers and on public work, where they have the opportunity which they seek of immediate investment in that which they do not need, and frequently to their detriment, injury, and ruin. It is the desire of the South to change and improve these conditions. It is to the interest of the landowner to improve and advance the negro laborer. Something must be done to prove to him that it is to his interest, as well as to that of the proprietor, to preserve the soil, thereby reaping better returns. They attend as a holiday "conclave" the presentations by the agricultural colleges from agricultural trains and farmers' institutes, called extension work, and receive not one atom of information which they will or can apply. There are in my State and in the South quite a number of negro landowners. We wish to make them better farmers and object lessons to the tenants and renters.

The passage of this bill, in my opinion, should mean much to the negro as a tenant or renter. It will go to him on the land and prove to him by demonstration that he can make and get better returns for his labor by the progressive methods inaugurated by Dr. Knapp and concluded by this bill. When you convince them of this, with the eternal vigilance of the proprietor as a daily teacher, they will be better renters, tenants, and owners and will be attracted back to the farm.

INDIVIDUAL OWNERSHIP OBTAINS.

Our land is farmed by individuals, not corporations. It is farmed by many millions of small farmers, and these can only be reached by national aid. The passage of the Morrill Act created a system of agricultural colleges which was impossible for the States to accomplish acting separately. The Hatch Act passed in 1887; and when this act became operative, experimentation attracted national interest; and when this bill—the Lever bill—is enacted into law, together with a vocational education bill, there will be carried into operation the very intent and purpose of this great system which these earlier enactments intended for the perpetuation of the soil, making better farmers and more prosperous country life.

DEMAND OUTGROWING SUPPLY.

It is estimated that in the last 10 years there has been a 23 per cent increase in acreage, 35 per cent in production, and 60 per cent in consumption. If this ratio continues, this country will, in 10 or 15 years, be importers of food instead of exporters. Our cities are growing rapidly, the inhabitants of which are consumers of farm products.

Every industry—manufacturing enterprises, railroads, banking and mercantile institutions—relies upon the farm for their daily food supply. These facts and conditions should attract the attention of every Member of this Congress to the national necessity of preserving and improving the soil, thereby giving increased production to the farmer. The discussion of this question—the preservation of the soil—has attracted wide interest throughout the Nation. The scientist in his laboratory, the agricultural colleges, the banker, the merchant, the railroad president have spoken in its behalf. The Farmers' Union and the Grange, representing millions of farmers, urge the passage of this measure. Whereas much has been done in behalf of agriculture, less than 1 per cent of all the appropriations has been devoted to this interest, of such vital importance; and should this bill pass it will be a tax of only about 3½ cents per capita. It will not do for this great country to defer this matter. It has been delayed too long.

From information just compiled by the Bureau of Statistics, it is shown that in the case of corn, the most important of the great cereal crops, the total yield in 1911 was little more than 2,500,000,000 bushels, or slightly below the average for the past 10 years, and to produce this corn required a larger area than was ever planted for this crop. The average yield per acre throughout this country was 23.9 bushels—less than any year since 1901. The average yield of wheat in 1911 was 12.5 bushels per acre, or less than in any year since 1900, except in 1904, when this low level was reached. While the increases per acre of American crops have been slight for the last 25 years, the European countries, which have been tilled for centuries, have shown a much greater gain in productivity within the same period. Germany, in 1884, was producing an average of 40.6 bushels per acre of wheat, rye, barley, oats, and potatoes. The United States the same year had an average of 20.6 bushels. Twenty-five years later, in 1909, the average yield of these same crops in Germany had advanced to 71.8 bushels per acre, while in the United States the average was 24.8 bushels. Experts who have studied the question agree that that remarkable improvement in European agriculture is due to the adoption of new methods of farming, such as this bill proposes.

This great Union has resources so varied, and in her confines the soil and climate are so adapted to the production of all crops, that we have grown indifferent, thoughtless, and inert, seemingly believing that the soil is indestructible and that its fertility is eternal, but facts show that such is not the case. The soil is deteriorating rapidly for the want of intelligent care, and it would be criminal on the part of those with whom the very destiny of the people rests to continue to delay and finally realize that they have been aroused too late.

The soil—the land—is an inheritance, handed down to man for humanity. It belongs to future generations, and, as it passes through our hands, we are as responsible as the man with the talents. Let us do our duty—pass this bill—and receive the plaudit, "Well done, thou good and faithful servants."

Mr. RUBEY. Mr. Speaker, this measure, providing for cooperative agricultural extension work, now before this House for consideration, meets with my hearty approval. in form and having identically the same aim passed this body during the last Congress, but failed to pass the Senate. Sentiment favorable to this legislation is so strong that there is not the least doubt in the mind of anyone that this measure will meet with favor at the other end of the Capitol and receive the approval of our Executive. That it will soon be the law of the land is conceded by all. It is a great advance step taken by Congress in the interest of agriculture, and the benefits to be derived from it can not be calculated.

Let us examine briefly, for my time is limited, the Federal statutes which have been enacted to assist the States in the promotion of agriculture. Strange as it may seem, it was at a time when our country was in the midst of a great Civil War, when men's thoughts, one would think, would have been centered upon that fierce struggle, that the first great law in aid of agriculture was passed by the Federal Congress. In July, 1862, was passed what is known as the Morrill Act. That act bears the signature of Abraham Lincoln. Under its provisions, with the cooperation of the States, has grown up a system of agri-

cultural colleges unexcelled in all the world.

It fell to the lot of a great Missourian, William H. Hatch, then chairman of the Committee on Agriculture, to father the next important Federal act for the advancement of agri-In 1887 Congress passed what is known as the Hatch Act, which provided for the establishment of experiment stations in connection with the agricultural colleges. The object of these stations, as their names indicate, is through research work and by investigation to ascertain scientific truths which may be used in the teaching of agriculture and which may result in new and improved methods to be applied directly upon the farms.

Under the Hatch Act experiment stations have been established in every State and in some of our island possessions. Inestimable benefits have come to the country from the establishment of these experiment stations. They are the great workshops, the laboratories, or demonstration farms where scientific investigations have been carried on and in which for more than a quarter of a century an immense amount of useful information has been accumulating.

In 1890 Congress passed a second Morrill Act, which had for its object the further endowment of agricultural colleges. It appropriated \$15,000 to each State and provided that that sum should be increased \$1,000 per year until there should be a permanent annual appropriation of \$25,000.

In 1906 the Adams Act was passed, which provided for increased appropriations for the experimental stations. At the present time, under this act, each experiment station in the United States gets an annual appropriation of \$30,000.

In 1907 the Morrill Act was further amended by an act which increased the appropriation to each State \$5,000 and which provided that the amount should be increased \$5,000 each year for five years. To sum up, Mr. Speaker, the National Government is now appropriating annually to each State, under the Morrill Act and acts supplementary thereto, the sum of \$50,000 for the use and benefit of agricultural colleges, and under the Hatch Act and amendments thereto the sum of \$30,000 for the maintenance and support of the various State experiment sta-

Agricultural colleges teach theories and methods; their field is limited; they reach only a comparatively small number of Experiment stations, by extensive research and investigation, have accumulated a wonderful amount of valuable information, which is furnished to the colleges, but which is not available, under present conditions, to the great body of the people. For more than 50 years the Federal Department of Agriculture and the State agricultural colleges have been accumulating information; for more than 25 years experiment stations have been gathering together valuable data. How shall this fund of information, the result of years of study and scientific research, be gotten to the man on the farm, that he may put it into practical use and profit thereby? Farm bulletins have been tried—hundreds of thousands have been printed and scattered broadcast—and while they have done much good and are a valuable means of diffusing knowledge, they have not accom-plished the desired result. The lecturer at farmers' institutes plished the desired result. The lecturer at farmers' institutes and agricultural meetings has been listened to with rapt attention and keen interest, but spoken words are soon forgotten. The agricultural press of the country, while it has done and is doing a great work for the advancement of the industry, while through its columns it is constantly carrying to the farmer new and valuable information, still it can not compel the farmer to put into practice the theories it so well presents.

Mr. Speaker, we must find some practical way of connecting the Federal Agricultural Department and the State colleges and experiment stations with the man on the farm. Why should we accumulate all this vast information if it is to go to waste and not become available to the farmers of the country? In my opinion, the pending measure will accomplish the desired re-Under the provisions of this bill the accumulated knowledge of years of experiment and research will be carried to the farmer, and by actual field demonstration he will "be shown,' as we say in Missouri, and the value and benefits proven to his entire satisfaction.

Farm-demonstration work is not a new and untried experiment. It has been thoroughly tested and the results are known. For many years farm-demonstration work has been carried on in the South and more recently in widely scattered counties in the Northern and Western States. The work in the South was carried on under the direction of the late Dr. Seaman A. Knapp, the founder of farm-demonstration work in this country. A number of years ago the boll weevil attacked the cotton fields and threatened the extermination of that great industry. The Government came to the relief of the people; it began to cooperate with them in their fight against this pest. Dr. Knapp took charge of this work, and under his direction men were sent into the territory infested. It was soon found that the only successful way to fight the boll weevil was by improved methods of cultivation and by diversifying the crops; that instead of raising cotton, and cotton alone, the farmer must learn to raise a variety of crops which the boll weevil would not attack. The agents of the Government, acting in hearty cooperation with the State and local authorities, went upon the farms and by actual demonstration showed what could be accomplished by certain improved methods of cultivation, by rotation, by fertilization, and by diversifying the crops. Thus began the work of farm demonstration, and so successfull has it proved that methods of agriculture have been revolutionized, and to-day the name of Dr. Knapp is a household word throughout the Southland.

Farm demonstration work, however, is not confined to the South alone. A few years ago the Department of Agriculture inaugurated what is designated as "improved methods of farm management, farm practices, and farm demonstration work." This work is carried on in about 150 counties in the Eastern, Western, and Northern States. It is cooperative work, and the funds for carrying it on come from the National Government, the State, and the county. A county desiring to avail itself of the advantages of this work is required to contribute one-half of the funds, the State one-fourth, and the Government one-fourth. In my own State, Missouri, in 1912, this work was taken up by 3 counties, in 1913 by 13 counties, and applications have been received from 25 additional counties—a much larger number than can be accommodated under the appropriation for this work-for 1914. In each of these counties there is a farm adviser, who gives his entire time to the work. He is selected by the Department of Agriculture with great care and only after advising with the officials of the agricultural college of the State. It is a significant fact that of the first seven farm advisers appointed in Missouri counties, all of them were farm boys, brought up on the farm, each of whom having had practical experience upon the farm after graduating from the agricultural college. I am not informed as to those more recently selected. The State leader in my State, Dr. D. H. Doane, is a graduate of the agricultural college, and he spent four years going over the State studying agricultural conditions, consulting with the most enlightened and progressive farmers, before he was appointed to his present position. The men who are appointed to do demonstration work must be practical farmers if their work is to be a success.

The work of farm management and demonstration thus inaugurated by the Department of Agriculture has been eminently successful, but the limited funds available will confine the work to comparatively few counties. Under the provisions of the pending bill a farm adviser or demonstrator will eventually be put into every county. This pending measure provides for a permanent appropriation of \$480,000 each year, or \$10,000 to each State. It further provides for an increased appropriation of \$300,000 each year for a period of 10 years, or until the permanent increased appropriation shall reach the sum of \$3,000,-This increased appropriation shall be distributed among the States in the proportion which the rural population of each State bears to the total rural population of all the States. By this method of distribution it is intended that the larger sums shall go to the States having the larger rural population. Thus it will be seen that the amount received by each State will begin with \$10,000 and will be gradually increased each year for 10 years, when the maximum amount will be reached. Under this distribution, when the system has been put into complete operation-that is, at the end of the 10-year period and annually thereafter-Missouri will receive from the increased appropriation, it is estimated, the sum of \$115,000, provided, of course, that the Legislature of Missouri cooperates in the work and

appropriates a like amount.

Mr. Speaker, I shall not take the time now either to detail the advantages to come from farm-demonstration work or to enumerate the many ways in which the farm adviser can be helpful to the farmers in his county. I desire, however, to briefly touch upon one phase of the work of the farm adviser which I do not think has been mentioned in the discussion of this subject. The farm adviser, as the appointee or agent of the Department of Agriculture, becomes the distributor of valuable information to the farmers and at the same time the collector of important data for that department. I will illustrate

what I mean by two concrete examples:

The marketing of farm products is the most important feature of farm economy, and yet the most neglected. A year ago, when the matter was before the committee for consideration, the present chairman [Mr. Lever] and I drafted the provision which was finally adopted and made a part of the appropriation bill, under which the Office of Markets has been established in the Department of Agriculture. This important line of work has just been started. This year we shall make a substantial increase in the appropriation, but the greatest difficulty which confronts the Office of Markets, we are told, is the lack of responsible agents, from whom to gather statistics and through whom to give out information. If we had a system of farm-demonstration work in full force and effect, the farm adviser would become a valuable medium, and would render efficient service to the Office of Markets in gathering statistics, and at the same time could give aid to the farmers in the marketing of their products by carrying to them the informa-tion sent out to him from the Office of Markets.

Last year we appropriated \$100,000 to demonstrate that the spread of hog cholera could be prevented. A serum has been discovered which the Department of Agriculture claims is an absolute preventive. How to get this information to the people and induce them to take advantage of it is the important problem. A farm adviser in every county would solve this problem, and millions of dollars would be saved annually to the farmers

of the country.

As I said in the opening of my remarks, Mr. Speaker, this measure is sure to become a law. Like other great bills, it will bear the name of its author, the distinguished chairman of the Committee on Agriculture, Hon. A. S. Lever, of South Carolina. Committee on Agriculture, Hon. A. S. LEVER, of South Carolina. It will be known far and wide as the Lever bill. Future generations, as they study the acts of Congress as they relate to agriculture, will discover standing out in bold relief above all others three great statutes, the Morrell Act, establishing State agricultural colleges; the Hatch Act, establishing cooperative ment stations; and the Lever Act, establishing cooperative agriculture-extension work, which is but another name for farm-demonstration work.

Mr. LEVER. Mr. Speaker, I will ask the gentleman from New York to use some of his time.

Mr. FITZGERALD. I supposed, Mr. Speaker, that the gentleman from South Carolina would explain his bill before anybody yielded time in opposition to it.

Mr. LEVER. I had intended to close the debate on this side, and I would like very much to hear the objections of the

gentleman from New York.

Mr. FITZGERALD. Mr. Speaker, it is a remarkable thing that the gentleman should propose a bill, saying that he will explain it at the close of the debate, and then ask gentlemen opposed to the bill to present objections before he even explains

Mr. LEVER. The bill was very thoroughly debated in the last Congress, practically for a week. It is well understood in the country by everybody, unless it is the gentleman from New York, and my friends to whom I am yielding are elaborately ex-plaining the provisions of the bill. But if the gentleman from New York insists, I will explain the bill myself.

Mr. FITZGERALD. I hope the gentleman will do so.

Mr. LEVER. I think it would clarify the atmosphere if I knew what the objections of the gentleman from New York are to the bill.

Mr. FITZGERALD. I would like to know the reasons for proposing the bill, and particularly in regard to one of the amendments.

Mr. MANN. Mr. Speaker, a parliamentary inquiry. The SPEAKER pro tempore. The gentleman will state it.

Mr. MANN. Whose time is this discussion coming out of? The SPEAKER pro tempore. The Chair would like to know that bimself. [Laughter.]

Mr. LEVER. Mr. Speaker, this is a bill to appropriate at the end of 10 years \$3,480,000, three millions of which appropriation is conditioned upon the States appropriating a like amount, for the purpose of enabling the Agricultural Department and the agricultural colleges of the various States to do what is commonly known as field demonstration work in aid of agriculture and home economics.

Mr. BLACKMON. Will the gentleman yield?

Mr. LEVER. I will.
Mr. BLACKMON. Will an amendment be offered that will save the farm demonstration work and the farm extension work now being done?

Mr. LEVER. The amendments I have presented absolutely take care of that situation, and were suggested by the gentle-man from Alabama when the bill was considered last year by the House

Mr. Speaker, we have accumulated in the agricultural colleges and in the Department of Agriculture sufficient agricultural information which, if made available to the farmers of this country and used by them, would work a complete and absolute revolution in the social, economic, and financial condition of our rural population. The great problem we are up against now is to find the machinery by which we can link up the man on the farm with these various sources of information. have expended in the neighborhood of a hundred million dollars in the last half century gathering together valuable agricultural truths. We have been spending 50 years trying to find an efficient agency for spreading this information throughout the country and putting it into the hands of the people for whom it was collected. We have tried the Farmers' Bulletin. We have tried the press. We have tried the lecture and the institute work. All of these agencies have done good. They have been efficient in a measure, but there is not an agricultural student in the country who does not realize that the greatest efficiency is not being had from these agencies. This bill proposes to set up a system of general demonstration teaching throughout the country, and the agent in the field of the department and the college is to be the mouthpiece through which this information will reach the people—the man and woman and the boy and girl on the farm. You can not make the farmer change the methods which have been sufficient to earn a liveli-hood for himself and his family for many years unless you show him, under his own vine and fig tree as it were, that you have a system better than the system which he himself has been following.

The plan proposed in this bill undertakes to do that by personal contact, not by writing to a man and saying that this is a better plan than he has or by standing up and talking to him and telling him it is a better plan, but by going onto his farm, under his own soil and climatic conditions, and demonstrating there that you have a method which surpasses his in results.

[Applause.]
The SPEAKER. The gentleman has consumed four minutes. Mr. LEVER. Mr. Speaker, I will now ask the gentleman from New York to consume some of his time.

Mr. FITZGERALD. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MADDEN

Mr. MADDEN. Mr. Speaker, this bill in many of its features is meritorious and in some of its features otherwise. principal objection that I have to the bill is the fact that it proposes to distribute the fund appropriated according to the percentage the agriculture population of any State bears to the whole population of the United States. As a matter of fact, the fund furnished by the Government of the United States should be furnished to a State in the proportion that its population bears to the population of all the States. For example, a great agricultural State like Illinois, with a large urban population, would pay very much more than its proportion of the expense of this educational system under the terms of the pending bill. The bill provides for the appointment of a large number of men to be known as demonstrators, and I am wondering whether they are to be placed in the classified service or whether their appointment is to be made under the spoils system, whether is se places are to be used for politics, or whether they are to be attached to an educational institution, in fact, and are to be educators. The best way to raise farm products is to till the soil. You can not raise a crop of corn unless you cultivate the soil. You can read all of the pamphlets that may be published from now to the end of time, but unless you cultivate the soil you will have no crops, and the farmer does not work on an eight-hour basis. He goes to work at 4 o'clock in the morning and usually quits at about 8 o'clock at night, if he is a successful farmer, and when he comes in at 8 o'clock at night after having worked from 4 o'clock in the morning, as a rule he is tired enough to want to go to sleep.

The gentleman behind me asks if that is under the old ethod. Yes; and it will be under the new method. You can not work a farm without tilling the soil. You can not produce crops without working the land. The States themselves ought to do the work of demonstration. It is a State function, and, as a matter of fact, States like that which I in part represent do this work. They have men employed educating the farmers as to how they can raise the best crops. That work is important, of course; but we should not forget that the distribution should be on an equitable basis, and it can not be unless the whole population of a State is to be the basis of participation in the fund, not merely the rural population. Under this bill Illinois would get \$131,000 per annum, but its people will pay \$400,000 into the fund from which that \$131,000 is taken. I say, they could better afford to do their own work of demonstration.

Mr. CALLAWAY. Will the gentleman yield?

Mr. MADDEN. Oh, surely.
Mr. CALLAWAY. Is it not about as reasonable to distribute this in proportion to population as to distribute the money that is appropriated for cleaning out harbors in proportion to popu-

Mr. MADDEN. It would be easy to distribute this accord-

ing to population; very easy.

Mr. CALLAWAY. What would the population in the city of

Chicago care about the money to demonstrate farms?

Mr. MADDEN. The population of the city of Chicago is interested in successful farming. It is interested in reducing the cost of living. There the product of the farm is bought, and if they are not interested who is?

Mr. CALLAWAY. The gentleman would not want farm demonstrators in New York City or in Chicago; you want the farm demonstrators scattered in proportion to the farming

Mr. MADDEN. I thought the gentleman wanted to ask a question.

Mr. CALLAWAY. I am asking a question.

Mr. MADDEN. The people of the city of Chicago and the people of the city of New York and every other city in the Union are called upon to pay their proportion of these taxes, and the States with the largest urban population pay the greatest proportion of the taxes, and they are being unfairly treated in the distribution of the funds. And, besides that, I am not always sure that it is safe, sane, or wise to make permanent appropriations, fix a permanent charge on the Government, about which future Congresses know nothing or very little. This bill ought to be taken up under the rules of the House that would admit of amendment. Under suspension of the rules no opportunity is afforded a Member of the House to offer an amendment.

Mr. LEVER. Will the gentleman yield?

Mr. MADDEN. Yes,
The SPEAKER. The time of the gentleman from Illinois has

Mr. LEVER. Mr. Speaker, I yield two minutes to the gentle-

man from Illinois [Mr. Mann].

Mr. MANN. Mr. Speaker, in a very short time spring will have come again and the farmers throughout the country will be engaged in sowing seed in the black, cold ground, from which will come a bountiful harvest. That is what we are engaged in doing now. The passage of this bill is sowing the seed, and a bountiful harvest will come when the value of this gets down to the farmer. We have a great country, greater in no re-spect than it is in its agricultural possibilities and its agricultural workers; and having this great country, we can afford out of the Public Treasury to expend large sums of money for the purpose of aiding men to get closer to the ground and the products of the soil. We can afford it. I for one supported the bill once before. I support it now believing that we ought to do these things for the farmer now. Eventually we will do more or less in the way of education for other citizens of the country, industrially and otherwise, and I swallow the bill, bait, hook, line, sinker, pole, and the gentleman behind [Applause.]

Mr. FITZGERALD. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. Moore].

Mr. MOORE. Mr. Speaker, no one who has been in this House for any length of time could have failed to note the admiration in which the gentleman from Illinois, who has just spoken, holds the distinguished chairman of the Committee on Agriculture, the father of this bill, and I think very worthily so, because the tributes paid to him as a friend of the farmer are properly bestowed. He is the farmer's friend, is the gentleman from South Carolina [Mr. Lever]. [Applause.] are some features of this bill to which a man from the larger,

the more thickly populated sections of the country, ought to draw attention. We support the farmer in the large cities. The product of the soil which we want him to cultivate, and which we encourage him to cultivate, is taken by the man who pays him for his toil and effort. That man must receive a wage. When that man does not receive a wage, he can not profitably buy the output of the farmer. Now, what has been done by the Congress, by this or by any other administration, to educate the man who depends upon the wage upon which the farmer, in the last analysis, must depend? We are asked to appropriate \$3,000,000, and some of the States are induced to make a like appropriation, for the purpose of educating one class of our citizens. It is not a direct system of practical education; it is as much to educate instructors of practical men upon the farm as it is to educate the practical man himself.

If I had my way and such an amendment would carry, I would provide in this bill that one boy, at least, should be taken out of every congressional district, whether it be in the city or whether it be in the country, and sent to one of these colleges, thus to become the beneficiary of the bounty of the Government for a practical education as a farmer. the boy in the city to get a farm education. He will not get it through the medium of this bill, because it distinctly bars from its benefits all those who are resident in communities of 2,500 or more. The gentleman from Illinois [Mr. MADDEN] very properly raised the question of the classification of appropriations. We are to appropriate to those particular sections of the country that are rural. Those that are urban, where there is a population of more than 2,500, are to be excluded from the advantages of this bill, and there is, of course, in consequence, to be an unequal appropriation of the general funds for the benefit of some of the people of the country to be paid for by all of the people of the country. In other words, there is unquestionably, commendable though it may be, a special privilege to some of the people of the land. Take the State of Rhode Island and the utmost it can receive under this bill is \$1,200, a paltry sum, and yet if you refer to page 12 of the report and compare the population of Rhode Island with that of some of the so-called rural States you will observe that vast appropriations go there, made up from the taxes of all the people, whether they come from Rhode Island, a revenue producing State, or whether they come from Arizona. In that respect the bill is unfair. We want to train the boys in the city, in order that they may go upon the farms and in order that they may attain to other useful occupations. What are we doing to train the boys who are to go on the ships? What are we doing to train the boys who are to go in the mines? Is there any Federal provision joining with any State provision to pay for the education of the miner boy? Is there any appropriation to pay for his education as a seafaring man? Is there any appropriation to pay for his education as a fisherman? Is there any appropriation to encourage him to learn any one of the industrial trades? Wherein have we made provision for these? I am glad some provision is to be made again for the farmer in this instance—not for the farmer's boy, as I would like, but for the farmer—through trained educators, to be paid for at the expense of the Federal Government, and I do not expect to vote against the bill, but I want some provision ultimately for the boy in the city.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. LEVER. Mr. Speaker, I yield two minutes to the gentle-

man from Iowa [Mr. HAUGEN].

Mr. HAUGEN. Mr. Speaker, in the 2 minutes allotted to me out of the 20 minutes' time given to this side to discuss the bill it would be futile to undertake to discuss the bill in detail. Besides, that does not seem necessary at this time. As stated by the chairman of the committee, a similar bill passed this House in a previous Congress without a dissenting vote. bill has been given careful consideration by the Committee on Agriculture. It comes from that committee backed up with a unanimous report. It has the approval of the Department of Agriculture, of the President of the United States, and of the representatives of agricultural colleges and experimental stations throughout the country. This I believe is sufficient to show that the bill has not only been given due consideration but also that its merit is generally recognized. So in the few minutes I have I will not undertake to discuss the bill in detail except to say that the proposed legislation furnishes an outlet for knowledge that has been bottled up over in the Department of Agriculture. We have there a corps of scientists which I believe the most able in the world. It is proper that the farmers of this country should have the benefit of the scientific investigations and research work of these very excellent men. .

Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Iowa [Mr. HAUGEN] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HAUGEN. Mr. Speaker, I yield back the balance of my

The SPEAKER. The gentleman occupied all of his time. Mr. HAUGEN. In availing myself of leave to extend my remarks, I wish to add that the proposed bill provides:

Mr. HAUGEN. In availing myself of leave to extend my remarks, I wish to add that the proposed bill provides:

**Be it enacted, etc., That in order to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics, and to encourage the application of the same, there may be inaugurated in connection with the college or colleges in each State now receiving, or which may hereafter receive, the benefits of the act of Congress approved July 2, 1862, entitled, etc. * * agricultural extension work which shall be carried on in cooperation with the United States Department of Agriculture. * * * SEC. 2. That cooperative agricultural extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on sald subjects through field demonstrations, publications, and otherwise; and this work shall be carried on in such manner as may be mutually agreed upon by the Secretary of Agriculture and the State agricultural colleges or colleges receiving the benefits of this act.

SEC. 3. That for the purpose of paying the expenses of said cooperative agricultural extension work and the necessary printing and distributing of information in connection with the same, there is permanently appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$480,000 for each year, \$10,000 of which shall be paid annually, in the manner herinafter provided, to each State which shall by action of its legislature assent to the provisions of this act. * * * Provided, That there is also appropriated an additional sum of \$300,000 for the fiscal year following that in which the foregoing appropriation first becomes available, and for each year thereafter for nine year's a sum exceeding by \$300,000 for the propriated for each preceding year, and for each year the sum of \$3,00

It will be seen that the object of the bill is to establish agriculture-extension departments in connection with the agricultural colleges in the several States to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics, and to encourage the application of the same by appropriating, to begin with, \$10,000 annually for and to be paid to each State, and increasing the appropriation \$300,000 each year up to the amount of \$3,480,000, and that amount to be permanently appropriated each year thereafter and paid in the proportion which the rural population of each State bears to the total rural population of all the States. Congress has up to this time appropriated, as set out in the report for State colleges and experiment stations, about \$70,000,000. The appropriation bill for the Department of Agriculture, including permanent annual appropriation for the coming year, will probably exceed \$24,000,000. The several States annually appropriate upward of .\$400,000,000 for public schools. The major portion of that amount is to prepare men and women for the profession, while only 8 out of every 100 of our people belong to the professions and the balance—92—to the industrial, commercial, agricultural, and idle classes. In view of that fact it seems wise and proper for Congress to appropriate the amount proposed in this bill to fit young men and women to work efficiently and to dignify the laudable occupation of farming, to give them a practical training, and, I might add, in developing a skill and efficiency not only on the farm but in the different trades and occupations.

In my opinion, the people in the industrial and commercial pursuits are entitled to consideration in this connection, and if I had my way about it I would amend the bill so as to make additional appropriation for secondary schools, high schools, normal schools, and State colleges; thus also giving those schools the benefit of a Federal appropriation for vocational education and training for those in the trades and industrial and commercial pursuits. But such an amendment is not in order under the suspension of the rules, and inasmuch as the bill does not provide for it, or can be so amended, that is no reason why this bill should be turned down. In my opinion, if this is all that can be had we had better take

what we can get and trust to the future for additional appropristion.

Statistics show that our farms yield less per acre than those in European countries. Many contend that our small yield is due to a lack of practical and scientific farming. Be that as it may, one thing is certain, that it is necessary for the farmer to have knowledge of the plant which he plants and the soil which he tills and how to bring about such conditions of the soil as will make it more fertile and productive. If so, and if the Department of Agriculture possesses the required knowledge, and can be of greater service to the farmer in increasing yield and in making farming more profitable-if not more profitable to make it more productive-and thus reduce the cost of production and thereby reduce the cost of living, by carrying this information and knowledge directly to him, it seems to me it ought to be done. It will benefit not only the farmer but the consumer as well.

All are agreed that with prosperity on the farm we have prosperity in the city, in the shops, and the mills, and with close times on the farms we have close times in the cities, crumbling banks and factories. All our interests are in com-mon. We go up and down together. Why not take this important step? Why not also provide for education in home economics? Why not provide, as is provided in this bill, for education in home education in home economics—not simply in cooking, but in every science conducive to making home better and more attractive? If it is wise to appropriate millions of dollars annually for the study of the soil, the life of the plant, the diseases of animals, is it not of even more importance to the mothers and the housewives to know what food to give to the child and members of the family; to know the nutritive value of different foods; to know that a certain kind of food builds up the tissues of the body that others destroy; others supply heat for the body; others energy and strength; to know just how it should be fed in producing the right physical condition, good health, and longevity? Knowledge of these things is certainly of vital importance to the good health, happiness, prosperity, and the longevity of our people. And it seems to me that the teaching of domestic science and the practical application of the same in

the home are of great importance.

I repeat what I have said before. We have accumulated facts and bottled up in the Department of Agriculture millions of dollars' worth of valuable knowledge. Our scientists over there, generally conceded to be the greatest in the world, are full of it. They have been endeavoring to disseminate knowledge on agricultural home economics through the mails by advertising and sending out bulletins, and much has been accomplished, but as a general thing the people do not apply things simply by reading or hearing about them. Now, let us send practical men, with expert knowledge, into the field to demonstrate what can be done when labor is practically, scientifically, and intelligently applied, as has been done in the cotton-boll weevil district and in the acre corn contest carried on all over this country. I believe that the department is and has been doing good work. All are proud of its achievements; yet while I fully appreciate that it has done splendid work, and I concur in practically all that has been said and is claimed for it, I do not share in the contention that the department or scientists are entitled to all the credit for what has been accomplished or that we must look to them alone for our future prosperity and happiness. Due credit must also be given those who have largely made the country what it is—those who have built our villages, homes, roads, farms, and charitable institutions; those who have constructed our vast system of public schools, many of them in poverty, in sickness, privation, and sorrow, others in health, wealth, joy, and prosperity, sympathizing with each other's woes, sharing each other's joys, step by step advancing along lines of accumulated wealth, culture, and refinement, until to-day we boast of the fact that we rank among the most successful and intelligent people upon the Their onward march to true greatness has placed them in the foremost ranks of modern civilization and refinement. These towns, these villages, these temples of religion and industrial institutions, the morality and industry of our people, all accomplished in this government of the people, by the people, and for the people, are not the achievements of an ignorant or indolent people. To the contrary, they bear upon them the most enlightened views and policies, executed with the greatest To the contrary, they bear upon them the prudence, firmness, and wisdom; they are the trophies of freedom and the grandest monument of national glory.

Several reasons for passing this bill at this time has been suggested. One is on account of the recent tariff legislation. That it unjustly discriminates against the farmer in placing practically everything which he produces and has to sell on the free list and leaving a high tariff on the things which he has

to buy, thus compelling him to sell his product in competition with products from cheap labor and cheap and productive lands of the world and to buy most of the things which he has to buy at home, or if he buys abroad, he must pay a high duty. As for instance when he offers his corn, wheat, cattle, beef, or wool, he must compete with the world, and when he goes outside of his own country to buy clothing for his family, woolen or cotton, he is compelled to pay a high duty. The contention is that under such conditions the farmer can not hope to succeed; that under such conditions the farmer can not hope to succeed; that under this unjust discriminating tariff legislation, its enactment made possible only through the Democratic vicious caucus system, he can not continue to pay higher wages and produce less per acre than other nations; therefore not only the yield must be increased, but the cost of production must be decreased, so that the Iowa farmer paying \$125 to \$300 per acre for land and from \$30 to \$50 per month for labor can not continue. land and from \$30 to \$50 per month for labor can not grow corn, raise and feed cattle, and sell in competition with cattle or beef raised by cheap labor on cheap land under more favorable conditions in other countries. He can not grow sugar beets and sell in competition with other countries with cheap labor growing sugar cane.

Now, I have no desire to sound a chord of alarm or discuss the tariff question, but I take it that a statement of facts is proper at any time, and that the statement relating to the subject may properly be inserted in the RECORD; and for the information of those who may care to know as to what effect the recent tariff legislation has had on the sugar-beet industry in northern Iowa, I insert in extension to my remarks a copy of a petition signed by thousands of people affected by the Underwood bill:

To the Ways and Means Committee, House of Representatives, Washington, D. C.:

We, the undersigned petitioners, are residents of the State of Iowa, and are interested in the growing of sugar beets. We have observed the development of this industry in this section and we believe in its encouragement. We have noted decided increase in the crops succeeding sugar beets, and we believe that the introduction into the rotation in this State of this crop is of material benefit to the farmer. We find the growers are also generally satisfied with the results of beet growing measured by the immediate profits.

We would therefore respectfully petition that no legislation that will injuriously affect this industry, or that will prevent its further development in this State, will receive the support of our National Congress.

Also extract from my remarks of May 2, 1913:

Also extract from my remarks of May 2, 1913:

Considering the intelligence, eloquence, and integrity of the excellent gentlemen in power; considering all that you have said and promised to the good people, both in legislation and jobs, the power of the big stick, and your hunger for pie; considering the pressure brought to bear, the contributions made to the Democratic national committee, the support given your party in campaigns by your devoted and inseparable friends, representatives of the Sugar Trust; and knowing that you are pledged to free trade, commonly called "tariff for revenue only"; that you are now in full control of the executive and legislative branches of this Government, it is, of course, fair to assume that you will exercise your power and honestly redeem your party platform pledges. Yet, considering it all, with the evidence and facts before you, I was in hopes that you might at least save this one great and promising industry, one that not only concerns the farmers and consumers, but all the people of the United States.

It occurred to me that the fact that Uncle Sam has been paying annually about a hundred million dollars for sugar produced in other countries, an amount about equal in value to the total output of all our gold and sliver mines, and the fact that sugar can, by a proper protection, cultivation, and encouragement, be produced at home with benefit to the farmer, thereby giving profitable employment to capital and hundreds of thousands of people, and will ultimately, if not immediately, furnish our 92,000,000 consumers sugar cheaper than now, and certainly cheaper than if that great industry is wiped off from the map, thereby giving the Sugar Trust a monopoly on sugar, and thus placing the consumers at the mercy of the Sugar Trust, whose representatives urgent request has been so generously heeded in this respect. As to proof as to that, I refer you to the testimony given before your own select and excellent committee, the Hardwick special committee on the investigation of the Am

CHAPTER I.

Shows that the refiners of foreign raw sugar are a unit in desiring the duty on foreign raw sugar reduced or removed.

CHAPTER II.

Shows that the refiners are striving to have the duty reduced on for-eign raw sugar in order that they may destroy the increasing competi-tion of the home sugar industry, which already forces them to lower prices while the home product is on the market.

CHAPTER III.

Shows that the alleged "committee of wholesale grocers" is Spreckels, the New York sugar refiner, who uses the grocers as a cloak to conceal his identity. CHAPTER IV.

Shows that when in September, 1911, the sugar refiners marked the price of imported sugar up to 7½ cents per pound domestic sugar was not on the market.

Shows that when domestic sugar came onto the market, in October, it was that and that alone which brought the refiners' price down to 6.11 cents in November and 5.63 cents in December.

CHAPTER VI.

Shows that the most effective manner in which to lower the price of sugar permanently is to increase the home production.

"Mr. WILLETT. Yes; an enormous influence. If it were not for the domestic sugar industry, sugars in this country would be to-day very considerably higher. I can not say how much higher, because I can not tell what influence they have had upon the European market, but the refiners would be compelled to purchase a quantity of sugar in foreign ports equal to the production of beet sugar coming into the market from this country. I would not be surprised if it would not be a cent a pound more but for the beet and cane sugar produced in this country." (Part 38, pp. 3153-3154 of hearings.)

"The CHAIRMAN. My idea in having this matter repeated, if it is repetition, was to understand Mr. Willett—who is probably the greatest living American authority on sugar prices"—

"Dr. WILEY. Yes; * * I have been encouraging it. I believe it to be one of the best things for the agriculture of this country that could possibly exist, because if one raises beets he must use scientific methods. Every beet-sugar field is practically an experimental station which teaches every farmer in the neighborhood. I am in favor of protecting the sugar crop in Louisiana and all along the coast. I am not making a plea for taking the tariff off of sugar at all."

"Dr. Willey. I look at this matter as I do everything else in which the farmers are interested; I want the farmers to have a fair chance in the markets, governed by supply and demand as to rise and fall, and not have everything they grow and everything they buy manipulated as to price by somebody that has nobody's interests at heart but their own. I can not sell a steer to-day, or a bushel of wheat, or a bushel of corn at a price governed by supply and demand, nor can you. The price of a steer, or of a bushel of wheat, or of a bushel of corn is set by gamblers in Chicago and elsewhere." (Part 42, p. 3447, of hearings.)

It would seem that under ordinary circumstances the testimony of these experts selected by your own committee would receive consideration and be heeded in preparing this all-important bill. Evidently the farmers and consumers, in whom you profess to have so much interest, were lost sight of and the persuasive and all-powerful eloquence of the Sugar Trust in its ceaseless efforts and unrelenting plea for free sugar won the day. Here you are—page 3 of the brief:

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

"Mr. Hinds. In other words, perhaps, you would take it [the tariff] all off, would you not, and have free trade?

"Mr. Spreckels. I would have free trade." (Part 27, p. 2277, of hearings.)

"Mr. Hinds. You would have free trade in sugar?

TO 1910.

"Mr. Fordney. Now, if the duty were removed absolutely on sugar, could we produce either cane or beets in this country?

"Mr. Heike. I doubt it very much.

WILLIAM G. GILMORE, PARTNER ARBUCKLE EROS., SUGAR REFINERS.

"Mr. Maddson. In other words you think the thing to do is to take

"Mr. MADISON. In other words, you think the thing to do is to take off the duty, and that it would be to your advantage to take it off as a refiner of cane sugar?

"Mr. GILMORE. Yes, sir.

"Mr. MADISON. And you would advocate the taking off of the duty?

"Mr. GILMORE. I would personally. I am only speaking now personally." (Part 14, p. 1169, of hearings.)

JAMES H. POST, PRESIDENT NATIONAL SUGAR REFINING CO.

"Mr. Post. If Congress did not need the revenue from sugar. That is a different proposition. But they have to have it from something, and sugar seems to be the thing that has paid a part of it for a great many years. As far as I personally am concerned, I would like to see free sugar. As we look at the country at large, however, I think it would be a very unfair proposition." (Part 6, p. 527, of hearings.)

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

"Mr. Hinds. Mr. Spreckles, you have been carrying on a campaign to reduce the tariff as beneficial to the cane-sugar refiners?

"Mr. Hinds. Of course that will be damaging to the beet-sugar refiners?

finers? "Mr. SPRECKELS. To some extent it will." (Part 27, p. 2275, of hear-

"Mr. Hinds. In other words, perhaps you would take it [the tariff] all off, would you not, and have free trade?

"Mr. Spreckels. I would have free trade." (Part 27, p. 2277, of

hearings.)
"Mr. Hinds. You would have free trade in sugar?
"Mr. Spreckels. Absolutely." (Part 27, p. 2278, of hearings.)

According to printed testimony the Sugar Trust has gone to the trouble and expense of thousands of dollars in distributing literature under the assumed name of "Committee of wholesale grocers." I refer you to pages 9 and 10 of the brief.

"Mr. FORDNEY. Mr. Lowry, I notice by a paper here that you are secretary, and the paper says secretary and treasurer, of the grocerymen's committee.
"Mr. Lowry. That is correct."

"Mr. FORDNEY. Who was instrumental, Mr. Lowry, in organizing that committee?

"Mr. LOWRY, I was "

"Mr. FORDNEY You alone, then, organized the committee, did you? "Mr. Lowax. 1 did."

"Mr. Foedder. How much money has been spent in distributing literature by that committee?

"Mr. Lowry. Somewhere in the neighborhood of \$12,000.

"Mr. Fordder. Who paid that money?

"Mr. Lowry. " " the only one that subscribed was the Federal Sugar Refining Co.

"Mr. Fordder. So that the Federal Sugar Refining Co. have paid in this \$12,000 for the distribution of the literature?

"Mr. Lowry. Yes.

"Mr. Fordder. And no other concern has paid in any sums of money?

"Mr. Lowry. No other concerns; no." (Part 19, pp. 1607-1608, of hearings.)

"Mr. Honder. And no other concern has paid in any sums of money? Mr. Lower. No other concerns; no." (Part 19, pp. 1607–1608, of hearings.)

"Mr. Hinds. Now, Mr. Spreckels, it was testified in Washington that the movement for lowering the tariff on sugar, the movement which is going on now and in which you were interested, that your company had expended \$12.000 for literature, etc.

"Mr. Spreckels, Possibir. I do not know what the amount is. I dare say we have." (Part 27, p. 2276, of hearings.)

Nearly every day communications are received from Mr. Lowry. Here is one. Builetin No. 34:

(Committee of wholesale grocers formed to assist in obtaining cheaper sugar for consumers through reduction of duties on raw and refined sugars, 138 Front Street, New York, N. Y.

As above stated, many are honest in their contention for free sugar, in my opinion, to put sugar on the free list, as the Underwood bill proposes to do May 1, 1016, will not only do harm, but will do exactly what the experts and representatives of the Sugar Trust, who testified before the committee, said that it will do—that is, it will destroy the sugar-beet industry in this co.ntry, and as a result, of course, additional millions will go to foreign countries to pay for sugar imported. Prices of American farms will go down, thousands of wage earners and producers of sugar beets will have to seek other employment, and I am arraid the price of sugar to the consumer will go up; but that is neither here nor there. The question of protection to American industries and inbor has passed that stage, and argument along that line is simply a waste of time, as you have declared that it is not to be considered. Your party pledges are out; you promised free trade under the guise of "tariff for revenue only." You excuse your action on the ground that the people have spoken. The cure has been prescribed; the remaining the first products, on the free list. You promised free trade to the farmer; you have given it in spots. You put his products on the free list, especial

Also a statement by Earl C. Moore, general manager of the Iowa Sugar Co. :

[From the Mason City (Iowa) Daily Times, Jan. 16, 1914.]

SUGAR-BEET MILL STOPPED BY FREE TRADE—DEMOCRATIC MEASURE CLOSES WORK OF BEET GROWING IN NORTHERN IOWA—FIRST EFFORTS OF THE WILSON ADMINISTRATION—EARL C. MOORE, GENERAL MANAGER OF THE WAVERLY FACTORY, ANNOUNCES THAT MILL WHICH HAS FURNISHED LABOR WITH EMPLOYMENT AND MARKET FOR THE AGRICULTURAL PRODUCTS WILL SHUT DOWN—CAN NOT OPERATE.

The Waverly sugar beet factory, that has proved such a great industrial proposition for the farmers of northern lowa, paying out thousands of dollars for the product and arranging for further extension, will close down because the Democratic free-trade bill has put the business on the bum.

The Clear Lake and Osage mills, which had been arranged for, will be abandoned.

Charles F. Crane, of Clear Lake, who has been at the head of the proposed Clear Lake mill, is in receipt of the following letter from Earl C. Moore, general manager of the Iowa Sugar Co., which tells its own story:

To the beet grovers of the Iowa Sugar Co.:

It is with regret that I inform you that the directors of the Iowa

To the best growers of the Iowa Sugar Co.:

It is with regret that I inform you that the directors of the Iowa Co. have decided to suspend operations of the factory at Waverly.

This action is due to the unfavorable conditions of the sugar market and the prospect of further decline in sugar prices.

We have been obliged to sell sugar from 65 to 70 cents a hundred pounds less than the price a year ago, and there are prospects of further reduction.

You understand that in the sugar-beet business we are compelled to anticipate the markets one year in advance. We have to buy our best beet seed from foreign countries, we have to contract with the growers, and make arrangements for labor nearly one year ahead of the time we have the sugar to sell, and with present prospects it is simply a straight business proposition with us that we are obliged to close down.

This is a sovere blow to the beet growers who have furnished us with beets, to the men we have furnished with employment, to the citizens of Waverly, and indirectly to the whole State of Iowa.

Many of you have grown beets for us from the very beginning, and you have known the many obstacles and the false ideas we have had to overcome. Much was said to discourage this industry, but its real worth has gradually become known. It took time for the growers to find out the benefits of beet growing; and all this time we waited patiently, because we knew that in the end the farmer would want to grow beets. For the campaign of 1913 we had to turn down thousands of acres of beets that were offered to be grown for us because we could not handle them.

Iowa was so well thought of as a beet-sugar State that in 1911 and

not handle them.

Iowa was so well thought of as a beet-sugar State that in 1911 and 1912 a party of men with sufficient capital had decided to build a factory at Osage. Plans for the building and articles of incorporation were drawn, when the tariff agitation was started and the deal fell

tory at Osage. Plans for the building and articles of incorporation were drawn, when the tariff agitation was started and the deal fell through.

The business men of Clear Lake also started a factory movement, and they had sufficient acreage written for 1914 to justify a factory, but the attitude taken on the tariff has killed the prospects, as no one would invest a dollar in a beet-sugar factory under present conditions. Raw sugar can be laid down in New York to-day at from \$1.85 to \$2 per hundred pounds, without any duty. The refiners can manufacture and put into the barrel and sell it at a profit at 80 cents per hundred pounds, which would make the net price on sugar about \$2.80 per hundred. You will see from this condition what we will have to meet when the free-sugar bill goes into force, and we would show very poor business judgment to try to operate the plant at Waverly under these conditions.

We have employed from 35 men the whole year to 250 men during the running of the factory. The farmers who grew beets for us employed about 700 men in the beet fields during the growing season.

The amount of money we have paid out for salaries and labor during our operations in Iowa would pay 125 men \$75 a month each for six years of steady work.

The money paid to the families who work for the farmers growing the beets would pay 132 families \$500 a year each for six years.

We have paid the railroad companies for freight on coal, coke, lime rock, and beets and sugar, \$312,465.

Our coke and coal bills have amounted to \$4,000.

We have paid for barrels, bags, and chemicals \$57,000.

Our miscellaneous supplies and expenses have amounted to \$50,000. I am giving you these figures so as to give you some idea of the amount of business which has been done.

There is no need for me to tell you how badly the agricultural condition of this great State of Iowa needs the sugar-beet industry, as you are all familiar with this condition.

The men who have been connected with this sugar company and who have put in several years

Yours, truly,

IOWA SUGAR CO., EARL C. MOORE, General Manager.

Also a clipping from the Howard County Times of January 20. 1914 :

TARIFF DISCRIMINATIONS.

The Pacific Daily Review thinks it sees accumulating evidence that the new tariff grossly discriminates against the American agriculturist, and particularly the western dairy farmer. It calls attention to the fact that if an American dairyman wants to ship butter to British Columbia, as we used to do a few years ago, they will find their product confronted by a 4-cent Canadian import duty, while on cheese it is 3 cents per pound. Germany would tax your butter at 3½ cents and Anstria 4½ to 5½ cents. Those enterprising Siberians who are trying to sell us their butter are a part of Russia, which country has an import duty of 12 cents on butter. Spain imposes 7 cents, Brazin import duty of 12 cents and Japan 7½ cents.

The criticism made by the Review seems to bear out the contention of Senator Cummins that the new tariff law clearly discriminates against the western farmer, and for that reason he voted against the measure.

Another from the Decorah Republican:

RIVAL TO IOWA COW-FINE BUTTER IS SHIPPED INTO THE STATE FROM AUSTRALIA AND NEW ZEALAND.

AUSTRALIA AND NEW ZEALAND.

Iowa butter must all be of the best quality. Competition from New Zealand and Australia has appeared. Butter churned 12,000 miles away is on the market in Iowa.

W. B. Barney, dairy commissioner, has in his office samples of this foreign butter, purchased in the open market in Iowa. It was sold for 25 cents a pound. It proves to be butter that will score about 85. Government experts in Chicago scored it a little higher. It is not adulterated, but is not of the quality of best lowa creamery butter.

It is learned that within the past few months a million pounds of this butter from the other side of the world has been received on the Pacific coast and from there distributed to the markets of America. A large quantity went to Chicago. Some of this was shipped back to Cedar Rapids and there sold to bakeries and restaurants at 25 cents a pound. It was from this source that a sample was received and sent to the State dairy commissioner.

Mr. Moore's statement and that clipping tell the story. comment is necessary. The very thing pointed out and pre-dicted when the tariff bill was up for consideration as to the sugar-beet industry has happened in northern Iowa. I take it that conditions elsewhere are the same, and that this great industry, so essential to the farmer and consumer, doomed to destruction by the framers of the present tariff law, has been destroyed; if not, it is sure to fall in 1916, when sugar goes on the free list and when the Sugar Trust will have full control and will be in position to make prices in accordance with its greed. Evidently this is not the only obstacle which is likely to be encountered. Take, for instance, the cattle industry. According to a statement made by Dr. Melvin, Chief of the Bureau of Animal Industry, who was sent to South America to study conditions there, reports show more than 30,000,000 cattle in Argentina, the annual increase being about 25 per cent, or seven and one-half millions; the increase being about 2,000,000 in excess of the number of cattle slaughtered in our 996 packing houses; 16,000 carcasses imported in a single day.

We read in the press of millions of eggs coming from China and Canada. I take it that the large importations are likely to greatly affect the farmer. But be that as it may, as before stated, I have no desire to now discuss the tariff; far be it from that. The tariff bill is passed and gone. Its friends, the Democrats, are responsible. Time will tell. The test of the pudding is in the eating of it.

Now, having pointed out a few of the unfortunate things that have happened to the farmer, to show the necessity of the proposed legislation under existing conditions, I dismiss the subject and close by saying, whether the bill is brought in and rushed through for the purpose of Democrats to square themselves with the farmer, whom they have wronged and discriminated against, or to meet a pressing need, whether the numerous reports of disastrous results from the present tariff law has anything to do with it or not, one thing is certain, and that is that the yield on our farms is not as large as in many other countries, and that something should be done to increase the yield; and if by appropriating the amount stated in the bill and authorizing the department to send men into the field to give instruction and demonstrations in agriculture and home economies will enable the farmer to rehabilitate his soil, make it more productive, increase the yield, reduce cost of production, as is believed it will do, at least in a degree, then by all means the bill should pass

Mr. LEVER. Mr. Speaker, I yield to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Speaker, no Member of this House is more greatly interested in the enactment of legislation that will advance and promote the interests of the American farmer than myself. No one realizes more than I do that the general prosperity of the country depends almost entirely on the success of those who till the soil. Believing this, I have taken advantage of every opportunity during the eight years I have been a Member of this body to use both my voice and vote in support of legislation that, in my judgment, would advance their interests and make life on the farm more pleasant and the profession more profitable.

Mr. Speaker, about two years ago in discussing a bill similar to the one now before the House I stated that I was here representing a large agricultural district whose farmers are intelligent, industrious, progressive, and successful. We know out in Indiana that their success means the success of the merchant, the manufacturer, the banker, the lawyer, the doctor, the laborer, and the mechanic. While I am not a farmer myself, all the business I have depends upon the farmer, and if his business is not profitable my business is likewise unprofitable. The fact is, agriculture is the foundation of all prosperity. It has built up and maintained our great manufacturing industries. It has made possible our beautiful and opulent cities, bound together with bands of steel. It has furnished the wealth that has opened up and beautified, no matter how obscure, every hole and corner of this vast universe. You may burn down and destroy our splendid cities, and the wealth of the farm will rebuild them more beautiful than before; but destroy our farms, and our cities will decay and our people will starve.

Appreciating these facts as I do I have advocated measures that, in my judgment, would tend to make better the condition of the men who live upon the farm and by whose toil the entire population is fed, and upon whose welfare and prosperity the country depends. I have been pleased to watch the growth of the Agricultural Department here in Washington. No department of this Government has done so much of genuine benefit to the country as a whole as has this department. While I have voted for and favored the strictest economy in the administration of governmental affairs, I have never yet and never will vote to lower the appropriation for agricultural purposes. Each year since I became a Member I have helped to increase the appropriation for the use of the Department of Agriculture in order that its efficiency may be improved and its power for good increased.

Mr. Speaker, I stand to-day where I stood two years ago, so far as legislation affecting the interests of the American farmer is concerned. On the 12th day of December, 1913, I introduced H. R. 10393, known as the Adair agricultural-extension diproviding for the establishment of agricultural extension departments in connection with agricultural colleges in the several States. The bill now under consideration contains all the provisions of my bill. The work to be done is exactly the same,

but the method of doing it differs in a slight degree. No one will question the necessity for some legislation that will offer encouragement to rural communities. For many years there has been a constant drift of rural population to the towns and cities. In 1880, 70 per cent of the population was rural, while in 1910 only 53 per cent of our people lived upon our farms. With our population increasing at the rate of 2,000,000 a year and 1,500,000 of these being foreign immigrants, who will not go upon the farm, but remain in our cities and must be fed, the question of stopping this movement away from the farm becomes an important one. Many farms have already been deserted throughout the country, and the only way to change this condition is to make farm life as attractive and as profitable as city life, and this can be done only through a systematic effort to redirect rural methods and ideals.

Mr. Speaker, it is stated in the very able and illuminating report prepared by the chairman of the committee, Mr. Lever, that the bill under consideration provides for the inauguration of cooperative agricultural extension work through "field demonstrations, publications, and otherwise," to be carried on in accordance with plans mutually agreed upon by the Secretary of Agriculture and the land-grant colleges receiving the benefits of the first Morrill Act.

In practical effect it undertakes to provide such machinery as will bring to the attention of the farmer, the farmer's wife and children, in the most striking manner, such demonstrated truths and practices of successful agriculture which, lived up to, make rural living desirable and profitable as an occupation. It provides the connecting link between the sources of information in matters relating to agricultural life and the people sought to be reached with such information, and furnishes an added agency to our system of agricultural teaching. It carries out to the farm the approved methods and practices of the agricultural colleges, experiment stations, the Department of Agriculture, and the best farmers, and demonstrates their value under the immediate environment of the farm itself, thus providing the means by which the organized agricultural institutions of the country may be made to serve all the people, as should be the case, rather than a limited and privileged few. Under the plan provided in this bill the information which has been accumulating for more than half a century and reservoiring in our colleges and other institutions organized in the interest of agriculture is to be made available to the mass of the people in such fashion as will bring the best results in the matter of improved rural conditions and rural living.

There is no more important work for the agriculture institutions of the country than that of strengthening field service, demonstration, and instruction, to the end that the promotion and development side of agriculture shall balance its investigational and research activities. To provide adequate facilities for the utilization by the farmer of the efficient work of the scientists in the Department of Agriculture and in the various colleges and experiment stations of the several States is one of the very important problems with which agricultural thought must deal. Earnest scientists every day are discovering useful truths, methods, and processes which, if known by the farmer and applied by him, would mean financial independence and social progress; but the farmer does not know what the scientist is doing and has no way of learning of his discoveries. Sufficient information has been gathered and is awaiting distribution to revolutionize rural conditions in this country in the next 10 years, but it is dead information until it becomes

vitalized by the service to which the farmer puts it.

The passage of the first Morrill Act, for the endowment and maintenance of at least one agricultural college in each State, committed the Federal Government emphatically and irrevocably to a policy of appropriating money to aid in acquiring and diffusing among the people of the United States useful information on subjects connected with agriculture.

mation on subjects connected with agriculture.

The first serious national effort to teach agriculture in a practical way was followed by legislation providing for the establishment of agricultural experiment stations in the several States, the creation of the Federal Department of Agriculture, and other enactments for collecting agricultural truths, to be made available to the farmer through such colleges and other agencies as were found suitable for the purpose.

Approximately \$70,000,000 have been expended by the Federal Government in the maintenance of the State experiment stations and agricultural colleges in the last 50 years, and the annual appropriation for the Department of Agriculture reaches a sum of more than \$20,000,000. These expenditures have resulted in the accumulation of a vast amount of agricultural information, which, made available to the farmer and applied by him, would work a marvelous reformation in the economic and social con-

dition of every rural community of the country. The past policy of the Government has confined itself largely to the gathering of information for the farmer. No one questions the wisdom of such a course, but it must be conceded that, if it has been wise to gather information for the use of the farmer, it would now be unwise to deny him that use. Every student and economist agrees that the efficient work of the colleges, stations, and Agricultural Department must be taken out to the farmer, and the most important and pressing problem at this time is that of finding the most effective machinery for doing this. The proposition of linking up the man on the farm with the demonstrated practices of successful agriculture must be met.

Various agencies have been tried as a connecting link, with various degrees of success. The printed page is insufficient. The bulletin and agriculture press have not been found effective in reaching and impressing the farmer in the remote districts, who most needs the information. The late Dr. Seaman A. Knapp, founder of the demonstration work in this country, said:

There is much knowledge applicable and helpful to husbandry that is annually worked out and made available for the scientists in the United States Department of Agriculture and in the State experiment stations and by individual farmers upon their farms which is sufficient to readjust agriculture and place it upon a basis of greater profit, to reconstruct the rural home, and to give to country life an attraction, a dignity, and a potential influence it has never received. This body of knowledge can not be conveyed and delivered by a written message to the people in such a way that they will accept and adopt it. This can only be done by personal appeal and ocular demonstration.

His judgment was correct, and to meet the deficiency of the bulletin and agriculture press in impressing the farmer there arose the system of undertaking to do this by means of the lecture-institute work, as the bulletin and lecture has its place in the extension field, but the best thought of the country has concluded that the characteristic attitude of the farmer is such as to make the development of some other system of reaching him with the best practice of agriculture a pressing necessity.

The farmer is naturally conservative, and to an extent skeptical of new methods. His habits of thought and methods of procedure are well settled upon him, and he is slow to change either unless convinced beyond any doubt of the wisdom of

doing so.

The fundamental idea of the system of demonstration, or itinerant teaching, presupposes the personal contact of the teacher with the person being taught, the participation of the pupil in the actual demonstration of the lesson being taught, and the success of the method proposed. In this country it is to an extent a new method of teaching, but in the Old World the same system has been so preeminently successful as to become a fixed and recognized method of carrying the truths of agriculture and home economics to the door of the farmer. It is a system which frees the pupil from the slavishness of the textbooks, which makes the field, the garden, the orchard, and even the parlor and kitchen the classrooms. It teaches to "learn to do by doing." As President Wilson said:

It constitutes the kind of work which it seems to me is the only kind which generates real education; that is to say, the demonstrative process and the personal touch of the man who does the demonstrating.

This method of teaching is in operation in practically every civilized country in Europe—the British Empire, Austria, Denmark, France, Holland, Germany, Russia, and Belgium—and it is significant, as pointed out by authorities in agriculture, that the farmers in Europe are producing two and one-half to three times as much per acre as the American farmer, and this in the face of the fact that European land has been under cultivation for many centuries and were perhaps originally not so fertile as ours.

The theory of this bill is to put in practice this system of itinerant teaching, the State always to measure the relative importance of the different lines of activity to be pursued and to determine upon the most important to the entire country by providing for at least one trained demonstrator or itinerant teacher for each agricultural county, who in the very nature of things must give leadership and direction along all lines of rural activity—social, economic, and financial. This teacher or agent will become the instrumentality through which the colleges, stations, and Department of Agriculture will speak to those for whom they were organized to serve with respect to all lines of work engaged in by them.

The committee, from the facts before it, concludes without hesitation that production can be many times increased through the machinery provided in this bill, but the committee does not believe that Congress can afford to appropriate money for the sole purpose of teaching the farmer the best methods of increasing production. To teach the farmers the best methods of increasing production is exceedingly important, but not more vitally so than is the importance of teaching him the best and most economical methods of distribution. It is not enough to

teach him how to grow bigger crops. He must be taught how to get the true value for these bigger crops, else Congress will be put in the attitude of regarding the work of the farmer as a kind of philanthropy. The itinerant teacher or demonstrator will be expected to give as much thought to the economic side of agriculture—the marketing, standardizing, and grading of farm products—as he gives to the matter of larger acreage yields. He is to assume leadership in every movement, whatever it may be, the aim of which is better farming, better living, more happiness, more education, and better citizenship.

The fundamental purposes of this bill have received the most emphatic indorsement of agricultural thinkers of the country, the rural press, influential business organizations, and agricultural and labor organizations. President O. W. Thompson, of the University of Ohio, and chairman of the executive committee of the Association of Agricultural Colleges and Experiment Stations, in his statement before the committee most heartily approves the purposes and principles of the bill, as did Director E. H. Jenkins, of the Connecticut Experiment Station, and president of the Association of Experiment Stations. The bill was most heartily commended by Mr. Arthur E. Holder, legislative committeeman of the American Federation of Labor.

In my own State of Indiana it has the indorsement of the

In my own State of Indiana it has the indorsement of the Indiana Live Stock Breeders' Association, the Indiana Corn Growers' Association, the State Grange Association, as well as a

large number of individual farmers.

Section 1 authorizes the inauguration of agricultural extension work in each State in connection with its land-grant college or colleges, in cooperation with the United States Department of Agriculture, and gives to the legislature of each State the authority to designate which of the college or colleges receiving the benefits of the act approved July 2, 1862, and known as the first Morrill Act, shall administer the funds appropriated by this bill.

Section 2 defines the character of the work to be undertaken as consisting in the giving of instruction and practical demonstrations in agriculture and home economics to persons not resident in the several colleges through field demonstration, publications, and otherwise. This work is to be carried on upon plans mutually agreed upon by the Secretary of Agriculture and the several land-grant colleges.

Section 3 is the appropriating section of the bill and provides the sum of \$480,000 for each year, \$10,000 to be paid annually to each State which by the action of its legislature assents to the provisions of this act. This is a straight, unconditional appropriation to the several States. The additional sum of \$300,000 is appropriated for the fiscal year following that in which the foregoing appropriation first becomes available, and for each year thereafter for nine years the sum exceeding by \$300,000 the sum appropriated for each preceding year, and for each year thereafter there is permanently provided the additional sum of \$3,000,000 for each year, making a total appropriation for the tenth year of the life of the act and thereafter annually of \$3,480,000.

The additional appropriations-this sum of \$3,000,000 annually-are to be allotted to the several States in the proportion which their rural population bears to the total population of the United States as determined by the next preceding Federal census. The Census Bureau defines as "urban population" that residing in cities and other incorporated places of 2,500 inhabitants or more, including the New England towns of that population. Provision is also made that no payment out of the additional appropriations shall be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State or provided by State, county, or local authority for the maintenance of the work provided in the bill, the idea being that some authority other than Federal authority must provide a sum equal to the additional appropriations made by the Federal Government. To illustrate: The allotment of a given State might be \$50,000 which the State would receive if it should duplicate this amount; but it might happen that the State would desire to appropriate for such a purpose only \$25,000, and under the provisions of the bill would therefore be entitled to only \$25,000 of the Federal funds in addition to the \$10,000 which is appropriated unconditionally. In requiring the States to duplicate the amount of the Federal appropriation the bill is undertaking to encourage them to greater activity along lines of demonstration work.

Mr. Speaker, I sincerely hope this bill will pass without a dissenting vote. I know it means much not only to the American farmer but to the entire country. Our agriculturists are entitled to this legislation. Let us give it to them, to the end that they may make their farms more productive and farm life

more attractive.

Mr. FITZGERALD. Mr. Speaker, the reason assigned from time to time for the entry by the Federal Government upon certain fields of work has been that the Federal Government possesses facilities for making investigations and obtaining information that are not possessed by any of the States, and which can not profitably be exercised by any of the States. Becognizing that fact, the Congress from time to time has appropriated money and authorized the extension of the activities of the Federal Government in many lines in which it otherwise would not be permitted to engage in order to promote agri-culture and the dissemination of information regarding it among the people. Congress by several acts has provided for the aiding of agricultural colleges, and at least \$2,000,000 annually is expended out of the Federal Treasury to aid agricultural colleges in the various States.

This bill proposes, however, to go further than has yet been proposed by the Federal Government. It is now claimed that the Federal Government has accumulated a vast amount of information of very great value to the agricultural communities of the country, which, if properly given to those engaged in agriculture, would result beneficially. To persuade the States to make the appropriations necessary to place this information at the disposal of those of their citizens who are engaged in agriculture it seems to be the opinion that it is necessary that there should be paid out of the Federal Treasury to the several States certain sums in the form of inducements, so that the States will discharge the duties which properly belong to them.

I am one of those, Mr. Speaker, who believe that questions relating to education along any particular line are questions of such vital importance to the States that that domain should not be encroached upon by the Federal Government. This bill proposes to appropriate \$480,000 at first; \$10,000 to be given to each of the States of the Union to engage in this extension work. Annually thereafter the appropriation is to be increased by the sum of \$300,000 until, at the expiration of 10 years, there is to be paid from the Federal Treasury \$3,480,000 annually to the States. These appropriations are to be apportioned among the States upon the condition that each State shall appropriate an equal sum to that to which it would be entitled under this bill, in addition to the \$10,000 which is carried the first year.

The Federal Government apparently has done its part. has collected the information, and it has been furnishing it to those engaged in agriculture by the various methods mentioned by the gentleman from South Carolina [Mr. Lever]—by bulletins, by lectures, by special circulars, by moving-picture demonstrations, in every conceivable way—until now it is proposed that employees of the Federal Government shall be sent out into the agricultural districts of the country and placed upon the farms of everyone engaged in agriculture, so as to demonstrate the most improved and best methods of agriculture.

Unquestionably it will be a benefit to those engaged in agriculture to have a man of scientific attainments come to his farm and, by practical demonstrations, show the best means to till and prepare the soil, to plant the crop, to cultivate it, and to harvest it. But is it not going quite far, Mr. Speaker, that there should be proposed a plan here by which an agent of the Federal Government shall be sent to every farm in the United States, not only to do for the farmer the things I have enumerated, but also to go into the farmer's household and there to demonstrate, for his wife or for the other female members of his family in charge of his household, the most practical and best methods of promoting domestic economy? If it be justifiable to do that for the farmer, why not send trained experts into the homes of the mechanics in the great industrial centers of the country? Why not send the trained nurses, as is now done by municipalities, into the homes of those engaged in lines of activity other than agriculture, in order to improve and to make better the conditions of that portion of the population not so fortunate, perhaps, as to be engaged in agriculture?

Mr. LEVER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from New York yield?

Mr. FITZGERALD. Yes.

Mr. LEVER. The gentleman understands, of course, that the House has just recently passed a resolution creating a com-mission to inquire after the very line of work he has just suggested, and in a measure has shown its interest in that direction?

Mr. FITZGERALD. Yes; I understand; and it is in my judgment wholly obnoxious to our theory of government, and would not, Mr. Speaker, have had the slightest chance of passing this House, instead of passing it practically without oppo-sition, were it not for the fact that Members of Congress are human and have just the same ambition to continue here as those who are not here have to get here.

But men who calmly study and familiarize themselves with our form of government

Mr. LEVER. Men who are inhuman-

Mr. FITZGERALD. Men who study the theory of our Government know that the whole scheme is contrary to the theory of the Government under which we live. I have no sympathy with such measures. I have not voted for them and

I do not propose to vote for them. Mr. Speaker, I might call the attention of gentlemen from the New England States to a feature of this bill discussed by the gentieman from Illinois [Mr. MADDEN]. The Census Bureau includes in the urban population the New England towns. The result is that the State of Massachusetts, which needs this scientific help more, perhaps, than any other State in the Union, as its once fruitful farms are now being abandoned because they are not sufficiently remunerative or productive to justify their cultivation, the State of Massachusetts with a population of 3,366,416, under the peculiar method adopted by the Census Bureau and followed by the Committee on Agriculture, will be credited with a rural population of only 241,000, and that State will be entitled to forty-nine one-hundredths of 1 per cent of the appropriations made in this way.

The State of New York, which maintains a magnificent agricultural college and is spending large sums in order to develop and to encourage the agriculture within its borders-a State containing one-tenth of the population of the United Stateswill, under this system of calculation, be entitled to 3.91 per cent of the appropriation. Some other States—

The SPEAKER. The time of the gentleman has expired. Mr. FITZGERALD. Mr. Speaker, I regret that a bill of this importance is brought up under such conditions for consideration as make it impossible to state fully the objections to it.

In order to show the great unanimity of feeling Mr. LEVER. on the floor of this House in favor of this bill, I yield to my

friend from Massachusetts [Mr. Treadway].

Mr. Treadway. Mr. Speaker, the district I represent is certainly one that can be described as rural, and if any section will be affected by the definition of "rural population," criticized by the gentleman from New York [Mr. FITZGERALD], mine will be. But I wish to record the fact that Massachusetts and western Massachusetts, which I represent, are heartily in favor of this legislation, whereby other sister States will be more greatly benefited than will our own State.

The gentleman from New York [Mr. FITZGERALD] has called attention to the discrimination made against the State of Massachusetts in this bill through our method of local government and division of communities into towns. I have made careful in-quiry of the distinguished chairman of the Committee on Agriculture [Mr. LEVER] about this feature, and also of those competent to judge of its effect. This discrimination does not arise through any intentional slight to Massachusetts or New England, but is an unfortunate circumstance over which the chairman of the committee has no control. The clause from which this discrimination arises appears on page 4 of the bill, and is as follows:

Such additional sums shall be used only for the purposes hereinbefore stated, and shall be allotted annually to each State by the Secretary of Agriculture and paid in the manner hereinbefore provided, in the proportion which the rural population of each State bears to the total rural population of all the States as determined by the next preceding Federal census.

Now, our local system of government is the cause of great variation in size of our towns, and the Census Bureau, for the purpose of convenience, defines rural population as places having less than 2,500 inhabitants and places with more than that as urban. There are within the limits of my own district eight towns with more than 2,500 in population, but having in its citizenship a very large percentage of persons connected with agricultural pursuits, who, were it not for this definition of rural population, could receive the benefits of the extension work intended by this act.

Some of our citizens have tried to suggest amended phraseology which would meet this situation, but it has been found, much to the regret of the chairman of the committee, Mr. LEVER, that such changes as would meet our needs would create unfair conditions in other sections of the country. We therefore are glad to forego the accruing benefit to our State and section, in order that rural populations of our sister States may receive additional benefits.

It is true, as stated by the gentleman from New York [Mr. FITZGERALD], that Massachusetts needs this scientific help and that many of our farms have in recent years been abandoned, but I desire to call his attention to the fact that the State itself realizes this need and appropriates \$50,000 annually for ex-

tension work, which is expended through our excellent agricultural college at Amherst, and in addition to this the State Board of Agriculture last year expended \$6,000 for similar work. We are not disposed to adopt a "dog-in-the-manger" policy and object to others securing their just due and needs even if we, ourselves, are less fortunate.

This discrimination is so much better explained than I can express it in an article published in the Springfield (Mass.) Republican of December 11 that I will quote the same in full:

express it in an article published in the Springfield (Mass.) Republican of December 11 that I will quote the same in full:

In some well-informed agricultural circles in this State there is criticism of the Lever agricultural extension bill which is pending in Congress. It is criticized because it takes such a large sum from this State and makes such a small return, and it secures this result upon what seems to be an unfair discrimination against certain farm interests. It is the purpose of the bill to appropriate a sum from the Treasury of the United States every year. It is to increase in amount year by year, but at the end of 10 years the total for one year is to be \$3,000,000, and that is to be the annual appropriation thereafter. Under the apportionment proposed in the bill the money is to be divided among the States on the basis of farming population, and only those places of less than 2,500 inhabitants each are to be reckoned in the basis. This would shut out from the calculation a large number of towns in the State which have a large amount of agricultural property and population. There seems to be no sufficient reason for making this discrimination against agricultural persons and property. Under the proposed distribution Massachusetts would get \$24,653, the way the friends of the bill have figured it out, while it has been computed, although there is no exact figuring possible, that Massachusetts will give about \$200,000 out of the \$3,000,000. The estimate of \$200,000 is reached by saying that \$100,000 would be contributed on the basis of total population. Then there must be considered the fact that Massachusetts is one of the wealthlest States and contributes much more to the National Government than is represented by its proportion of population. Indirect taxes fall heavier upon Massachusetts than upon the newer States. The new income tax, too, will get more out of this State than out of the new western States according to the population.

If this estimate of \$200,000 is correct, and it is held to

With this information before them a meeting of the committee on agriculture of the Western New England Chamber of Commerce was held in Springfield on December 29. I also quote the account of that meeting and its action from the same publica-

The committee on agriculture of the Western New England Chamber of Commerce met in the rooms of the Springfield Board of Trade yesterday to discuss the Lever bill and also the agricultural interests of western New England. Those present were: J. B. Taylor, of Burlington, Vt., secretary of the Greater Vermont Association; Dr. E. H. Jenkins, director of the experiment station at New Haven, Conn.; Prof. W. D. Hurd, director of the extension service of the Massachusetts Agricultural College, of Amherst; Emmet Hay Naylor, secretary of the Springfield Board of Trade, and also secretary of the Western New England Chamber of Commerce; and J. A. Scheuerle, secretary of the Hampden County Improvement League.

The committee after carefully discussing the report of a subcommittee that had investigated the Lever bill, with its bearings on New England agriculture, recommended that the constituent members of the Western New England Chamber of Commerce urge the Scantors and Representatives of the several States in New England to do ail in their power to secure the passage of the bill.

The Lever bill, if passed, will provide Federal aid for agricultural extension work to be carried on by the agricultural colleges of the several States in the Union, with the approval of the Secretary of Agriculture and the Secretary of the Treasury. This bill provides an annual appropriation of \$480,000, or \$10,000 for each State each year for the first year and every year thereafter. It also provides that \$300,000 be added annually for each fiscal year following until the total appropriation shall reach the sum of \$3,000,000. This additional appropriation will be apportioned to the different States according to the relation each State bears to the entire United States in point of the number of rural population.

each State bears to the entire United States in point of the number of rural population.

This bill is of especial interest to those living in Hampden County, as the agricultural work done by the Hampden County Improvement League through its advisers and the support of the Massachusetts Agricultural College extension service, has already given such large results that it is felt that the Government could spend no money that would be more effective than that provided by the Lever bill.

The \$300,000 yearly appropriations are paid to the several States in the proportion the rural population of the State bears to the rural population of all the States, and Dr. Jenkins, of Yale, in connection with this has prepared some very interesting figures. The total rural population of the United States is 49,348,883, and the total rural population of New England is 1,097,336. Under this apportionment plan the share of each of the New England States in the \$300,000 appropriation would be as given below. New England's share, if the fund were divided on the basis of the number of farms, is also given.

	Basis of rural pop- ulation.	Basis of number of farms.
Maine New Hampshire. Vermont Massachusetts Rhode Island Connecticut.	\$2,194 1,067 1,137 1,465 109 699	\$2, 828 1, 273 1, 542 1, 728 246 1, 251
Total	6,671	8,868

"Urban population," as used in the census, is given a very different meaning in the case of the New England States from what is given it in the case of other States, and Prof. Jenkins believes this works to the disadvantage of this section in the allotment of the extension fund. The Census Bureau, he says, for purposes of discussion, has defined urban population generally as that residing in cities and other incorporated places of 2,500 inhabitants or more. In the New England States, in addition to cities having this population, all towns having a population of 2,500 or more have also been classed as urban, without regard to the population of the villages (whether incorporated or not) which they may contain. The result is that the "urban areas" in New England include some population which in other sections of the United States would be segregated as "rural." This departure from the general rule, rendered necessary by local conditions in New England, probably makes no great change in the proportions of urban and rural population in those sections where population is dense and generally devoted to manufacturing. Obviously, says Prof. Jenkins, in all our New England States there are many towns of over 2,500 inhabitants where the population is classed as "urban" in the census which are yet essentially rural and are farming communities. Many of these farmers are living in isolated places, and certainly are as much in need of the services of the extension department as if the total population were under 2,500. There are at least 24 such distinctively agricultural towns in Connecticut, with populations ranging from 2,537 to 6,047, with two exceptions less than 4,000 inhabitants.

My friend, the gentleman from Pennsylvania [Mr. Moore],

My friend, the gentleman from Pennsylvania [Mr. MOORE], said that the city population supports the country. I beg to differ with him on this point and reverse that statement by saying that we of the country support the city. No portion of our citizenship is more deserving of such material benefits as it receives as a result of its labor, nor is any portion of it less liable to be overpaid for its labors than is the tiller of the soil and the members of his family. They are the real producers, not only of the product of the soil but of a high standard of mental and physical development. I hope some day to have the opportunity of taking him into the farming community of my district that I may convince him that it is from such sturdy manhood and womanhood that the true support of the entire country comes.

We hope that after the Lever bill becomes a law and is put into practical operation some method of amendment will be found whereby Massachusetts and other States will be placed on a parity with her sister States, and in accomplishing this I am confident we will have the support and cooperation of the proposer and friends of this bill.

We anticipate ultimate amendments, but until that is possible we wish it speedy passage and give it our hearty support. That I do not speak for myself alone, but represent the feeling of the people who will be directly affected, I would say I have been asked to support this bill by the president of one of the agricultural societies in my district; by the president of the Hampden County Improvement League, which has made a careful study of the bill and is devoted to rural developments and improvements; and by the director of the extension service of the Massachusetts Agricultural College, of Amherst—cer-tainly as representative men as could be selected to voice the sentiment of the agricultural section of Massachusetts.

Mr. LEVER. I yield to the gentleman from Alabama [Mr. Underwood]. [Applause.]

Mr. UNDERWOOD. Mr. Speaker, I listened with much interest to the argument that has just been made by my friend from New York [Mr. FITZGERALD]. That argument might well apply to the establishment of an agricultural department. That Agricultural Department has been established for many years. It has done a great and a useful work. The only difficulty with that work is that up to this time it has been largely scientific work that has not gone to the farm.

The real purpose of this bill is to supplement or add to the work that the Agricultural Department has already done and carry it, by farm demonstration, into the rural districts. It is impossible for a large number of farmers to profit by the splendid work that the Agricultural Department has done simply by reading bulletins or having the information conveyed to them in printed pamphlets. In order that the people of the United States may receive the full benefit of this work you must carry it to the farm by a man who knows the work himself and can demonstrate it.

This bill may not be perfect. Few bills that pass Congress are. If I had my way I would probably amend it in some respects, but I have long ago found out that in this Congress we can not any of us pass a bill with which we agree entirely. All the great bills that go through here must go through as a matter of compromise.

This bill drives directly at the purpose to be attained. purpose is to carry this scientific work of the Agricultural Department to the farm, and no better appropriation, in my judgment, can be made at this time. [Applause.]

Mr. LEVER. Mr. Speaker, I yield to the gentleman from

Mr. LEVER. Mr. Speaker, Michigan [Mr. McLaughlin].

Mr. McLAUGHLIN. Mr. Speaker, this bill provides for practical work. It provides for the taking out to the people in such form that they can understand and make practical use of it, the results of the work of the Department of Agriculture and the agricultural colleges in the country, many of which were established and are in part maintained by aid from the Federal Government. The question involved in this bill, the desirability of making an appropriation of this kind, has for some time attracted the attention of the Committee on Agricul-It was urged upon our consideration at a time when all its members were not favorable to the idea, and at a time when some of the active, prominent officials of the Department of Agriculture themselves were not altogether favorable to it. We are able to say now, though, that the Committee on Agriculture has reported the bill unanimously.

The SPEAKER. The time of the gentleman has expired. Mr. McLAUGHLIN. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LEVER. I yield to the gentleman from North Dakota [Mr. Young].

Mr. YOUNG of North Dakota. Mr. Speaker. I like the spirit manifested by the gentleman from Massachusetts [Mr. Tread-way] in his speech. "No man liveth unto himself." This is also true of cities and States. These gentlemen from the large cities who have opposed the passage of this bill will live to see the benefits which will through it come to the farming districts float back to the cities.

This is an epoch-making measure. It provides for teaching agriculture on all the farms of the Nation. It enlarges the work of the colleges; in fact, it makes every farm a classroom. It unlocks and makes available to those who till the soil a wealth of information procured by the Government at an expense of millions upon millions. It means genuine vocational education for the farmers. Best of all, it brings technical and practical agricultural knowledge to the adults, the men and women who either consider themselves too old or are prevented by circumstances from attending agricultural colleges. These men and women of my State, and I presume elsewhere, are eager to learn the new methods of farming and anxious to cooperate with the field demonstrators or teachers

Is the system provided for in this bill workable? Fortunately we are not left to the realms of speculation. A rich fund of experience has been accumulated from different places where it has been tried out. Of these the most complete demonstration of the system proposed in this bill is found in North Dakota, where the Better Farming Association has been operating during the years 1912 and 1913. This association was organized by a group of far-seeing and public-spirited men who realized the need of introducing better methods of farming. They have given freely of their time and money to finance the association's work. They exercised great care in the selection of a man to direct its activities and finally chose Prof. Thomas P. Cooper, of the University of Minnesota College of Agriculture. Under his leadership the association has made a truly wonderful showing.

Anticipating the action of Congress, President Worst, of our agricultural college, always abreast of the times, arranged to have the college take over the work of the Better Farming Association on January 1. I favored that change and am now in favor of the enactment of this bill, because it will give permanence to the great extension work begun in our State, and it will give uniformity to such work throughout the Nation.

One of the greatest measures enacted during the nineteenth the of the greatest measures enacted during the innecessing the century had to do with land, the great reclamation act. When the history of another period of 100 years shall have been written the Lever gricultural education bill will be reckoned as among the greatest pieces of constructive legislation of this century.

I have just received the annual report for 1913 from Prof. Thomas P. Cooper. It covers the second year's work of the North Dakota Better Farming Association.

The association spent \$62,500 during the year, contributed partly by the cooperating countries and partly by subscription. In an ordinary educational proposition that sum would only pay for part of the cost of the construction of buildings. Under this scheme no buildings are needed. The instruction is given under the shining dome of heaven. Dollars spent under this system will go further and accomplish more than any other money spent by the Government. Here in brief are the results of \$62,500 spent in 17 counties of North Dakota last year:

Field instructors employed, all college graduates and thoroughly 25 5, 105 44, 612

Constructed in districts where employed. do.

This is a wareful of which our Stefe is proud. Other pounds__ bushels__ $\frac{106}{180}$ number 17,000

This is a record of which our State is proud. Other States can do the same under the provisions of this bill introduced by the distinguished chairman of the Committee on Agriculture, Mr. Lever. I congratulate him and predict that his name will find a place among those who make the history of the twentieth

century.

Mr. LEVER. I yield, Mr. Speaker, one-quarter of a minute to the gentleman from Indiana [Mr. Cullor].

Mr. Cullop. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record.

The Speaker The gentleman from Indiana asks unani-

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I have not objected to the extension of remarks, but if there are any more yieldings of a quarter of a minute I shall object, because it makes a farce of the proceedings of the House.

Mr. LEVER. There are two or three more Members, Mr.

Speaker, who desire to make remarks.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LANGLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. BLACKMON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. SABATH. Mr. Speaker, I make the same request

The SPEAKER. The gentleman from Alabama [Mr. Black-MON] and the gentleman from Illinois [Mr. Sabath] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent to

extend my remarks in the RECORD.

Mr. WILSON of Florida. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from Kentucky [Mr. Bark-LEY] and the gentleman from Florida [Mr. Wilson] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

Mr. Roderts of Massachusetts, Mr. Hill, Mr. Seldomridge, Mr. Stephens of Mississippi, and Mr. Peterson asked unanimous consent to extend remarks in the RECORD.

The gentleman from Massachusetts [Mr. The SPEAKER. Roberts], the gentleman from Illinois [Mr. Hill], the gentleman from Colorado [Mr. Seldomridge], the gentleman from Mississippi [Mr. Stephens], and the gentleman from Indiana [Mr. Peterson] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

Mr. MANN. I object.

The SPEAKER. The question is on suspending the rules and passing the bill H. R. 7951, with the matter read into it

The question was taken; and on a division (demanded by Mr.

MANN) there were 177 ayes and 9 noes.

So, two-thirds having voted in favor thereof, the rules were suspended, and the bill was passed.

CORBETT TUNNEL.

Mr. STEPHENS of Mississippi. Mr. Speaker, I move to suspend the rules and pass Senate joint resolution 74.

The SPEAKER. The gentleman from Mississippi moves to

suspend the rules and pass Senate joint resolution 74, which the Clerk will report.

The Clerk read as follows:

Joint resolution (S. J. Res. 74) appropriating money for the payment of certain claims on account of labor, supplies, materials, and cash furnished in the construction of the Corbett Tunnel.

certain claims on account of labor, supplies, materials, and cash furnished in the construction of the Corbett Tunnel.

Resolved, etc., That there be, and is hereby, appropriated, out of any moneys in the reclamation fund in the Treasury supplemental and additional to the appropriation made in public resolution No. 56, Sixty-second Congress, the sum of \$15,750, or so much thereof as may be necessary, for the payment of and to be paid to those persons who have presented claims remaining unpaid on account of labor, supplies, materials, or cash furnished to the contractor or the subcontractor and used in the construction of the Corbett Tunnel, including the spillway connected therewith, as a part of the Shoshone irrigation project, in the State of Wyoming, under any contract or contracts let for that purpose by the Government of the United States; and the Secretary of the Interior is hereby authorized and directed to forthwith, and as soon as may be, investigate, hear evidence about, determine, and declare the several amounts due and remaining unpaid, if any, on account thereof, and to whom so due, and to certify the amounts due to the Secretary of the Treasury, who is hereby authorized to pay the several amounts so ascertained to the persons entitled to the same: Provided, That no such claim not now filed shall be considered: And provided further, That the Secretary of the Interior shall deduct from the amounts to be certified for payment hereunder and under the said resolution No. 56, Sixty-second Congress, to each claimant a proportionate sum to cover the expense of and fair compensation for the person or persons through whose time and services this matter has been laid before Congress, except such claimants as have agreed with such person or persons for compensation; and such deductions shall be certified for payment to such person or persons in like manner as other claims.

The SPEAKER. Is a second demanded?

Mr. MANN. I demand a second.

Mr. STEPHENS of Mississippi. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Mississippi asks unani-

mous consent that a second be considered as ordered. Is there objection?

There was no objection.

The gentleman from Mississippi [Mr. The SPEAKER. STEPHENS] has 20 minutes and the gentleman from Illinois [Mr. MANN] has 20 minutes.

Mr. STEPHENS of Mississippi. Mr. Speaker, this resolution comes before the House with a unanimous report from the Committee on Claims. It is not a new matter to many Members of this body. A bill relating to this same subject was before the last Congress. It passed both the House and the Senate and went to the President and was vetoed. The Senate passed the bill over the President's veto, and it only lacked, as I recall, the resident's veto, and it only lacked, as I recan, as or 4 votes of passing the House over the veto. At a later day, the measure came again before Congress, and the bill was passed, providing for a payment of \$42,000. This bill provides for the payment of an additional \$15,000.

Some years ago the Government entered into a contract with

one Charles Speer to construct the Corbett Tunnel at a part of the Shoshone irrigation project, State of Wyoming. Speer sublet the contract to the Western Construction Co. The contract price for that work was \$594,000. The Government required the contractor to enter into a bond in the sum of \$75,000. After performing about 16 per cent of the work the contractor decided that he did not care to pursue his contract further and abandoned the work. The Government took over the contract to finish the work at an additional expense of \$200,000 over and above the contract price. In the meantime, before the contractor abandoned his work, various parties had furnished labor, material, and supplies to him, and they were not paid for these things, and that causes this matter to be before this body at this time.

Mr. Speaker, the reason why the parties are before Congress again asking for relief is simply this; Certain parties had filed their claims amounting to about \$42,000. Other parties with claims against the contractor failed to file their claims. Government had no notice that these claims were outstanding, so far as we know. At least, no provision was made for them. When this \$42,000 was available, which was to pay claims that had been or might be presented, these other parties came in and filed their claims in the amount of \$15,000 additional. Secretary of the Interior put the matter up to the Attorney and he stated that under the provisions of the act appropriating the \$42,000 the money could not be prorated; that nothing could be paid out until further provision was made. So a bill was introduced, the resolution that is now under consideration, providing for the appropriation of an additional \$15,000 to pay these parties who had not filed their claims prior to the passage of the former act.

Mr. Speaker, it occurs to my mind that this is a meritorious measure, because, as I said in the beginning, the contract price was almost \$600,000. The bond was in the sum of \$75,000, a bond taken according to the law in such case. That law says that the bond shall be given with good and sufficient securities. with additional obligations that such contractor or contractors shall promptly make payments to all persons supplying him or them labor and material in the prosecution of the work provided for in such contract.

The position of the Committee on Claims is simply this: This bond was insufficient; it was not adequate; it was not large enough to properly safeguard the rights of these men who had supplied labor and material. About the time this contract was made the law was changed. Let me say now that these parties were not informed as to the change, and they presumed that they were acting under the original law. Under the law at that time the supply men and the materialmen had a right to go to the Government and ask permission, and it should be granted to them, to bring suit on the bonds. But shortly before this contract was entered into the law was changed, simply giving them the right to intervene when the Government brought suit to collect its own debts. It was provided further that the claims of materialmen should be subject to the priority of the claim and judgment of the United States. We thought this—that the bond was insufficient, that it ought to be large enough to provide for any contingencies. If a sufficient bond had been taken, then these parties would not have lost their money; and let me remark further, that some of the material and supplies furnished by those parties were actually on the grounds and unused at the time the Government took over this contract and these metaviole and conditions and the contract and these metaviole and conditions are the contract. this contract, and these materials and supplies were used by the Government in carrying forward the work.

For a more complete statement of the case I will insert the

report of the committee that was drafted by me.

For a more complete statement of the case I will insert the report of the committee that was drafted by me.

The Committee on Claims, to whom was referred the joint resolution (S. J. Res. No. 74) appropriating money for the payment of certain claims on account of labor, material, and cash furnished in the construction of the Corbett Tunnel, having considered the same, report thereon with a recommendation that it do pass.

The resolution under consideration provides for an appropriation, to be paid out of the reclamation fund, of \$15,750, or so much thereof as may be necessary, for the payment of claims on account of labor, supplies, material, or cash furnished to the contractor or subcontractor and used in the construction of the Corbett Tunnel, including the spiilway connected therewith, as a part of the Shoshone Irrigation project in the State of Wyoming, under any contract or contracts let for that purpose by the Government of the United States. It authorizes the Secretary of the Interior to investigate and determine the amounts due and unpaid.

During the Sixty-second Congress public resolution No. 56, which was in the following language, was passed:

"Resolved, etc., That there be, and is hereby, appropriated, out of any moneys in the reclamation fund in the Treasury, the sum of \$42,000, or so much thereof as may be necessary, for the payment of labor, supplies, materials, or cash furnished to the contractor or subcontractor and used in the construction of the Corbett Tunnel, as a part of the Shoshone irrigation project, in the State of Wyoming, under any contract or contracts let for that purpose by the Government of the United States; and the Secretary of the Interior is hereby authorized and directed to forthwith, and as soon as may be, investigate, hear evidence about, determine, and declare the several amounts due and remaining unpaid, if any, on account thereof, and to whom so due, and to certify the amounts due to the Secretary of the Treasury, who is hereby authorized to pay the several amounts so

The Government entered into a contract with Charles Spear to construct the Corbett Tunnel as a part of the Shoshone irrigation project in the State of Wyoming. The contract price for the work was \$594,000. Spear sublet the work to the Western Construction Co. The contract was made in October, 1905. After doing about 16 percent of the work the contractor, because of his inability to complete it, was forced to abandon the work.

In August, 1906, the Secretary of the Interior authorized the formal suspension of the contract and instructed the supervising engineer to take up the work and complete it. This was done at a cost of about 30 me of the claimants under this bill furnished material and supplies to the subcontractor for use in his work. Others took over the time checks issued to the laborers employed by the company, and they have not been able to collect the amounts due them.

It is well to remark that some of the material and supplies were on hand at the time the Government took over the work, and that such material and supplies were used by it in completing the tunnel. These supplies and material were furnished and the time checks accepted under the belief that the parties were amply protected by the fact that this was work for the Government, and that under the law they had the right to proceed against the bond of the contractor, if it was necessary to do so in order to collect their and that under the law they had the right to proceed against the bond of the contractor, if it was necessary to do so in order to collect their debts.

The act of August 13, 1894, provided—

The act of Au

I do not believe that these claimants should be made to suffer because of the act of the Government in failing to require good and sufficient bond of the contractor. The law contemplates a bond large enough to protect both the Government and those who furnish material, supplies, and labor. These people had no way to protect themselves; but, under the law in reference to requiring this bond, they had reason to believe that the Government officials would comply with the law and amply protect all their rights.

Mr. MANN. Mr. Speaker, this matter has been before Congress on several occasions. It comes now from the Committee on Claims. I think the Committee on Claims has been im-posed upon. The bill heretofore was not before that committee, if I remember correctly. The Committee on Irrigation reported the bill in the last Congress, although I am not certain. There never was any legal liability on the part of the Government, and there never was any moral liability on the part of the Government, but we were told that under the peculiar circumstances of the case, the Government having received the benefit of the work which was done, we ought to pay for these supplies, because the people who furnished them were poor and could not afford the loss; and we were especially appealed to in behalf of a very pleasant and sincere woman, Mrs. Mc-Donald, who came here lobbying for the bill, stating that her house or store had furnished a large share of these supplies on orders which could not be cashed because of the failure of the contractor, and that it meant the loss of all of the property which she and her husband owned. The bill passed, having been vetoed once. The gentleman from Oklahoma [Mr. Ferris] vigorously opposed it at one time and stopped it because it proposed to make the payment out of the reclamation fund. Finally it was passed, as I say, for the sum of \$42,000, I think, it being stated that that would be in full. No portion of that money has yet been paid to the claimants, as I understand, and that was a settlement, so far as Congress was concerned. They now come in with a proposition to pay \$15,000 more, and do what? Not merely to pay out of the \$15,000 attorneys' fees, but to take out of the \$42,000 which has already

been appropriated attorneys' fees to pay the people who have lobbied the claims through Congress.

It is the first time in my experience in this House of a great many years when it is proposed deliberately by an act of Congress to take money away from the claimant and force the claimant to pay an attorney whom he had not employed. There is no pretense here that these people have employed Mrs. McDonald or some one else, but the proposition here is that people having money due to them shall have it taken away from them by the Government and paid to somebody else. A more monstrous proposition was never presented to a legislative body, in my opinion. I do not think that Congress or the House ought to agree to such a thing, and therefore I hope the bill will not be passed. I reserve the balance of my time.

The SPEAKER. The gentleman from Illinois reserves the

balance of his time.

Mr. MANN.

Mr. MANN. How much time did I consume?
The SPEAKER. Three minutes.
Mr. STEPHENS of Mississippi. I would like for the gentle-

man from Illinois to yield some more time.

Mr. MANN. I yield five minutes to the gentleman from Mississippi [Mr. Sisson].

Mr. Sisson].

Mr. Sisson. Mr. Speaker, as was stated by the gentleman from Illinois [Mr. Mann], this matter has been before the House several times. I opposed it before, and the matter was the feated one time, and then I presume through sympathy or for defeated one time, and then, I presume through sympathy or for some reason satisfactory to Members, it finally passed the House and was vetoed. Now, the principle of this bill, I think, is all wrong. A bond was taken by the Government for \$75,000 which it is contended, was entirely too small. The Government attorneys in investigating the matter compromised the bond, as I I have endeavored to get the record, but I have not recall it. been able to do so. But the bond was compromised for about \$45,000. Now, the Government got that sum. When the bill passed before, I agreed with a Senator who was interested in the matter that I was willing to withdraw my objection, provided the claimants got from the Government what the Government got out of the bond. The Government is in no wise responsible, as no sovereign State has been responsible, for the failure on the part of a contractor to comply with the contract and then pay out of the Treasury the labor and material men for their liens. But in addition to all of that, as was stated by the gentleman from Illinois, it was thoroughly understood at the time that bill passed and when we permitted it to pass before it was thoroughly understood that that \$42,000 carried what would be all that would be asked for and would be in final settlement of all claims against the Government.

No statement was ever made in better faith and it was accepted in good faith, because the amount paid out would be just about the amount which the Government had obtained on the bond, and I was willing that the labor liens and material men on the contract should be paid out of that fund, because the bond really is for that purpose. I do not know whether the Government received consideration for the money it paid or not; I do not know whether the work done on this particular contract is worth the money which the Government expended or not; but I do know, however, that the Federal Government took the project in hand and completed it without the intervention of a contractor. How much it cost I can not at this time state, but when the project failed the Government then, through its engineers, took the project and completed it out of the Federal Treasury. Now, that being true, it seems to me that the Government is doing ample justice when it gives to those people all it got out of the bond, and when it does that the Government does not set a bad precedent and become liable for material

and labor liens,

Mr. COX. How much did the Government recover on this

Mr. SISSON. My recollection is about forty-odd thousand dollars. It was compromised. In other words, the investigation at that time showed that the Government compromised this bond because of the fact they could not make the money out of the bond, and they took all they thought they could possibly get with a lawsuit. Now, that money went into the Treasury, and I am willing now that these people shall take it, and that is what the Government thought before, and we let it go through with the distinct understanding that this should end the matter, and we understood at the time that this would do it; that it would relieve the situation. But who knows now when this \$15,000 additional is paid that this is going to be the last of it or not? And, as stated by the gentleman from Illinois, the President of the United States vetoed this bill because these claims are not legitimate demands upon the Treasury. If this bill should pass, the President would be fully justified in vetoing it. It is wicked as a precedent for the reason that the bill provides for attorneys' fees, with which Congress has and ought to have nothing to do. This should be a matter between the attorney and client. Every bill in the future would, of course, contain a like provision, and the committees of Congress would soon become a court of claims. If this was a legal claim against the Government the court would so decide, but the attorneys in this case know that the Government is not liable, and that is why they come here first.

But it is a mere gratuity. The Federal Government is not

liable either in law or in good morals for this claim.

The SPEAKER. The time of the gentleman from Mississippi has expired. The gentleman from Illinois [Mr. MANN] is recognized.

Mr. MANN. Mr. Speaker, I would like to have the gentleman from Mississippi [Mr. STEPHENS] use some of his time

Mr. STEPHENS of Mississippi, Mr. Speaker, I yield five

minutes to the gentleman from Wyoming [Mr. MONDELL].

The SPEAKER. The gentleman from Wyoming is recognized

for five minutes.

Mr. MONDELL. Mr. Speaker, I hope this bill will pass. do not altogether approve the provision contained in the bill under which parties who have spent their time and made earnest efforts in bringing this matter to the consideration of the Congress are to be paid, but as the matter is to be left in the hands of the Secretary of the Interior, and as he is familiar with the situation, I feel that the amounts which he would allow under the bill would be fair and reasonable, and I think all the bene-ficiaries under the bill, a number of whom I know personally and with a number of whom I have had correspondence, would be perfectly satisfied to have a small percentage of what is coming to them paid to Mrs. McDonald. I hope that percentage in the majority of those cases will be small.

Now, so far as the merits of the matter are concerned, they are certainly clear. Congress attempted to settle this claim. Unfortunately, we did not have full information in regard to it, and when the Secretary came to consider the claims that were made under the former legislation he found there were valid ones amounting to some \$15,000 over and above the amounts which had been appropriated by Congress. Those claims are largely owing to laborers, small subcontractors, and to others who did work on the Corbett Tunnel and spillway and other

appurtenances to the main tunnel.

We passed a bill some time ago under which we paid to a South Dakota bank a large sum of money in connection with reclamation work, and we heard no considerable criticism of that. This is a bill proposing to pay the men who actually did work, who familiable their considerable criticism of the consid work, who furnished their time, their teams, their tools, and who furnished hay and grain, who boarded the men who did the work. And if Congress was justified in paying the claim of a banking institution in South Dakota, it is certainly justified in paying these claims of men who did the work, of farmers who furnished material, and of the people who fed the men. I trust that the bill will pass

I yield back the balance of my time.

The SPEAKER. The gentleman from Wyoming has three minutes remaining.

Mr. MANN. Mr. Speaker, I yield five minutes to the gentle-

man from Wisconsin [Mr. Lenroot].

Mr. Lenroot. Mr. Speaker, I am opposed to this bill, principally because of the proviso relating to the payment of attorneys' or agents' claims. I am opposed to it not so much because it might not be meritorious in this particular case, although I well remember when the bill was before us before it was expressly stated that Mrs. McDonald had an individual claim of her own and that she was entirely satisfied that the others should have their relief, without compensation for the benefit that she herself would receive, but it creates a new precedent in the history of Congress, and to my mind a most dangerous one. What is the situation? John Doe presents a claim to the Congress of the United States for himself and others. He states to the Congress that those are all the claims of that nature. Congress passes them and creates a precedent for the passage of other claims. 'Time goes on and other claims are introduced with these claims that John Doe presented as a precedent, and this provision would authorize and make a precedent for every claim that Congress might pass in the future to take a portion of that claim and give to John Doe, although he had never earned a dollar of it, although he had never been retained by the beneficiaries of the claim, and although he had received full compensation, presumably, in the claims that he first presented to Congress.

I venture to say, Mr. Speaker, that you can find no precedent anywhere for this kind of a case, and I am satisfied if the com-

precedent which this would create, this proviso would not be found in the bill.

I yield back the balance of my time.

The SPEAKER pro tempore (Mr. Ferris). The gentlems from Wisconsin [Mr. Lenroot] has consumed three minutes. The gentleman

Mr. STEPHENS of Mississippi. Mr. Speaker, will not the gentleman from Illinois use the balance of his time? There will be only one more speech on this side.

Mr. MANN. Mr. Speaker, I yield two minutes to the gentle-

man from Minnesota [Mr. SMITH].

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. SMITH] is recognized for two minutes.

Mr. SMITH of Minnesota. Mr. Speaker, the amount involved in this claim is not large, but the principle is far-reaching. Irrespective of the merits of this claim, I do not think Congress ought to go on record as authorizing the reduction from a claim of the charges made by an attorney or an agent. If you establish such a precedent, there is no doubt that hereafter we shall have men traveling up and down this counmaking it their business to look up outlawed and stale claims against the Government.

It is admitted here that this claim has no legal standing. is simply a matter of grace. We are asked to grant this claim. without its being a lawful claim against the United States. Why can not hundreds of such claims be brought up hereafter, especially when you are placing a premium on bringing to Con-

gress just this sort of claims?

You passed a bill in the Sixty-second Congress allowing \$42,000, and now you are holding up the \$42,000 until you get another law passed authorizing the Secretary of the Interior to deduct from the \$42,000 the expense of bringing the original claim to Congress and presenting the facts.

I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman has used his

wo minutes. He has no time to yield back.

Mr. MANN. Mr. Speaker, I yield three minutes to the gentleman from Indiana [Mr. Cox].

The SPEAKER pro tempore. The gentleman from Indiana

[Mr. Cox] is recognized for three minutes.

Mr. COX. Mr. Speaker, I am opposed to this bill. After reading it and after the report, I do not believe it has any merit in it. I do not believe that it is bottomed upon any financial or moral consideration whatever. I think it ought to be defeated, not so much because of the amount involved in it, as has been stated by others on the floor of this House, as on account of the

principle involved in it.

It has already been adjudicated and allowed, so far as Congress is concerned, at a former Congress. It has been vetoed by the President of the United States. Congress in a measure solemnly pledged heretofore that \$42,000 or \$45,000 would settle and adjust the entire matter, but inasmuch as the President vetoed it, an opening was presented for more claims to be brought in here, and now it comes before us as a different proposition. Other claims apparently have been found, amounting to \$15,000, and it is argued and set forth in the report that because Congress allowed \$42,000 or \$45,000, that is a reason why the amount set forth in this bill, or \$15,000 additional. should be allowed.

Mr. MONDELL. Mr. Speaker, will the gentleman yield? The SPEAKER pro tempore. Does the gentleman yield? Mr. COX. I must decline to yield. I have only the I have only three minutes.

No one has contended for a moment that the Government was to blame in the first instance; at least I never heard any argument presented on that ground when the bill went through before, and I have not heard any presented on that ground at this time. If the Government was not to blame in any particular so far as this transaction is concerned, upon what ground, upon what basis, upon what theory do we propose to appropriate this money? Simply because the Treasury of the United States has got it. That is all.

Have we got a right-moral, financial, or political-to reach our arms into the Treasury of the United States and pay a claim-I care not whether it be for \$1 or \$15,000 or \$15,000,000unless it is based upon an honest, candid, conscientious, meritorious consideration?

This bill ought to be defeated because it has no basis on which to stand, morally or financially. It has no considera-tion upon which it stands. It ought to be defeated, because it comes here

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. COX. I can not, because I have only three minutes. It ought to be defeated because it carries a proposition, right on the face of it, to reach out and pay attorneys' fees to men mittee had understood the extent to which this might go, the who have dug up some of these claims in the past. That is

wrong, because the matter has already been adjudicated. appeal to the membership of this House to defeat this measure beacuse it is not right. It is unjust; it is unrighteous.

The SPEAKER pro tempore. The time of the gentleman from Indiana has expired.

Mr. MANN. Mr. Speaker, how much time have I remaining? The SPEAKER pro tempore. The gentleman has four min-

utes remaining.

Mr. MANN. Mr. Speaker, this is rather a peculiar proposi-Congress has made an appropriation of forty-odd thousand dollars to pay certain claims. This bill provides that the Secretary of the Treasury shall deduct from the amount certified under resolution No. 56, Sixty-second Congress, to each claimant a proportionate sum to cover the expense of and fair compensation for the person or persons through whose time and service this matter has been laid before Congress, except such claimants as have agreed with such person or persons for compensation. Who are the persons whose time and services have laid this matter before Congress? That is a matter of proof hereafter. No one knows now. In the last Congress we thought we knew the quantity of claims, but we were mis-No one knows how many people may have been giving their time and services. But here is a proposition that if the persons who have been giving their time and services have made an agreement that shall stand; but if they have not made any agreement with these claimants, then the claimants shall have the money taken out of their pockets and turned over to these Now, we have at times in the past put into bills limitations upon attorneys' fees, limitations upon the amount of money that could be paid out of the money appropriated for attorneys or agents' fees in getting bills passed through Congress, but I do not recall any instance heretofore where it has been proposed, out of an appropriation heretofore made or then being made, to require people to pay for the services of agents when they have not employed the agents. Suppose these people out there were fully confident that Congress, in its wisdom, would make an appropriation to pay their bills. Why should we require them to pay out of their pockets the useless expense of sending one or a dozen people to lobby with Tom, Dick, and Harry in the House or Senate? On what theory can gentlemen defend the proposition that, having made the appropriation, we require people who do not wish to pay to pay for services which they did not desire. I do not believe Congress can afford to take that position. I feel confident—I will not say absolutely confident, because I never feel absolutely confident that this House will or will not do anything—I feel quite confident that the sober judgment of this House will not commit itself to the proposition that on claims reported from the Committee on Claims or the Committee on War Claims, of which we have thousands every year, we shall provide in the bill that the claimants shall pay for services rendered by persons who have given their time and services to lay the matter before Congress

Is it going to be the policy of Congress that when we pass a claims bill and some gentleman here offers an amendment on the floor, and because it is like some other case that an attorney has represented here, we shall require both to contribute to the attorney's fees? Are we going to take the position that every time we pass a claim we shall require the claimants to pay for services which they have not asked for, which they do not want, in regard to paying for which they have made no agreement?

How can anyone defend such a proposition? But I leave it to the distinguished gentleman who is to follow me. If there is any vicious proposition that can be ably defended, he can ably defend it. [Laughter.]

The SPEAKER. The gentleman from Mississippi has 10 minutes

Mr. STEPHENS of Mississippi I yield 10 minutes to the gentleman from California [Mr. RAKER].

The SPEAKER. The gentleman from California [Mr. RAKER] is recognized for 10 minutes.

Mr. RAKER. Mr. Speaker, the question of the right to appropriate the \$15,000 has been practically conceded by the gentleman opposing this resolution; and it seems to me that I would be wasting too much time to go over that question. But will just give the House a little history upon that question.

This matter came up during the Sixty-second Congress and passed the House on the Unanimous Consent Calendar. It went over to the Senate and passed there. It went down to the White House and was vetoed by the President and came back, and, as stated, passed the Senate overwhelmingly, but failed by a few votes to receive the necessary two-thirds in the House. The Committee on Irrigation as well as the Committee of the Senate on Irrigation held full and complete hearings upon this bill as it was originally presented to the House, and those hear- | people.

ings have been reported and considered by the House, and much of the information derived during those hearings has been placed in the RECORD.

A resolution was reintroduced in the Senate and passed, and came over to the House and passed here by unanimous consent, because it changed the fund out of which this money was to be paid; and it was conceded then that it was legitimate and ought to be paid, and that it had a real, equitable foundation, and that this Congress should have appropriated \$42,000 for its payment. That bill then went to the Secretary of the Interior, and it provided that all parties should present their claims. They presented their claims under that resolution; but instead of amounting to \$42,000, they amounted to about \$15,000 more than the resolution provided for, and the Secretary of the Interior has been unable to adjust that claim without deducting proportionately the amount over and above what was appropriated for. So the Secretary has recommended that this amount be appropriated.

This matter went to the Senate again last year, and in the last days of the session it was left out rather than hold up the appropriation bill. It now comes back again for action.

Mr. FITZGERALD. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. FITZGERALD. It went out of the appropriation bill because the managers on the part of the House served notice on the Senate that under no consideration would they agree to the

Mr. RAKER. I want to call attention to the fact that the appropriation contained in this bill was not in that.

Mr. FITZGERALD. I know; but I am referring to the pay-

ment of the \$15,000 additional.

Mr. RAKER. I am taking the statements of Senators who participated in the conference.

Mr. FITZGERALD. But I was there, and so was the gentleman from Georgia, who sits by me, and we know what took place.

Mr. RAKER. I take it that the Senators knew what was done in the conference, too. The matter of \$15,000 was not involved as it is in the present resolution as it passed the Senate.

Now, I want to call the attention of the House to the question of the amount to be allowed for the parties who did the work. If there was no one who participated in presenting this matter, then there is no one to be paid. If some one has given their time and was sent here by a committee of these claimants to present their bill to the Secretary of the Interior and to the committee, that person ought to be paid. But when they find that the bill is approved, because they did not sign a written contract, and desire to get out of it, it is not a fair thing nor is it right to deny that person compensation. That is the condition of this case. Part of the claimants entered into a contract that if this matter was presented to the Secretary and that it this matter was presented to the secretary and the House and the Senate, they would pay their proportion. A gathering of the creditors was had, and a representative sent here to attend to their claims, and they were always willing to pay a reasonable attorney fee until the bill was approved and signed, and they find that there was an opportunity to defeat the party who had given her time and attention to this bill that they might receive their just compensation.

Mr. BARTLETT. May I ask the gentleman a question? Mr. RAKER. I am sorry, but I have only two minutes.

I want to call attention to a further matter. Here was this lady running a store, who paid the workmen their time checks, who paid the laboring men, who furnished the lumber and other money so that they could use it, and the material men the same. She spent all of her money for this purpose, mortgaging her home, and it is now under mortgage to-day. She is unable to relieve it unless this amount is allowed and paid for.

I want to call the attention of the House to the fact that this House unhesitatingly passed, and the Senate unhesitatingly passed and appropriated for a rich bank, a claim just exactly like this, and that bank received its money. Here is a small merchant and laboring people who have given their time and labor on these matters, and it is said that they ought not to

have their money.

I want to call attention to one further matter. Sixteeen per cent of the work done by Speer and his subcontractor was performed for \$57,000 less than for the same percentage of the work that the Government completed the contract when they took it over from the contractor. That is the record; that is the statement that has been presented in the record here; so that if the Government paid the entire \$57,000, they would not be paying the amount of the work that was done for these people.

When you voted the bankers the amount of their claim the law was just as it is to-day, but that contract was entered into believing that the act of 1884 was in force, that gave the one who furnished the material and labor a prior right to recover on the bond. This case shows, and the bond shows, and the letters from the Reclamation Service show, and the entire hearing shows that the Reclamation Service believed, until they took over the project to do it, that they were working and that this bond was given under the act of 1884, which meant that those who performed the labor and furnished the material had the prior right to sue and recover on the bond. But the act of 1905 came in and gave the Government the prior right to collect on the bond. The Government has sued to recover on the bond for \$75,000, and there is nobody here but what can say that the bondsmen on that bond are not able to respond to the entire \$75,000. Is it right when the people believed they had the right under the law to recover, when the Reclamation Service believed that they had the prior right to recover, on the bond, to now deny them this right? This original bill did not provide or specify any time in which the parties should present their claims. As I have called attention of the House to the fact, as soon as the bill passed they presented their claims, amounting to \$57,000. This resolution provides that they shall present their claims in one year after its enactment or their claims shall be barred. That is fair.

Mr. GARRETT of Texas. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. GARRETT of Texas. Is there anything in the RECORD to show how much of this claim will be absorbed by attorneys'

Mr. RAKER. That is entirely up to the Secretary of the Interior. Let me call the attention of the gentleman to the fact that these people gathered in a body upon these works when these people failed. They said: "We will collect a certain amount of money and send a representative to Washington and see if it can not be collected there by presenting the claim to the Secretary of the Interior by a proper presentation, and if not then through Congress.'

They all united, except a few that they left out. They were perfectly satisfied to have the work done, but as soon as the claim was allowed they said: "Why, here, we did not give a written contract; you have done the work and the bill provided for the money, and we ought to beat you out of it."

Mr. DICKINSON. Will the gentleman state on what grounds the President vetoed this bill when it was passed before?

Mr. RAKER. The present President never vetoed the bill.

Mr. DICKINSON. Well, a similar bill.

Yes; it is a different condition altogether. The SPEAKER. The time of the gentleman from California has expired. All time has expired. The question is on suspending the rules and passing Senate joint resolution 74.

The question was taken, and two-thirds having failed to vote in favor thereof, the motion to suspend the rules was rejected.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill: H. R. 9321. An act to amend the act approved May 9, 1888, as

amended by the act of June 11, 1896.

PROCEDURE IN UNITED STATES COURTS.

Mr. McCOY. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 10946) to regulate the judicial procedure of the courts of the United States, which I send to the desk and ask to have read.

Mr. FINLEY. Mr. Speaker, I would like to ask the gentleman from New Jersey what calendar this bill is on?
Mr. McCOY. This is on the House Calendar.
Mr. FINLEY. I believe there is a rule against a bill being on more than one calendar.

The SPEAKER. The Chair is not aware that it is on more than one calendar. This is a motion to suspend the rules and pass the bill. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 269 of the act approved March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary," be, and the same is hereby, amended so as to read

as follows:

"Sec. 269. That no judgment, decree, or order shall be set aside or reversed, or new trial granted by any court of the United States in any case, civil or criminal, on account of any error which does not injuriously affect the substantial rights of the party complaining. The trial judge may, in his discretion, in any case submit to the jury the issues of fact arising upon the pleadings, reserving any question of law arising in the case for subsequent argument and decision, and he and any court to which the case shall thereafter be taken on writ of error shall have the power to direct judgment to be entered either upon the verdict or upon the point reserved, if conclusive, as its judgment upon such point may require."

The SPEAKER. Is a second demanded?

Mr. FINLEY. Mr. Speaker, I demand a second. Mr. McCOY. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

Mr. FINLEY. Mr. Speaker, I think that the attendance in the House is too limited to consider a matter of this kind, and will ask the gentleman to let the matter go over.

The SPEAKER. Does the gentleman object to the request

that a second be considered as ordered?

Mr. FINLEY. No; I do not.

The SPEAKER. The gentleman from New Jersey is entitled to 20 minutes and the gentleman from South Carolina to 20 minutes.

Mr. McCOY. Mr. Speaker, this is one of several bills which from time to time have been considered at the different annual sessions of the American Bar Association, and for several years past the passage of such a bill as this has been recommended by that association. It is a bill which in short phrase is termed the "technical-error bill." The bill was considered by the House in the Sixty-second Congress, and on the unanimous report of the Committee on the Judiciary, the report being pre-pared by Solicitor General Davis, then a Member of the House from West Virginia. The bill was passed, but it did not get through the Senate. The bill was again introduced at this session by myself, at the request of a committee of the American Bar Association, and is identical with the bill as it passed the House in the Sixty-second Congress. The bill contains two provisions in effect, and one of them is that no judgment, decree, or order shall be set aside or reversed and a new trial granted on account of error which does not injuriously affect the substantial rights of the party complaining. This sort of legislation has been adopted in several of the States in the Union, as affecting the State courts, and it is clearly in the interest of expedition in the trial of cases; it is clearly in the furtherance of justice.

Mr. MOON. Mr. Speaker, will the gentleman yield?
Mr. McCOY. Certainly.
Mr. MOON. What does the gentleman mean by a technical error?

Mr. McCOY. I will say to the gentleman from Tennessee that that is the phrase which has been applied to the bill. It has been called the "technical-error bill." I take it that that means what might be known as an immaterial error, an error, in other words, which did not and probably could not have affected the right of the party complaining.

Mr. MANN. Is it not described in the bill? Mr. MOON. The way the bill is drafted.

The way the bill is drafted, does it not mean that the Federal court may proceed to judgment in these matters and take such action as it sees fit, without regarding those technical rules of law which are made for the purpose of protecting not only the property but the liberty of citizens? Mr. McCOY. No.

Mr. MOON. If you do not follow the technical rules of law in administering criminal law particularly you have placed the province of the jury practically in the hands of the judge, and you have made a condition that citizens can not live under, having made the judge the dictator instead of a legal officer.

Mr. McCOY. I quite agree with the gentleman, but I was perhaps unfortunate in my use of the designation by which the bill has gone. Of course practice in court is all technique, and if you violate any rule of practice you have committed what might be called a technical error; but there are a great many technical errors which do not affect the substantial rights of the party concerned.

Mr. MOON. That is the point. What do you call substantial right or justice? Is there any way to reach substantial justice or right without pursuance of the technical rules of law in their application to the trial of cases?

Mr. McCOY. I consider it the right to have the case fairly tried.

Mr. MOON. No; the gentleman's bill means this, that the judge may do just what he pleases, regardless of law and procedure.

Mr. McCOY. I disagree with the gentleman. It does not affect the trial of the case before the nisi prius judge, but it has to do with the reversal for error which the appellate court, on examination of the whole record, can say could not have affected the rights of the party.

Mr. MOON. Exactly. The nisi prius court may overrule the technical rules of the law, and the Supreme Court would be without power to correct that error.

Mr. BORLAND. Will the gentleman yield for a question?

Mr. McCOY. I will.

Mr. BORLAND. I want to call the gentleman's attention to the language which says a trial judge may, in his discretion, in any case, submit to the jury issues of fact arising upon the pleadings, reserving any question of law arising in the case for subsequent argument and decision.

Mr. McCOY. I have not come to that part of the bill.

Mr. BORLAND. Does that mean the trial judge is clothed with discretion to submit issues of fact to the jury?

Mr. McCOY. Surely; I take it that he would have it. It is a discretion to-day, which is in the laws of a great many States, where he is given that power now.

Mr. BORLAND. He is not compelled to submit issues of fact

to the jury?

Mr. SISSON. In a criminal case?

Mr. McCOY. They either go to a jury in the usual course of a law case or the judge can submit specific issues to the jury in

civil cases

Mr. BORLAND. It does not say that. It says he may, in his discretion, submit to the jury the issues of fact arising upon the pleadings. If the gentleman means that, then he can strike out those words; but if he means to say the trial judge can, in his discretion, reserve any question of law on the pleadings for subsequent argument, that would be a different proposition.

Mr. McCOY. That is just what the bill does.

Mr. BORLAND. That is not what the bill does. It says he may, in his discretion, submit issues of fact.

Mr. McCOY. Surely; in other words—
Mr. BORLAND. In other words, I think the gentleman can reach this question by striking out the language about "in his discretion submit the issues of fact" and put in—

Mr. McCOY. I will say to the gentleman I do not think "in his discretion" would add anything or take anything away. In other words, it follows the practice, as I understand it, the common-law practice, of submitting the whole case to the jury and adding also the submitting of specific issues of fact to the jury and taking the verdict of the jury on those specific issues.

Mr. BORLAND. That common-law practice of submitting specific issues of fact to the jury occurred in cases where the

right to a jury trial was not mandatory. It occurred in courts of equity, where the judge would have the decision of both issues of fact and the law and in which he had the right to submit certain special issues of fact to the jury. This language is not so confined.

Mr. McCOY. In common-law practice the judge frequently reserves the ruling on the law to take the verdict of the jury

on the issues which have been-

Mr. BORLAND. But this law is not confined to that case. That is the point to which I am calling the attention of the gentleman.

Mr. McCOY. Why, in common law and in equity that is a power which was frequently exercised by the court in sub-

mitting issues of fact to the jury.

Mr. BORLAND. And it was the common practice of referring questions of law arising upon the verdict, and not a discretion whether or not he would submit issues of fact to the jury, and

this gives the right to do both. Mr. McCOY. I do not think this takes away from any party litigant the right to have a verdict on the issues in the case, but it permits the judge, in his discretion, to submit separate

issues of fact to the jury.

Mr. BORLAND. I do not think it is so worded.

Mr. BARTLETT. Mr. Speaker, may I interrupt the gentleman?

Mr. McCOY. I yield. Mr. BARTLETT. This bill says "any case, civil or criminal," so that the bill is intended to apply both to civil and criminal

Mr. McCOY. The first branch of the bill; yes.

Mr. BARTLETT. There is no distinction made thereafter, and it applies to common-law suits as well as equity cases, and all cases of the courts, both civil and criminal, common law and equity, are to be governed by this bill.

Mr. McCOY. Yes; the first part of it.
Mr. BARTLETT. Now, will the gentleman tell me why, in criminal cases, the trial judge should be given discretion to submit to the jury special issues of fact arising upon the pleadings, reserving any question of law arising in the case for subsequent argument and decision?

Now, does the gentleman propose that a judge may in a criminal case or in a common-law case—say for damages—segregate the various parts in the case and submit any question of fact in a criminal case to a jury, and then, when the jury returns its special findings upon those facts, enter a judgment he thinks the facts justify, and take away from the jury the right to return a general verdict of guilty or not guilty? This

bill certainly would authorize him to do it. You do not limit in this provision the trial judge in his discretion to a civil case. but you say in all cases, civil or criminal, certain things may be done.

That is the first part.

Mr. BARTLETT. I know that. And still you do place a period in there, which makes a new sentence, and go on and say the trial judge may in his discretion, so that the trial judge may in any case, civil or criminal, submit to the jury

Mr. McCOY. I do not think the bill was intended to do that, but I should be quite willing to consent to an amendment to insert in line 1, on page 2, after the word "any," the word

Mr. BARTLETT. It can not be amended under the proceeding we have here.

Mr. McCOY. I would ask unanimous consent to have that

Mr. BORLAND. Under the way in which this bill is brought up it is not subject to amendment.

Mr. BARTLETT. That is what I was stating to the gentle-It is under the suspension of the rules.

Mr. McCOY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McCOY. A criticism, which I think is perhaps a valid criticism, has been made, and which I think can be cured by an amendment. What I would like to know is, whether it is possible to suggest an amendment and ask unanimous consent that it be considered.

The SPEAKER. The House can do anything by unanimous

consent.

Mr. MANN. I suggest to the gentleman that he ask unanimous consent to change his motion.

Mr. McCOY. That the bill be amended by inserting after the word "any," on page 2, line 1, the word "civil," and that as amended the rules be suspended and the bill passed.

Mr. SISSON. Mr. Speaker, I would suggest that this bill is a matter of a great deal of importance, and I would ask the gentleman if he does not feel that it ought to go back to the committee and let the committee work it out. This is no place to work out a matter of this kind.

Mr. MANN. This was worked out, I will say to the gentleman, by a very distinguished man, and a better lawyer than any

mah, by a very distinguished man, and a better any state of the most in the House, perhaps.

Mr. SISSON. We may not agree. He may work out what he wants, and not what I want.

Mr. BARTLETT. The gentleman from New Jersey [Mr. McCov] says it was not intended.

Mr. McCov I will say that I am perfectly willing to have Mr. McCOY. I will say that I am perfectly willing to have it changed. I merely state that the gentleman aimed a criticism at the bill, and by the insertion of one simple word that objection could be removed. I think the bill as it was drawn was not intended in that particular part of it to refer to criminal cases, but if the insertion of that word would cure it I think it would be all right.

Mr. MOON. Mr. Speaker, I want to object to any change, because I think this bill is pernicious in any view that you may take of it. It is an outrage on the citizen of the country. It is arbitrary and practically deprives the citizen of a trial by jury. This House ought to have reported to it and have passed

a bill which means exactly the opposite of this.

Mr. McCOY. I would like, Mr. Speaker, to reserve the balance of my time, and would suggest to the gentleman from Tennessee [Mr. Moon] that he secure time.

The SPEAKER. Does the gentleman from New Jersey [Mr. McCoy] submit a unanimous consent?

Mr. McCOY. Yes; I ask manimous consent.

The SPEAKER. The gentleman from New Jersey [Mr.

McCoy] asks unanimous consent to amend-

Mr. McCOY. That the bill be amended by inserting, on page line 1, after the word "any," the word "civil," and that after it is so amended the rules be suspended and the bill passed.

The SPEAKER. Does the gentleman from Tennessee [Mr. Moon] object?

Mr. MOON. I object. Mr. McCOY. Mr. Speaker, I reserve the balance of my time. The SPEAKER. The gentleman from New Jersey has used

15 minutes of his time.

Mr. FINLEY. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. Sisson] five minutes.

away from litigants in some cases even the right of trial by

jury altogether on issues of fact.

As I understand the last provision, it provides in all cases of appeal to the Supreme Court, in the event that the court reverses a case and it goes back to a lower court-and I am putting the most favorable construction on the last sentence of the -it is left in the discretion of the Federal judge to determine whether he will or will not submit a question of fact to a Under the laws and practice in England the right of a trial by jury is sacred, and in this country it should be also. There are sinister influences in America which would love to get under the shadow and protection of a judiciary that is appointed for life, and I want to take them out from under that protection. I am unwilling that these men who are appointed for life, who are making these arbitrary rules, should be vested with that arbitrary discretion.

I agree with many distinguished attorneys, and particularly one whose name I will not mention, living in the city of Washington, who contends that the Federal judiciary by reaching out with their decisions have absorbed almost supreme power and been one of the great causes of the trouble that now prevents the country from getting the right sort of remedial legis-

In a matter of so much importance as this, tampering with the right of juries to try causes and vesting in the judge that sole power, it seems that if Congress in its wisdom should agree to it, it certainly should have more discussion than is proposed to be accorded here. The consideration of a matter so far-reaching as this should extend to more than 20 minutes to a side. This is no place in which to bring a bill of this kind and character-a bill that affects every man within the broad domain of this great Republic, and even the isles of the sea that we own and control. A matter of this great importance should be taken up by the Committee on the Judiciary and fully considered and placed on the calendar. It should be considered thoroughly, item by item, and every Member of this body should have the right to discuss it.

It is not sufficient to say, as I believe it is said, that the American Bar Association indorses this measure. We have no right, as Members responsible to our constituents, to substitute the judgment of the American Bar Association for our own judgment. The question is, Does this meet with your individual approval, rather than the approval of the American Bar Asso-Does this meet with your individual conscience, or the conscience of the American Bar Association? Does this meet your own individual judgment, or the judgment of the American Bar Association? I do not know that the American Bar Association is always good authority for the masses of the people. I fear that great lawyers-at least too many of them-are too much influenced by matters that would be hurtful to the people, representing, as they do, the great moneyed interests of the country.

Mr. McCOY. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman yield?

Mr. SISSON. Yes. Mr. McCOY. I called attention to the fact that several States now have a law exactly of this kind, and this bill only extends to the Federal courts, if it should become a law, what is already done in those States.

Mr. SISSON. Yes; but in those States the judges do not hold office for life. In those States the judges are elected by the people, whereas in the case of Federal judges they are appointed and hold office for life. It makes a great difference, as everybody knows who practices law in the respective juris-

Mr. Speaker, will the gentleman yield further?

The SPEAKER. Does the gentleman yield?

Mr. SISSON. I regret I can not yield. I have only five minutes

Mr. McCOY. But will not the gentleman— Mr. SISSON. I told the gentleman I could not yield. The SPEAKER. The gentleman from Mississippi declines to

Mr. SISSON. I want to quote to you, gentlemen, an extract from Thomas Jefferson, written before we had a Supreme Court; written, in fact, before the court was organized. He said that the Constitution vested a power in the Supreme Court that ought not to be vested in any human being holding office for life. Another expression that he used was that they would become sappers and miners of the Constitution of the United States; and no prophet ever prophesied more truly than he did there.

I do not believe this House ought to pass a bill of this kind until we have had ample opportunity to study it, and then opportunity to offer amendments and consider it carefully.

It is a measure of too far-reaching importance to be jerked up here and passed under suspension of the rules. That provision in the rules for the passage of bills under suspension was intended not for the passage of great general legislation, but simply for the passage of these unimportant private measures and small matters that would not require much time-matters that would go through merely as a matter of course. How many Members are here now? I venture to say there are less than 100 Members present—no; there are not more than 75 Members present on the floor. The idea of taking up and passing under suspension of the rules a bill of this importance is not to be tolerated in a serious legislative body. [Applause.]
The SPEAKER. The time of the gentleman from Mississippi

has expired.

Mr. FINLEY. Mr. Speaker, I vield to the gentleman from Georgia [Mr. BARTLETT] four minutes.

The SPEAKER. The gentleman from Georgia [Mr. BARTLETT]

is recognized for four minutes.

Mr. BARTLETT. Mr. Speaker, the fact that the American Bar Association has approved this bill does not discredit it to me. I happen for many years to have been a member of that association. I was present when it was organized 30 years ago, and I have continuously been a member since. I know that they do study and endeavor to advocate the passage of laws that they believe to be for the benefit of the people. I myself believe it to be a true principle of administering justice in an appellate court that in civil cases where substantial justice has been done by the verdict and judgment and where immate-rial error may have been committed the case should not be reversed and sent back simply to be tried over upon the same facts because some error had occurred which did not really affect the minds of the jury in finding the verdict.

But a different proposition is involved in a case where a man is tried on a criminal charge. In criminal cases under our administration of justice, both in State and Federal courts, the jury are authorized to find a general verdict of guilty or not guilty, and an error of law or in the admission of evidence very

often leads to injurious effects.

When you try a man for his liberty or his life in a Federal court, there is but one tribunal which, under our Constitution, has the right to pass upon the question of his guilt or innocence, and that tribunal is the 12 men who sit in the jury box, selected under our form of judicial administration to pass upon the question. Therefore I called the attention of the gentleman who is in charge of this bill to the broad and sweeping proposition contained in the bill on page 2, that "in any case" the judge may submit to the jury issues of fact and let the jury return a verdict upon the special issue, and have the judge pronounce judgment upon the finding of the jury; not a general verdict of guilty or not guilty, but a special finding of fact; and not that the jury shall determine from that special finding whether the man is guilty or not guilty, but that the judge shall pronounce judgment of guilty or not guilty. However much I may be in favor of reforms in our judicial system that will hasten trials and end litigation, I am not prepared to vote for a bill which proposes to strike down the fundamental palladium of the liberties of our people, known as the jury system. I do not believe that the mind of man has ever conceived of a better or a superior tribunal to try a man criminally indicted in a court. The jury trial has stood the test of time and has been handed down to us from our forefathers and preserved in our constitutions, both State and Federal, as a blood-bought heritage to our people. And while this may be a technical criticism, yet men tried in court for their lives or liberty are always tried on technicalities, and if the right of trial by jury and the right to have a general verdict returned of guilty or not guilty is a technical right, it is one that has come down to us from Magna Charta and has been preserved to us by our forefathers, and I trust it will be preserved by us for our descendants hereafter. [Applause.]

Mr. FINLEY. I yield five minutes to the gentleman from

Tennessee [Mr. Moon].

Mr. Moon. Mr. Speaker, in my inquiries of the gentleman from New Jersey [Mr. McCov] I have said nearly all that I desire to say on this subject; but I will call the attention of the House briefly to the fact that this section, as sought to be passed here, practically destroys the right of trial by jury and commits into the hands of the Federal judge the exclusive and arbitrary power of disposing of the rights of litigants. Now, listen:

That no judgment, decree, or order shall be set aside or reversed, or new trial granted by any court of the United States in any case, civil or criminal, on account of any error which does not injuriously affect the substantial rights of the party complaining.

Who has the right to determine that question? The trial judge in the first place, and the appellate court in the next place. Now, what are these rights? They are rights under the law, arising from a given state of facts. Under the Constitution that state of facts must be submitted, if the amount involved exceeds \$20, to the verdict of a jury. The effect of this is to leave to the court the determination of the question as to whether the rights of a man are affected or not, and that is an invasion of the rights of the party under the Constitution, which ought not to be tolerated in this or any other country.

Next the bill provides:

The trial judge may, in his discretion, in any case submit to the jury the issues of fact arising upon the pleadings, reserving any question of law arising in the case for subsequent argument and decision, and he and any court to which the case shall thereafter be taken on writ of error shall have the power to direct judgment to be entered either upon the verdict or upon the point reserved, if conclusive, as its judgment upon such point may require.

That provision the more completely and effectually not only invades the province of the jury but destroys the jury part of the court system of the country. The idea is, to my mind, intolerable; that on a given state of facts on which the citizen is entitled to the verdict of a jury the power should, in the face of the precedents of a century, be conferred upon the trial judge to say whether those issues shall be submitted to the jury or whether he, in his discretion, shail determine them. And, again, if it goes to the appellate court under this section, either upon the trial of law or fact, the order should be and is a reversal always where there has been any substantial error. Here the court is not permitted to remand the case except, in its discretion, for further action in the court below, but they are authorized to enter such judgment as, in their opinion, may be proper on the facts. What is the object of all this; what is the legislation for? You know what the tendency of the Federal courts has been. You know their tendency has been toward the corporate interests of the country, toward the sustaining of the trusts and all those corporate interests that make against the welfare and interest of the people.

Mr. McCOY. If the gentleman will allow me, I want to call attention to the case of Springer v. Westcott (166 N. Y., 117), where there were four appeals in a recovery of \$900 for the contents of a trunk, and there the corporation was the appellant in the case. What we are trying to do here is to prevent and take away the power of the corporations to wear out a

Mr. MOON. I do not think this does it. That case may have been disposed of properly. That has nothing to do with the question here presented. If you take away from the citizen the right of trial by jury and allow the court to determine what substantial justice is, you have taken away the constitutional right of a citizen of the United States.

I want to remark, in conclusion, that it does not t ke a very wise man to see the purpose of this bill. It is brought here in disguise to cover the questions of contempt of labor organizations and to aid corporations in this country, and the National Bar Association of the United States does itself no credit if it favors this legislation.

Mr. FINLEY. Mr. Speaker, I yield two minutes to the gentleman from Illinois [Mr. Fowler].

Mr. FOWLER. Mr. Speaker, this bill proposes to amend section 209, and when we read section 269 we will see just how much this bill will change it or how much will be added to it. Section 269 of the code reads as follows:

All of the said courts shall have power to grant new trials in cases where there has been a trial by jury for reasons for which new trials have usually been granted in the courts of law.

That is all there is to section 269. I think it is harmless as compared with this bill. It simply gives the power to grant new trials, the same as is ordinarily given in courts of law where there is a substantial reason for a new trial.

I think new trials ought to be granted occasionally where justice has not been done. This bill not only undertakes to prevent new trials, but it undertakes to take away from the people of this country one of the greatest bulwarks of our jurisprudence, the right of trial by jury. If the Federal court had the right within its discretion to say whether cases should be tried by a jury or by the court, in my opinion they would all be tried by the court at the expense of the people. I have no assault to make on our Federal courts, but the conduct of some of our Federal judges has often been arbitrary and oppressive. Their tenure in office is for life. This bill seeks to increase the power of these courts and should be defeated by all means.

The SPEAKER pro tempore (Mr. SAUNDERS). The time of

the gentleman has expired.

Mr. FINLEY. Will the gentleman from New Jersey have

more than one speech?
Mr. McCOY. I will yield three minutes to the gentleman from Iown [Mr. GREEN].

Mr. GREEN of Iowa. Mr. Speaker, I think this bill is somewhat misconstrued, and I somewhat fear the language is subject to misconstruction. I would have liked to ascertain before I spoke whether it was intended on the part of the gentleman from New Jersey that the provisions of the latter part of the bill should apply to criminal cases as well as to civil.

There is one thing certain, that the time is coming, and fast coming, in spite anything gen'ilemen may say on the floor, when we will dispense with the archaic rules that we borrowed from the English procedure of 400 years ago and which England has dispensed with and put aside for more than half a century.

This bill was intended not to affect the substantial rights of any party. So far as any person who is put on trial for a criminal charge, he has the one natural right, and that is to be acquitted if the evidence fails to show his guilt beyond a reasonable doubt. He has no right to any particular form of trial, he has no right to any particular form of indictment except as has been provided by our statutes, which differ in different States. What might be justice according to the views of the gentleman from Tennessee, if I understand him correctly, in his State because the statutes so provide, would not be justice in my State because the statutes did not so provide. It is the intention of amendments of this character to do away with such provisions which do not pertain to the natural rights of a party and which obstruct justice being done in the case.

I do not think that this bill, as has been said by some gentle-men, prevents a trial by jury absolutely in any criminal case. If it did, it would not be constitutional, and the passage of it would have no weight. It was not so intended, I am satisfied, and I do not believe it can be properly so construed. I would, however, be better satisfied with it myself if the other part of

it applied simply to civil cases.

The SPEAKER pro tempore. The time of the gentleman

from Iowa has expired.

Mr. FINLEY. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. Three and one-half minutes. Mr. FINLEY. Mr. Speaker, I yield one minute and a half

to the gentleman from Tennessee [Mr. McKellar].

Mr. McKELLAR. Mr. Speaker, in a minute and a half I can only protest against the passage of this bill. Our Constitution provides that the right of trial by jury for any amount over \$20 shall remain inviolate. This bill, if passed, would take away absolutely the right of trial by jury. Federal judges in this country have already taken away to a large extent the right of trial by jury, and if you pass this law the result is going to be that they will take away the whole extent of the right of trial by jury. This ought not to be done, in my judgment, and instead of that, if the bill should not be voted down, I am going to offer the following amendment-

Mr. MURDOCK. But the gentleman can not do that.
Mr. McKELLAR. Then I think we ought to kill this bill.
Mr. MURDOCK. The committee could offer such an amend-

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman vield?

Mr. McKELLAR. Certainly.
Mr. KELLEY of Michigan. Mr. Speaker, I notice that this is an amendment to section 269 of the present law—

Mr. McKELLAR. Mr. Speaker, I want to interrupt the gentleman to say that I have not examined the bill critically at ali. I have just come into the Chamber, and do not know what agreement has been made about this bill; but so much do I feel, as a lawyer, as a man who believes in the Constitution, and in what is right between man and man—as a man who believes in the courts-so much do I believe that this is a vicious measure that I desire earnestly to insist that the bill be voted down. I, for one, am not ready to vote to abolish any part of the Constitution, and shall uphold in every honorable way the right, the sacred right, of trial by jury, which that instrument guarantees to the American people, but which right our Federal courts are apparently always seeking to take away.

The SPEAKER pro tempore. The time of the gentleman from

Tennessee bas expired.

Mr. FINLEY. Mr. Speaker, I am not here to make war on the judiciary of the United States or of the States at all, but when a bill like this comes here that is unconstitutional on the face of it

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman yield?

Mr. FINLEY. No. A bill that is unconstitutional on its face, that is admittedly so; a bill, which if passed, would in criminal cases and in other cases than on the criminal side of the court destroy the right of trial by jury in any case where the trial judge so willed, I can not and will not support it. I believe that

the people of this country should have a voice in the Government and particularly in the jury box. There the voice of the American citizen should be most potent. Take away his power to voice his honest judgment on a state of facts presented in a court, and to take the law as given to the jury by the trial judge, and you destroy one of the strongest incentives to high citizenship in this country. I do not believe that this bill should pass. I am opposed to it, because I think it wrong in principle and I think it pernicious. I think if it passes this Congress it will be a reflection on the Congress. Whether or not any such bill was ever so intended-

The SPEAKER pro tempore. The time of the gentleman has

expired.

Mr. McCOY. Mr. Speaker, I am sorry that so many men can

see so many bugaboos in this bill.

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman

yield?

Mr. McCOY. In just half a second. It does not take away the right of trial by jury from anyone, under any circumstances; but if it became the law it simply would have the result of doing away with the delay of justice which has become a stench in the nostrils of the people of the country, and I am surprised that lawyers in this body could object to any reform of this kind, which so many people have been asking for.

I now yield to the gentleman from Michigan.

Mr. KELLEY of Michigan. Section 269 of the existing law provides affirmatively for a new trial.

Mr. McCOY. Yes. Mr. KELLEY of Michigan. Is there any statement in this

section which would give a new trial at all?

Mr. McCOY. I think it could not be considered in any other way than as giving new trials, except under certain circum-

Mr. KELLEY of Michigan. That is, under other circumstances there would not be any new trial provided?

Mr. McCOY. I hope the bill will pass under suspension of the rules, and that the reform which has so long been demanded will be granted at this time.

The SPEAKER. The question is on suspending the rules

and passing the bill.

The question was taken; and the Speaker announced the noes seemed to have it.

Mr. McCOY. Division, Mr. Speaker.
Mr. MANN. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from New Jersey demands a division, and the gentleman from Illinois makes the point of order there is no quorum present.

Mr. McCOY. Mr. Speaker, I withdraw my demand. Mr. MANN. Well, I do not withdraw the point of order. I object to the vote on the ground that there is no quorum

The SPEAKER. The Chair will count-there is no use counting.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 27 minutes p. m.) the House adjourned to meet to-morrow, Tuesday, January 20, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications

were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Locklies Creek, Va. (H. Doc. No. 612); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of New London Harbor, Conn., with a view to securing increased depth of channel and for report upon the question of cooperation on the part of the State of Connecticut in the improvement of said harbor and its approaches (H. Doc. No. 613); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

3. A letter from the Acting Secretary of the Treasury, transmitting list of judgments rendered by the Court of Claims which have been presented to this department and require an appropriation for their payment (H. Doc. No. 616); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Acting Secretary of the Treasury, transmitting communication from the Attorney General submitting a list of judgments rendered by the Court of Claims in favor of claimants in Indian depredation cases (H. Doc. No. 615); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Acting Secretary of the Treasury, transmitting list of judgments rendered against the United by the circuit and district courts of the United States, as submitted by the Attorney General, and which require an appropriation for their payment, and additional sums for the payment of interest at 4 per cent from date of judgments (H. Doc. No. 614); to the Committee on Appropriations and ordered to be printed.

6. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the brig Julia, in the cases of Montgomery Fletcher, administrator of John Walter Fletcher and others (H. Doc. No. 617); to the Committee on Claims

and ordered to be printed.

7. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the brig Patsy, in the cases of the president and directors of the Insurance Co. of North America v. The United States, and in other cases (H. Doc. No. 618); to the Committee on Claims and ordered to be printed.

8. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the brig Six Brothers, in the cases of Elizabeth Needham, administratrix of the estate of John Needham, and in the case of John H. Nichols, administrator de bonis non cum testamento annexo of Isaac Needham v. The United States (H. Doc. No. 619); to the Committee on Claims and ordered to be printed.

9. A letter from the assistant clerk of the Court of Claims.

transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the ship Rising Sun, in the cases of Gordon Gairdner, administrator of James Gairdner, v. The United States, and in other cases (H. Doc. No. 621); to

the Committee on Claims and ordered to be printed.

10. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the schooner Sea Flower, in the cases of Nathan Matthews, jr., administrator of Daniel Sargeant, v. The United States, and in other cases (H. Doc. No. 622); to the Committee on Claims and ordered to be printed.

11. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the brig Betsy, in the cases of Solomon N. Barlow, executor of last will and testament of Solomon N. Barlow, deceased, v. The United States, and other cases (H. Doc. No. 620); to the Committee on Claims and ordered to be printed.

12. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spoliation claims, relating to the schooner Port Royal, in the cases of David Stewart, administrator of John H. Behn, v. The United States, and other cases (H. Doc. No. 623); to the

Committee on Claims and ordered to be printed.

13. A letter from the Acting Secretary of the Treasury, transmitting copy of legislation and requesting that it be incorporated in the urgent deficiency bill (H. Doc. No. 611); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SHACKLEFORD, from the Committee on Roads, to which was referred the bill (H. R. 11686) to provide that the United States shall, in certain cases, aid the States and the civil subdivisions thereof in the construction and maintenance of rural post roads, submitted a supplemental report (H. Rept. 168, pt. 2), which was referred to the Committee of the Whole House on the state of the Union and ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 9848) for the relief of the New England Steamship Co., reported the same with amendment, accompanied by a report (No. 173), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 2728) for the relief of George P. Heard, and the same was referred to the Committee on Military Affairs.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows

By Mr. MURDOCK: A bill (H. R. 11888) to extend the benefits of the act of June 27, 1890, as amended by the act of May 9, 1900, granting pensions to soldiers and sailors who served in the military or naval forces of the United States, their widows, minor children, and dependent parents, and the act of February 6, 1907, and the act of May 11, 1912, as amended by the act of March 4, 1913, to the officers and enlisted men who served in the Nineteenth Regiment of Kansas Volunteer Cavalry; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 11889) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

Also, a bill (H. R. 11890) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

Also, a bill (H. R. 11891) authorizing the Secretary of War to donate condemned cannon and cannon balls; to the Committee on Military Affairs.

By Mr. HENSLEY: A bill (H. R. 11892) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict labor, or made in whole or in part from materials which have been made in whole or in part in any manner manipulated by convict labor; to the Committee on Labor.

By Mr. CRAMTON: A bill (H. R. 11893) to amend section 3646 of the Revised Statutes of the United States, as amended by the act of February 16, 1885, as amended by act of March 23, 1906, as amended by act of June 19, 1906; to the Committee on Invalid Pensions.

By Mr. WILLIS: A bill (H. R. 11894) to regulate the type and installation of scales used by railroads in interstate com-merce, and for other purposes; to the Committee on Interstate and Foreign Commerce

By Mr. REED: A bill (H. R. 11895) to provide for the examination of the Merrimac River; to the Committee on Rivers and Harbors.

By Mr. STEPHENS of Texas: A bill (H. R. 11896) to amend section 5 of the act approved June 25, 1910, and for other purposes; to the Committee on Indian Affairs.

By Mr. BATHRICK: A bill (H. R. 11897) to encourage agriculture and ownership of farm homes; to reduce the rate of interest and extend the term of farm mortgages; and to provide a fund for the construction and maintenance of good roads; to the Committee on Banking and Currency.

By Mr. GORMAN: A bill (H. R. 11898) to provide a pension

for dependent mothers; to the Committee on Pensions. By Mr. CARTER: A bill (H. R. 11899) to create an Indian Code Commission to codify the laws relating to Indians taxed and not taxed, and to define more exactly the privileges and disabilities of the several classes of Indians in the United States; to the Committee on Indian Affairs.

By Mr. SMITH of Maryland: A bill (H. R. 11900) to construct a sewage-disposal plant for the District of Columbia; to the Committee on the District of Columbia,

By Mr. HOWARD: A bill (H. R. 11901) to establish postal savings banks, to enable the Government to borrow money directly from the people, and to market its bonds directly to the people in small and varying denominations through the medium of the post office, and for other purposes; to the Committee on the Post Office and Post Roads.

By Mr. LEVER: A bill (H. R. 11902) to determine relative spinning values of standardized grades of cotton; to the Committee on Agriculture.

By Mr. BARNHART: A bill (H. R. 11903) to provide for the erection of a public building at Plymouth, Ind.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 11904) to provide for the erection of a public building at Warsaw, Ind.; to the Committee on Public

Buildings and Grounds.

By Mr. DILLON: A bill (H. R. 11905) to improve, regulate, and control the streams of the United States, provide for the use thereof, and to appropriate money therefor; to the Committee on Rivers and Harbors.

By Mr. SMITH of Texas: A bill (H. R. 11906) for extension of time under the reclamation act, and for other purposes; to the Committee on Irrigation of Arid Lands.

By Mr. KELLY of Pennsylvania: A bill (H. R. 11907) for the improvement of the Youghiogheny River in western Pennsylvania; to the Committee on Rivers and Harbors.

By Mr. THACHER: A bill (H. R. 11908) to provide for enlarging the site for the United States building at Plymouth,

Mass.; to the Committee on Public Buildings and Grounds. By Mr. DAVENPORT: A bill (H. R. 11909) to refer the claims of the Eastern and Western Bands of the Cherokee Indians to the Court of Claims for investigation and final judg-

ment; to the Committee on Indian Affairs.

By Mr. SLAYDEN: Resolution (H. Res. 379) authorizing the Speaker to appoint three counselors; to the Committee on the Library

By Mr. HILL: Resolution (H. Res. 380) authorizing the appointment of a committee to make an investigation of conditions in the copper mines in the counties of Houghton, Keweenaw, and Ontonagon, in the State of Michigan; to the Committee on Rules.

By Mr. BARTHOLDT: A resolution (H. Res. 381) in relation to the Third Hague Conference; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions

were introduced and severally referred as follows:
By Mr. ADAIR: A bill (H. R. 11910) granting a pension to Lovina B. Chase; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11911) granting an increase of pension to John T. Fullhart; to the Committee on Invalid Pensions.

By Mr. CAMPBELL: A bill (H. R. 11912) for the relief of Thomas F. Kelley; to the Committee on Naval Affairs.

Also, a bill (H. R. 11913) granting an increase of pension to

John S. Lane; to the Committee on Invalid Pensions.

By Mr. CARTER: A bill (H. R. 11914) for the relief of Mrs. E. B. Ainsworth; to the Committee on Indian Affairs. By Mr. CASEY: A bill (H. R. 11915) granting a pension to

Lucy F. Smith; to the Committee on Invalid Pensions. Also, a bill (H. R. 11916) granting a pension to William

Ringlaben; to the Committee on Invalid Pensions.

By Mr. CLINE: A bill (H. R. 11917) granting an increase of pension to Anna M. Shafer; to the Committee on Invalid Pensions.

By Mr. COLLIER: A bill (H. R. 11918) for the relief of the estate of W. L. Johnston; to the Committee on War Claims.

Also, a bill (H. R. 11919) for the relief of the heirs or estate of David S. Sexton, deceased; to the Committee on War Claims. By Mr. CONNOLLY of Iowa: A bill (H. R. 11920) to correct the military record of William A. Blades; to the Committee on Military Affairs.

By Mr. COX: A bill (H. R. 11921) granting an increase of pension to Benjamin Collins; to the Committe on Invalid Pensions.

Also, a bill (H. R. 11922) granting a pension to Major Buley; to the Committee on Invalid Pensions.

By Mr. CRAMTON: A bill (H. R. 11923) granting a pension to Anna Davidson; to the Committee on Invalid Pensions, Also, a bill (H. R. 11924) granting an increase of pension to

Clement Waldron; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11925) granting an increase of pension to William J. Ottaway; to the Committee on Invalid Pensions.

By Mr. DONOVAN: A bill (H. R. 11926) to remove the

charge of desertion from the military record of Henry B. Smith; to the Committee on Military Affairs.

By Mr. DOOLITTLE: A bill (H. R. 11927) for the relief of Matthew McDonald; to the Committee on Naval Affairs. By Mr. DRISCOLL: A bill (H. R. 11928) granting a pension

to Bertha M. Jones; to the Committee on Pensions.

By Mr. EDWARDS: A bill (H. R. 11929) for the relief of the legal representatives of Dr. J. R. Middleton and Mrs. Eliza-

beth Middleton, deceased; to the Committee on War Claims.

By Mr. FESS: A bill (H. R. 11930) granting a pension to
John W. Thatcher; to the Committee on Pensions.

Also, a bill (H. R. 11931) granting a pension to Lila H.

Young; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11932) granting a pension to Mary E. Clemens; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11933) granting a pension to George A. Huston; to the Committee on Pensions.

Also, a bill (H. R. 11934) granting an increase of pension to Alonzo Judd; to the Committee on Invalid Pencions.

Also, a bill (H. R. 11935) granting an increase of pension to John W. Barrett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11936) granting an increase of pension to William Howard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11937) granting an increase of pension to George W. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11938) restoring the name of Michael Beyersdoerfer to the pension roll; to the Committee on Invalid

By Mr. GALLAGHER: A bill (H. R. 11939) granting a pension to Sophia M. Human: to the Committee on Invalid Pensions.

By Mr. GARNER: A bill (H. R. 11940) granting a pension to Adelia B. Woodlief; to the Committee on Pensions.

By Mr. GARRETT of Tennessee: A bill (H. R. 11941) granting an increase of pension to Michael Shoffner; to the Committee on Invalid Pensions.

By Mr. GOULDEN: A bill (H. R. 11942) granting an increase of pension to John C. Messerschmidt; to the Committee on Invalid Pensions.

By Mr. GUERNSEY: A bill (H. R. 11943) granting an increase of pension to Luther F. Palmer; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 11944) granting an increase of pension to Lewis S. Fuller; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 11945) for the relief of Levi W. Revelle; to the Committee on War Claims.

By Mr. KREIDER: A bill (H. R. 11946) granting a pension to Cyrus T. Bowman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11947) granting a pension to William Mc-Kim; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 11948) granting an increase of pension to Isaac Montgomery; to the Committee on Invalid Pensions.

By Mr. LEE of Georgia: A bill (H. R. 11949) granting an increase of pension to Charles Blacker; to the Committee on

By Mr. LLOYD: A bill (H. R. 11950) granting an honorable

discharge to H. J. Stanly; to the Committee on Military Affairs. By Mr. McLAUGHLIN: A bill (H. R. 11951) granting a pension to Mrs. Eliza A. Keech; to the Committee on Invalid Pen-

By Mr. MERRITT: A bill (H. R. 11952) granting a pension to William F. Walker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11953) granting a pension to Pauline Short; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11954) granting a pension to Anna E. Thayer Carpenter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11955) granting a pension to Henry Pickle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11956) granting an increase of pension to

John Tyler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11957) granting an increase of pension to Seymore Denio; to the Committee on Invalid Pensions.

By Mr. PALMER: A bill (H. R. 11958) granting an increase of pension to Samuel Reinhart; to the Committee on Invalid Pensions.

By Mr. REED: A bill (H. R. 11959) granting an increase of pension to John Franklin Hobbs; to the Committee on Invalid

By Mr. ROUSE: A bill (H. R. 11960) granting an increase of pension to Anna M. Maratta; to the Committee on Invalid Pen-

By Mr. RUSSELL: A bill (H. R. 11961) granting an increase of pension to Charles Schultz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11962) for the relief of Andrew J. Sells;

to the Committee on Military Affairs.

By Mr. SHERLEY: A bill (H. R. 11963) granting an increase of pension to Pernina S. Owen; to the Committee on Invalid

By Mr. STEPHENS of Texas: A bill (H. R. 11964) granting an increase of pension to James J. Boyd; to the Committee on Pensions.

By Mr. TRIBBLE: A bill (H. R. 11965) for the relief of John Billups; to the Committee on War Claims.

By Mr. WILLIS: A bill (H. R. 11966) granting a pension to John W. Thatcher; to the Committee on Pensions.

By Mr. YOUNG of Texas: A bill (H. R. 11967) for the relief of the estate of Edward E. Douglas, deceased; to the Committee on War Claims.

Also, petition of the Daughters of Liberty of New York City, N. Y., favoring the passage of House bill 6060, restricting immigration; to the Committee on Immigration and Naturalization.

SENATE.

Tuesday, January 20, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. ALBERT B. FALL, a Senator from the State of New Mexico, appeared in his seat to-day.

The Journal of yesterday's proceedings was read and approved.

FRENCH SPOLIATION CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting the findings of fact and conclusions of law and opinions filed under the act of January 20, 1885, in the French spoliation claims set out in the annexed findings by the court relating to the following causes:

The schooner Seaflower, Luke Baker, master (H. Doc. No.

622), and

The brig Patsey, John Livingston, master (H. Doc. No. 618). The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

He also laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law filed under the act of January 20, 1885, in the French spoliation claims set out in the annexed findings by the court relating to the following causes:

The ship Rising Sun, Thomas Baker, master (H. Doc. No.

The schooner Port Royal, William Smith, master (H. Doc. No. 623);

The brig Betsey, James Weaver, master (H. Doc. No. 620) The brig Six Brothers, John Needham, master (H. Doc. No. 619); and

The brig Julia, Samuel Caleff, master (H. Doc. No. 617)

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 3638) providing

for the issuance of a patent to Joe Joubert,

The message also announced that the House had passed the bill (S. 541) granting to the Emigration Canon Railroad Co., a corporation of the State of Utah, permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, a certain piece of land now included in the Mount Olivet Cemetery, Salt Lake County, Utah, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the

Senate .

H. R. 5993. An act authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes

H. R. 7951. An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture;

H. R. 6827. An act to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," approved August 14,

H. R. 11006. An act authorizing the disposal of a portion of

the Fort Bidwell Indian School, Cal.

WORKMEN'S COMPENSATION AND EMPLOYERS' LIABILITY.

Mr. OVERMAN. Mr. President, I send to the desk a letter from the vice president and representative of the Order of Railway Conductors, the vice president and representative of the Brotherhood of Locomotive Firemen and Enginemen, and the vice president and representative of the Brotherhood of Railroad Trainmen, with resolutions adopted at the national conventions of these orders. I ask that the letter may be read and that the accompanying resolutions may be printed in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Order of Railway Conductors; Brotherhood of Locomotive Firemen and Enginemen; Brotherhood of Railroad Trainmen.]

WASHINGTON, D. C., January 19, 1914.

WASHINGTON, D. C., January 19, 1914.

Dear Senator: That you may know the wishes and attitude of the 300,000 members of the above organizations on workmen's compensation, herewith is a copy of a resolution adopted by national conventions which were attended by 2,276 delegates from all parts of the United States.

States.

The total casualties to trainmen last year were 45,538. Fully 38,000 of such accidents occurred to firemen, conductors, brakemen, and switchmen. Therefore the above organizations have a better right to speak for the membership, because they would be the principal beneficiaries if such a law was enacted. We ask you to use your influence and oppose all pending bills, because such a law would be prejudicial to the welfare of the classes stated above.

The employers' liability law affords a better way for adequate compensation. Since the decision of the United States Supreme Court many cases are being settled out of court, and in many instances employees are able to settle for a small sum of money and a position, which means more than money. Workmen's compensation would preclude such settlements.

Trusting you shall oppose the pending bills, we are,
Yours, very truly,

W. M. Clark.

Vice President and Representative O. R. C.
J. McNamara,
Vice President and Representative B. L. F. & E.
Nat Fitzpatrick,
Vice President and Representative B. of R. T.

The VICE PRESIDENT. The letter will be referred to the Committee on the Judiciary and the accompanying resolutions will be likewise referred and printed in the RECORD, without objection.

The accompanying resolutions are as follows:

Order of Railway Conductors, resolution adopted by the national convention held in Detroit, Mich., May 12 to May 29, 1913.

Be it resolved, That the Order of Railway Conductors does not favor a workmen's compensation law as an exclusive remedy for damages sustained through injury or death of employees of railroads, but it believes that inasmuch as compensation and liability laws are for the benefit of the employee it will lend its support to any bill that will strengthen the present liability laws, Federal and State, and to any compensation bill satisfactory to those who favor the principle of workmen's compensation: Provided, houvever, That said compensation bill shall give the employee his option and election to either claim indemnity under the compensation law or maintain an action under the lia-

bility laws, such option and election to be exercised by the employee after his injury, or, in case of death, by his dependents after death; and that we will oppose any effort to repeal, suspend, or amend the present liability laws, Federal and State, unfavorable to the employee.

Brotherhood of Locomotive Firemen and Enginemen, resolution adopted by the twenty-sixth national convention, held in Washington, D. C., June 2 to July 3, 1913.

Resolved, That this, the twenty-sixth convention of the Brotherhood of Locomotive Firemen and Enginemen, is opposed to the enactment of an exclusive Federal workmen's compensation law or of any workmen's Federal compensation law that will in the slightest interfere with, impair, or obstruct the operation of the Federal employers' liability law or of any State employers' liability law.

Resolved further, That we believe that it is to the best interests of railroad employees that no workmen's compensation legislation be attempted by the United States Congress, but that that body direct its efforts along that line to strengthening and improving the present Federal employers' liability law in the Interests of railroad employees.

Resolved further, That it is our belief that it is to the best interests of railroad employees injured in the performance of their duties as such, or the heirs of those who meet death in the performance of such duties, that it should be optional with such persons to accept the compensation provided by their respective State workmen's compensation law or to sue under the Federal employers' liability law.

Resolved further, That we heartly commend the course pursued by our worthy president. W. S. Carter, relative to the first Sutherland exclusive workmen's Federal compensation bill introduced in the United States Congress, and that we realize that but for his action in the premises and for the wide publicity given the said Sutherland bill in the columns of our magazine this measure would have become enacted into law to the very detriment of the interests of injured railroad employees and the heirs of those killed in railroad service.

Brotherhood of Railroad Trainmen, resolution adopted by the national convention held in San Francisco, Cal., May 19 to June 4, 1913.

convention held in San Francisco, Cal., May 19 to June 4, 1913.

Session of Tuesday, May 27:

Motion that the convention go on record as opposed to any form of Federal workmen's compensation law affecting the Brotherhood of Railroad Trainmen. Carried.

Motion that the president be instructed to notify the President of the United States, President of the Senate, and the Speaker of the House of Representatives of the action taken by the convention regarding workmen's compensation. Carried.

Session of Monday, June 2:

In view of the fact that this convention has gone on record by a most decisive vote in opposition to any Federal workmen's compensation act, and in view of the fact that bills almost identical with the so-called Brantley bill have been introduced in the National Senate and House of Representatives, we strongly recommend that the efforts of this brotherhood and its officers be directed to the defeat of these or any similar bills. We further recommend that in States wherein liability laws have not been enacted every effort be used to procure the adoption of laws which are in conformity with the Federal liability law and to supplement it.

The resolutions represent approximately the unanimous opinion of 2,276 delegates.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of Nathan Hale Branch, American Continental League, of Philadelphia; of Yorktown Branch, American Continental League, of Philadelphia; of the County Cork Men's Patriotic and Beneficial Association, of Philadelphia, all in the State of Pennsylvania, and of Winfield H. Scott Branch, American Continental League, of Brooklyn, N. Y., remonstrating against any appropriation by Congress for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations,

Mr. GRONNA presented a memorial of sundry citizens of Wheelock, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Com-

mittee on the District of Columbia.

Mr. BRISTOW presented a memorial of sundry citizens of Stafford, Kans., remonstrating against the enactment of legislation authorizing the removal of assistant postmasters from the classified service, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Herndon, Shaffer, and Emporia, all in the State of Kansas, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. GALLINGER presented a petition of Evening Star Council, Daughters of Liberty, of Quincy, N. H., praying for the enactment of legislation to further restrict immigration, which

was referred to the Committee on Immigration.

Mr. HITCHCOCK presented a memorial of sundry citizens of Burt County, Nebr., and a memorial of sundry citizens of Sherman County, Nebr., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a memorial of Local Branch No. 74, National Association of Civil Service Employees, of Omaha, Nebr., remonstrating against enactment of legislation authorizing the removal of assistant postmasters from the classified service, which was referred to the Committee on Post Offices and Post

Mr. WORKS presented a petition of the Chamber of Commerce of Sacramento, Cal., remonstrating against certain features of the income-tax law, which was referred to the Committee on Finance.

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the adoption of the proposed plan of the Park Commission for the improvement of the city of Washington, which was referred to the Committee on the District of Columbia.

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the passage of the so-called Harrison antinarcotic bill, which was referred to the Committee on Finance

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the enactment of legislation providing for a reorganization of the Consular and Diplomatic Service, which was referred to the Committee on Foreign Relations.

Mr. McCUMBER presented resolutions adopted by the Commercial Club of Enderlin, N. Dak., favoring the enactment of legislation providing free mail delivery to all towns or villages having 1,000 population or over, which were referred to the Committee on Post Offices and Post Roads.

Mr. SHEPPARD presented a memorial of sundry citizens of Chapel Hill, Tex., remonstrating against the adoption of the socalled literacy test in the immigration bill, which was referred

to the Committee on Immigration.

Mr. SMITH of Maryland presented a memorial of sundry citizens of Millington, Md., and a memorial of sundry citizens of Takoma Park., D. C., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Delmar, Md., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigra-

Mr. PERKINS presented a memorial of sundry citizens of Humboldt County, Cal., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the enactment of legislation providing for a reorganization of the Consular and Diplomatic Service, which was referred to the Committee on Foreign Relations.

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the adoption of the proposed plan of the Park Commission for the improvement of the city of Washington, which was referred to the Committee on the District of Columbia.

He also presented a petition of the congregation of the First Congregational Church of Campbell, Cal., and a petition of the congregation of the First Baptist Church of Berkeley, Cal., praying for the suspension of the proposed naval programs of the great powers, which were referred to the Committee on Naval Affairs

He also presented a memorial of the Chamber of Commerce of Sacramento, Cal., remonstrating against certain requirements of the income-tax law, which was referred to the Committee on Finance

He also presented a memorial of the German-American Sweigervband, of San Jose, Cal., remonstrating against the enactment of legislation prohibiting the sale, manufacture, and importation of distilled liquor containing alcohol except for certain specified purposes, which was referred to the Committee on the Judiciary.

He also presented a petition of the Chamber of Commerce of Sacramento, Cal., praying for the passage of the so-called Harrison antinarcotic bill, which was referred to the Committee on

Mr. POINDEXTER presented a petition of the Vineland Industrial Club, of Clarkston, Wash., praying that an appropriation be made for the further improvement of the Columbia River bar, which was referred to the Committee on Commerce.

Mr. SHIVELY presented a petition of sundry citizens of Fort Wayne, Ind., praying for the enactment of legislation to further restrict immigration and remonstrating against making Columbus Day, October 14, a legal holiday, which was referred to the Committee on Immigration.

REVIEW OF DECISIONS OF HIGHEST STATE COURTS.

Mr. ROOT. From the Committee on the Judiciary I report back favorably the bill (S. 94) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and I submit a report (No. 161) thereon. The bill proposes to amend the Judicial Code by conferring jurisdiction upon the Supreme Court to review final decisions rendered by the highest court of a State when the decision has been in favor of a claim of right under the Constitu-tion, treaties, or laws of the United States.

There have been six bills introduced in the Senate upon this subject, all designing to accomplish the same object. port is in effect a committee substitute for the six. It is technically a report of the first one on the list. The other five I now report back to the Senate with a recommendation that they be indefinitely postponed. Those are Senate bill 1320, introduced by Mr. Jones (for Mr. Clarp) April 21, 1913; Senate bill 1783, introduced by Mr. Nelson (by request) May 5, 1913; Senate bill 3492, introduced by Mr. Gallinger November 29, 1913; Senate bill 3609, introduced by Mr. Smith of Georgia December 10, 1913; and Senate bill 3994, introduced by Mr. Root January 14, 1914.

I ask that Senate bill 94 may go to the calendar under Rule VIII, and I give notice that at the first opportunity, to-morrow if possible, I shall ask unanimous consent for its consideration, as the bill is substantially the same as a bill which passed the Senate at the last session; and I move the indefinite postpone-

ment of the five other bills which I have enumerated.

The VICE PRESIDENT. Senate bill 94 will be placed on the calendar, and the remaining bills will be indefinitely postponed, if there be no objection.

The remaining bills were postponed indefinitely, as follows: S. 1320. A bill to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911

8.1783. A bill to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

S. 3994. A bill to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

S. 3609. A bill to amend section 237 of the Judicial Code so as to provide for a review by the Supreme Court of the United States of all final decisions rendered by the highest court of a State in sults of the character and kind named in said section, and for other purposes; and

S. 3492. A bill to amend section 237 of "An act to codify, revise, and amend the laws relating to the judiciary," approved

March 3, 1911.

THE UNITED STATES STEEL CORPORATION.

Mr. NEWLANDS. From the Committee on Interstate Commerce I report back Senate resolution 241 directing the Interstate Commerce Commission to conduct an examination to ascertain whether facts or evidence exist justifying the Government in instituting proceedings for recovery of fines, and so forth, from the United States Steel Corporation, its subsidiaries, or any common carrier, because of unlawful rebates within the last six years, with amendments, and I submit a report (No. 162) thereon. The committee report the resolution with the recommendation that it be referred to the Attorney General and to the Interstate Commerce Commission for investigation and for such action as shall be deemed advisable by them, or either of them, in the public interest. The testimony taken before the committee in connection with the resolution is also submitted.

The VICE PRESIDENT. The resolution will be placed on

the calendar.

THE COMMITTEE ON INTERSTATE COMMERCE.

Mr. NEWLANDS. I am instructed by the Committee on Interstate Commerce to report a resolution, which I ask to have

The resolution (S. Res. 248) was read, as follows:

The resolution (S. Res. 248) was read, as follows:

Resolved, That the Committee on Interstate Commerce, or any subcommittee thereof, be, and the same is hereby, authorized during the Sixty-third Congress to send for books and papers, to administer oaths, and to employ, if necessary, a stenographer at a price not to exceed \$1 per printed page to report such hearings as may be had in connection with any subject which may be pending before the said committee or under investigation or examination thereby; that the committee or any subcommittee thereof may sit during the sessions or recesses of the Senate; the expenses thereof to be paid out of the contingent fund of the Senate; and that such committee or subcommittee thereof may sit during the sessions of the Senate or during the vacation of the Senate at any place in the United States.

Mr. NEWLANDS. I should like to have unanimous consent

for the present consideration of the resolution.

The VICE PRESIDENT. The resolution will be referred under the law to the Committee to Audit and Control the Contingent Expenses of the Senate, there being a law providing that no appropriation shall be made out of the contingent fund of the Senate without a reference to that committee.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES: A bill (S. 4095) making timberlands available for homestead settlement, and for other purposes; to the Committee on Publie Lands.

By Mr. SUTHERLAND:

A bill (S. 4096) to amend the act authorizing the National Academy of Sciences to receive and hold trust funds for the promotion of science, and for other purposes; to the Committee on the Judiciary

By Mr. WORKS:

A bill (S. 4097) for the purchase of a collection of California quartz gems for the National Museum; to the Committee on the Library. By Mr. THOMAS:

A bill (S. 4098) granting an increase of pension to Henry

A bill (S. 4099) granting an increase of pension to Frank A.

A bill (S. 4100) granting an increase of pension to Mary A. Price;

A bill (S. 4101) granting an increase of pension to Mary C. Jackson;

A bill (S. 4102) granting a pension to Mary C. Christensen; A bill (S. 4103) granting an increase of pension to John H.

A bill (S. 4104) granting a pension to William G. Neeley; A bill (S. 4105) granting an increase of pension to Francis Mahon (with accompanying papers);

bill (S. 4106) granting a pension to Lucy S. Hamilton (with accompanying papers);

A bill (S. 4107) granting a pension to Hiram B. Kelly (with accompanying papers);

A bill (S. 4108) granting an increase of pension to Jeanie G.

Lyles (with accompanying papers); and

A bill (S. 4100) granting an increase of pension to George W. Cook (with accompanying paper); to the Committee on Pensions.

By Mr. NEWLANDS:

A bill (S. 4110) authorizing the cutting of timber for mining purposes by corporations organized in one State and conducting mining operations in another; to the Committee on Public

By Mr. HITCHCOCK:

A bill (S. 4111) authorizing the Secretary of War to donate to the United Spanish War Veterans, Camp Lee Forby No. 1, of Omaha, Nebr., two brass or bronze cannon or fieldpieces, with their carriages; to the Committee on Military Affairs.

By Mr. KERN:

A bill (S. 4112) granting an increase of pension to James T. Kent (with accompanying papers);

bill (S. 4113) granting a pension to Clarence A. Murphy (with accompanying papers);

A bill (S. 4114) granting an increase of pension to David R. Forsha (with accompanying papers); and

A bill (S. 4115) granting a pension to Ralph A. Meyer (with accompanying papers); to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (8. 4116) granting a pension to Maria A. Holmes (with accompanying papers); to the Committee on Pensions. By Mr. BURLEIGH:

A bill (S. 4117) granting an increase of pension to Hanson B. Simmons; to the Committee on Pensions.

By Mr. McCUMBER:
A bill (S. 4118) granting an increase of pension to William B. Scace; and

A bill (S. 4119) granting an increase of pension to Nelson W. Armstrong (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 4120) granting an honorable discharge to Emmet M. Lowery; to the Committee on Military Affairs.

A bill (S. 4121) granting pensions to all honorably discharged

survivors of Indian wars and their widows and minor children;

A bill (S. 4122) granting an increase of pension to Cyrus M. Wilson (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 4123) granting a pension to Fannie E. Douglass;

A bill (S. 4124) granting an increase of pension to Charles J. F. Reimer; to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 4125) to place the name of Michael James McCormack upon the active list of the Navy; to the Committee on Naval Affairs.

By Mr. JONES:

A joint resolution (S. J. Res. 102) authorizing the delivery to the proper authorities of Columbia County, State of Washington, two condemned bronze or brass cannon or fieldpieces and suitable outfit of cannon balls; to the Committee on Military Affairs.

ADDRESS BY LORD CHANCELLOR HALDANE (S. DOC. NO. 371).

Mr. ROOT. Mr. President, some time ago, in the first session of this Congress, the Senate had printed as a document, being Senate Document No. 233, an address by Lord High Chancellor Haldane before the American Bar Association at Montreal, Canada, September 1. There has been a very large demand for it, It appears that in the copy which was handed in at that time to be printed there was omitted the introduction by the Chief Justice of the United States, who presented the Lord Chancellor to the bar association and the audience, and some brief proceedings consequent upon the delivery of the address. There is a general desire to have these proceedings printed with the address, and I ask unanimous consent that a second edition be printed with these proceedings included. It will add only two or three pages, I think, to the document.

Mr. SMOOT. Mr. President, I will say to the Senator from New York that if the document is merely ordered to be reprinted it can not carry the additional matter, and therefore it

will have to be printed as a separate document.

The VICE PRESIDENT. Is of the Senator from New York? Is there objection to the request

Mr. CHILTON. I did not hear the introductory remarks of

the Senator. What is the document?

Mr. ROOT. I desire to have pri I desire to have printed the address of Lord Chancellor Haldane before the American Bar Association, together with the introduction by Chief Justice White.

Mr. CHILTON. I was going to say that it has already been printed.

Mr. ROOT. It has been printed, but without the introduction.

Mr. CHILTON. Very well.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the order will be made.

ADDRESS BY HON. GEORGE W. NORRIS (S. DOC. NO. 372).

Mr. CLAPP. In connection with the subject of printing, I desire to ask that there be printed in the RECORD an address delivered by Hon. George W. Norris, the junior Senator from Nebraska, before the First National Conference on Popular Government, held at Memorial Continental Hall, Washington, D. C., December 6, 1913.

The VICE PRESIDENT. Does the Senator desire it printed as a public document?

Mr. CLAPP. Yes, sir. Mr. SMOOT. Mr. President, do I understand the Senator to ask that it be printed as a public document?

Mr. CLAPP. I am not particular as to that. Let it be printed in the Record. That will be sufficient.

Mr. SMOOT. I have no objection to its being printed as a public document.

Mr. CLAPP. Very well; let it be printed, then, as a public

The VICE PRESIDENT. Is there objection to the request of the Senator from Minnesota? The Chair hears none, and the address will be printed as a public document.

PRESIDENTIAL PRIMARIES.

Mr. SHERMAN. I wish to give notice that on Tuesday next the 27th instant, I shall submit some remarks on Senate bill 3922, relating to Presidential primaries, and to the current politics involved in the subject matter of the bill.

THE EMIGRATION CANON RAILROAD CO.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 541) granting to the Emigration Canon Railroad Co., a corporation of the State of Utah, permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, a certain piece of land now included in the Mount Olivet Cemtetry, Salt Lake County, Utah, which was, on page 1, line 8, to strike out all after the colon down to and including the word "acre," on page 2, line 9, and insert: "Commencing at a point 195 62 feet east and 100 feet north of the southwest corner of Mount Olivet Cemetery (formerly the southwest corner of the Fort Douglas Military Reservation), in Salt Lake County, Utah; thence counding a 20° 35' curve to the right a distance of 351.99 feet to a point on the west line of the said Mount Olivet Cemetery, said point being a distance of 306.94 feet north from the southwest corner of said Mount Olivet Cemetery, the center of said curve with a radius of 279.94 feet, being located at a point 279.94 feet east and 366.94 feet north from the southwest corner of said Mount Olivet Cemetery; thence south 266.94 feet to a point 100 feet north of the southwest corner of said Mount Olivet Cemetery; thence east a distance of 195.62 feet to place of beginning; containing in all three hundred and nineteen thousandths of an acre."

Mr. SMOOT. I move that the Senate concur in the amend-

ment of the House of Representatives, The motion was agreed to.

HOUSE BILLS REFERRED.

H. R. 5993. An act authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes was read twice by its title and referred to the Committee on Public

H. R. 6827. An act to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," approved August 14, 1912, was read twice by its title and referred to the Committee on Public Health and National Quarantine.

H. R. 7951. An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, was read twice by its title and referred to the Committee on Education and Labor.

Mr. SMOOT. I think that bill should be referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. That action will be taken, and the bill will be referred to the Committee on Agriculture and

H. R. 11006. An act authorizing the disposal of a portion of the Fort Bidwell Indian School, Cal., was read twice by its title and referred to the Committee on Indian Affairs.

THE PRESIDENT'S ADDRESS (H. DOC. NO. 625)

The VICE PRESIDENT (at 12 o'clock and 2" minutes p. m.). In pursuance of the resolution adopted yesterday by the Senate, the Sergeant at Arms will proceed to carry out the order of the Senate.

Thereupon the Senate, headed by the Sergeant at Arms and preceded by the Vice President and the Secretary of the Senate, proceeded to the Hall of the House of Representatives.

The Senate returned to its Chamber at 1 o'clock p. m.

The address of the President of the United States, delivered this day to both Houses of Congress, is as follows:

The PRESIDENT. Gentlemen of the Congress, in my report "on the state of the Union," which I had the privilege of reading to you on the 2d of December last, I ventured to reserve for discussion at a later date the subject of additional legislation regarding the very difficult and intricate matter of trusts and monopolles. The time now seems opportune to turn to that great question; not only because the currency legislation, which absorbed your attention and the attention of the country in December, is now disposed of, but also because opinion seems to be clearing about us with singular rapidity in this other great In the matter of the currency it cleared suddenly and very happily after the much-debated act was passed: in respect of the monopolies which have multiplied about us and

in regard to the various means by which they have been organized and maintained it seems to be coming to a clear and all but universal agreement in anticipation of our action, as if by way of preparation, making the way easier to see and easier to set out upon with confidence and without confusion of counsel. Legislation has its atmosphere like everything else, and the atmosphere of accommodation and mutual understanding which we now breathe with so much refreshment is matter of sincere

congratulation. It ought to make our task very much less difficult and embarrassing than it would have been had we been obliged to continue to act amidst the atmosphere of sus-picion and antagonism which has so long made it impossible to approach such questions with dispassionate fairness. Constructive legislation, when successful, is always the embodiment of convincing experience, and of the mature public opinion which finally springs out of that experience. Legislation is a business of interpretation, not of origination; and it is now plain what the opinion is to which we must give effect in this matter. It is not recent or hasty opinion. It springs out of the experience of a whole generation. It has clarified itself by long contest, and those who for a long time battled with it and sought to

change it are now frankly and honorably yielding to it and seeking to conform their actions to it.

The great business men who organized and financed monopoly and those who administered it in actual everyday transactions have year after year, until now, either denied its existence or justified it as necessary for the effective maintenance and development of the vast business processes of the country in the modern circumstances of trade and manufacture and finance; but all the while opinion has made head against them. The average business man is convinced that the ways of liberty are also the ways of peace and the ways of success as well; and at last the masters of business on the great scale have begun to yield their preference and purpose, perhaps their judgment also, in honorable surrender.

What we are purposing to do, therefore, is, happily, not to hamper or interfere with business as enlightened business men prefer to do it, or in any sense to put it under the ban. The antagonism between business and government is over. We are now about to give expression to the best business judgment of America, to what we know to be the business conscience and honor of the land. The Government and business men are ready to meet each other halfway in a common effort to square business methods with both public opinion and the law. The best informed men of the business world condemn the methods and processes and consequences of monopoly as we condemn them; and the instinctive judgment of the vast majority of business men everywhere goes with them. We shall now be their spokesmen. That is the strength of our position and the sure prophecy of what will ensue when our reasonable work is done.

When serious contest ends, when men unite in opinion and purpose, those who are to change their ways of business joining with those who ask for the change, it is possible to effect it in the way in which prudent and thoughtful and patriotic men would wish to see it brought about, with as few, as slight, as easy and simple business readjustments as possible in the circumtances, nothing essential disturbed, nothing torn up by the roots, no parts rent asunder which can be left in wholesome combination. Fortunately, no measures of sweeping or novel change are necessary. It will be understood that our object is not to unsettle business or anywhere seriously to break its established courses athwart. On the contrary, we desire the laws we are now about to pass to be the bulwarks and safeguards of industry against the forces who have disturbed it. What we have to do can be done in a new spirit, in thoughtful moderation, without revolution of any untoward kind.

We are all agreed that "private monopoly is indefensible and intolerable," and our program is founded upon that conviction. It will be a comprehensive but not a radical or unacceptable program and these are its items, the changes which opinion deliberately sanctions and for which business waits:

It waits with acquiescence, in the first place, for laws which will effectually prohibit and prevent such interlockings of the personnel of the directorates of great corporations—banks and railroads, industrial, commercial, and public service bodies—as in effect result in making those who borrow and those who lend practically one and the same, those who sell and those who buy but the same persons trading with one another under different names and in different combinations, and those who affect to compete in fact partners and masters of some whole field of business. Sufficient time should be allowed, of course, in which to effect these changes of organization without inconvenience or confusion.

Such a prohibition will work much more than a mere negative good by correcting the serious evils which have arisen because, for example, the men who have been the directing spirits of the great investment banks have usurped the place which belongs to independent industrial management working in its own behoof. It will bring new men, new energies, a new spirit of initiative, new blood into the management of our great business enterprises. It will open the field of industrial development and origination to scores of men who have been obliged to serve when their abilities entitled them to direct. It will immensely hearten the young men coming on and will greatly enrich the business activities of the whole country.

business activities of the whole country.

In the second place, business men as well as those who direct public affairs now recognize, and recognize with painful clearness, the great harm and injustice which has been done to many, if not all, of the great railroad systems of the country by the way in which they have been financed and their own distinctive interests subordinated to the interests of the men who financed them and of other business enterprises which those men wished to promote. The country is ready, therefore, to accept, and accept with relief as well as approval, a law which will confer upon the Interstate Commerce Commission the power to superintend and regulate the financial operations by which the railroads are henceforth to be supplied with the money they need

for their proper development to meet the rapidly growing requirements of the country for increased and improved facilities of transportation. We can not postpone action in this matter without leaving the railroads exposed to many serious handleaps and hazards; and the prosperity of the railroads and the prosperity of the country are inseparably connected. Upon this question those who are chiefly responsible for the actual management and operation of the railroads have spoken very plainly and very earnestly, with a purpose we ought to be quick to accept. It will be one step, and a very important one, toward the necessary separation of the business of production from the business of transportation.

The business of the country awaits also, has long awaited and has suffered because it could not obtain, further and more explicit legislative definition of the policy and meaning of the existing antitrust law. Nothing hampers business like uncertainty. Nothing daunts or discourages it like the necessity to take chances, to run the risk of falling under the condemnation of the law before it can make sure just what the law is. Surely we are sufficiently familiar with the actual processes and methods of monopoly and of the many hurtful restraints of trade to make definition possible, at any rate up to the limits of what experience has disclosed. These practices, being now abundantly disclosed, can be explicitly and item by item forbidden by statute in such terms as will practically eliminate uncertainty, the law itself and the penalty being made equally plain.

And the business men of the country desire something more than that the menace of legal process in these matters be made explicit and intelligible. They desire the advice, the definite guidance and information which can be supplied by an administrative body, an interstate trade commission.

The opinion of the country would instantly approve of such a commission. It would not wish to see it empowered to make terms with monopoly or in any sort to assume control of business, as if the Government made itself responsible. It demands such a commission only as an indispensable instrument of information and publicity, as a clearing house for the facts by which both the public mind and the managers of great business undertakings should be guided, and as an instrumentality for doing justice to business where the processes of the courts or the natural forces of correction outside the courts are inadequate to adjust the remedy to the wrong in a way that will meet all the equities and circumstances of the case!

Producing industries, for example, which have passed the point up to which combination may be consistent with the public interest and the freedom of trade, can not always be dissected into their component units as readily as railroad companies or similar organizations can be. Their dissolution by ordinary legal process may oftentimes involve financial consequences likely to overwhelm the security market and bring upon it breakdown and confusion. There ought to be an administrative commission capable of directing and shaping such corrective processes, not only in aid of the courts but also by independent suggestion, if necessary.

Inasmuch as our object and the spirit of our action in these

matters is to meet business half wav in its processes of selfcorrection and disturb its legitimate course as little as possible, we ought to see to it, and the judgment of practical and sagacious men of affairs everywhere would applaud us if we did see to it, that penalties and punishments should fall not upon business itself, to its confusion and interruption, but upon the individuals who use the instrumentalities of business to do things which public policy and sound business practice condemn. Every act of business is done at the command or upon the initiative of some ascertainable person or group of persons. These should be held individually responsible and the punishment should fall upon them, not upon the business organization of which they make illegal use. It should be one of the main objects of our legislation to divest such persons of their corporate cloak and deal with them as with those who do not represent their corporations, but merely by deliberate intention break Business men the country through would. I am sure. applaud us if we were to take effectual steps to see that the officers and directors of great business bodies were prevented from bringing them and the business of the country into disrepute and danger.

Other questions remain which will need very thoughtful and practical treatment. Enterprises in these modern days of great individual fortunes are oftentimes interlocked, not by being under the control of the same directors but by the fact that the greater part of their corporate stock is owned by a single person or group of persons who are in some way intimately related in interest. We are agreed, I take it, that holding companies should be prohibited, but what of the controlling private owner-

ship of individuals or actually cooperative groups of individu-Shall the private owners of capital stock be suffered to be themselves in effect holding companies? We do not wish, I suppose, to forbid the purchase of stocks by any person who pleases to buy them in such quantities as he can afford, or in any way arbitrarily to limit the sale of stocks to bona fide pur-Shall we require the owners of stock, when their voting power in several companies which ought to be independent of one another would constitute actual control, to make election in which of them they will exercise their right to vote? This question I venture for your consideration.

There is another matter in which imperative considerations of justice and fair play suggest thoughtful remedial action. Not only do many of the combinations effected or sought to be effected in the industrial world work an injustice upon the public in general; they also directly and seriously injure the individuals who are put out of business in one unfair way or another by the many dislodging and exterminating forces combination. I hope that we shall agree in giving private individuals who claim to have been injured by these processes the right to found their suits for redress upon the facts and judgments proved and entered in suits by the Government where the Government has upon its own initiative sued the combinations complained of and won its suit, and that the statute of limitations shall be suffered to run against such litigants only from the date of the conclusion of the Government's action. is not fair that the private litigant should be obliged to set up and establish again the facts which the Government has proved. He can not afford, he has not the power, to make use of such processes of inquiry as the Government has command of. Thus shall individual justice be done while the processes of business are rectified and squared with the general conscience.

I have laid the case before you, no doubt, as it lies in your own mind, as it lies in the thought of the country. What must every candid man say of the suggestions I have laid before you, of the plain obligations of which I have reminded you? That these are new things for which the country is not prepared? No; but that they are old things, now familiar, and must of course be undertaken if we are to square our laws with the thought and desire of the country. Until these things are done, conscientious business men the country over will be unsatisfied. They are in these things our mentors and colleagues. We are now about to write the additional articles of our constitution of peace, the peace that is honor and freedom and

prosperity.

BAILROADS IN ALASKA.

Mr. POINDEXTER. I ask unanimous consent that Senate

bill 48 be laid before the Senate.

The VICE PRESIDENT. The Senator from Washington asks unanimous consent that the Senate proceed to the consideration of Senate bill 48. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other

[Mr. POINDEXTER addressed the Senate. See Appendix.]

Mr. KENYON. Mr. President, I want to embrace this opportunity to submit just a few observations in respect to the pend-

I intend to vote for this bill, and I will do so with much satisfaction. It is a great piece of constructive legislation; a step forward in the economic policies of this country; a declaration of courage on the part of Congress. It is an attempt to do justice to a great possession, fourth in value of our possessions. It strikes a blow at monopoly. It will act as a safeguard to our Navy in times of war, and, in my humble judgment, the benefit to be derived from the passage of this bill and the development of railroads in Alaska, both to Alaska and to Nation, is beyond the dream of imagination.

I believe that in 10 years after the construction of this road the development of Alaska will have been so great that she will present herself as a candidate for representation by another star in our flag.

Alaska is a great storehouse. Within its hills and mountains the Creator has placed quantities of coal and gold and oil for the use of mankind; its agricultural and grazing lands will support a large population. It is time these resources were used for the benefit of mankind and not merely to augment the profits of those who by reason of their large wealth are enabled to plunder and fatten upon the wealth of Alaska. Alaska is a region of bigness. It needs big men for its development, imbued with the spirit of the ploneer, a spirit of courage, of inquisitiveness, of enterprise, of development, of home building.

The purchase by Seward for \$7,200,000 of the present Territory of Alaska was laughed at as "Seward's folly." were inclined to sneer at it; only recently have we come to comprehend that what was termed "Seward's folly" was really "Seward's wisdom." Alaska is larger than the original thirteen States, it is one-fifth as large as the entire continental United States. It has returned a great dividend upon the investment; it has produced nearly \$500,000,000 in gold, copper, fish, fur, and coal; and the oil, gas, and coal of Alaska will be enough for this country for a thousand years after our own coal and oil is It has 64,000,000 acres of grazing and agricultural In 1912 it carried on \$70,000,000 worth of commerce with the United States. It is a more valuable possession to us than the Philippines, and we have spent nothing like the money or had nothing like the trouble with it. Better treatment should be accorded than it has received; it is entitled to protection from financial pirates of the house of Guggenheim or the house of Morgan. It has been a prey for big business. It is well that Congress act now before any further monopolistic grip exerts itself thereon. The great storehouse that the Almighty has placed there and filled with coal and gold and copper and oil remains closed and locked to the people of this country. Even should there be little benefit to the immediate present in unlocking this storehouse, yet the people of to-morrow would profit

greatly thereby.

In a number of speeches here the value to our Navy of the development of the coal of Alaska has been clearly shown, although some dispute was injected into the discussion on yesterday as to the value of this coal. The coal for a fleet in the Pacific Ocean has been brought around from West Virginia to these points at a cost of some \$9 per ton. It is estimated that the building of railroads in Alaska will decrease the cost of this coal to the Navy one-half. That in itself ought to be sufficient argument for the experiment and the expenditure of \$40,000,000 This legislation, of course, as has been sugon these railroads. gested by the Senator from Washington [Mr. Poindexter]. must be followed by other legislation for the development of the coal lands. The coal fields of Alaska should not be left for speculation; they should be used for the American people and for the people of Alaska as far as may be necessary in main-

taining the American Navy.

It was stated in the House by the Delegate from Alaska [Mr. Wickersham] in his very extended and able speech that this bill was in the interest of the people, and that as he viewed it the question now before us as to control in Alaska was whether it should be Government or Guggenheim. It seems to me that the testimony before the Senate committee substantiates the statement of Mr. Wickersham. On such an issue we should not long delay.

I do not propose to go analytically into this bill or specifically into the great resources of Alaska. The report of the personal representative of the President on his tour through Alaska in 1913, the numerous publications on the subject, the able report of the Secretary of the Interior, the report of the Committee on the Territories, and the hearings conducted are sufficient for anyone of an inquiring mind to learn of these great resources. Certain it is that the resources of Alaska are stupendous and of the kind to benefit the people of the Nation.

I should like, however, to insert as a part of my remarks, without reading, certain portions of the report of the Secretary of the Interior on Alaskan railroads and Alaskan coal, and I ask per-

mission so to do.

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

the recovered to is as follows:

AS TO ALASKA.

The matter referred to is as follows:

As to Alaska.

The largest body of unused and neglected land in the United States is Alaska. It is now nearly half a century since we purchased this Territory, and it contains to-day less than 40,000 white inhabitants—less than 1,000 for each year it has been in our possession. The purchase was made as a means of protection against the possible aggression of a foreign nation and without the hope that it would be even self-supporting. In the intervening 46 years we have given it little more than the most casual concern, yet its mines, fisheries, and furs alone have added to our wealth the grand sum of \$500,000.000.

For almost a generation it was the rich harvest field of a single company. Individual fortunes have been made in that country larger than the price paid to Russia for the whole Territory. How rich its lands are in gold and copper, coal and oll, iron and zinc, no one knows. The prospector has gone far enough, however, to tell us that no other section of our land to-day makes so rich a mineral promise; and in agriculture the Government itself has demonstrated that it will produce in abundance all that can be raised in the Scandinavian countries, the hardy cereals and vegetables, the meats and the berries off which 9,000,000 people live in Norway, Sweden, and Finland. It has been estimated that there are 50,000,000 acres of this land that will make homes for a people as sturdy as those of New England. Whether this is so or not, it would appear that Alaska can be made self-sustaining agriculturally.

This vast and unsurpassed asset lies almost undeveloped. A Territory one-fifth the size of the United States contains less than a thou-

sand miles of anything that can be called a wagon road. It has a few inconsiderable stretches of railroad which terminate, with one exception, either in the wilderness or at a private industry. Only the richest of its mines can be worked, and one of its resources of greatest immediate value to the people—its coal lands—lies unworked.

The one constructive thing done by this Government on behalf of Alaska in nearly half a century was the importation of reindeer for the benefit of the Eskimo on the border of the Arctic Ocean. For the white man we have done nothing—so little, in fact, that to mention what we have done is matter for chagrin and humiliation. I have thought that perhaps the scandals that have developed in Alaska have been in some part the result of a feeling that it was a No-Man's Land, where the primal instincts and powers were the only law.

This unfortunate condition can not be explained on the ground of the inhospitality of the Alaskan climate. A careful study of isothermal lines shows that some of southeastern Alaska has a climate more temperate and more equable than that of this city, while much of the greater portion to the north has a kindlier climate than Stockholm or St. Petersburg. Moreover, our people are not stayed in their quest for homes or wealth by the rigors of a long winter. The spirit and purpose which brought them from Europe to Virginia and to Massachusetts take them to-day to Montana and Saskatchewan. The United States lately opened to entry a tract of land in Montana for which there were 46,000 applicants for registration, and only 7,000 of these could be given an opportunity to homestead. There is more railroad building 500 miles north of the Canadian border than there is for the same distance south of it.

Why has not this land been developed. The frank answer is that we did not realize until within a few years that it was worth developing. As soon as we discovered its value as a national asset we became alarmed and drew back, affrighted at the thought that we might lose it,

ALASKAN RAILROADS.

that we shall proceed at once and in a large way to deal with the problem of Alaskan development.

ALASKAN RALLEGADS.

I have already expressed to the Congress my belief that it was wise for the Government itself to undertake the construction and operation of a system of trunk-line rallroads in Alaska. And I am led to this view irrespective of the possibility of private enterprise undertaking such work, although my belief is that no railroads would be privately constructed in Alaska for many years to come excepting as adjuncts to some private enterprise. Be that as it may, it would seem wise for the Government to undertake this task upon grounds of State. The rates and the service of such railroads should be fixed with reference to Alaskan development—not with regard to immediate returns. The charges fixed should be lower for years to come than would justify private investment. I would build and operate these highways in the same spirit that the counties or the State build wagon roads—not for revenue, but for the general good. After all, a railroad is little more than an operated wagon road. In many countries they still call railroad cars "wagons." Our laws as to railroads are evolved from our old laws as to carriage by wagon. Our courts speak of railroads as property charged with a public interest and so jostify the regulation of their rates. But no court would justify the imposition of rates made for the purpose for which Alaskan rates should be made—the creation of a commonwealth. If this is our task, it should be done whole heartedly and with a consciousness that the dollar spent to-day on an Alaskan railroad will yield no more immediate return on the luvestment than the dollar spent to not be Panama Canal.

These, then, are the persuading reasons for the belief that the Government should undertake to drive from the coast inland one or more lines of railroad: (1) The Government already regards it as its duty to build wagon roads. Such roads when well built are almost as costly as the construction of a railr

ALASKAN COAL

It is not necessary to set forth here the extent or character of the coal fields of Alaska. Neither could I add to your knowledge or that of Congress as to the need for this coal, both by the Navy and by the industries and the people of the Pactific coast generally. There are almost unlimited quantities of a high grade of lightle in the interior which may not stand extended storage or transportation. This could be converted into electricity at the mouth of the mines and widely distributed for lighting, heat, and power. Toward the southern coast of the peniusula there are two well-known fields of a high-grade bituminous coal and some anthracite. These are the fields which have given rise to the troubles with which all are familiar.

These coal fields should be opened not to speculators but to operators. Those should have these lands who will use them. None should be opened as a basis for a gamble in future values. If these premises

express a sound public policy, there appears to me but one conclusion that can be reached as to the manner in which they may safely be turned over to the public—under a leasing and royalty system similar to that under which the State of Minnesota leases its ore lands and the States of Montana and Colorado their coal lands. The tracts opened should be disposed of to those who within a certain time would develop mines and make their product commercially available. This means that where a railroad is necessary to the operating of a mine the applicant should take a lease so conditioned for a limited period. Sufficient land should be leased as a body to justify long-continued and economical operation. As the average of all operations in the United States is 2,600 acres, lacluding many small holdings, this might be taken as a maximum unit.

operation. As the average of all operations in the United States is 2,600 acres, including many small holdings, this might be taken as a maximum unit.

There has been much dispute between those who favor making a lease for an indeterminate period, dependent alone upon continued operation, and those who believe it wisest to fix a term for the lease, 20, 30, or more years. This dispute seems to me of much more academic than practical interest. There should be no disposition to change the lessee. If a fixed term of lease is decided upon, the original lease should have an assured preferential right to a renewal until the mine is worked cut. So that in the end the fixed term is a reservation of the right on the part of the Government to make new terms at the end of a number of years, a reservation which could be fixed in an indeterminate lease.

A fixed minimum annual royalty would conduce to operation and prevent the holding of lands out of use. These are matters, however, of regulation upon which much thought should be expended, and the experience of other lands will be found helpful. If the principle of the homestead law is adopted, and one lease only permitted to any one person or group of persons, and all leases made nontransferable, excepting with the consent of the designated authority, it would seem that monopoly could be prevented. I would, however, add one other precaution: That in each field a large body of the coal land be reserved so that the public and the Navy might be rendered independent of private supplies, if that should become necessary.

The attraction of a leasing system is that it enables an operator to put all of his capital into the promotion of his enterprise, no investment being needed for the purchase of the land. This makes it possible for the man of comparatively small means to become a coal-mine operator. The lessee is pleased to pay the Government a royalty in leu of tying up a large amount of capital in the land itself.

There is this further consideration, which those interested in

Mr. KENYON. I regret that the bill does not limit more specifically the amount that might be expended by the President, but I do think it is a fair construction of the bill to say that the amount is limited to \$40,000,000. Section 5 of the bill

would seem by fair inference so to provide.

Mr. CHAMBERLAIN. Mr. President—

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Oregon?

Mr. KENYON. Certainly.

Mr. CHAMBERLAIN. I desire, with the permission of the Senator, to say that in the House of Representatives there was a limitation placed upon the amount to be expended, and those of us who had to do with the preparation of the Senate bill thought that it was limited in our bill. This amendment has been attached to the House bill, and I shall submit it to the committee with a view of placing the same limitation in the Senate bill:

Provided, however. That the total amount authorized by this act to be appropriated shall not exceed the sum of \$40,000,000, including any sum in or by this act appropriated.

I am glad

CHAMBERLAIN. Thirty-five million dollars is the amount proposed to be appropriated in the House bill. In the Senate bill it is proposed to appropriate \$40,000,000; and I think I shall suggest to the committee the propriety of making that limitation in the Senate bill.

Mr. KENYON. I hope the Senator will do so.
Mr. SMITH of Michigan. If the Senator will allow me—
The VICE PRESIDENT. Does the Senator from Iowa yield

to the Senator from Michigan?

Mr. KENYON. Certainly.

Mr. SMITH of Michigan. I should like to ask the Senator from Oregon whether he understands that there is any specific mileage authorized?

Mr. CHAMBERLAIN. The committee is going to suggest an amendment limiting the mileage, as well as the amount to be

Mr. SMITH of Michigan. Would it be agreeable to the Senator to say what limit is to be recommended?

Mr. CHAMBERLAIN. The committee was going to recom-

mend that it shall not exceed 1,000 miles.

Mr. SMITH of Michigan. Well, upon what would you base the thousand miles? Surely it is not 1,000 miles from Resurrection Bay up to Fairbanks?

Mr. CHAMBERLAIN. No.

Mr. KENYON. I understood the limit was to be about 733

Mr. CHAMBERLAIN. Seven hundred and thirty-three miles was the suggestion of the Alaska Railroad Commission, but we thought a thousand miles might be fixed as the limit; so that, in case the President saw fit, that many miles might be constructed, although, of course, there may be no necessity of going to that extent.

Mr. SMITH of Michigan. If the Senator from Oregon purposes to limit the extent of the mileage, it seems to me that it would commend itself to Senators who do not desire to gridiron a vast undeveloped area like that with small or disconnected I have been given to understand-and it is a subject, as the Senator from Oregon well knows, to which I have given some thought-that an expenditure of \$40,000 a mile would be a fair authorization through such parts of Alaska as railroad construction may be undertaken within reason, and, if that is true, why not limit it in that way and let Senators, whose judgment may be a little more conservative than that represented by the committee, take part in a development so important as this is likely to be?

Mr. KENYON. Of course, some miles, the Senator must bear in mind, may cost more and some less. His judgment is that an average of \$40,000 a mile will be sufficient?

Mr. SMITH of Michigan. I understand that there may be a vast difference in the cost of construction in different localities. Mr. KENYON. I wanted to get the Senator's proposition. understand he suggests \$40,000 a mile as an average.

Mr. SMITH of Michigan. Yes; an average of \$40,000 a mile

is most liberal.

Mr. KENYON. The Senator can offer an amendment to that effect.

Mr. SMITH of Michigan. A limitation as to mileage, it seems to me, would appeal to the better judgment of Senators as wise. I do hope that when the matter comes to a vote, which, as I understand, will be on Thursday, under the unanimous-consent agreement, that the Senator from Oregon and his associates may give us the benefit of a real, fair, conservative

judgment as to what ought to be undertaken, in the first instance, at least, by the Government in Alaska.

Mr. KENYON. Mr. President, I should certainly, for one, be glad to see that done, but, even if that can not be done, so far as I am concerned I am perfectly willing to trust the good judgment, wisdom, and patriotism of the President on this proposition. I do not think he would spend more money than That has not been our experience in Panama. was necessary. Nor do I think he would expend this money in any way so as to increase the value of the present Guggenheim or Morgan railroads before condemnation or purchase by the Government, which has been, to my mind, rather a serious objection to some phases of this bill-that we would increase the value of these roads and then possibly turn around and condemn them.

Mr. SMITH of Michigan. Mr. President, if it will not annoy

the Senator

Mr. KENYON. I yield to the Senator. Mr. SMITH of Michigan. I would not be understood as saying that I lacked confidence in the Executive judgment or in his prudence or economy in handling a matter of such vast im-I have during my service seen the largest discretion conferred upon the Executive, and never in a single instance has it been abused. I was one of those who voted \$50,000,000 into the hands of President McKinley at a time when the money could have been wasted if it had not been patriotically and prudently managed, and I would make no reflection upon the President in this limitation. I am simply questioning the wisdom of our embarking upon a new principle like this in Federal Government without some restrictions being placed about it.

Mr. KENYON. Of course, it is giving a tremendous power, and it might be better to have it limited in some way. It would be a very vicious proposition, it seems to me, to expend this money in making connected lines, which by their very construction would enhance the value of the other lines, and then turn around and condemn those lines. I am satisfied, however, that that will not be done.

As the Senator has suggested, many instances have arisen in which the President has been intrusted with large sums of money and large power. We intrusted the great work of build-ing the Panama Canal to the President of the United States. No voice of criticism has ever been raised. The money has been wisely expended, and I am content to believe that the same wisdom that has characterized that transaction will characterize this. The President undoubtedly has the same purpose in

mind as Congress-viz, to open this great storehouse, develop Alaska, and take it from the grip of private monopoly

Another thing: Attempts have been made to show that this project is different from governmental ownership of railroads. Mr. President, if the Government had constructed its own railroads in this country instead of giving away a vast public domain therefor, it would have been better for the entire country. That has not been done and can not now be remedied. It is water over the dam. The proposition of building this railroad in Alaska, however, is a pure proposition of the Government engaging in the railroad business. There may be some fine distinctions drawn between railroads built into pioneer countries and railroads built into thickly populated countries, but the principle is the same. There is no use in beating around the bush or apologizing or trying to draw distinctions. It is purely and simply a proposition of the Government going into the railroad business, and I can not see how any man who believes that the governmental ownership and operation of railroads is bad in theory and worse in practice can support this measure.

Some Senators on this floor have said they would not support it because it embodied the same principle as governmental ownership of railroads. I honor them for their frankness and their courage. I do not hesitate to support this bill because of this question, and I am glad that the passage of this bill-as I am sure, or feel reasonably certain, it will be passed—is rather in the nature of a declaration that the people of this country are not afraid of the proposition of the Government owning and operating railroads if they believe it necessary to the welfare of the country so to do.

I am not making an argument for governmental ownership. Men can vote for this bill who might not be in favor of the Government at this time taking over all the railroads in this country. I am glad, however, that Congress is not afraid to discuss the proposition, because the country is discussing it

and thinking about it.

I desire to place in the RECORD some figures relative to governmental ownership of railroads, which figures, I think, will be of interest to the people of the country. In fact, that is about all I had intended to do until the distinguished Senator from North Dakota [Mr. McCumber], on yesterday, said something implying that those who supported this bill were socialistic in their tendencies. Hence I have been diverted a little from the only thing I intended to do, which was to place these figures in the Record. I do so in the form of a letter sent to me by Hon. Clifford Thorne, chairman of the Iowa Railroad Commission. Mr. Thorne has been a great student of railroad problems for many years, and I make bold to say that no man in the Nation has a better conception of the railroad problem in general and in particular than has Mr. Thorne. A tireless student and a man of broad judgment, he brings to every subject a profundity of knowledge as well as a striking manner of expression.

Preliminary to that, however, I desire to say that it seems to me no one who can correctly read the signs of the times and is intellectually honest can deny that since the passage of the Elkins Act many things have happened that create in the minds of the people some doubt as to the success of governmental regulation apart from governmental ownership.

The question of governmental ownership of railroads will become in a few years a live question in our politics. not contend that at this particular time we are ready for governmental ownership, but the minds of the people are receptive as to arguments therefor—although they are receiving but the arguments on one side—more receptive than they were some years ago when a distinguished citizen of this Nation, upon his return from abroad, advocated governmental ownership. Many years ago a brilliant Senator from Colorado, Senator Patterson, introduced a bill, and advocated it on this floor, for the governmental ownership of railroads. It was rather shocking to the enthroned sentiment of the Senate at that time, but many of the predictions he made in regard to governmental regulation have come true.

I am familiar with the arguments against governmental ownership and the arguments for it, but I do not propose at this time to enter into any extended discussion of the subject. A prerequisite to any plan for governmental ownership is that the employees under such ownership must be absolutely removed from partisan politics, as our mail clerks and rural carriers now are. If this could not be done, if the great power of the railroad employees could be injected into our political life en masse to perpetuate any administration, I for one would never favor governmental ownership. That is one of the questions to be solved, and it must be solved if any successful plan is ever to be inaugurated.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from New Hampshire?

Mr. KENYON. Certainly.

Mr. GALLINGER. I am very much interested in the Senator's discussion of this important question. I will ask the Senator if he can tell us approximately the number of employees who would be under the control of the Government if the railroads of this country should pass into Government ownership?

Mr. KENYON. I do not want to say "under the control of the Government." I do not think a Government employee is I do not think a Government employee is under the control of the Government. I should prefer to say "in the service of the Government." I can not answer the

Mr. GALLINGER. Very likely I ought to have put my ques-

tion in that form.

Mr. KENYON. I can not answer the question. I do not

Mr. GALLINGER. If I remember correctly, there would be approximately 2,000,000 employees

Mr. KENYON. It may be possible.

Mr. GALLINGER. Would the Senator disfranchise those

Mr. KENYON. I would not. Mr. GALLINGER. The Senator says they ought not to be permitted to participate in politics; that they ought not to

take part in politics.

Mr. KENYON. I would place them under the civil service. If the civil service is to be stricken down, then matters of this kind and governmental ownership of telegraphs and telephones never can come, in my judgment. If, however, we had a civil service for them similar to that under which the operatives in the Post Office Department are employed, who, I think, generally take no offensive attitude in politics, that might solve the problem.

I think the Senator could not have misunderstood me when said that I never would favor governmental ownership of railroads unless some plan could be devised to keep this mass of employees from going into politics as a body to perpetuate

any administration.

Mr. GALLINGER. Yes; I think I correctly understood the Senator.

Mr. KENYON. But I would not disfranchise them; certainly not. You can not disfranchise the people of this country.

Mr. GALLINGER. The only thought I had in mind was that I know of no reason why those men should not be given the free right of the American citizen to vote their convictions under all circumstances, whether in the employ of the Government or not. I doubt very much whether, with that mass of men, a million or two million men, in the employ of a governmental instrumentality, we could devise any plan whereby they might not be manipulated so as to become a very important factor in our political system.

Mr. KENYON. Does the Senator feel that the mail clerks and rural carriers are anything of a menace to our system of government?

Mr. GALLINGER. No, I do not think so; but those men are not very much restricted in their political acts.

Mr. KENYON. I do not think you can control the judgment and the intellect and the action of the men upon the railroads of this country. They will vote according to their own con-

Mr. GALLINGER. I agree with the Senator, and I think that whatever restrictions can be placed upon them are very limited indeed; but that fact does not remove the possibility of their being controlled to a greater or less extent by Government influence.

Mr. THOMAS. I should like to ask the Senator whether he did not mean-and this is what I understood him to say-that he would never advocate any plan of governmental ownership unless some plan were devised whereby the large mass of employees would not operate in solidum for their own benefit, taking advantage of their numbers and organization to perpetuate either some system or some administration?

Mr. KENYON. Exactly.
Mr. THOMAS. That is the way I understood the Senator.

Mr. SMITH of Michigan. Oh, no.

Yes; and I want to put in the RECORD an Mr. KENYON. editorial from the Washington Times on this subject. should like to have it read except for the time it would take. It is rather short. I think I shall ask to have it read. cite this editorial with a feeling of sorrow that our civil service is in any way being stricken down at this time, because it is going to retard a great many important movements in this country. | be realities.

Mr. SMITH of Michigan. Mr. President, before we are unalterably committed to the editorial, I should like to ask the Senator a question.

Mr. KENYON. I am not asking that anybody shall be

unalterably committed to it.

Mr. SMITH of Michigan. I should like to suggest to my friend from Iowa that, if I understood him correctly, he said that under no circumstances would he be in favor of the Government ownership of railroads unless the employees of the system could be removed from participation in our politics.

Mr. KENYON. No; I said no such thing. The Senator can

not put me in that position.

Mr. SMITH of Michigan. I do not want to put the Senator in an unfair light.

Mr. KENYON. I do not propose that the Senator shall do so. Mr. SMITH of Michigan. Did the Senator say that unless they could be removed from politics

Mr. KENYON. I will repeat just what I said, so that there will be no question about it. I said that a prerequisite to any plan for governmental ownership, and inhering in the plan, is that the employees under such ownership must be absolutely removed from politics in the exercise of power en masse.

I used the term "en masse."

Mr. SMITH of Michigan. The Senator is an able lawyer

and a ripe student-

Mr. KENYON. I do not want to have to concede either of those statements.

Mr. SMITH of Michigan. It is generally conceded, I think. do not think I am overstating the matter. At least, I will take the responsibility for the statement.

I should like to ask the Senator if he knows in what form a law could be passed that would insure the prerequisite which he exacts.

Mr. KENYON. Civil service; that is all,

Mr. SMITH of Michigan. But that is not permanent. We have seen it struck down here within a few days.

Mr. KENYON. That is why I expressed my sorrow that any assault is being made on the civil service in this country.

Mr. SMITH of Michigan. Exactly. It is not permanent; and if Congress were by statute to set apart this class of employees so as to protect them in the best and most intelligent manner possible, the law would be good only until the same Congress or a future Congress might repeal it. So I think there is a great deal of hope that the Senator may not get quite to the position where he intimates he would be willing to subscribe to the doctrine of the governmental ownership of railroads; at least, I hope so.

Mr. KENYON. I think the Senator will agree with me that the public sentiment of this country is for civil service in the great departments of the Government and that that system shall stand; that merit shall be the qualification; and any party that strikes down the civil service will not be sustained by the American people.

Mr. SMITH of Michigan. I like that expression of the Senator's, although I am entirely out of accord with its funda-

mental philosophy.

Mr. KENYON. I am sorry the Senator is wrong about it.
Mr. SMITH of Michigan. I like the expression because it ought to be so; but instead of our civil service being a civil service it has degenerated into a most uncivil service, and the man they try to get out the quickest is the man whose tenure is supposed to be the safest.

Mr. KENYON. But these great matters of Government, the Senator knows, are moving on. They may be delayed for a little while; things may not work out just right; but the merit system in this country is not going to be destroyed, because the American people never will permit it to be destroyed.

Mr. SMITH of Michigan. I hope not.

Mr. KENYON. No political party will dare destroy it.

Mr. SMITH of Michigan. I hope it will not be ruthlessly

destroyed. I want merit to prevail.

Mr. KENYON. What I meant to say was that I shall never favor this system until we are certain that the civil service will prevail.

Mr. SMITH of Michigan. Then, I think, the Senator is a good way from the Utopian dream that some people flatter themselves is now about to be realized.

Mr. KENYON. Seven years ago I read some of the speeches of the Senator from Wisconsia [Mr. La Follette] in relation to the physical valuation of railroads, and that project was de-clared to be a Utopian dream; but I was glad to see the bill passed without a dissenting vote since I have been in the Senate. So, a good many of these Utopian dreams are coming to

Mr. SMITH of Michigan. The Senator must have read some other Senator's speech. He does not mean that the Senator from Michigan expressed any disapproval of the physical valuation of railroads?

Mr. KENYON. No. I think the Senator finally voted for

the bill.

Mr. SMITH of Michigan. I do not disapprove of the merit system in our Government; but the longer I live, and the more intimately I am associated with the public affairs of our country, the more I think that the merit system, so called, goes glimmering the moment it becomes expedient that the tenure shall be terminated.

Mr. KENYON. I do not agree with the Senator.

Mr. GALLINGER. Before the interesting editorial is read I wish to ask the Senator one question relating to the merit system.

Mr. KENYON. I was going to get through in 20 minutes,

Mr. President

Mr. GALLINGER. This is simply a practical question, and I think it ought to be answered. There is not a watchman and I am not sure that there is a charwoman in the Government service now who can be dismissed, under the civil-service law, without a hearing, without charges being put in writing and submitted to the employee, and a hearing granted. Would the Senator apply that system to the brakemen, the trackmen, and the other employees of a railroad?

Mr. KENYON. Why, of course I would. Are titled to a hearing just as much as anybody else?

Are not they en-

Mr. GALLINGER. How would the Senator put those men under the civil service so that a railroad corporation could not

dismiss a trackman for cause?

Mr. KENYON. They would not have to keep them working.

The Senator must take that into account. They withdraw men from active service now. They withdraw an engineer and he gets his hearing. The brotherhoods have settled that proposition. He has his hearing.

Mr. SMITH of Michigan. They usually withdraw the engi-

neer when he has lost his hearing. [Laughter.]
Mr. GALLINGER. I had not supposed that the minor employees of any great corporation in this country could right-fully demand a hearing if those in charge of the corporation

thought they were unworthy, incompetent, or dishonest.

Mr. KENYON. The Senator will find that where the brotherhoods feel that an injustice is done there is a hearing. is some strike taking place now up in New York-I am not familiar with it-over some such question as that, where a man was discharged, and no hearing was accorded him. The men were determined that he should have a hearing. Why should he not

have one? Why should not justice be done?

Mr. SMITH of Michigan. Exactly; the Senator is right. He should have a hearing; and yet the United States district attorney for the western district of Michigan-and a cleaner, finer, abler man never held office under this Government-was dismissed the other day, two years and a half before his term expired, and he could not get a hearing, and he has not gotten

Mr. KENYON. Things happen in Michigan for which we can

not account

Mr. SMOOT. The same thing has happened in other States as

Mr. NORRIS. Mr. President, will the Senator yield to me?

Mr. KENYON. Certainly. Mr. NORRIS. I should like to suggest to the Senator that a prosecuting attorney is now a political appointee. The foreman of the Government Printing Office is a political appointee. I take it that if we had a comprehensive system such as the Senator from Iowa is speaking of, the very head of the department that would have control of that Government instrumentality should, to begin with, be free from political influence or control, as free as the Interstate Commerce Commission is now.

Mr. KENYON. That is always a good example, of course. Mr. SMITH of Michigan. He would have to be a wooden

man if he were absolutely free.

Mr. NORRIS. No; he would not have to be a wooden man, and the Interstate Commerce Commission is a living illustration

Mr. KENYON. I believe the people of the country have more confidence to-day in the Interstate Commerce Commission than in any other branch of the Government, and it is absolutely

divorced from politics.

Mr. SMITH of Michigan. I venture the assertion that from the time the Interstate Commerce Commission was created down to the present time seventeen-twentieths of its membership were political appointees, and some of the best men that have ever sat on the commission were political appointees.

happened to sit near the President of the United States one day when a man was being urged as having superior fitness for a place on the commission because he had some political influence in his State. As the Senator from Iowa knows, at the close of the last administration we undertook to confirm Mr. Clark, of his own State, as a member on the Interstate Commerce Commission, and we were held up by our friends on the other side of the aisle who refused to permit it to be done in order that the incoming Democratic Executive might have the privilege of naming a man for the place.

Mr. KENYON. He appointed the same man, however. Where was the politics in that? Mr. Clark was a Republican.

Mr. SMITH of Michigan. It was to give Senators on the other side of the Chamber control of the Government from a partisan point of view weeks in advance of their assuming it under the Constitution.

Mr. KENYON. The people gave them control of the Govern-

ment.

Mr. SMITH of Michigan. But they did not give them control of it on the 1st of November or the 1st of December. They gave them control of the Government on the 4th day of March; and yet they were so keen for power that they wanted to exercise it two months before the Constitution gave them the right to do so.

Nothwithstanding that, I think the Senator Mr. KENYON. from Michigan will agree with me that the Interstate Commerce Commission has been a body of very high character and great efficiency, and that it has the confidence of the

Nation.

Mr. SMITH of Michigan. I do; and I would not say anything against the competency of the commission. One of the most distinguished lawyers and jurists in our country, a man from my own State, helped establish the efficiency of the Interstate Commerce Commission. I know what he said to me in the early formative stages of the commission. It has been officered by most competent men. After all, however, they came to a partisan Senate for their confirmation; they got their commissions from a partisan Executive; and usually, in private, they reflect the views of the appointing power. You can not keep that from being so, although in the discharge of their public duty I have no doubt they are animated by very high motives

Mr. NORRIS. If the Senator from Iowa will permit me to do so, I should like to ask the Senator from Michigan if he thinks the employees who have been recently appointed, and who are being appointed now, to carry out the law that has been referred to for the physical valuation of railroads, have been appointed on a partisan basis?

Mr. SMITH of Michigan. I have not seen any appointments since the present administration assumed the direction of

affairs

Mr. NORRIS. The administration is not appointing those Mr. SMITH of Michigan. I say, I have not seen any appointments—there may have been some—that had no partisan

bias. Mr. NORRIS. I have not heard of any that have had partisan

bias, and there are none of them that have been appointed recently to carry out that law.

Mr. SMITH of Michigan. The Senate is intensely partisan.

Mr. NORRIS. Yes.

Mr. SMITH of Michigan. The House is intensely partisan. The Executive, with all of his masterful talents and splendid

character, is partisan, and he can not help being partisan.

Mr. NORRIS. That does not answer the question.

Mr. SMITH of Michigan. Then I say that these selections are more or less the reflection of that mental attitude toward public questions, and where they are not they are the exception. I am glad the Senator from Colorado [Mr. Thomas] nods his head in approval of my concluding sentence.

Mr. NORRIS. I do not believe the members of the Interstate Commerce Commission know the politics of one-half of the men they have appointed to value the railroads of the country.

They have never given any consideration to that matter.

The VICE PRESIDENT. In the interest of the Reporter the Chair would suggest that one Senator speak at a time.
Mr. SMITH of Michigan. Mr. President, the men who are

to collect the income tax are being appointed on a partisan basis.

Mr. NORRIS. That is going on to another proposition. was asking the Senator about this nonpartisan body, the Interstate Commerce Commission.

Mr. KENYON. Mr. President, of course it is true that the man who has the floor seldom has much chance to talk here, I but I am very anxious to get through.

Mr. SMITH of Michigan. I want the Senator to have his full

share of the time. He is very modest about it.

Mr. MARTINE of New Jersey. How about the editorial? Mr. KENYON. I should like to have the editorial read now, if I may

VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

[Editorial from the Washington Times.] PUBLIC OWNERSHIP AND CIVIL SERVICE,

One of the first things to be disposed of by Congress after the holiday recess will be the Alaska railroad bill, providing for Government ownership of railroads in Alaska. While the bill will be strongly opposed, the expectation is that it will be passed. The discussion will have an important bearing on Government ownership in general, both ownership of the railroads and ownership of the telephones and telegraphs. Already Postmaster General Burleson has come out strongly for public ownership of telephones and telegraphs.

Covernment ownership advocates are increasingly numerous. It

Government ownership advocates are increasingly numerous. It is, however, beyond dispute that if the public is to own public utilities, the public's employees must be governed by a rigid civil service. If the

Government owns and operates railroads in Alaska, what about the men employed to run them?

Are these men going to be promoted and demoted because of their politics, as the practice is now in the Government Printing Office?

politics, as the practice is now in the Government Printing Office?

If the Government takes over the telephones and telegraphs, will the men who operate the lines be chosen with careful regard for their political complexions? Will the system now in use in the Government Printing Office obtain when the Postmaster General has in his hands the operation of the telephones and telegraphs?

Politicians who are conniving at the breaking down of the civil service are doing more to block, delay, and defeat such things as Government ownership of railroads in Alaska and Government ownership of telephones and telegraphs than all the adverse corporation influences combined. It would be well for those who really want to promote the cause of public ownership to wake up to the supreme importance of seeing that the civil-service laws are lived up to in letter and in spirit.

Mr. KENYON. Mr. President, the people are not afraid any longer to discuss the proposition, at least, of the Government taking over some of the great properties of the country which are absolutely essential to the life of the people and the welfare of the Nation, nor are they doubtful of the Government's ability to carry on great projects. We have not been afraid as a Nation to undertake the building of the Panama Canal when private parties failed. We have not been afraid to assume the obligations of conducting a parcel post, and it has been a success. We are not, I assume, afraid to construct a railroad success. We are not, I assume, afraid to construct a railroad in Alaska. The Secretary of the Navy, as I understand from newspaper reports, has recommended to Congress that the Government should own or lease some of the oil lands in order that the Government may be relieved of oil monopoly. There is really no more reason why the Government should be relieved of oil monopoly than why the people should.

Sincere, honest, and able men are advocating that the Government should take over the telephones and the telegraphs. Other sincere and honest men view with alarm the present-day tendency of those in public life to advocate the taking over of these properties by the Government. If we can do all the various things we have done, it may well be argued that the Government could carry on the work of the railroads. Such ownership would eliminate express companies, special freightcar systems, Pullman palace car companies, and other parasites upon transportation. Transportation rates would be stable, no higher than at present, and in time lower. Much economic

waste would be avoided.

In the present hearings before the Interstate Commerce Commission for advance in freight rates, railroad presidents have rather indicated in their testimony that the final solution of rather indicated in their testimony that the final solution of this matter was to be governmental ownership President Mellen, in retiring as president of the New York, New Haven & Hartford Railroad Co., according to newspaper accounts, intimated rather woefully that the question was now upon us. Disclosures, such as have taken place in the St. Louis and San Francisco investigation, showing that officers of the company were buying in small lines at low rates and selling them to the parent line at tremendously high prices issuing bonds.

to the parent line at tremendously high prices, issuing bonds to cover the sale and making large personal profits out of the transaction, have aroused the people of the country to insist that before freight rates shall be advanced it shall be certain that they are not being advanced to cover the speculations or manipulations of officials. The people have been amazed at the revelations concerning the New York, New Haven & Hartford Railroad and the Frisco Railroad.

I hold in my hand the report of Commissioner Prouty in the road, and these are some of the things, Mr. President, that make the people of this country unafraid of the proposition at least of discussing whether the Government shall own and control railroads. He says:

June 30, 1903, the total capitalization of the New Haven Co. was approximately \$93,000,000, of which \$79,000,000 was stock and \$14,

000,000 bonds. The mileage then operated was 2,040. On June 30, 1912, the capitalization, excluding stock premiums, was \$417,000,000, an increase of \$324,000,000, while the operated mileage was 2,090, an increase of 50 miles.

So the people of this country have had placed upon their backs and their children and their children 324,-000,000 that does not represent anything.

It expended-

Commissioner Prouty says-

during the nine years something over \$96,000,000 upon its railroad for betterments and equipment, making a total of \$136,000,000 devoted to its railroad property proper.

This would leave the sum of \$204,000,000 which in nine years had been expended in operations outside its railroad sphere. This fact of itself is a most significant one which, standing alone, might well require explanation

Yet the distinguished Senator from North Dakota [Mr. Mc-CUMBER] seems to think that we who believe in this Alaskan bill are of socialistic tendencies. There are a good many people in this country of socialistic tendencies and socialistic tendencies will continue to grow if high finance can go on in the manner that it has in the New York, New Haven & Hartford.

In 1904 the New Haven began its campaign for the acquisition of the trolley lines of southern New England-

I am not going to spend any time in reading that, but just his conclusion:

Representatives of the New Haven Co .-

This is in reference to the Rhode Island trolley line-

earnestly insisted that this company had not watered the stock of the Rhode Island Co., and this, strictly speaking, is true. The Improvement Co. turned in the water, and the New Haven Co. converted that water into wine. In whatever aspect the transaction is viewed the New Haven gave \$13,500,000 for nothing.

Since then additional money has been invested by the New Haven Co. in the development of these Rhode Island trolleys, so that to-day the investment totals about \$24,000,000. Prof. Swain, in his report to the validation committee, estimated the value of this investment at \$6,000,000. Other estimates are somewhat higher. We are not here concerned with the amount lost, but rather with the character of the transaction.

And then

And then:

The inevitable query is-

Says Commissioner Prouty-

What was the motive behind this transaction, and who made the profit? That question, in the very nature of such transactions, never can be satisfactorily answered.

I think if it could be, the answer would be found in the banking houses of the same people who have tried to plunder Alaska and prevent the building of other railroads there.

Again, he says of another enterprise, the Westchester Rail-

Here, therefore, is an enterprise which has cost the New Haven Co. \$12,000,000 in excess of the value of its property upon its own showing. Again the question arises, what has become of this \$12,000,000? In case of the Rhode Island Co. it was possible to locate the corporation, if not the individual, which had ostensibly obtained the money, but in this case it is impossible from anything upon the books of the New Haven Co. to do this even approximately. So far as those records go this money has vanished into thin air.

The Government operation of railroads could not be much worse than that.

Again, Mr. Mellen came before this investigation.

His statement was that the amount had been used-

Referring to a certain amount-

in campaign expenditures during the summer and fall of 1904, that this had been done—

Mr. POINDEXTER. How much was that?

by the direction of his directors, and that they had subsequently ratified his act.

These campaign contributes

by the direction of his directors, and that they had subsequently ratified his act.

These campaign contributions call for no comment from us. The act of the New Haven was not peculiar to that company at that time. What may be open to criticism is the lax way in which this matter was handled between an officer of this company and its directors.

The special account referred to shows a payment to Mr. Mellen of \$50,000 in cash, which he passed over to the Republican campaign committee. It shows a second payment to Mr. Buckland, now the vice president of the company, of \$6,500, which was turned over to the Republican State committee of Rhode Island. There are payments of various other specific sums which undoubtedly went to particular individuals for a particular purpose. All this left a balance after the campaign was over, in December, 1904, of \$24,000, which was paid to Mr. Mellen upon his statement that disbursements for campaign purposes other than those specifically named in the account had equaled or exceeded that amount.

What a comfort it must be Mr. President to the widows and

What a comfort it must be, Mr. President, to the widows and orphans who are stockholders in the New York, New Haven & Hartford Co., that has been managed so splendidly by private individuals that it is now on the verge of bankruptcy, to feel that, while their dividend has been passed and they must get along in some other way, \$50,000 of the money of this company went to the Republican campaign fund. Could governmental ownership be much worse than that?

So all through this report, which I will not take the time to read; but I desire to place in the RECORD the conclusions of Commissioner Prouty:

In conclusion this commission desires to call attention to one lesson from this investigation of national application.

No student of the railroad problem can doubt that a most prolific source of financial disaster and complication to railroads in the past has been the desire and ability of railroad managers to engage in enterprises outside the legitimate operation of their railroads, especially by the acquisition of other railroads and their securities. The evil which results—first to the investing public and finally to the general public—can not be corrected after the transaction has taken place; it can be easily and effectively prohibited. In our opinion, the following propositions lie at the foundation of all adequate regulation of interstate railroads: railroads:

1. Every interstate railroad should be prohibited from expending money or incurring liability or acquiring property not in the operation of its railroad or in the legitimate improvement, extension, or develop-

ment of that railroad.

2. No interstate railroad should be permitted to lease or purchase any other railroad, nor to acquire the stocks or securities of any other railroad, nor to guarantee the same, directly or indirectly, without the approval of the Federal Government.

3. No stocks or bonds should be issued by an interstate railroad except for the purposes sanctioned in the two preceding paragraphs, and none should be issued without the approval of the Federal Government.

Mr. THOMAS. I hold in my hand a clipping from Collier's Weekly, of December 27 last, which is so appropriate in this connection that I will read it into the RECORD if the Senator from Iowa will permit me.

Mr. KENYON. I will be very glad if it does not take until

Mr. THOMAS. It is as follows:

Mr. THOMAS. It is as follows:

Regarding the investigation of the Frisco receivership, it was stated that Chairman Clark and E. E. Brown, of the Interstate Commerce Commission, will lay before Congress the following:

"That the Frisco was compelled to carry and pay interest on a fictitious indebtedness of \$40,000,000, created by enormous commissions paid to bankers and brokers for the sale of its securities, and profits to promoters of feeder lines in the Southwest.

"That the chairman of its board of directors, B. F. Yoakum, made \$7,000,000 profits for himself and associates trading with himself in the capacity of promoter and builder of Texas roads, which he caused to be sold to the Frisco at prices in excess of their value.

"That approximately \$32,000,000 in the Frisco's total funded indebtedness of \$244,000,000 was paid to bankers and brokers in commissions.

debtedness of \$244,000,000 was paid to bankers and brokers in commissions.

"That the average rate of commission was 12.05 per cent, while the profits of Mr. Yoakum and his associates in the promotion of the feeder lines sold to the Frisco ranged from 10 per cent to more than 100 per cent."

At almost the same time the Railway Age Gazette—issue of November 7, 1913—was printing an article on "Locomotive fuel economy on the Frisco," showing how the care, cooperation, and loyalty of the rank and file of employees had lowered the 1912 fuel bill by \$260,000 as compared with that for 1910. The plan was originated by W. C. Nixon, vice president in charge of operation, whose name does not appear in the list of "insiders," and was a good solid piece of work from beginning to end. The saving which hundreds of men thus wrought out will pay three-fifths of 1 per cent on the fictitious debt, or 35 per cent on what the "insiders" took. If the men worked thus for 28 years they would save for the road, without interest, the sum which the directors and officials have already taken by conspiracy from the road. This is what alls "big business." This is what breeds "class hatred." This Is the sabotage of greed among those in authority, treason in place of leadership.

Mr. KENYON. And rates can be raised on the railroad to

Mr. KENYON. And rates can be raised on the railroad to

cover those burdens?

Mr. THOMAS. Precisely, the patrons of the road are now called upon to submit to an increase of 5 per cent in the charges

in order that this burden may be carried.

Mr. KENYON. It illustrates again the splendid private management we have heard so much about which has placed the St. Louis & San Francisco Railroad in hands of receivers. I ask permission to place in the Record an editorial from the New York World as a part of my remarks, "How the New Haven was looted," and also a portion of an editorial, or the figures rather, as to the directors in that road.

The VICE PRESIDENT. Is there objection? The Chair hears none and permission is given.

The matter referred to is as follows:

HOW THE NEW HAVEN WAS LOOTED.

How the New Haven was looted.

Of all the 336 subsidiary corporations among which the New Haven Railroad so dispersed its assets and its credit as to bring it from a post of primacy to the verge of ruin, none better illustrates the manner of the looting than the Westchester road, some portions of whose history the World told yesterday for the first time.

The old Westchester company, formed in 1872, went bankrupt in 1875 and did nothing for 29 years. Early in 1904, galvanized into life by an application of the rival Portchester road, the Westchester company received its franchise from the New York board of aldermen; vetoed by Mayor McClellan, the franchise was again passed. About that time \$100,000 in a downtown bank changed possessors, and immediately after a \$6,000,000 contract for work on the New Haven was secured by the Murphy-Gaffney Co.

At about this time the stock of the Westchester road had been bought by the late J. P. Morgan, William Rockefeller, and George McCulloch Miller for the New Haven. They paid more than \$5,000,000, though less than \$500,000 had been expended; though the road had slept 29 years; though President Mellen himself protested in vain that the stock was worth "10 cents a pound" and the New Haven already too heavily loaded.

With such a beginning it is not wonderful that a road which cost less than \$22,000,000 should have gone into the New Haven system at \$33,000,000—the difference, as Interstate Commerce Commissioner Prouty says, "vanishing into thin air." As to how the money vanished, the details sleep in "Account No. 2" in the office of J. P. Morgan & Co., which covers the original purchase; and in the subsequent dealings of the New Haven with the Milibrook (construction) company, in which Morgan and Rockefeller succeeded Marsden J. Perry and Oakleigh Thorne as leading spirits.

The New Haven road needs money. Why does it not in civil suit seek restitution of this vanished \$12,000,000? Why does it not seek to ascertain whether in this shocking conversion of funds there was any criminal transaction not yet shielded by the statute of limitations?

Excellent, necessary, inevitable is the "unscrambling" of the New Haven eggs. But justice should not stop short of restitution and punishment.

Name and number of corporations.

The interests represented in this total of 578 corporations of which New Haven directors are also directors range from the most powerful banking institutions of the country to concerns making brass, steel cars, locomotives, cart wheels, couplers, brake apparatus, draft gear, bolsters, springs, oil, waste, and every device and article necessary to the mechanical equipment of a railroad.

springs, oil, waste, and every device and article necessary to the mechanical equipment of a railroad.

IN GRIP OF THE BANKERS.

Further than this, the banking interests represented on the New Haven directorate have floated, underwritten, and performed every form of flduciary service essential to the distribution of bonds, stocks, negotiations for leases, traffic, and other contracts entering into the enormous business of a corporation of the magnitude of the New Haven.

Since the retirement of Mellen, his indictment for violation of the restraint of trade provisions of the Sherman anti-Trust law in the Grand Trunk matter, and the activity of the Attorney General in seeking to "unscramble" the hopelessly involved mess resulting from the mismanagement of the New Haven road there have been a number of retirements. J. P. Morgan, jr., who is destined to become a most prominent figure in the Federal inquiry into New Haven affairs, has retired from the board of directors after serving as the successor of his father for a few months.

Theodore N. Vall, representing the Telegraph and Telephone Co., has also withdrawn from the directorate along with Charles S. Mellen, Alexander Cochrane, Sidney W. Winslow, and D. V. R. Warner. Murray Crane has taken the place of Vall, and is regarded as the representative of the telephone and telegraph interests on the board.

Members of the full board, of which William Rockefeller is the dominant spirit at present, are as follows: William Rockefeller, Charles F. Brooker, William Skinner, D. Newton Barney, Robert W. Taft, James S. Elton, James S. Hemenway, A. Heaton Robertson, Frederick E. Brewster, Henry K. McHarg, John L. Billard, George F. Baker, Thomas De Witt Cuyler, Edward Milligan, Samuel Rea, Laurence Minot, Morton F. Plant, John T. Pratt, A. F. Hadley, Howard Elliott, W. Murray Crane, James L. Richards, J. H. Hustis, and F. T. Maxwell.

Mr. KENYON. In an official investigation still in progress in Massenbuscits a avasor of sevent december of the March.

Mr. KENYON. In an official investigation still in progress in Massachusetts, a report of general expenditures of the New Haven Road from December 1, 1912, to June 30, 1913, listed under the head of other expenses the names of persons who

shared in the distribution of \$337,469.71.

The hearing developed that newspaper reporters at the Massachusetts statehouse for daily newspapers had received money from the New Haven. One editor admitted receiving A professor in the Harvard Law School admitted that he had been employed as advisory counsel by the New Haven, but had kept the fact under cover, although frequently addressing public gatherings on questions concerning the New Haven

I assume this was an investigation ordered by Gov. Foss, of the public-service commission. Something like \$100,000 was expended in molding the opinion of the legislature.

We hear a good deal about governmental ownership bringing railroads into politics. It would rather seem from this investigation that the railroads were in politics.

Commissioner Prouty, commenting on the future for the Westchester Road, said:

Westchester Road, said:

The hope was expressed that in the near future it would earn its operating expenses and something more, and that finally it would become a profitable investment. All this may be true; such trolley lines grow up to almost any amount of overcapitalization, and it is possible that in years to come the Westchester Railroad will yield a return on the investment of the New Haven. The same thing may be true of the Rhode Island Co., but all this in no respect alters the quality of the transaction.

In any aspect of the matter the patrons of these lines are required to pay upon an investment which never has been made and are thereby subjected to a perpetual, unjust exaction.

Mr. President, it is amazing that the managers of this great property, intrusted by the stockholders with its management,

should dissipate the property and secure personal profit for themselves, as the Senator from Colorado [Mr. Thomas] has just pointed out. A bank robber is entitled to more respect than these men. It requires some courage to rob a bank. The people are not willing in instances such as the Senator from Colorado has cited of the St. Louis & San Francisco, and instances that I have cited of the New Haven Railroad; that rates, though they want to be fair, should be increased in order to cover such losses or to pay dividends on what Thomas W. Lawson has so aptly described as "counterfeit capital," one of the greatest causes of the high cost of living in this country.

The difficulties of the rate question, the conflict in the regula-tion by the Federal Government and by the States, the manipulations of stocks and bonds, the wrecking of great railroad properties, are some of the inciting causes that have led the people to sit up and take notice and give serious thought to the situation and be willing to discuss the question of governmental ownership of great public utilities. If private ownership of great public utilities is to continue to mean plunder of the people, then private ownership of these great public utilities will some day go. There must be complete governmental regula-tion and honest management of railroads or governmental

ownership will surely come.

The distinguished Senator from New Jersey [Mr. MARTINE] has advocated, in a report which has not yet been made to the Senate, but of which I have seen an account in the newspapers, that as a solution of the awful mining conditions in West Virginia, where he was on the committee investigating, and where his great heart was touched, that the only solution of those matters is for the Government to take over control. I do not know that he advocated operating, but at least to take over and lease the great coal mines of this country. Coal is something people have got to have, and in that report, although I do not know all the minutia of it, on the fundamental proposition that the great coal of this country which the Creator has put into the ground for the use of all the people no monopoly ought to be permitted to take charge of it and charge the people of the country excessive rates, I indorse his position.

At the present market prices of stocks it would cost in the neighborhood of \$13,000,000,000 to take over the railroads. Of course, such stupendous figures are staggering, and when considering it we are apt to lose sight of the fact that behind the debt would be the property itself, with its constantly increasing unearned increment. If the water was squeezed out of these stocks, they would not be anywhere near such value.

If the railroads had been purchased by the Government some 20 years ago, it is entirely probable that the difference in what the Government would have to pay on the indebtedness and what the railroads pay on their stocks and bonds in interest and dividends would have nearly paid for the railroads. has been so claimed by experienced statisticians and railroad. The Government can borrow money at a less rate of interest, finding little trouble to borrow at 3 per cent. Railroads, on their bonds, must pay 4 and 4½ per cent.

Mr. Thorne in his figures estimates that governmental owner-

ship would save \$450,000,000 a year.

He does not discuss the question of operation, and that is the

only weak point in this letter.

Mr. President, if the efficiency of our transportation was not diminished, the people may well inquire why said amount should not be saved, because it makes no difference whether the interest is paid by the railroads on bonded indebtedness from dividends on stock, or whether it is paid on bonds issued by the Government, it comes ultimately from one source, the Four hundred and fifty million dollars people of the country. is more than is received from customs duties in a year—probably as much as it will cost to build the Panama Canal.

I do not mean to indicate by these remarks that I would be in favor at this time of taking over the railroads. I have an open mind on the question, but would favor and am anxious that a commission be appointed by the President of men whose sole interest would be the public welfare, for that in the end is the sole interest that concerns us-men of high character and breadth of learning and limited to three members, who should go to foreign countries where they have grappled with this question and make an unbiased report to Congress as to the success of governmental ownership of railroads or of the failure thereof; men who will give real thought to the question and not merely be engaged, as is too often the case, in a

Mr. SMITH of Michigan. I should like to ask a question of the Senator from Iowa right there. Mr. Thorne, as I understand the Senator, says that \$450,000,000 could be saved by the

Government taking over and operating the railroads?

Mr. KENYON. That that amount could be saved each year. Mr. SMITH of Michigan. Does Mr. Thorne say what rail-roads, which are practically parallel and duplicates, are to be discontinued, and what railroads are to be operated?

Mr. KENYON. None would be discontinued.

Mr. SMITH of Michigan. Take 5, 6, 7, or 8 railroads running out of Des Moines, all competing. There is scarcely one of them that is not an active competitor. Would Mr. Thorne maintain that competition if the ownership were the same?

Mr. KENYON. They are competitors, possibly, as to the quality of service. I do not know that I could be accurate as to the Des Moines railroads, but take Council Bluffs, where different railroads crossing the State converge, and the fares are the same. They are competitors only as to the quality of Their trains nearly all leave Council Bluffs at the same time. There is no need of that, is there? Why should not trains on the different railroads leave there two, four, or six hours apart?

Mr. SMITH of Michigan. What I am trying to get at is, whether Mr. Thorne in his figures proposed to operate the same amount of mileage that is now being operated, much of which is a duplication, with many parallel lines constructed perhaps ill-advisedly? Does he propose to operate all those railroads, or is he to make the saving from an economy of mileage service?

Mr. KENYON. No; he is to take exactly the roads now operated by private ownership and put them under Government ownership. By so doing he figures that we would save \$450,0000,000 a year.

Mr. SMITH of Michigan. Take the roads running out of Des

Mr. KENYON. Is the Senator asking me for Mr. Thorne's figures:

Mr. SMITH of Michigan. Yes. That is the Senator's own State. You have the Chicago & Great Western there; you have got the Chicago, Milwaukee & St. Paul there; you have got the Des Moines Short Line there; you have got the Rock Island there; you have got the Burlington there; and I do not know but

that you have the North Western there also.

Mr. KENYON. Yes; we have the North Western.

Mr. SMITH of Michigan. And the North Western. Now, surely any scheme of governmental ownership, if it were originally planned, would not call for any such duplication of mileage

Mr. KENYON. Then, why does the present plan of operation call for this duplication?

Mr. SMITH of Michigan. But there has not been a railroad, if the Senator from Iowa will permit me to say it in his timehe has been very courteous-there has not been a railroad built in the State of Iowa in a generation that has not been enthusiastically encouraged by the people who live along the line, and that was true of the last one to be built.

Mr. KENYON. And most of them have been financially en-

couraged.

Mr. SMITH of Michigan. The last one to be built involves saving of over 50 miles between Des Moines and St. Paul, and yet it has not earned a dollar; it has not paid a penny in dividends.

Mr. KENYON. I am not advised as to that.

Mr. SMITH of Michigan. I think I am right about it: I do not know anything specifically about it, but I think I am correct. Mr. KENYON. The Senator does not speak from knowledge

as a stockholder, of course?

Mr. SMITH of Michigan. Oh, no; I do not own any stock, and could not if I wanted to. To be consistent, under Government ownership you would have to revise the railroad map of your country and discontinue parallel and unnecessary lines in order to accommodate the traffic economically and have the best interests of the Government at heart. I do not see just how you

can accomplish it. I hope you can.

Mr. KENYON. I am not trying to accomplish it.

Mr. SMITH of Michigan. I did not speak of the Senator in the first person.

Mr. KENYON. I am trying to have it discussed; that is all. Mr. SMITH of Michigan. I think if Mr. Thorne is going to save \$450,000,000 a year, he will have to do it by discontinuing existing lines.

Mr. KENYON. The Senator has not heard the figures read. Mr. SMITH of Michigan. I heard the figures which the Sena-

Mr. KENYON. I think Mr. Brandeis, some years ago, suggested what we could save in the operation and management of the railroads. If the Government were going into the railroad business as it goes into the public-building business, that would be a sham and a farce, and we would never get anywhere

with it. If we were to build a railroad in some community in order to help send a Representative back to Congress, or a Senator back to the Senate, we would never accomplish any beneficial result.

Mr. SMITH of Michigan. The same may be said of the river and harbor expenditures. We have some skill in the apportion-ment of river and harbor appropriations.

Mr. KENYON. I wish we had more time, because there is a complete answer to the suggestion of the Senator. The railroads are now competing in the service that they render, but they are not competing as to rates. They are trying to get traffic by reason of furnishing better accommodations, and some of them even have fountains in their drawing-room cars, as the North Western has between Chicago and St. Paul, to draw business from the Milwaukee road, while the Milwaukee is serving a better meal, in order to draw business from the North Western. You have your choice between a fountain and a good meal.

Mr. SMITH of Michigan. They have fountains in their depots and plenty of water in their chests, I understand. There is no

doubt about that. I wish it were not there.

Mr. KENYON. Water in their chests?

Mr. SMITH of Michigan. Yes. I wish it were not there. I think there is altogether too much water in the railroads.

Mr. KENYON. There is plenty of water in the capital stock. Mr. SMITH of Michigan. That is what I mean.

Mr. KENYON. I do not want to take so much time. I am just about through, if the Senator has no further question to

Mr. SMITH of Michigan. I have interrupted the Senator as much as I ought to do.

Mr. KENYON. I have been very glad to yield to the Senator. The commission which I have suggested would merely make an unbiased report to Congress as to the success of governmental ownership of railroads or the failure thereof. The Senator from Oregon [Mr. CHAMBERLAIN], who has given great thought to this subject, handed me a few moments ago a letter which I think ought to be in the RECORD, and I hope he will place it in the RECORD, showing the results of governmental ownership and operation in foreign countries. We ought not to be afraid of discussing the proposition; and that is all I am trying to do.

Mr. SMITH of Michigan. I am not afraid to discuss it.

have ridden on government-owned railroads.

Mr. KENYON. The most advanced nations of the world. with the exception of Great Britain, have handled the proposition successfully, and this Nation ought not to be afraid to go thoroughly into an investigation and discussion of the proposition; and if after investigation—I do not know what it might show—such a course may seem best for the welfare of the greatest number of our people to then adopt the plan of governmental ownership, surrounding it, as I have suggested, with such civil-service regulations or other regulations as to make impossible the participation of employees in partisan politics. The general welfare of all our people is the object to be attained. and no hints that Government ownership is socialistic will stop discussion of the question. The people have not become discussion of the question. frightened by the cry of socialism whenever any advance movement is proposed. Public discussion is the lifeblood of representative government. The American people are not afraid of discussion; they do not deem it necessary to talk in whispers or go behind closed doors when talking of Government ownership of great public utilities. The Alaskan railroad, owned and operated by the Government, will be a good experiment as to the merits of Government ownership and operation of all

I have made these suggestions preliminary to the introduction of a letter and not as meaning to indicate that I favor the taking over of the railroads by the Government, but because I believe that discussion of this subject is healthy and apropos and that this letter in the Record—thus giving wide circulation-may tend to stimulate inquiry along the line suggested.

I was anxious to have this letter read. I think it will take but a moment or two; but I ask permission to make it a part of That is all that I care to say on the subject.

The VICE PRESIDENT. Does the Senator ask to have the letter read ?

Mr. KENYON. I ask to have the letter read.
Mr. BRISTOW. How long is it?
Mr. KENYON. If no Senator wants to hear it at this time, I will not ask to have it read.

Mr. POINDEXTER. I should like to hear it, Mr. President.

Mr. SMITH of Michigan. By whom is it signed?

Mr. KENYON. It is signed by Clifford Thorne, railroad com-missioner of the State of Iowa, the gentleman to whom I have referred in my remarks. Unless there is a desire to have it

read, I will simply ask that it be printed in the RECORD in con-

nection with my remarks.

Mr. MARTINE of New Jersey. I, for one, should like to hear read

Mr. SMITH of Michigan. I also should like to hear it read. Mr. KENYON. Then, let it be read.

The VICE PRESIDENT. Is there objection to the reading? The Chair hears none, and the Secretary will read as requested. The Secretary read as follows:

NOVEMBER 29, 1913.

Senator WM. S. KENYON, Washington, D. C.

Washington, D. C.

Dear Senator: Col. S. W. Brookhart informs me that you desire a summary of my recent investigation relative to the market value of American railroads, and the actual loss to the public because of their private ownership as compared to Government ownership.

The following is the substance of my recent discussion of this subject before the National Association of Railway Commissioners at Washington, D. C., and later with President Ripley, of the Santa Fe Railroad

Railroad.

Railroad.

On the eve of making a physical valuation of all the railroads in the United States I thought it would be of some interest to know their present market value. My attention was called to this by reason of my work as chairman last year of the committee on "railroad taxes and methods for ascertaining fair value," and this year of the "valuation committee" of the National Association of Railway Commissioners, I have had this "market value" estimated (by methods described later) and find it to be approximately \$13,969,173,383.

In this connection there is a fact of tremendous significance: The Government could issue bonds and purchase these outstanding securities at prevailing market prices and save several hundred millions of dollars every year.

at prevaiing market prices and save several hundred millions of dollars every year.

For the year ending June 30, 1911 (the last year for which complete returns are available), we find the railroads paid out in interest and dividends and had a surplus which they put into improvements and surplus account the following:

In dividends on stock In interest on bonds Appropriations for additions and betterments Appropriations for new lines or extensions Appropriations for other reserves Surplus for year to general balance	\$291, 497, 164 380, 411, 667 58, 740, 315 3, 518, 628 7, 897, 134 91, 669, 663
--	--

833, 734, 571

SUMMARY.

Interest, dividends, and surplus earnings \$833, 734, 571
Interest at 3 per cent on present market value of railway securities 419, 075, 201

Annual saving, through purchase by the Government, of outstanding railway securities, at prevailing market

414, 659, 370

standing securities at prevailing market prices. The railroads have been bettering and improving their properties for many years out of earn for every doular paid in dividends. We not only pay them a return or their investment, but we nuitd their properties for them. The surprise earnings of American railroads put into betterments. The surprise earnings of American railroads put into betterments. The surprise earnings of American railroads put into betterments. The surprise earnings of American railroads put into betterments. All such surprise earnings help to swedt the values, which are quoted in higher rates or as a means to prevent reductions ordered by the State and Federal Governments. In case of Government purchase of ascand will not be used as a justification for higher freight rates. That billion-doiler savings is a rather large sum of money. The total wealth of the entire Nation, as estimated by the United States Department of the control of t

rallroads. I have not personally investigated the situation, but I am reliably informed that most of the rallroad mileage is owned by the Governments in Germany, Austria-Hungary, Italy, Switzerland, Norway, Belgium, Holland, Denmark, Russia, New South Wales, New Zealand, Queensland, South Australia, Victoria, West Australia, Bulgaria, Servia, Roumania, Peru, Chile, Japan, India, Ceylon, Dutch East Indies, Natal, Indo-China, Baden, Bavaria, Cape Colony, Tasmania, and Orange Free State. The large majority of the countries on the continents of Europe, Asia, Africa, and Australia own most of their railroads.

Aside from England and the United States, every first-class power on earth is committed to Government ownership. I have not reached a final conclusion that it is wise to take over these properties at the present time, but there must be some facts in the experience of these other nations that are worthy a careful investigation by disinterested parties.

Respectfully, yours,

CLIFFORD THORNE

Respectfully, yours,

Respectfully, yours,

CLIFFORD THORNE,

NOTE.—The present market value of the railroads in the United States described above was estimated in the following manner: Thirty-five representative railroads were selected. This list included those selected by Wesley C. Mitcheel, of New York City, in his computations of price fluctuations on securities for the 20-year period from 1890 to 1910. The only changes we made in the list were to eliminate the Canadian Practic, Canada Southern, and lowa Central, substituting the Northern Pacific, Great Northern, and Baltimore & Ohio. As the list is finally completed, these carriers landled 53.6 per cent of the transportation business in the country last year, and I am confident that they represent the better class of railroads as a whole, so that the market value finally obtained is not low. We used market quotations as given in the New York Commercial and Financial Chronicle for all stocks and bonds quoted, taking the average of the daily mean for the week ending October 17, 1913. Where no sale was recorded, but a "bid" and "ask" price was given, we used the "ask" price in order to avoid the criticism of obtaining a low valuation. In this manner we found the total market value of the stocks of these 35 companies to be \$4,087,158,107, while their par value was \$4,289,693,C63; in other words, the market value was 95.057 per cent of the par value. The total market value of the bonds quoted was \$3,485,471,596, their par value \$3,855,217,979, and the percentage \$9,1123 A complete list of the railroads would have been preferable, and quotations over a longer period of time would have been desirable. It will be impossible to find exactly the market value because some securities are not quoted and prices vary. To-day prices are low, but this is effect by reason of the fact that we have chosen, on the whole, the better class of railroads. For the reasons we have previously stated we conclude these percentages are not low for the current year. It would appear that

eral, perhaps too liberal. The securities used are much above the average in value.

The par value of the securities of American railroads outstanding in the hands of the public—according to the statistician of the Interstate Commerce Commission in the latest published report, for June 30, 1912, assuming that securities for 1912 held by other railroads were the same as in 1911—was \$15,286,101,947, divided as follows: \$5,843,446,355 in stock and \$9,442,655,592 in bonds.

Applying the percentages described above, it is roughly estimated that the market value of American railroads, as of the present time is \$13,969,173,383. The par value of outstanding railway securities in the hands of the public is, as stated above, a little over fifteen billions. But par value is given practically no consideration before courts or commissions or on the markets. Some securities sell at 2 or 3 per cent of their par value, while others sell at 600 and 700 per cent of their par value. The Interstate Commerce Commission has said that the par value of stocks and bonds is no evidence whatsoever of value. The Supreme Court has never used par value of securities as the basis for "fair value" in rate cases or any other kind of cases. In the eyes of the investing public the present value of American railroads is determined on the markets, where securities are bought and sold.

EXECUTIVE SESSION.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, January 21, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 20, 1914. UNITED STATES ATTORNEY.

Francis A. Garrecht, of Washington, to be United States attorney, eastern district of Washington, vice Oscar Cain, resigned.

UNITED STATES MARSHAL.

James S. Magee, of New Bloomfield, Pa., to be United States marshal, middle district of Pennsylvania, vice James M. Yeager, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 20, 1914. POSTMASTERS.

William Finley, Hoopestown. H. P. Simpson, Rock Island. R. C. Probasco, Sparta. Charles D. Rock, Farmer City. D. B. Ulrey, Martinsville.

IOWA. George A. Crane, Dexter. John J. Dunlevy, Lansing. Laura H. Figert, Marathon.

Weston D. Ralston, Paullina. Harvey A. Sweigard, Garner. James S. Webster, Carlisle.

NORTH DAKOTA.

John Schmitz, Tower City. Curtis Shepard, Courtenay.

PENNSYLVANIA.

Henry J. Bock, Conway. John A. Rick, Girard.

SOUTH DAKOTA.

M. M. Bennett, Yankton.

WISCONSIN.

T. D. Pluck, Horicon.

HOUSE OF REPRESENTATIVES.

Tuesday, January 20, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Be graciously near to us, O Thou great Father Soul, as we thus enter upon a new congressional day. Give to these Thy servants great thoughts and help them to control and direct those thoughts that their acts may be worthy of statesmen; that the people of this great Nation whom they represent may be faithfully and efficiently served to the honor and glory of Thy holy name. Amen.

The Journal of the proceedings of yesterday was read and

approved.

CONSTRUCTION OF RAILROADS BY NEW LANDS.

Mr. HOUSTON. Mr. Speaker, I desire to ask unanimous consent to extend my remarks in the Record by printing a letter from the Secretary of the Interior setting forth history and data in regard to railroads constructed by different countries in the opening up of new lands. It is a mere historical statement of fact and nothing more.

Mr. MANN. The purpose of it is that it may be used in connection with the Alaskan railroad bill?

Mr. HOUSTON. Yes, sir; that is the purpose of it.

The SPEAKER. The gentleman from Tennessee [Mr. Houston) asks unanimous consent to extend his remarks in the RECORD in the manner stated. Is there objection? [After a pause.]

My Dear Mr. Houston: If we are to open Alaska, we must do so either by subsidizing railroads with land and money grants or by governmental construction. No other method has been devised in this or any other country. I submit for your consideration the recent history of railroad construction in lands newly opened. The United States has subsidized private construction. Canada has given unprecedented amounts in land and cash and built some lines of its own. England has opened India with Government railroads, and Africa likewise. Nearly all lines of railroad in the Australian colonies have been built by the Government. So, too, in the South American Republics and Mexico, either the Government has built the line outright or given a large bonus for its construction. large bonus for its construction.

UNITED STATES.

The records of the General Land Office show that land grants made by Congress in aid of private railway construction in this country averaged about 7,500 acres of land for each mile of railroad built. Railroad land grants made by Congress have aggregated 158,139,000 acres, or 247,003 square miles. These land grants equal in area a territory as large as the combined area of the New England States, Nork, New Jersey, Pennsylvania, Maryland, Virginia, and West Virginia.

How much other public aid has been given to private railroad building in the form of land grants by States and subdivisions of States and in the form of cash bounties or subsidies or guaranteed interest and principal on bond issues can not even be approximated with any degree of certainty.

Reliable authorities have stated that the actual cost of construction of the Union Pacific Railroad was approximately \$50,000,000. The cost to the railroad company of this construction was \$93,500,000. nearly \$43,000,000 being taken in profit by the contractors and the Credit Mobilier. Land grants to the Union Pacific alone were made to the extent of 11,309,844 acres in addition to the Government's guaranty of bond issues and interest. Previous to the settlement of the Government with the Pacific roads it was estimated by the inspecting engineer of the United States Pacific Railway Commission that the entire property of the Union Pacific system could have been reproduced for \$37,250 a mile, whereas at the time the average per mile of subsidized mortgage debt and interest on the road to the credit of the Government was \$47,465 a mile.

Land Office records show that land grants by Congress in aid of the construction of private wagon roads were made at the rate of 1,900 acres of land for each mile of canal.

CANADA.

From 1876 to 1912 there had been built in Canada something less

and land grants to the extent of 56,052,055 acres from the public

domain.

In other words, it has cost the Government in Canada \$20,000 in cash and 5,600 acres in land for every mile of road built under private ownership in that country. Some part of these cash subsidies are in the form of loans which the rallroads are under agreement to repay.

According to the report of the department of rallways and canals of the Dominion Government, the various forms in which these cash subsidies have been paid are as follows:

By the Dominion: Cash subsidies Loans Cost of lines handed over to Canadian Pacific Ry- Paid to Quebec government. Implement clause, Grand Trunk Pacific agreement	37, 785, 319, 97 5, 160, 053, 83
Total	154, 075, 235. 09
By the Provinces: Cash subsidies Loans Subscriptions to shares	32, 895, 485, 16 2, 750, 030, 00 300, 000, 00
Total	35, 945, 515, 16
By municipalities: Cash subsidies Loans Subscriptions to shares	2, 404, 498, 62
Total	18, 051, 323, 60
Land grants are reported as follows: By the Dominion By Province of Quebec By Province of British Columbia By Province of New Brunswick By Province of Nova Scotia By Province of Ontario	8, 119, 221 1, 647, 772 160, 000
	50 050 055

In addition to these bonuses of cash and lands for private railroad construction, the Canadian Government and its Provinces have guaranteed bond issues of railroad companies at the rate of from \$13,000 to \$20,000 a mile. The total amount of railroad bonds guaranteed by the Government, as reported in 1912, was \$245,070,045, divided among the Dominion and several provincial governments as follows:

Dominion	\$91, 983, 553
Manitoba	20, 899, 660
Alberta	45, 489, 000
Saskatchewan	32, 500, 000
Ontario	7, 860, 000
Nova Scotia	5, 022, 000
British Columbia	38, 946, 832
New Brunswick	1, 893, 000
Quebec	476,000

245, 070, 045

Mr. HOUSTON. Yes, sir, that is the purpose of it.

The SPEAKER. The gentleman from Tennessee [Mr. Houstons] and the second his remarks in the Record in the manner stated. Is there objection? [After a pause.] The Chair hears none.

The following is the letter referred to:

Securatar or the Interest of the Securatar or the Securatar or the Securatar or the Securatar or the Securatar of the Securatar or the Secura

The plan proposed for reimbursing the Government for the construction of the Alaskan railway will permit the United States, if it desires, to get back all its original investment, which may be regarded as a loan, after the railway becomes profitable, and the Nation will have the road as an asset, both during and after this period of repayment.

AUSTRALIA.

AUSTRALIA.

In the early days of the settlement of Australia, private capital attempted to build the railroads needed for the development of that country, but failed so conspicuously to keep pace with the need that in 1855 the Government took over the lines already built, and since then but one important railroad in Australia has been built under private ownership.

While the scarcity of private capital at first compelled adoption of the policy of Government ownership and operation in Australia, this policy was later extended in order to provide roads in new and sparsely settled sections for the encouragement of settlement. Of the total railway mileage in Australia, 16,427 miles is owned and operated by the Government, and about 2,000 miles is under private ownership and operation. Most of the private lines are branches and "feeders," and many of them owned by corporations for conveying their own product to the State's trunk lines.

Only 145 miles of the Government roads in the country are owned and operated by the Central Government, the remainder being under the management of the several Provinces. A new trunk line to be 1.083 miles in length is now under construction by the Commonwealth. The estimated cost of its construction and equipment is about \$40,000 a mile. The average capital cost of all the State railroads in Australia is \$47,500 a mile.

Australian railroads have been built and operated for more than 50 years with no serious charges of graft or corruption. The general policy has been to operate them at cost, and despite increased cost of operation several reductions in rates have been made within recent years.

Australia has a mile of railroad to every 250 population as com-

policy has been to operate them at cost, and despite increased cost of operation several reductions in rates have been made within recent years.

Australia has a mile of railroad to every 250 population as compared with a mile to each 500 population in the United States.

In the State of Victoria all but 60 of the 3,627 miles of railway reported in 1912 were constructed by the Government. There are no privately owned railways in this State. The total expenditure charged to capital account against the State railroads was \$228,000,000, or at the rate of \$63,300 a mile.

The first railroads in New South Wales were built as private enterprises, but the companies got into financial difficulties before the lines were completed and the State bought and finished building them. All the trusk lines since have been constructed by the State. There were 3,831 miles of Government lines in operation in 1912, the capital charges against which averaged \$70,000 a mile.

Of the 1,460 miles of railroad in South Australia, only 15 miles was built by private enterprise. One line 478 miles in length is owned by the Commonwealth, which pays the interest on its capital cost and leases it to the State government for operation. The capital cost and leases it to the State government for operation. The capital cost of the South Australian lines has been approximately \$44,000 a mile.

In western Australia 310 of the 2,598 miles under public operation in 1912 were constructed by private enterprise and later acquired by the Government. The average cost of construction and equipment of the State lines, charged to capital account, is \$26,500 a mile.

Queensland's 4,266 miles of Government roads, of which only 143 miles was built by private enterprise, is charged with a capital account averaging \$35,250 a mile.

The capital charges against the 500 miles of State lines in Tasmania are \$42,500 a mile.

No part of the cost of construction of Australian roads has been paid out of revenue. Owing to the sparsely settled condition of the country the ro

NEW ZEALAND.

Government ownership and operation of railroads has been the policy of New Zealand almost from the beginning of settlement in the colony, first adopted to provide transportation facilities faster than private enterprise would furnish them, and later as a part of the cooperative democratic program of the Government. After the first few years of operation the attempt to make the New Zealand railroads pay profits was abandoned, and the roads are run with the idea of giving the best and cheapest service possible.

The capital cost of the 2,808 miles of Government owned and operated road in the country in 1912 was charged with a capital cost of \$54,500 a mile. The total cost of the roads forms part of the public debt of the Dominion, and the surplus earnings are turned over into the general revenues of the country, exactly as is done with the United States Post Office. The net receipts of New Zealand railroads for 1912 were about \$6,000,000 in excess of operating expenses.

New Zealand's area is about one-sixth that of Alaska. In 1870, when its railways were nationalized, the population was 250,000. As the beginning of a policy of national expansion and development, the Government in that year authorized an appropriation of lands and money of between \$60,000,000 and \$70,000,000, to be spent in the following 10 years for railway extensions and improvements. On the basis of population, this appropriation at that time was equivalent to an appropriation of upward of \$20,000,000,000 in the United States to-day.

The effect of building a system of railroads through a then unsettled and undeveloped country gave New Zealand a growth that produced remarkably prosperous and speedy settlement and industrial and agricultural progress. As fast as the profits of railroads operated have risen above 3 per cent on the capital investment the increase has been absorbed by reductions in passenger fares and freight rates. To encourage industries, low rates on products have been made regardless of distance. Railway construc

Practically all the railroads in Africa are in British territory and have been built either by the Government or under heavy subsidies from the Government. Because of the same conditions which make privately built railroads in Alaska a dubious experiment, the roads built by private enterprise in Africa have, for the most part, been forced into

Government control. Even a large portion of the famous Cape-to-Cairo line, built in sections, under different ownerships, and carried to partial completion only by liberal assistance from the British and German Governments, has passed under governmental operation as a matter of expediency.

Private enterprise failed in its effort to build the transportation lines that would open the door to the civilization of the "Dark Continent," and only since the Boer War and the organization of the union of South Africa has the British colonial policy of Government railroads paved the way to permanent development and settlement of any part of that continent along lines of thorough and systematic growth and conservation.

servation.

Of the 22,892 miles of railway in the whole of Africa in 1910, 13,670 miles were under Government ownership and operation, and approximately one-half of the entire mileage was in the South African Union. The total mileage in that year, as reported by the Prussian ministry of public works, was divided among the various sections of the country and between private and public ownership, as follows:

	Total mileage.	State owned.
Egypt. Algiers and Tunis. Belgian Kongo Colony. South African Union:	3, 674 3, 134 515	2,791
Cape Colony Natal Central South Africa Rhodesia German colonies:	3,771 1,092 2,589 2,191	3,318 1,092 2,589 2,191
German East Africa German Southwest Africa Togo. Cameroon	446 992 185 66	446 992 185 60
English colonies French colonies. Italian colonies Portuguese colonies.	1,806 1,359 71 1,001	

In 1911 the British Parliament returns showed 7.548 miles of public owned and operated railways in South Africa and 545 miles under private ownership and operation.

The report of the general manager of railways of the Union of South Africa for 1912 shows 7.848 miles of Government railways in operation, acquired and built by the Government at a cost of \$394,983,499, or an average of \$49,149 a mile, with 630 miles of additional Government lines under construction. Of the total amount of expenditure by the Government to that time, \$2,199,791 had been paid in Government subsidies to privately constructed railroads, while the remainder was expended for roads built by the Government. This construction cost included complete equipment.

After paying all operating expenses and \$12,710,624 in interest on capital charges the South African railroads in 1912 showed a net profit to the Government of \$9,069,216.

In addition to the Government-owned lines, the South African Government leases 50 miles of roads from the Natal-Zululand Co., and operates 56 miles of privately owned lines within the Union, besides 597 miles of the section of the famous Cape-to-Catro Railroad built by Cecil Rhodes and now owned by the Rhodesian (Government) railways.

In the other British Colonies in Africa the few roads attempted by private capital were generally left incomplete and finished by the Government, and Government ownership and operation, with further extensions constantly being made under public management, are the rule. British reports for 1911 showed practically the entire railroad mileage in British colonies having no responsible local government and protectorates to be under Government ownership and operation. The mileage of these lines, with their cost, the latter borne by either the British or colonial Governments, or divided, were shown as follows:

	Mileage.	Cost (approximate).
East Africa Gold Coast Northern Nigeria Sierra Leone Southern Nigeria. Uganda	584 186 356 255 307 61	\$26, 875, 000 11, 204, 000 6, 000, 000 5, 000, 000 20, 000, 000 500, 000

INDIA.

According to the report of the Indian Railway Board for 1911, there were 32,839 miles of roads in operation in that country, of which 6,874 miles were owned and operated by the Indian Government, 18,245 miles were owned and operated by the Indian States, 1,682 miles were owned and operated by native Indian States, 1,648 miles were owned by native States and operated by companies (including 256 miles worked by the State railway administration), and 170 miles were owned by district boards or the administration of the French settlements in India. This would leave only 4,240 miles of privately owned railroads in India, of which a majority are subsidized, either by the Indian Government or by the native States.

While most of the early railways in India now owned by the Government were either wholly or partially built by private enterprise, the British administration found it necessary to acquire and control them in order to have them operated in the interest of the Government. A number of these privately built roads were constructed with money advanced by the Government and not repaid, and were taken over by forfeiture. The secretary of state of India is practically in the position of banker to the companies which operate Government roads, and who pay their money over to him and draw upon him as they need it. This results in frequent overdrafts, for which the Government foots the bill.

Nearly \$2,000,000,000 is represented in the purchase price, construction accounts, cash subsidies, and liabilities assumed by the Indian Government for railroads. The total cost and liabilities average something like \$80,000 a mile for the roads under Government ownership.

After deducting operating expenses, interest, and annuities and profits to operating companies, the results of operation of the Government railroads for 1911 showed a net gain to the Government of upwards of \$20,000,000.

The capital outlay charged against the 3,363 miles of railroads in India owned by the native States for which reports are made averages

about \$17,000 a mile.

A system of Government railroads planned to extend trunk lines into every section of the country and connect all its important centers is the heart of the program for the nationalization of China.

Practically no privately constructed railroads have ever been built in China. This has been partly due to the timidity of private capital and partly to the native prejudice against foreign intrusion and change of creterion.

and partiy to the native prejudice against foreign intrusion and change of customs.

Almost a round billion dollars has been borrowed by the Chinese Government within the last 20 years for railroad construction. These loans generally bear interest at 5 per cent.

Aside from the 3,110 miles of Chinese Government railways reported in 1912, there were 2,670 miles of private railroads in China, owned by Russian, Japanese, or German companies, or by the Governments of those countries.

While the men at the head of the Chinese Government have for years realized the need of a national system of railways, they have been opposed by native prejudice to an extent that has greatly hampered their constructive work. The completion of arrangements for a \$25,000,000 loan from foreign countries for the construction of 1,200 miles of additional railroads in 1911 was so unpopular as to be largely responsible for the revolution which followed shortly afterwards. With the organization of the Republic and adoption of a national policy, however, this loan is to be carried out and railroad construction to be expanded even faster than before planned.

Statistics of Chinese railroads available are so incomplete that it is impossible to give any complete information as to the cost of their construction or their capital charges.

The first Chinese national railroad, built in 1894, took over a section of completed line 130 miles in length that had been built by a native company and also 35 miles owned by Japan. These short lines were expanded into the Imperial Railways of North China, with 602 miles of lines in operation and capital charges of about \$50,000 a mile. The Peking-Kalgan Railway, 124 miles in length, was built out of the surplus earnings of the Imperial Railways of North China. The 755 miles of the Peking-Hankow line were built at a capital cost of something over \$58,000 a mile.

The first railway built in Japan, opened in 1872, was a Government-owned line, 18 miles in length. Private ownership of roads was not encouraged until 1883; and in 1905 there were 4,729 miles of railways in the country, of which 1,461 miles were owned by the Government and 3,268 miles by 38 private companies.

In 1906 Japan undertook the nationalization of its railways as a part of the program for paying the Chinese war debt and bringing the country into the rank of progressive industrial nations. At the end of 1911 the Government had acquired all the important railway lines in Japan, amounting to 5,023 miles. Of these, 2,822 miles had been purchased from private companies at a cost of \$83,000 a mile, which is estimated to have been approximately twice the cost of their construction. The remaining roads under Government ownership have been constructed by the Government. The total estimated cost of construction and acquisition of the Government roads is \$300,000,000, or a little over \$60,000 a mile, and the total national railway bond issues amount to about a quarter of a billion dollars. These bonds bear 5 per cent interest and are to run for 55 years.

The surplus earnings of the Japanese national railways for 1911 were \$6,500,000, after the payment of all expenses, including interest charges of \$16,000,000.

MINOR ASIATIC RAILWAYS.

MINOR ASIATIC RAILWAYS.

charges of \$16,000,000.

MINOR ASIATIC RAILWAYS.

Outside of Japan, China, Siberis, and India, where Government activities of Russia, China, Great Britain, Germany, and Japan have forced railroad building as a part of the program of development, few railroads have been built in India.

Slam, in 1912, had 634 miles of Government-constructed roads in operation and 554 miles under construction. The completed Siamese railroads were built and equipped at a cost of about \$40,000 a mile. There were 66 miles of private railroads in the country.

In the Federated Malay States, which include the Malay Peninsula and the islands of Singapore, all the railroad construction has been by the Government. At the beginning of 1912 there were 559 miles of lines in operation and something like 100 miles more under construction. Malayan railroads have been wholly constructed out of State revenues, without loans. The cost of construction has been about \$50,000 a mile. Net earnings of the Malayan railroads for 1911 were upwards of \$1,500,000.

The 577 miles of railroads in Ceylon were built and are owned and operated by the Government. They have cost approximately \$60,000 a mile.

The 61 miles of railroad on the island of Cyprus was built from a loan of \$625,000 made by the Government.

There are 120 miles of railways in Johore, financed and constructed by the Federated Malay States at a cost of approximately \$6,000,000, the State of Johore paying 3 per cent interest on the capital outlay and operating the roads, which have been worked at a loss.

The 7 miles of railway on the island of Malta was built by a private company, operated for several years at a loss, and abandoned, the local government acquiring it in 1890. Its operation under Government ownership has showed a small net return.

ERITISH COLONIES AND PROTECTORATES.

BRITISH COLONIES AND PROTECTORATES.

In the less-important British Colonies and protectorates the policy of Government construction and operation of railways as a part of the

governmental policy of development and expansion has been as general as in India, Africa, and Australasia.

British Honduras: Twenty-five miles Government railroad; no private lines; cost of construction, \$26,000 a mile.

Hongkong: British section of the Kowloon-Canton Railway, 22 miles; cost of construction, \$12,000,000; repaid from earnings, \$250,000.

Jamaica: The first railway line—25 miles—was built by a private company and later taken over by the Government. After building extensions the Government sold it in 1890 to a private company for \$500,000 cash and \$3,500,000 in second-mortgage bonds, agreeing also to pay the cost of laying track and to make land grants of 1 square mile for each mile of additional line built. Under this arrangement 74,000 acres of land was acquired by the company, but in 1898, after extending the road to a length of 120 miles, the company defaulted in payment of interest on the first-mortgage bonds, and the Government took repossession, becoming responsible for liabilities amounting to \$8,250,000. In 1912 the Government lines in Jamaica were 184 miles, with capital charges of about \$65,000 a mile. The only other railroad in Jamaica is 8 miles of private line owned by the United Fruit Co.

Mauritius: One hundred and twenty miles of railways constructed, owned, and operated by the Government; no other lines; cost of construction, \$9,450,000.

Trinidad: Eighty-one mises of railroads; constructed and operated by the Government; no other lines, \$4,500,000.

THE SIBERIAN RAILROAD.

One of the greatest railroad undertakings of the age was the building of the Trans-Siberian Railway by Russia. This comprised the construction of a line from European Russia through the plains of Siberia to the Pacific Ocean. Its building was carried out, both as a brilliant move in military strategy and statesmanship, to strengthen Russia's power in Asia, and as a means for encouraging settlement in the great Asiatic territory and developing its resources.

The Siberian railroad, which was constructed entirely by the Government, is 4,272 miles iong, and its construction cost \$180,019,000, or at the rate of a little less than \$28,000 a mile. In connection with the building and operation of this road, the Russian Government has spent an additional \$11,227,000 in encouraging settlement of the country, developing trade, etc. The Russian Government has built in Asia a total of about 7,000 miles of railroads.

Argentine republic.

ARGENTINE REPUBLIC.

In the Argentine Republic the Government, up to last year, had bought and built 2,495 miles of railroads, at a cost of \$121,000,000, or about \$48,000 a mile. Most of these Government lines are narrow-gauge roads that have been constructed into new territory to encourage its settlement under conditions which did not offer sufficient inducement for private enterprise to venture. Argentina has not followed the example of the United States and Canada in making land grants to railroads.

In addition to the Government lines there were in operation in Argentina something over 15,000 miles of railroad under private ownership and operation. In connection with various schemes of railroad extension the State had under construction in addition more than 1,300 miles of uncompleted lines. Construction of new railroads in the country is now carried on under the direction of the Government railway administration. No details of cost of construction of Government lines are available.

Government ownership and private operation of railroads under lease has been the policy of Brazil since 1906. The reports for 1911, the last available, show the ownership and control of Brazilian railroads to be as follows:

2,000 tion—
Privately owned lines built under concessions and with Government guarantee of interest—
Privately owned lines built under concessions without guarantee of interest Lines owned by various States of the Union ____

The most important of the Brazilian Government railroads is the Central Railway of Brazil, over 1,200 miles long, which was built by the Government at a cost of about \$80,000,000. It is operated at a

A contract has been made between the Bolivian Government and the Bolivia Railway Co. whereby the Government is to provide \$12,-500,000 and the company \$15,000,000 for the building of railroads in the Republic, the Government guaranteeing interest on the entire capital expenditure at the rate of 5 per cent.

CHILD.

The Longitudinal Railway, which is to extend the full length of Chile, as its greatest trunk railroad, is under construction in two sections of 446 and 366 miles each. The road is being built by contract, the total cost to be \$35,000,000, or an average of something under \$45,000 a mile. There is also under construction by the Government 768 miles of other lines. The Longitudinal Railway, to be completed this year, is to be operated by a contracting company for 25 years, the Government guaranteeing interest at 5 per cent on the bonds and sinking fund charges of 2 per cent a year.

Of the Chilean railroads in operation, there are 1,928 miles owned and operated by the Government and 1,977 miles under private ownership and operation. Two sections of uncompleted lines, begun by companies that went bankrupt, have been bought, and the remainder of the State roads have been built by the Government. The capital value of the Chilean State railways was officially estimated, in 1910, at \$94,000,000, or something more than \$45,000 a mile, including stations and equipment.

and equipment.

COLOMBIA.

The Colombian Government owns no railroads, but has either bought stock or made liberal concessions for the construction of the 600 miles of railroad in the country. Accurate statements of the financing of these roads are not obtainable.

ECUADOR.

There are about 700 miles of railroad in operation and under construction in Ecuador, all of which have been built under concessions or subsidies, or both, from the Government. The Machala Railroad, 18 miles long, was built by the municipality of Machala at a cost of about \$250,000, and the Government has assigned a surcharge of one-half of 1

per cent on the export duties at the port of Bolivar to the payment of the debt. Under the terms of the concession for the Guayaquil & Quito Railway, 290 miles long, the Government guaranteed the payment of \$12,250,000 of the \$17,500,000 which represented the cost of construction. This railroad is to revert to the ownership of the Government at the end of 60 years. For the building of the Bahia de Caraquez to Quito railway (344 miles), the Government guarantees interest for 30 years at 6 per cent on the cost of construction up to \$5,000,000, and has allocated otherwise unassigned customs duties of the port of Manabi for this purpose. For the building of the 37 miles of the Central Railway of Ecuador, for which a concession was granted in 1903, the Government advanced a loan of \$600,000, bearing interest at 6 per cent, and guarantees the interest and sinking-fund charges by assigning as security one-third of the export duty on all vegetable ivory exported at ports in the Province of Manabi.

PARAGUAY.

Paraguay has one railroad, 138 miles in length, owned partly by a private company and partly by the Argentinian Government.

PERU

Peru's 1,656 miles of railway are mainly owned by the Government and are leased and operated by the Peruvian Corporation (Ltd.), formed in 1800 for the settlement of the Peruvian debt. This corporation received Government concessions for assuming responsibility for the debt, among them being the use of the railroads. Later the agreement was modified so that the corporation returned to the Government nearly a million dollars that had been expended on railroad improvements and agreed to build extensions of nearly 200 miles of lines. The net earnings of the railroads operated by the corporation are nearly \$2,000,000 at year.

URUGUAY.

Uruguay guarantees interest of 3½ per cent for 35 years on a thousand miles of privately owned railroad built under a 90-year concession. The roads are to revert to the Government in 90 years, and the capital expenditure upon which the interest is guaranteed is about \$40,000 a mile.

Mile.

A plan for a system of secondary railroads to open up new territory is being worked out by the Government, by which a part of the cost of construction is to be met by a special loan paid out of Government revenues and a part is to be assessed against land within a zone 4½ miles wide on each side of the railroads.

MEXICO.

All the railroads in Mexico have been built under concessions from the Central Government or the States and they will all ultimately revert to the State. The Central Government has a large interest in the National Railways of Mexico, with 6.250 miles of broad-gauge and about 1,500 miles of narrow-gauge roads. The Government also has a direct interest in the Tehuantepec Railway—207 miles.

The political complications in the history of Mexico and other countries to the south of us make it impossible to give any accurate statistics as to the cost or other details of the construction of railroads.

There are in all about 10,000 miles of broadgauge and 6,000 miles of narrow-gauge roads in Mexico. Under the general railway laws of 1889, all the roads are to revert to the Government at the end of 99 years, subject to payments for rolling stock and equipment, to be made upon valuation.

As nearly as can be ascertained, the total Government subventions to railroads in Mexico, up to 1910, amounted to \$163,361,000, or something over \$10,000 a mile for all the roads in the country.

COSTA RICA

There are 443 miles of railroads in Costa Rica, of which 83 miles were built by the Government at a cost of \$5,660,000.

NICARAGUA.

The Government owns and operates 171 miles of roads which cost about \$3,500,000.

The Panama Railroad, in the Canal Zone, is owned by the United States and operated by the Government in connection with the Panama Steamship Line, also Government. The nominal capitalization of the railroad is \$70,000,000, but the road was included in the purchase, for \$40,000,000, of all the interests and property of the French Panama Canal Co. From 1905 to 1912, inclusive, the net earnings of the Panama Railroad, over operating expenses, and exclusive of steamship earnings, aggregated \$12,217,459.

Respectfully.

Hon. William C. Houston,

Chairman Committee on Territories, House of Representatives.

¹ Owned by the United States.
² Roads given under private ownership and operation do not include something over 5,000 miles of '¹local'' lines, feeders, etc.
² According to reports of the Indian Railway Board for 1911, 6,874 miles of railroads are owned and operated by the Indian Government; 18,245 miles were owned by the Indian Government and operated by companies; 1,662 miles were owned and operated by particle of the states and operated by private companies; and 170 miles were owned by district boards or the administration of the French settlements in India. Of the roads under private ownership, some are subsidized by the Indian Government or State governments.
⁴In 17 British protectorates and colonies not possessing responsible government there were, in the year 1911, 12 state railways with 3,525 miles of lines. The only colonies and protectorates in this group possessing railway systems in which there were no Government lines were Barbados, British Guiana, Nyasaland, the Bechuanaland Protectorate, and the settlements of Labuan and Rhodesia. Of the total of 2,596 miles of railways under private ownership and operation in all these colonies and possessions, 2,35i miles belonged to the Rhodesian system in Rhodesia, the Bechuanaland Protectorate and Portuguese East Africa, this system being mainly owned by a branch of the South Africa Co. which was heavily subsidized by the Government in the building of these lines.

⁵ Figures given do not include 2,420 miles of suburban, narrow-gauge, and ''light'' lines under private ownership and operation.

ĕ Exclusive of 232 miles of private ''light'' roads.

¹ Part of this mileage is operated by the Imperial railways under private ownership.

⁵ Figures include narrow-gauge and interurban electric lines.

ship.

Figures include narrow-gauge and interurban electric lines.

Includes 2,000 miles of secondary roads.

Includes 2,000 miles of narrow-gauge roads.

IMMIGRATION.

Mr. GOLDFOGLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by printing a very short article on the subject of immigration.

The SPEAKER. The gentleman from New York [Mr. Golden.

FOGLE] asks unanimous consent to extend his remarks in the RECORD by printing a very short article on the subject of immigration. Is there objection?

Mr. MANN. An article by whom? Mr. GOLDFOGLE. It is an article from a New York newspaper.

Mr. BARNHART. Mr. Speaker, I object.

LEAVE OF ABSENCE.

Mr. Hamilton of New York, by unanimous consent, was granted leave of absence for one week on account of illness in his family.

WITHDRAWAL OF PAPERS.

Mr. HAWLEY, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, papers in the case of Lienary Flatter, H. R. 31361, Sixty-first Congress, no adverse report having been made thereon.

Also, papers in the case of Lewis S. Fulter, H. R. 23308, Sixtysecond Congress, no adverse report having been made thereon. Also, papers in the case of Delia R. Goss, H. R. 21987, Sixty-

second Congress, no adverse report having been made thereon. Also, papers in the case of Rebecca M. Gannto, H. R. 20148, Sixty-second Congress, no adverse report having been made thereon.

Also, papers in the case of Frazier Ward, H. R. 25087, Sixtysecond Congress, no adverse report having been made thereon.

CHANGE OF REFERENCE.

On request of Mr. Lever, by unanimous consent, the Committee on Agriculture was discharged from further consideration of the bill (H. R. 10235) making appropriation for printing and publishing maps and reports relating to the kelp beds on the Pacific coast, and the same was referred to the Committee on Appropriations.

RECESS.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that the House stand in recess until 12 o'clock and 20 min-

The SPEAKER. The gentleman from New York [Mr. Firz-GERALD] asks unanimous consent that the House stand in recess until 12 o'clock and 20 minutes p. m. Is there objection? [After a pause.] The Chair hears none.

Accordingly (at 12 o'clock and 14 minutes p. m.) the House

stood in recess until 12 o'clock and 20 minutes p. m.

AFTER THE RECESS.

The recess having expired, the House was called to order by the Speaker.

The SPEAKER. The Chair will state that it will be necessary for Members to vacate the first three rows of seats for the occupancy of the Senate.

At 12 o'clock and 26 minutes the Doorkeeper announced the Vice President of the United States and the Members of the United States Senate.

The Members of the House rose.

The Senate, preceded by the Vice President and by their Secretary and Sergeant at Arms, entered the Chamber.

The Vice President took the chair at the right of the Speaker, and the Members of the Senate took the seats reserved for

The SPEAKER. All gentlemen will resume their seats. The Chair appoints on the part of the House, as the committee to conduct the President in, Mr. UNDERWOOD, Mr. FITZGERALD, and Mr. Mann. The Vice President will announce those on the part of the Senate.

The VICE PRESIDENT. The Vice President appoints Sena-

tors Kern, Bacon, and Gallinger.

At 12 o'clock and 30 minutes the President of the United States, escorted by the committee of Senators and Representa-tives, entered the Hall of the House and stood at the Clerk's desk, amid applause on the floor and in the galleries.

ADDRESS OF THE PRESIDENT (H. DOC. NO. 625).

The PRESIDENT. Mr. Speaker, Mr. President, gentlemen of the Congress, in my report "on the state of the Union," which I had the privilege of reading to you on the 2d of December last, I ventured to reserve for discussion at a later date the subject of additional legislation regarding the very difficult and intricate matter of trusts and monopolies. The time now seems opportune to turn to that great question, not only because the currency legislation, which absorbed your attention and the attention of the country in December, is now disposed of, but also because opinion seems to be clearing about us with singular rapidity in this other great field of action. In the matter of the currency it cleared suddenly and very happily after the muchdebated act was passed; in respect of the monopolies which have multiplied about us and in regard to the various means by which they have been organized and maintained, it seems to be coming to a clear and all but universal agreement in anticipation of our action, as if by way of preparation, making the way easier to see and easier to set out upon with confidence and without confusion of counsel.

Legislation has its atmosphere like everything else, and the atmosphere of accommodation and mutual understanding which we now breathe with so much refreshment is matter of sincere congratulation. It ought to make our task very much less difficult and embarrassing than it would have been had we been obliged to continue to act amidst the atmosphere of

suspicion and antagonism which has so long made it impossible to approach such questions with dispassionate fairness. structive legislation, when successful, is always the embodiment of convincing experience and of the mature public opinion which finally springs out of that experience. Legislation is a business of interpretation, not of origination; and it is now plain what the opinion is to which we must give effect in this matter. It is not recent or hasty opinion. It springs out of the experience of a whole generation. It has clarified itself by long contest, and those who for a long time battled with it and sought to change it are now frankly and honorably yielding to it and seeking to conform their actions to it.

The great business men who organized and financed monopoly and those who administered it in actual everyday transactions have, year after year until now, either denied its existence or justified it as necessary for the effective maintenance and development of the vast business processes of the country in the modern circumstances of trade and manufacture and finance; but all the while opinion has made head against them. The average business man is convinced that the ways of liberty are also the ways of peace and the ways of success as well; and at last the masters of business on the great scale have begun to yield their preference and purpose, perhaps their judgment

also, in honorable surrender.

What we are purposing to do, therefore, is, happily, not to hamper or interfere with business as enlightened business men prefer to do it, or in any sense to put it under the ban. The antagonism between business and Government is over. We are now about to give expression to the best business judgment of America, to what we know to be the business conscience and honor of the land. The Government and business men are ready to meet each other halfway in a common effort to square business methods with both public opinion and the law. The best-informed men of the business world condemn the methods and processes and consequences of monopoly as we condemn them, and the instinctive judgment of the vast majority of business men everywhere goes with them. We shall now be their spokesmen. That is the strength of our position and the sure prophecy of what will ensue when our reasonable work is done.

When serious contest ends, when men unite in opinion and purpose, those who are to change their ways of business joining with those who ask for the change, it is possible to effect it in the way in which prudent and thoughtful and patriotic men would wish to see it brought about, with as few, as slight, as easy and simple business readjustments as possible in the circumstances, nothing essential disturbed, nothing torn up by the roots, no parts rent asunder which can be left in wholesome combination. Fortunately, no measures of sweeping or novel change are necessary. It will be understood that our object is not to unsettle business or anywhere seriously to break its established courses athwart. On the contrary, we desire the laws we are now about to pass to be the bulwarks and safeguards of industry against the forces who have disturbed it. What we have to do can be done in a new spirit, in thoughtful moderation, without revolution of any untoward kind.

We are all agreed that "private monopoly is indefensible and intolerable," and our program is founded upon that conviction. It will be a comprehensive but not a radical or unacceptable program and these are its items, the changes which opinion deliberately sanctions and for which business waits:

It waits with acquiescence, in the first place, for laws which will effectually prohibit and prevent such interlockings of the personnel of the directorates of great corporations—banks and railroads, industrial, commercial, and public service bodies—as in effect result in making those who borrow and those who lend practically one and the same, those who sell and those who buy but the same persons trading with one another under different names and in different combinations, and those who affect to compete in fact partners and masters of some whole field of business. Sufficient time should be allowed, of course, in which to effect these changes of organization without inconvenience or confusion.

Such a prohibition will work much more than a mere negative good by correcting the serious evils which have arisen because, for example, the men who have been the directing spirits of the great investment banks have usurped the place which belongs to independent industrial management working in its own behoof. It will bring new men, new energies, a new spirit of initiative, new blood, into the management of our great business enterprises. It will open the field of industrial development and origination to scores of men who have been obliged to serve when their abilities entitled them to direct. It will immensely hearten the young men coming on and will greatly enrich the business activities of the whole country.

In the second place, business men as well as those who direct public affairs now recognize, and recognize with painful clearness, the great harm and injustice which has been done to many, if not all, of the great railroad systems of the country by the way in which they have been financed and their own distinctive interests subordinated to the interests of the men who financed them and of other business enterprises which those men wished to promote. The country is ready, therefore, to accept, and accept with relief as well as approval, a law which will confer upon the Interstate Commerce Commission the power to superintend and regulate the financial operations by which the railroads are henceforth to be supplied with the money they need [applause] for their proper development to meet the rapidly growing requirements of the country for in-creased and improved facilities of transportation. We can not postpone action in this matter without leaving the railroads exposed to many serious handicaps and hazards; and the prosperity of the railroads and the prosperity of the country are inseparably connected. Upon this question those who are chiefly responsible for the actual management and operation of the railroads have spoken very plainly and very earnestly, with a purpose we ought to be quick to accept. It will be one step, and a very important one, toward the necessary separation of the business of production from the business of transportation. [Applause.]

The business of the country awaits also, has long awaited and has suffered because it could not obtain, further and more explicit legislative definition of the policy and meaning of the existing antitrust law. Nothing hampers business like uncertainty. Nothing daunts or discourages it like the necessity to take chances, to run the risk of falling under the condemnation of the law before it can make sure just what the law is. Surely we are sufficiently familiar with the actual processes and methods of monopoly and of the many hurtful restraints of trade to make definition possible, at any rate up to the limits of what experience has disclosed. These practices, being now abundantly disclosed, can be explicitly and item by item forbidden by statute in such terms as will practically eliminate uncertainty, the law itself and the penalty being made equally

And the business men of the country desire something more than that the menace of legal process in these matters be made explicit and intelligible. They desire the advice, the definite guidance, and information which can be supplied by an adminis-

trative body, an interstate trade commission.

The opinion of the country would instantly approve of such a commission. It would not wish to see it empowered to make terms with monopoly or in any sort to assume control of business, as if the Government made itself responsible. [Applause.] It demands such a commission only as an indispensable intrument of information and publicity, as a clearing house for the facts by which both the public mind and the managers of great business undertakings should be guided, and as an in-strumentality for doing justice to business where the processes of the courts or the natural forces of correction outside the courts are inadequate to adjust the remedy to the wrong in a way that will meet all the equities and circumstances of the

Producing industries, for example, which have passed the point up to which combination may be consistent with the public interest and the freedom of trade, can not always be dis-sected into their component units as readily as railroad companies or similar organizations can be. Their dissolution by ordinary legal process may oftentimes involve financial conse quences likely to overwhelm the security market and bring upon it breakdown and confusion. There ought to be an administrative commission capable of directing and shaping such corrective processes, not only in aid of the courts but also by

independent suggestion, if necessary.

Inasmuch as our object and the spirit of our action in these matters is to meet business half way in its processes of selfcorrection and disturb its legitimate course as little as possible, we ought to see to it, and the judgment of practical and sagacious men of affairs everywhere would applaud us if we did see to it, that penalties and punishments should fall, not upon business itself, to its confusion and interruption, but upon the individuals who use the instrumentalities of business to do things which public policy and sound business practice con-[Applause.] Every act of business is done at the command or upon the initiative of some ascertainable person or group of persons. These should be held individually responsible and the punishment should fall upon them, not upon the business organization of which they make illegal use. It should be one of the main objects of our legislation to divest such persons of their corporate cloak and deal with them as with those

who do not represent their corporations, but merely by deliberate intention break the law. Business men the country through would, I am sure, applaud us if we were to take effectual steps to see that the officers and directors of great business bodies were prevented from bringing them and the business

of the country into disrepute and danger.

Other questions remain which will need very thoughtful and practical treatment. Enterprises, in these modern days of great individual fortunes, are oftentimes interlocked, not by being under the control of the same directors, but by the fact that the greater part of their corporate stock is owned by a single person or group of persons who are in some way intimately related in interest. We are agreed, I take it, that holding companies should be prohibited, but what of the controlling private owner-ship of individuals or actually cooperative groups of individuals? Shall the private owners of capital stock be suffered to be themselves in effect holding companies? We do not wish, I suppose, to forbid the purchase of stocks by any person who pleases to buy them in such quantities as he can afford, or in any way arbitrarily to limit the sale of stocks to bona fide purchasers. Shall we require the owners of stock, when their voting power in several companies which ought to be independent of one another would constitute actual control, to make election in which of them they will exercise their right to vote? plause.] This question I venture for your consideration.

There is another matter in which imperative considerations

of justice and fair play suggest thoughtful remedial action. Not only do many of the combinations effected or sought to be effected in the industrial world work an injustice upon the public in general; they also directly and seriously injure the individuals who are put out of business in one unfair way or another by the many dislodging and exterminating forces of combination. I hope that we shall agree in giving private individuals who claim to have been injured by these processes the right to found their suits for redress upon the facts and judgments proved and entered in suits by the Government where the Government has upon its own initiative sued the combinations complained of and won its suit, and that the statute of limitations shall be suffered to run against such litigants only from the date of the conclusion of the Government's action. plause.] It is not fair that the private litigant should be obliged to set up and establish again the facts which the Government has proved. He can not afford, he has not the power, to make use of processes of inquiry the Government has command of. Thus shall individual justice be done while the processes of business are rectified and squared with the general conscience.

I have laid the case before you, no doubt, as it lies in your own mind, as it lies in the thought of the country. What must every candid man say of the suggestions I have laid before you, of the plain obligations of which I have reminded you? That these are new things for which the country is not prepared? No; but that they are old things, now familiar, and must of course be undertaken if we are to square our laws with the thought and desire of the country. Until these things are done. conscientious business men the country over will be unsatisfied. They are in these things our mentors and colleagues. now about to write the additional articles of our constitution of peace, the peace that is honor and freedom and prosperity. [Applause on the floor and in the galleries.]

At 12 o'clock and 52 minutes p. m. the President retired from the Hall of the House.

Thereupon the Vice President and the Members of the Senate returned to their Chamber.

REFERENCE OF ADDRESS OF THE PRESIDENT.

Mr. UNDERWOOD. Mr. Speaker, I move that so much of the message of the President that has just been delivered to the two Houses of Congress as relates to the establishment of an interstate trade commission be referred to the Committee ou Interstate and Foreign Commerce, and that the balance of the message be referred to the Committee on the Judiciary

The SPEAKER. The gentleman from Alabama [Mr. Underwood] moves that so much of the President's address as refers to the interstate trade commission be referred to the Commit-tee on Interstate and Foreign Commerce, and that the rest of it be referred to the Committee on the Judiciary.

Mr. MANN. The gentleman should ask unanimous consent

Mr. MANN. The gentleman should ask unanimous consent instead of making the motion to refer.

Mr. UNDERWOOD. Mr. Speaker, I think the suggestion made by the gentleman from Illinois is correct.

The SPEAKER. The Chair did not hear him.

Mr. MANN. Instead of a motion being made, the gentleman should ask unanimous consent.

Mr. FITZGERALD. I think the gentleman is mistaken.

Mr. MANN. I know I am not mistaken.

Mr. FITZGERALD. I know that the matter came up under Speaker Henderson, and he held that with the exception of the annual message of the President, under the rules and practice of the House the Speaker referred other messages, subject to the action of the House, if it did not agree to the motion; and the gentleman should amend his motion to refer the message.

Mr. UNDERWOOD. I will amend my motion in accordance with the suggestion of the gentleman from Georgia [Mr. Adamson], that so much of the President's message as relates to stocks and bonds also be referred to the Committee on Interstate and Foreign Commerce. Does the gentleman from Illinois desire to amend that order?

Mr. MANN. I desire to have the motion stricken out in some way so that there would be no conflict between the Committee on the Judiciary and the Committee on Interstate and Foreign

Mr. UNDERWOOD. I think that questions in reference to trust legislation have already been referred, by the reference of the President's annual message, to the Committee on the Ju-

There are two matters in this message that are outside of legislation to carry out the purposes of the Sherman antitrust law. One is the reference in this message to the establishment of an interstate trade commission. The other is in reference to the control of stocks and bonds.

Now, I recognize that those two propositions can come under our jurisdiction only in view of the fact of their interstate rela-tion, and therefore should go to the Committee on Interstate

and Foreign Commerce.

Mr. MANN. I quite agree with the gentleman on his proposition, if it is so worded in his motion that there can be no controversy about it.

Mr. UNDERWOOD. I will state the motion over again Mr. PAYNE. Will the gentleman allow me right there? I will state the motion over again.

Mr. UNDERWOOD. Certainly.
Mr. PAYNE. The usual resolution distributing the President's message has followed the language of the rule, giving the committees the same jurisdiction that the rules give. I suggest to the gentleman that if he will follow the language of the rule in this case he will accomplish what he desires to accomplish.

Mr. UNDERWOOD. I will say to the gentleman from New York that if I followed the language of the rule I would still leave the question in doubt. Therefore I am not following the language of the rule.

Mr. MURDOCK. Will the go Mr. UNDERWOOD. I will. Will the gentleman yield to me?

Mr. MURDOCK. The gentleman will remember that I introduced three bills dealing with the trust proposition, and they went by reference to the Committee on Interstate and Foreign Commerce. I understand there is a motion that this trust legislation is to be variously divided between the two

Mr. UNDERWOOD. No. The main question; that is, all those portions relating to the Sherman antitrust law, will go to the Committee on the Judiciary. My motion is merely that the portion of the message which relates to this interstate trade commission, and to the control of stocks and bonds, shall go to the Interstate Commerce Committee, and that the remainder of the message shall go to the Committee on the Judiciary.

Mr. MURDOCK. Now, my question is this: In so far as the interstate trade commission does not deal with the trusts, the Interstate Commerce Committee, in dealing with the subject,

will deal with the trust proposition.

Mr. BORLAND. Why not let it all go to the Committee on

The SPEAKER. The truth about this business is that somehow or somehow else trust legislation in the House has always been referred to the Judiciary Committee. The Chair does not know how it started, but the bills that the gentleman from Kansas [Mr. Murdock] is talking about created a trade commission, and for that reason the Chair referred them to the Committee on Interstate and Foreign Commerce. Now, the bills of the gentleman from Kansas and a good many others of these bills are in what is called the twilight zone, and they are so mixed up that King Solomon himself, if he were back again, could not separate them with any satisfaction to himself or anybody else. So the Chair referred these three bills of the gentleman from Kansas to the Interstate and Foreign Com-merce Committee, not because that committee had jurisdiction concerning trusts, but because of the creation of this interstate trade commission.

Mr. MURDOCK. Now, will the gentleman from Alabama yield, to see if I can get this clear in my own mind?

Mr. UNDERWOOD. I will.

Mr. MURDOCK. When we are heard on those bills, to what committee are we to go to have a hearing?

Mr. MANN. To the committee which is considering them.

Laughter.1

Mr. MURDOCK. That is true enough, but that does not answer the question. I should like to have an answer from the

gentleman from Alabama,

Mr. UNDERWOOD. I will say to the gentleman that I have not read his bills, and it is not my business to refer bills. That prerogative belongs to the Speaker. But if the subject matter of the gentleman's bills relates to an interstate trade commission, or to the control of stocks and bonds, my judgment is that those bills would go to the Interstate Commerce Committee.

Mr. MURDOCK. The matter of the reference of the bills Mr. UNDERWOOD. I understand that one of the gentleman's bills provides for an interstate trade commission.

Mr. MURDOCK. Yes. Now, the matter of referring these bills to the Interstate Commerce Committee will not preclude us from being heard before the Judiciary Committee on the general question of trust legislation.

Mr. UNDERWOOD. Certainly not.
Mr. MURDOCK. We expect to have hearings before both

Mr. UNDERWOOD. I understand so.

Mr. ADAMSON. As I understand the motion of the gentleman from Alabama, it is to dissect and properly to distribute and refer the message of the President, and not any particular bill. There are a great number of bills introduced by various Members, some of which have gone to the Judiciary Committee and some of which have gone to the Committee on Interstate Foreign Commerce, because those bills, many of them, are multifarious and contain matters which are cognizable by both I apprehend that in considering the message of the President each committee will consider the part referred to it, and that they will have access to all bills, no matter to what committee referred, and may gather wisdom and information from any source, and from any bill, and from any gentleman. no matter to which committee the bills are referred.

Mr. MURDOCK. That sounds mighty sensible to me.

Mr. ADAMSON. Each committee may construct a bill to suit the exigencies of the case. For instance, I have no doubt the Judiciary Committee will be able, from the bills and sources of information that they have, to construct legislation touching the antitrust law, interlocking directorates, and kindred subjects, and that the Committee on Interstate and Foreign Commerce will be able, from the various sources at hand relating to the control of finances of transportation companies, trade commissions, and other subjects, phases, and instrumentalities of commerce, to construct and report appropriate bills. Members of the Judiciary Committee may draw bills affecting commerce and have them referred to the Committee on Commerce, and vice versa. The authorship of a bill and committee jurisdiction are entirely different propositions.

Mr. MURDOCK. Does the gentleman expect to have hear-

ings before his committee?

Mr. ADAMSON. We have not considered the question; it may be that when we read all of the bills and messages we will know enough in regard to the subject without having hearings. If we do have hearings, we will give the gentleman

from Kansas and all others interested due notice.

The SPEAKER. So far as the parliamentary point raised is concerned, the annual message of the President is referred by motion, and others are referred by the Speaker, and if the House does not like the Speaker's reference any Member can make a motion to have a change. In this particular case the Chair called the attention of the gentleman from Alabama to the matter and asked him to make the motion, because when the time came the Chair might have his attention otherwise directed. There is no question but that this motion is in order, and therefore the Chair puts it. The motion is to refer that part of the President's address touching interstate trade commissions and stocks and bonds to the Interstate and Foreign Commerce Committee, and the remainder of it to the Committee on the Judiciary.

The question was taken, and the motion was agreed to.

POST OFFICE APPROPRIATION BILL.

Mr. MOON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Post Office appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. Hay in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the Post Office appropriation bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 11338) making appropriations for the service of the ost Office Department for the fiscal year ending June 30, 1915, and Post Office Departs for other purposes.

Mr. MOON. Mr. Chairman, I yield to the gentleman from

Kentucky [Mr. BARKLEY].

Mr. BARKLEY. Mr. Chairman, it will be impossible for me in the short space of time allotted to me to discuss the present Post Office appropriation bill in all of its details. place. I desire to congratulate the chairman of the committee and the members of the Post Office Committee for bringing into the House such an admirable piece of legislation as I conceive this appropriation bill to be. I desire also to congratulate those who have the management and control of postal affairs in this country for the excellent showing which they have made in the bill that has been reported. I desire, Mr. Chairman, to direct my remarks for a few moments with special reference to section 6 of the Post Office bill, which takes the assistant postmasters in the first and second class post offices out of the civil service.

We have heard a great deal, Mr. Chairman, on the floor of this House during the pendency of this measure under general debate about the criminal conduct of the dominant party with reference to the onslaught, so called, on the civil service. those who have criticized us so severely for taking the internal deputy revenue collectors out of the civil service and the deputy marshals of the United States from under the cloak of the civil service will refer to the debates that occurred in Congress when the civil-service law was enacted in the first place, they will discover that the great mass of speeches that were made on that subject were not directed toward securing the merit system for the appointment of officers of the different departments of the Government, but the main excuse and the main reason given by those who advocated the passage of the law of 1883 was not a merit service, not in order to get better men in office, but it was in order to enable the Members of the House and Senate to shield themselves from the demands and requests of constituents who were seeking appointments in the Government service.

If you will examine the debates that occurred in Congress at that time you will discover that they were not basing the idea on the fact that merit could be obtained by reason of the civil service, but it was an effort on the part of Members of the House and the Senate to shield themselves behind the civilservice law as a buffer by reason of which they could protect themselves against the demands of their constituents from back

Mr. Chairman, I do not care to go into a discussion of that subject in detail, because I can not do it in 10 minutes. I do not believe it was ever the intention of the originators of this law that the civil service should be extended by Executive order to cover almost every employee in the Government service. I do not believe it was the intention of the framers of the civilservice law in the beginning, for instance, that in the Agricultural Department every employee in the entire department, be it at Washington or elsewhere, except seven, should be covered into the civil service by Executive order of the President. [Applause on the Democratic side.] To-day in the Agricultural Department there are only seven men, from the top to the bottom, who are not under the cloak of the civil service, and one of them is the Secretary of Agriculture. The others are Assistant Secretaries and a few heads of bureaus. I do not believe it was ever intended by the framers of the law that deputy revenue collectors or deputy United States marshals, who are directly responsible to their employers, should be covered into the civil service by Executive order; and as has been already said upon the floor of this House, while we are criticized for undertaking to do on the floor of the House that which Republican Presidents have heretofore done by Executive order, the fact remains and stares our Republican opponents in the face, that whereas they have preached civil-service reform they have never put it into actual practice and operation by either Executive orders or by the methods of their appointments. [Applause on the Democratic side.] When Mr. McKinley went into the office of President he suspended the civil-service law as to railway mail carriers until they had all been filled up with Republicans, and then he used the Executive order again and covered them into the civil service. The gentleman from York [Mr. PAYNE] the other day admitted on the floor of this House that whereas Democrats had been in these places under Mr. Cleveland for four years and thereby had become in some measure meritorious and experienced, Mr. McKinley sus- lings that we could have given to those who do not reside in near

pended the operation of the civil-service law until he could put his Republican friends in office and then covered them back into the civil service.

Mr. Chairman, I believe in an honest civil-service law. lieve that the offices of the various departments who have no discretion in inaugurating policies ought to be under the civil service, but I do not believe that the civil service ought to be carried to any such extreme as to say that it ought to cover heads of departments and those who ought to be in harmony and sympathy with the administration that is in power. I say, my friends, and I say with all sincerity, that I do not intend to criticize the Republicans for the manner in which they have operated the civil-service law. The mere fact that they have done it shows on the very face of it that it has been a farce. The mere fact that it may be done under a different political party shows that it has been a farce, and I am against all farces in Government, whether perpetrated by Democrats or Republicans. How far is this so-called merit system to be carried? If the head of a bureau in the Department of Agriculture or in the Treasury ought to be under the civil service, why ought not a Cabinet minister to be under the civil service? If a Cabinet minister ought to be under the civil service, and if long experience presupposes merit in any particular office, why ought not Members of the House of Representatives be put under the civil service? If we were required to stand a civil-service examination on the Constitution of the United States, how many of us would be returned here if we had to make a grade of 70? How many Members of this House, many of whom have been here for 10 or 15 years, if they were required to stand a civil-service examination on the rules of the House and make a grade of 70 could ever get back here by election or appointment?

Mr. MURDOCK. The longer we stay here the less we know

about them.

Mr. BARKLEY. That is true of the gentleman from Kansas, I am sure, from my experience with him. [Laughter.] How many Members of Congress would be willing to have the Civil Service Commission tell them who their secretary should be, and yet he is a Government officer—he is paid out of the Public Yet you are not willing that the postmaster, who is responsible for the conduct of his office, who is directly responsible to the Postmaster General, should name his first assistant postmaster in that particular office; and if anyone were to introduce a bill here requiring a Member of Congress to accept a secretary certified to him by the Civil Service Commission, the bill would not get 10 votes.

Mr. O'SHAUNESSY. Mr. Chairman, will the gentleman

Mr. BARKLEY.

Mr. O'SHAUNESSY. I would like to ask the gentleman if he thinks an efficient postmaster, having rather an efficient assistant postmaster, should be discharged and a man recom-

mended merely by a political organization should take his place?
Mr. BARKLEY. Mr. Chairman, I think that the postmaster himself ought to be the judge of the efficiency of not only his assistant but he ought to be a man who is in sympathy the policies and the purposes of the postmaster, and taking them out of the civil service will not prevent them from retaining an efficient man in office if they want to do it. [Applause on Democratic side.] I believe that the postmaster ought to be given the right to discharge an inefficient assistant or one who is not in sympathy with him, if he desires to do so. and other reasons I think assistant postmasters should be taken from under the civil service. [Applause.]

The CHAIRMAN. The time of the gentleman from Ken-

tucky has expired.

Mr. Chairman, I will ask the gentleman Mr. BARKLEY. from Tennessee to yield me two minutes more.

Mr. MOON. I regret to say that I have not the time. Mr. MOON. Mr. Chairman, I yield to the gentleman from Georgia [Mr. EDWARDS].

Mr. EDWARDS. Mr. Chairman, the Postal Service was never . intended to be a paying institution. It was not established as a money-making branch of the Government; it was established as a convenience for the people. The American people enjoy as good, if not a better, Postal Service than any people in the world. It should be the best in the world. I shall not consume the time of the House in a discussion of the general topic of Postal Service. I wish to address myself to a few branches of the service and to a few phases of the subject.

RURAL FREE DELIVERY SERVICE.

Congress has given to the people of the country the Rural Free Delivery Mail Service, which is one of the greatest blessreach of post offices. We have rapidly extended and increased this service until to-day the country is a network of rural free delivery routes. I have taken a keen interest in this branch of the Postal Service, because I was confident I could do nothing that would be of more substantial service and value to the farmers of the district I represent than to help them get good While the first district of Georgia can boast of mail' service. a great number of rural mail routes, and while thousands of people are accommodated in that district by the service we have given them, yet there are thousands of people waiting for this service, which I am anxious they should have. As rapidly as the Post Office Department will establish these routes, I am urging them for the people in our section. I hope to see the time when every farm home, no matter how humble, in the first district of Georgia will be supplied with a daily, except Sunday, mail service. What I wish for the people I represent should be extended to the farmers of all sections of this country. People on the farms, away from the post offices, have not the proper appreciation of Rural Free Delivery Service until they have used it for a while. Once they know what it means to them they would not be without it.

PARCEL POST.

Coupled with the extension of the Rural Free Delivery Service we have also given to the people the Parcel Post System. The farmers of the country were clamoring for the parcel post. In certain quarters certain merchants thought they were opposed to it. It has developed, however, that since it has gone into operation and has proven to be such a wonderful success and of such great convenience to everybody the merchants, farmers, and all other classes are praising it. In this connection might be mentioned the Postal Savings Bank System which we have given to the people and which, in my opinion, is going to be a great success.

CHEAPER POSTAGE.

There is a great demand for the reduction of the postage rate. If I had an idea that to reduce the postage rate would impair the efficiency of the Postal Service, I would not favor the reduction. I am convinced, however, that to adopt a plan that will give the people a 1-cent postage rate will not impair the efficiency of the service, and it will result in a great saving to the people of the country. It is another benefit they should reap.

What the American people want is efficient service. Particularly is this true of the Postal Service. In making recommendations regarding vacancies in postmasterships in the district I have the honor to represent, I have at all times kept the question of efficiency in mind, in order that the people might have the very best possible service. The good of the public is paramount to individual ambition. The people of the country will not be satisfied with anything short of the very best mail service. In order to insure the best mail service and to get the best and most efficient postmasters, it occurs to me that it would be an excellent idea if the Postmaster General and his Assistant Postmasters General were required to effect a readjustment of the salaries of the postmasters of the country, from the smallest to the largest offices. "The laborer is worthy of his hire." In many cases the salaries of the postmasters in some of the smaller country post offices are so ridiculously small that the postmasters can not afford to devote their time to the discharge of the duties of the office.

The result is that in many cases the public is put to an inconvenience and denied efficient service. With the establishment of the parcel post and its enlargement, additional and greater burdens have been placed upon the postmasters of the country and upon the rural free-delivery carriers. In order to get the most efficient service it is going to be, in my opinion, necessary to increase the salaries of the rural free-delivery carriers, as well as the salaries of the postmasters. In order that an increase might result to the rural free-delivery carriers of the country, along with many others, I have introduced a bill in Congress on the subject, which is as follows:

To fix the compensation of letter carriers of the Rural Free Delivery Service at a salary of \$1,500 per annum.

I sincerely hope that Congress will see fit to give the rural free-delivery carriers a substantial increase. The carriers, as a general rule, are good and efficient men of high type. The salaries now being received by them are not sufficient to meet the demands that confront them. They are unable to keep up themselves, their families, their horses, and their vehicles. The city mail carriers, proportionately speaking, receive much better salaries than the rural free-delivery carriers, and people in the cities get better service.

cities get better service.

There is not a gentleman within the sound of my voice who will not admit this fact, and yet Congress delays in giving to

the rural free-delivery carriers the increase they are justly entitled to, and are denying to the people on the farms the efficient service they should have.

GOOD ROADS.

Many of us have worked for a number of years trying to create a sentiment in favor of Federal aid to road building and road maintenance. For several years I have been an ardent advocate of this proposition. While I favor contributions by the National Government, at the same time I think the roads should be under State control. The sentiment in the House in favor of good roads has grown so rapidly that to-day we have a Committee on Roads in the House. That important committee has worked out a plan that in my opinion should become a law at this Congress, and the people of the country will get Government aid for building and maintaining their roadways. This plan is somewhat upon a rental basis for roads over which the mails are carried, which, of course, increases the importance of the rural-route roads. It is my purpose to discuss this road bill more at length when it comes before the House for consideration.

DAILY MAILS.

Good roads will mean new rural routes. Rural routes mean good mail service to the people in the country. It brings the people of our country into closer touch with each other. The vast amount of reading matter, daily papers, weekly papers, magazines, and the like, go out to the people who do not reside in towns and cities, and thereby they are enabled to keep abreast with the times and to keep up with current events and happenings. The value of this Rural Free Delivery Service to the country can not be estimated in dollars and cents. There should be no hesitation on the part of any Member of the House to put this service upon a sure footing. The country needs and must have that efficiency in the Postal Service which will give our people every convenience. Our Postal Service should be second to none in the world. We should be first among the nations of the earth in the service that means so much to the happiness, peace, and prosperity of our citizens.

RURAL CARRIERS.

Before concluding my remarks I want to read a statement which I received from a good friend of mine in the Rural Free Delivery Service, which is as follows:

Statement showing actual cost of necessary equipment and maintenance of same to properly serve my rural route during the year 1913.

Two horses One vehicle Harness	\$300, 00 25, 00 10, 00
Total investment	335. 00
Interest on same Depreciation Feed of all kinds Shoeing, veterinary services, etc Repairs, vehicle and harness Incidental expenses	\$26, 80 75, 00 280, 00 18, 00 50, 00 10, 00
Total expenses for year	459. 80
Total salary	1, 100, 00 459, 80
Net salary per year	640. 20 53. 35

It will be observed that the net monthly salary to this carrier is only \$53.35 after deducting the expenses that he has been put to for his equipment and its maintenance. I will not call the name of this carrier. I know him well. He is a gentleman of the highest type. His services are worth twice this amount to the people on his route. In his letter to me he states that unless an adequate increase is made many of the rural carriers will necessarily have to resign their positions. The service is a farce unless it is maintained in the way it should be maintained, and I sincerely hope that this bill will not become a law without carrying a substantial increase, for equipment allowance or otherwise, for the carriers. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks in the Record, and I yield back the balance of my time to the chairman of the committee.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the Record. Is there objection? [After a pause.] The Chair hears none.

Mr. MOON. Mr. Chairman, I yield to the gentleman from Georgia [Mr. HOWARD].

[Mr. HOWARD addressed the committee. See Appendix.]

Mr. MOON. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. Balley].

Mr. BAILEY. Mr. Chairman, I want in the brief time allotted me to speak a word on behalf of the forgotten man in our Postal Service. We have provided free delivery for the

people of the cities, we are rapidly extending free delivery to the people living out in the rural districts-and I am thoroughly in sympathy with that-but there are about 14,000,000 people in the United States who have less postal service than those living in the cities and in the country. I feel, Mr. Chairman, that the people of the towns and smaller communities should be given an equal service with that which is accorded the people of the cities and the people of the rural districts. I would not take anything away from those who are now being served, but I would like to have this service extended. I am glad to see that the bill as it now stands extends, or rather enlarges, the appropriation for the experimental free-delivery service in the villages. lieve it might have gone very much further and served the people much better by extending this service generally to the towns and villages of the country averaging in population about 2,000.

There are 6,609 of such towns in the United States, and it seems to me that in common fairness all these people should be considered. And I have taken it upon myself to speak for these people in a bill which I have introduced and which at the proper time I shall offer as an amendment to the pending measure-to that part of it dealing with experimental free delivery

Mr. Chairman, that the forgotten man will not much longer consent to remain forgotten is evidenced by the responses I have received from all quarters of the Union to my bill for a square deal in the Postal Service. My mails have been heavy with letters, newspapers, and petitions, the letters almost without exception expressing keen interest in my proposal; the papers containing editorial and news articles appealing to their readers to get in behind me in my effort to extend the Free Delivery Service to the smaller communities; the petitions praying Congress to act favorably upon my bill—H. R. 8947.

Back in my own district, in personal contact with the people of the many smaller communities not now in the enjoyment of Free Delivery Service, I found a unanimity of sentiment that was most encouraging. Many of these communities lie along a main highway and some of the patrons of the post offices are far from the center. To go two or three times a day for their mail or to deposit their mail involves a sacrifice of time which in the aggregate is staggering. By a very rough computation it is found that this loss of time runs far into the thousands of dollars in every one of the nearly 7,000 towns and villages now excluded from the Free Delivery Service. According to figures which have been supplied to me by the Post Office Department, the cost of free delivery would not exceed \$1,200, on the average, in each of these. The loss of time to the people of the village would hardly be less under the most favorable circumstances than five or six times that amount. It has been suggested to me by one who has had much experience in the Postal Service in a small community that it would be entirely feasible to require the postmaster in some of the smaller of the small communities to act as a carrier, the point being made that this arrangement would cut down the expense and in no appreciable way interfere with his other official duties.

Almost every Member of this House has a considerable number of towns and villages which are the victims of a discrimination which ought no longer to be tolerated. I appeal to these Representatives in behalf of their own constituents. It can be no satisfaction to the patron of the post office in the smaller communities to see mail being carried past his door by a rural carrier when he must drop his work and trudge a quarter, a half, or possibly a full mile to the village post office and pay a high rent for the privilege of box service. Incidentally, the com-plaint against the box-rent exactions is widespread. A large number of letters which have reached me dwell upon this factor in the general discrimination against the people of the smaller communities. Not only are they compelled to tramp to and fro in depositing and obtaining their mail, but they must pay what they believe an extortionate price for box rent. In previous remarks of mine on the same subject on the floor of this House I said that the discrimination against the people of the towns and villages in the Postal Service, including the box-rent burden, was not different in effect from that which would be produced by a higher postage rate for the smaller communities than that accorded the dweller in the city or on the farm. How this Congress can blink the fact of this discrimination it is not easy

Experimental free delivery has been welcomed with great acclaim by the small number of towns which have enjoyed it; and the testimony from these towns is enthusiastic. They say it has been a complete success, notwithstanding its newness and the limitations which have been placed upon it. It has resulted in a larger use of the mails, in some cases ranging up to 10 per cent and even higher, yet it must be borne is mind that the experiment is less than a year old and that nothing like a fair try-out of the Free Delivery System has been attempted. It is

my belief that if the smaller communities were accorded the full benefits of free delivery there would be an increase of business as a response which would in the near future take care of the increased expense.

But I want to say, Mr. Chairman, that we should not look at the Postal Service from the money-making point of view. The post office was not established for the purpose of turning money into the Treasury. It was designed to convey intelligence to the people. It was realized that in a government of the people, by the people, for the people, the dissemination of informa-tion was of vital importance. The people would have to know tion was of vital importance. The people would have to know what their Government was doing, what events were taking place, what policies were under consideration, what were the developments at home and abroad. By the increase of the functions of the post office it has at last been brought to a point where it is yielding in returns practically all that the service cost. It is the one institution that comes closest to the people, that serves them from day to day, that is the mainstay of that large intelligence which has brought this Republic to its present high position among the nations of the world.

would have this service equal to all. I would have it so that it would be timesaving for all, as it is timesaving for the man in the city and for the man far out on the prairie or in the remote valleys among the hills. I speak for the "forgotten man" of town and village, and I feel that in speaking for him I am speaking for one who is quite as deserving as the banker

and broker or as the farmer and woodsman.

I can not refrain, Mr. Chairman, while on the subject of a square deal in the Postal Service, from adverting to some criticisms which have been made on this floor of the present rate on second-class matter. It has been asserted here that this class of mail has been carried at a tremendous loss; yet I would call attention to the fact that the railroads are now carrying enormous quantities of periodical matter at the second-class rate, and only a few years ago the express companies were carrying the same class of matter at the same rate. Those who have attacked the rate for second-class matter have particularly objected to allowing the magazines to come in under that rate. Yet I would not have it overlooked that to the socalled "muckraking" magazines this country undoubtedly owes in large part that great awakening of the public conscience which resulted in the election of a Democratic Congress in 1910, in the complete overthrow of Cannonism, in the repudiation of that corrupting combination between bad politics and big business, and the triumph of Woodrow Wilson in 1912. But for the "muckrakers" and for their message carried through the cheap periodical literature, which played so great a part in the history of the last few years, we should still find Cannonism in the saddle, still find big business in control all along the lines, still find the system all-compelling. I therefore can not agree with those who would increase the rate on second-class matter or who would make a new classification which would place a heavier burden upon the periodical literature of the country. We can not have a too wide dissemination of intelli-gence. And I believe with all my heart that the magazines of We can not have a too wide dissemination of intellithe United States have done the people a tremendous service in exposing the inner secrets of our politics and business and in carrying a message of hope and deliverance to the masses.

Mr. Chairman, I yield back the balance of my time, and I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.
Mr. MOON. Will the gentleman from Michigan [Mr. Samuel W. SMITH] use some of his time?

Mr. SAMUEL W. SMITH. I do not see the gentleman from Illinois [Mr. Copley] on the floor, and I yield 10 minutes to the

gentleman from Kansas [Mr. MURDOCK].

Mr. MURDOCK. Mr. Chairman, the Post Office appropriation bill for the first time this year passes in the sum appropriated the \$300,000,000 figure. The total of the bill is \$305,000,000. The postal business of the United States is the biggest business in the world. There was a day when it was the biggest political machine in the world, but the tendency in the Postal Service for a long time has been away from politics and toward business. That has been in response largely to public sentiment. So it is perfectly natural that the one paragraph in this bill which should excite the most discussiona matter of fact, it has monopolized this general debate-is the paragraph which shows the dominant party here in the House taking a backward step; taking a step away from business in the postal department, and back into politics. I refer to section 6, the subject of debate here for the last four or five days. The section places in the hands of the Postmaster General the right to appoint, regardless of the merit system, under civil

service, assistant postmasters, of whom there are probably twenty-four hundred or twenty-five hundred in the system,

Now, I do not take much stock in the battle that has raged here between the two old parties about civil service. It is a resumption of the ancient and diverting game of the pot and The Republicans say that the Democrats are not friendly to the merit system and the Democrats say that the Republicans are not friendly to the merit system. Both of them are right. I have watched this thing for a number of I have heard the charge on the Democratic side for years that in some way partisan postmasters did so manipulate civil service that they filled up their post offices with Republicans. I have been at some little pains to find out how that could be done, and I think I know how partisan Republican postmasters could work the scheme. I want to say that this is not true of all Republican postmasters; it is not true of a great number of them; but where the postmaster was an extreme partisan it was possible for him to manipulate the personnel of his office by the provision in the civil service which permits him to choose a man from the first three men on the eligible lists certified to him. Now, that has been said here before, but the thing I think I discovered was this, namely, that this is arithmetically progressive; that when you eliminate the first man of the first three you enter the new field below that is, you take in the fourth man-and it was possible, and it was done by partisan Republican postmasters, by eliminating the first two men on the list, to reach down among the first five men in the list.

Mr. STAFFORD. Will the gentleman yield?

Mr. MURDOCK. Certainly.

Mr. STAFFORD. I think the gentleman is entirely mistaken.

Mr. MURDOCK. I am not.
Mr. STAFFORD. The civil service will not sustain you.
Mr. MURDOCK. As a matter of fact, the practice of some

partisan Republican postmasters does sustain me in the proposition. They have done that very thing.

Mr. STAFFORD. If the gentleman will permit me, I will

explain that the method is for them to select one of the first three designated.

Mr. MURDOCK. When they rejected the first man they

moved to the fourth.

Mr. STAFFORD. They do not do that. They go on until

the first three are exhausted.

Mr. MURDOCK. At any rate, I think that is the plan followed, and you will find in post offices presided over by certain extreme partisans an almost complete complement of Repub-

Now, the difference between the Republicans on the one side and you Democrats on this civil-service proposition is that the Republicans are subtle in their processes and you are coarse. They are insidious and you are crude. They are sly and you are bold and bald about it. I submit that as soon as you get this thing running well, as soon as you get your postmasters all in, and your assistant postmasters all in-and the relation between the postmasters and their assistants is quite a confidential one-you will begin to work this arithmetical progression of three at a time unless you are compelled to select the first man alone, which is the correct method.

Mr. RUSSELL. Did I understand the gentleman to say that the Republicans sometimes eliminate the first of the three men in order to reach down to the fourth and fifth men?

Three are certified to the postmaster as Mr. MURDOCK. eligible under the law, and he must take one of the first three. Then, as he exhausts at the top, he has the right to go below the first three as other names are certified to him.

Mr. RUSSELL. Do you know whether the Democrats have

Mr. MURDOCK. Oh, no; I do not. I think they are getting rendy to do it. I do not think there is any question about that. [Laughter.] My point is that neither of the old political parties is friendly to the merit system.

Mr. POU. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?
Mr. MURDOCK. I regret I can not now. I have only 10

minutes, and I want to get through.

Here is my proposition: You Democrats brought in section 6, which is taking a backward step. You can not get it through under the rules of the House, and you must bring in a special rule making it in order, so that you are resorting to the old device of a special rule to make it in order to insert this sec-You may pass it through the House and you may pass it through the Senate, but you will not write it into a law.

I make the prediction that if this bill ever reaches the White

House with that provision in it President Wilson will veto it, what you are proposing to do here.

and he ought to veto it. You are taking a backward step. You are mixing up in this postal business more politics, and what we need in the postal business is less politics. I have a great deal of confidence in Postmaster General Burleson. served here with him for many years. He has one fine quality, among others, and that is courage. He is not afraid. He does not believe in this proposition, and I believe that under his advice, if this thing ever does reach the President of the United States, you will lose out.

But what will happen if the veto comes back from the President and the Democrats in the House and the Democrats in the Senate, along with a lot of sympathetic Republicans, pass that provision over the President's veto? What will the President I can tell you what he could do, and I hope to heaven that if it ever comes to that point he will do it. He ought to It is the thing that every man within the sound of my voice knows is the proper thing to do, and that is to select the postmasters out of the working forces of the post offices. Take the men in the carrier system and the postal clerks. Take these men, the best skilled servants we have in the Railway Mail Service; take the men who understand the postal business and make them the postmasters. Take the place out of politics. There is no reason under heaven why a man should become postmaster because he is supposed to be the political boss in his community.

Mr. STAFFORD. I will ask the gentleman if he pursued that policy when he was making recommendations for the ap-

pointment of postmasters in his district?

Mr. MURDOCK. I have advocated for years the taking of these places out of politics.

The CHAIRMAN. The time of the gentleman from Kansas

has expired

Mr. MURDOCK. I would like to have a few minutes more.

Mr. SAMUEL W. SMITH. I will yield to the gentleman three minutes more.

The CHAIRMAN. The gentleman from Kansas [Mr. Mug-

Mr. MURDOCK. Let me complete this proposition. I want to tell the gentleman why this proposition will work to the benefit of the service. In the first place, if you will do that, we will put in the mind of every subordinate in the post offices the carriers and the clerks—the lure of promotion. You will offer him a chance to get ahead. You will give him the hope that he may be postmaster some day. This opportunity is not now in the system. It is not there. In fact, it never was not now in the system. It is not there. In fact, it never was there. It would be the best thing for the system to get that lure of promotion in.

Then this proposition would do another thing. It would put into the Postal Service of the country everywhere men in the high places who have knowledge of the intricate details of the service-postmasters who would know what the Railway Mail Service is, what the carrier system is-who would know its needs. It would put into the service men who would know what is actually going on under them in their offices.

And, another thing, I think that Congressmen who have had service here any length of time at all would understand the need for it-it would take out of national legislative life the matter of patronage. That ought to be taken out, and I should think that every man here would like to see it go out.

I served in one Congress when a Republican President attempted to penalize some of us because we were exercising our own free wills as Representatives, because we were voting our convictions against a vicious system. I saw a Republican President reach into this House and take away from the Members here the right to recommend postmasters with the idea of controlling our votes.

Mr. POU. Does not the gentleman think that-

Mr. MURDOCK. But I know what that President did not -that in the natural course of politics the actual taking away of the right to recommend the appointment of a postmaster is not half as potential as the threat of taking it away.

The CHAIRMAN. Does the gentleman yield? Mr. MURDOCK. Yes; I will yield to the gentleman.

Mr. POU. I only wanted to ask the gentleman if he does not think it was a debauchery of the merit system the vay that these assistant postmasters were covered into the civil service?

Mr. MURDOCK. I do not know how the gentleman feels on this question, but I think that when public servants go into the

merit system they ought to go in under an examination.

Mr. POU. Then the gentleman thinks something ought to be done about this?

Mr. MURDOCK. But after they are in, you ought not to take them out. You ought not to take a backward step, and that is

I want to say another thing to the gentleman from North Carolina, who is one of the leaders in the Democratic Party. I hope the gentleman will double up his fists and go into this thing in earnest. He will find after a little experience that postmasters are not the great political help that they used to be in this country under the old political system. The gentleman

will find that out speedily.

Now, here is another matter to which I direct his attention. We have not revised the system by which we pay the post-masters for nearly 40 years. The act under which we operate to-day in paying postmasters is a law passed away back in 1879. It is a law under which the compensation of the postmaster is based on the sale of postage stamps. The sale of postage stamps—a minor detail in the conduct of a post office— The sale of has absolutely nothing to do with the responsibility of the man who is at the head of the office. There is a chance now to change that system. It ought to be changed. The item of pay for the postmasters this year reaches the sum of \$30,000,000. Not all the postmasters of this country earn their 000,000. Not all the postmasters of this country earn their salary. The assistant postmasters come nearer earning theirs than the postmasters. While the assistant postmaster has his nose absolutely to the grindstone usually helping conduct the business of the office, the postmaster, a good deal of the time, may be out paying attention to politics, which would not be true if the place were taken out of politics.

Mr. QUIN. What can be done for the little fourth-class

postmasters who are now getting a few dollars a year?

Mr. MURDOCK. Oh, the fourth-class postmasters, as a matter of fact, receive little enough, heaven knows. I do not attack their pay. I have had postmasters in my district who got as little as \$17 or \$18 a year—an entirely inadequate compen-

Mr. QUIN. Does not the gentleman think it ought to be in-

creased in some way?

Mr. MURDOCK. I have no doubt there are cases where it ought to be increased; but I am talking about that class of postmasters who devote a great deal of their time to politics, and who are paid on the antiquated system of the amount of stamps sold.

The CHAIRMAN. The time of the gentleman has expired. Mr. MURDOCK. I promised to yield to the gentleman from Wisconsin [Mr. Lenroot]

Mr. SAMUEL W. SMITH. I yield one minute more to the gentleman from Kansas.

Mr. MURDOCK. I yield to the gentleman from Wisconsin

Mr. LENROOT. Referring to the portion of the gentleman's remarks about taking the man off the top and thus getting to the fourth man, did the gentleman have personal knowledge of

Mr. MURDOCK. In the most obscure way.
Mr. LENROOT. Was it in the gentleman's district?
Mr. MURDOCK. No. Is that what the gentleman wants to

Mr. LENROOT. I want to know, because I know that is not

the system they pursue.

Mr. MURDOCK. Does the gentleman say that when they have exhausted the first list they do not get a new list?

Mr. LENROOT. The postmaster is compelled to make his selection from one of the three at the top of the list.

Mr. MURDOCK. Yes; but after the first three are exhausted, then what?

Mr. LENROOT. Then another list is sent.

Mr. MURDOCK. Certainly. That is what I contend.

Mr. LENROOT. But the appointment has been made. Mr. MURDOCK. Yes; but the postmaster can manipulate that so that the second list that comes will contain the name he wants

Mr. LENROOT. No; but the vacancy has been filled. Mr. MURDOCK. The vacancy has not been filled The vacancy has not been filled at all. Three men have not taken the place, for some reason or other.

Mr. LENROOT. Oh. Mr. MURDOCK. Does not the gentleman realize that a postmaster can discourage the applicant; that he can tell the applicant it is not a suitable place for him? A man who is perfectly eligible may be passed on, and so the list may be exhausted; and that is just exactly the trick that has been played

in this country.

Mr. LENROOT. That rests entirely with the applicant and

not with the postmaster.

Mr. MURDOCK. The applicant is a helpless proposition in

this manipulation compared to the powerful postmaster.

Mr. SAMUEL W. SMITH. Mr. Chairman, in the closing moments of a debate on a bill carrying the largest amount of money—

congratulate the House and the country that so able and distinguished a man as Judge Moon presides over the deliberations of the great Committee on Post Offices and Post Roads, one of the leading committees of the House.

He has long been a member of that committee, is so well equipped, so familiar and conversant with the workings of that great department, that if circumstances permitted it would be a fitting close to his long, useful, and honorable career as a Member of this body if he could be made Postmaster General.

He is not only able and conscientious, but he is kind and considerate of the feelings and opinions of others, qualities to

be commended in any man.

It is a pleasure indeed, sir, a delight, to work with him, not only in the committee room, but on the floor of the House.

The committee as a whole have been so united on most of the provisions of the bill that I have not availed myself of the opportunity to speak in general debate, but will do so as to certain provisions when the bill is read section by section.

I now yield 50 minutes to the gentleman from Wisconsin [Mr.

STAFFORD]

Mr. STAFFORD. Mr. Chairman, for more than 10 years the subject of postal legislation and postal administration has been of direct concern to me. Ten years ago this coming March, during my first term in Congress and on the Post Office Committee, the Post Office appropriation bill was reported to the House, at that time the largest supply bill presented to Congress. That bill carried a total appropriation of \$170,000,000. present appropriation bill carries an aggregate of \$306,000,000. The expenditures for the fiscal year ended June 30, 1903, equaled \$138,000,000. The expenditures for the year ended June 30, 1913, equaled \$262,000,000.

In glancing over the figures, or rather the expenditures, for the last 15 years there is a seeming relation that in every 10year period the expenditures increase to the amount of 80 or 100 per cent. The expenditures of 1903 and those of 1913 confirm that, as well as all the expenditures dating back 15

years.

But these expenditures for the various services have not increased proportionately. In some of the branches of the service there have been in the last 10 years decided increases in salaries, notably in the case of post-office clerks, railwaymail clerks, and city as well as rural letter carriers. In the Post Office appropriation act for 1905 we carried an appropriation for postmasters of \$23,250,000. In the present bill there is appropriated \$30,750,000, or an increase of 32 per cent. For salaries to post-office clerks in 1905 we carried an appropriation of \$20,614,000. The present bill carries an appropriation of \$44,470,000, or an increase of 115 per cent.

The appropriation for letter-carrier service in 1905 was \$20,606,000, and the present bill carries \$37,700,000, or an increase of 87 per cent. In 1905 the clerks of the Railway Mail Service received \$12,951,000, and under the present bill for salaries they receive \$28,501,000, and for travel allowance, which is in the nature of compensation and which has been added since 1909, there is an appropriation of \$1,534,000, which

totals \$30,035,000, or an increase of 132 per cent.

In the rural carrier service we have seen the appropriations increase from \$15,000,000 in 1905 to \$48,650,000, as proposed in this bill, and if the increase in salaries, as recommended in the bill, is adopted it will require an additional two and a half or three million dollars, which will amount to an increase of about 250 per cent. Not only do we find these increases, so far as the compensation to the actual employees of the service is con-cerned, but, naturally, we find them in other branches of the service, as, for instance, in the increase of pay for the carriage of the mail by railroads.

The subject of railway-mail pay has been a disputed subject, I may say, since we first began to carry the mail on railroads, in It has been the subject of greatest discussion and less understanding than any other postal matter. There have been various commissions appointed, both congressional and private, and while most of them have come to definite decisions in their findings, nevertheless there has been some doubt left in the minds of many as to whether we were not paying the railroads too much for the carriage of the mails. I wish to direct the attention of the House to the increase of mail pay during the last decade, or, rather, the last 15 years. In 1899 we paid to the railroads, for the carriage of mails on the tonnage basis, \$30,500,000, whereas in 1913 there was expended \$47,627,000, or 56 per cent increase.

As most Members of the House know, there are two methods of compensating railroads for the carriage of the mail-one based on tonnage carried, according to a sliding scale of payment, the rate becoming less as the weight increases. In addi-\$306,953,117—in any single congressional budget, I want to tion to this weight pay there is an additional allowance based

upon what is known as the R. P. O. service, or the traveling post-office cars. For the tonnage pay in these 14 years the amount has increased, as above stated, 56 per cent; but in the traveling post-office car pay, which has been most sharply criticized, we have this startling condition, the only instance in the whole post-office bill of any reduction in any one branch of the service.

In 1905 the appropriation for that character of service was The appropriation carried in the present bill is \$5,412,000, or a reduction of \$324,000. It is proposed in one provision of this bill-that is, it is recommended by a majority of the Post Office Committee, though opposed very strenuously by a large minority of that committee-that we should launch into the Government ownership of the railway mail cars, not only the so-called traveling post-office cars, but also the storage cars; and provision is therein made for the purchase, under the direction of the Postmaster General, of sufficient storage cars and railway mail post-office cars that can be purchased for the amount of \$200,000, the purpose being to experiment and see whether we are paying the railroads too much for this character

At the present time and for many months past there has been a congressional investigation being made of this very subject as to whether we were paying too much to the railroads for the carriage of the mail in the traveling post office or so-called railway post-office cars. That compensation is based on space. the minimum rate being \$25 for a 40-foot car, and increasing in rate for the largest-sized cars, the highest rate being for a 55-feet car, or larger. Those cars, at least the modern steel cars for Railway Post Office Service, cost in the neighborhood of \$12,000. The pay for all these cars averages less than \$3,500 per annum. Many people in considering the proper allowance to be paid for these cars confuse in their minds that the payment of \$3,500 a year is for rental, for the mere use of a railway post-effice car, and do not take into consideration the fact that we are really paying the railroads for the hauling of that car. The railroads could well afford, and would be willing to any extent, to provide the Government with all kinds of railway post-office cars and have them on some siding and not in operation, at merely a nominal return of perhaps 8 per cent on the cost of the car; but when the Government takes possession of a car and makes it a traveling post-office car, the Government must necessarily make a return in payment for that service, just like every other character of service must make payment, when a private car is being operated over the railroad

In the very illuminating address delivered by a member of this postal commission, the gentleman from New Jersey [Mr. Tuttle], on Saturday last, there was brought to the attention of the House that on the 51 leading transportation lines of this country the cost of operation of passenger cars per mile is 19.41 cents per passenger train car mile, whereas the return to the railroads from these traveling post-office cars, including the compensation they received for the tonnage mail included in them, on an average of two and a half to three tons, is 18.84 cents per car per mile, or fifty-seven one-hundredths of a cent less than the cost of operation alone of these passenger cars. That computation of 19.41 cents does not take into consideration whatsoever any return for interest, dividends, or other fixed charges. The mere cost of operation is 19 cents, and yet the Government to-day is only paying 18 cents for these railway

Mr. GOULDEN. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes. Mr. GOULDEN. I did not catch quite clearly the gentleman's statement with regard to the operating cost per mile per passenger on the railroads.

Mr. STAFFORD. On 51 leading railroads of this country the statistics show that the haulage charge, the cost of operation per car, regardless of the receipts-the actual cost of operation-19.41 cents per passenger train mile.

Mr. GOULDEN. That is, regardless of how many passengers

the car carries's Mr. STAFFORD. Regardless of that. It is the cost of opera-

Mr. GOULDEN. That is what I wanted to get at clearly.
Mr. STAFFORD. The return to the railroads from the carriage of these railway post-office cars, including the space pay and tonnage pay for the average mail content of these railway post-office cars, is only 18.84 cents per car-mile, or a difference of 0.57 of a cent less than the cost of operation. And yet we are presented by this novel proposition by which the Government should go into the experimentation of constructing and operating these railway post-office cars and storage cars. As the

the so-called storage cars, which carry the great bulk of the mail over the country. We pay only an additional compensation for the use of these traveling post-office cars when the Government uses more than 40 feet of space.

Mr. GOULDEN. I think the gentleman has answered the second question which I proposed to ask, and that is, whether the gentleman is in favor of the Government going into the furnishing of cars for the transportation of its mails. the gentleman answered that with the statement he made a few

Mr. STAFFORD. The Interstate Commerce Commission has all the evidence before it to determine the cost of operation of this character of car. Not only that, but ever since the Government has been operating these traveling post-office cars the department has had full control as to the mode of construction, the interior and exterior arrangements, and the character of material, so that the character of the car is completely under the control of the Post Office Department. A few years ago we provided in the Post Office appropriation bill that all of these traveling post-office cars should be made of steel, and in a few years every one of these cars will have to be made of steel. Now, what justification can there be for this expenditure of \$200,000 in launching experimentation that may carry us to an expenditure we can not even approximate, when the facts from the Interstate Commerce Commission are within the reach of any man in this body?

Mr. GOULDEN. My friend from Wisconsin, then, is not willing the Government should enter into this experiment of furnishing its own cars? It has been claimed during this debate that, if adopted, it would save large sums of money to the

Government.

Mr. STAFFORD. I can not see any need for it. We have all the data at our command. Here is the data of this commission, which shows we are paying less than what it costs the railroads to merely operate these cars. Now, with this data which is being collected and which will shortly be presented to this Congress, if it shows that, why launch on this experiment of policy of the Government constructing and operating these

Mr. MADDEN. Will the gentleman yield for a question?

Mr. STAFFORD. I will be glad to yield for a brief question. Mr. MADDEN. The gentleman states that the cost of the transportation of mails, including all of the car and the weight, amounts to a little over 18 cents per car mile for miles traveled. How much is the gentleman able to state is the total weight of mail, how many cars there are, and how many miles were

Mr. STAFFORD. I could give that information by referring to my notes taken before the committee, but the hearings show that the average pay for one of these railway post-office cars is less than \$3,500 per annum. Now, the gentleman has all that information, because it was presented in the hearings, and I do not wish to divert from the other line of presentation that

Mr. MADDEN. My idea was it would illumine the statement which was made; it was not for the purpose of diverting

the gentleman from his line of thought.

Mr. STAFFORD. I appreciate the purpose of the gentleman that he intended to have me make an elaboration of that subject. If we inaugurate this policy, there is no telling where it will end. We will have to invest millions of dollars in storage cars that are now provided gratis by the railroads to the Government. We will have to erect shops and keep them in repair. We will have to have always an adequate supply ready at all times to meet the demands of the Postal Service; but to go into this experimentation at the present time, when the postal commission is about to report after a very full examination, I consider is rather launching into a field which can not be justified under existing conditions.

From the study I have given to this question-and I have so expressed myself in times gone by-the Government is not paying more than and I doubt even a compensatory rate for the use of these traveling post-office cars. If the supporters of this proposition believe that we are paying too much, they can readily offer an amendment to reduce the present haulage rate. But I protest in launching by this means in the Government ownership of a utility when it only means expense and perhaps

wasteful expenditure.

In the past 10 years, although the service has been extended, there have been no added improvements in postal administration other than the postal savings banks and the parcel post, both of which had their genesis in the last administration. These institutions, so popular—and deservedly so—are fixed in our postal administration. The postal savings banks have been gentleman knows, we pay nothing to the railroad for the use of | in operation a little more than two and a half years, and their

utility has already been proven. Though this service has been operated at a loss of a little less than \$1,000,000, as I have had occasion to say before on this floor, if we lift the limit on deposits of postal savings, which is now \$500, and permit the de-positors to deposit an unlimited amount, as was embodied in a bill which passed the House before the holiday recess, there will be only a short time before the revenues equal the expenses of this service; and if they do not, the Government can readily impose a higher interest rate to the 2½ per cent now being charged banks for interest on the loan of this money. But the postal savings-bank feature is a fixed adjunct to the Postal Service that will not in the future be removed. It is here to stay. It is like the parcel post

Mr. MADDEN. Will my colleague yield? Mr. STAFFORD. I yield,

Mr. MADDEN. I merely wish to be permitted to say that it is only fair to state the amount of loss showed in the operation of the Postal Savings System is due in a large measure to the arbitrary charges made against its operation by the various

post offices in the United States,

Mr. STAFFORD. It is the one branch of the Postal Service where there has been a strict accounting as to every element of cost, and the assistant director has taken into his computation elements that I believe should not be charged against the entire service for the present alone, but which will continue to be spread out over the service as the years go on and this savingsbank institution is continued.

Mr. MOORE. Will the gentleman yield?

Mr. STAFFORD. Yes.
Mr. MOORE. Will the gentleman state what the loss in the conduct of the postal savings bank was?

Mr. STAFFORD. A little less than a million dollars.

Mr. MOORE. In one year?

Mr. STAFFORD. No; in the entire two and one-half years of its operation.

Mr. MOORE. May I ask if the gentleman can tell whether the expectations of those who organized the postal savings bank,

with regard to deposits, have been justified?

STAFFORD. The expectations have been more than justified by those who recognize that those in opposition to it were wet-blanketing the proposition in every particular. The United States pays less return to postal savings-bank depositors than even Italy or any other country on the face of the globe that has a postal savings bank. We are lending the money to-day to the bankers at 2½ per cent, when the gentleman knows that the majority of the savings banks in New York pay 34 to 4 per cent.

Mr. MOORE. The strongest argument I heard in favor of the postal savings bank was that it would draw savings from stockings and from those who would probably send their money abroad because of lack of confidence in the banks and savings

funds.

Mr. STAFFORD. The testimony before the committee is uncontroverted that there have been any number of instances where money has been withdrawn from stockings for deposit in the postal savings bank, only to be refused because of this arbitrary limit as to the amount that can be deposited in any one month, or having \$500 on deposit at any one time. But there were a few of us on the committee at the time of its organization who wanted to have no limit, and only recently a bill has been introduced in the House which will permit those who have not confidence in private savings institutions, such, for instance, as was instanced in Washington recently, when the United States Trust Co. was in difficulty, to make deposit in postal savings banks. It will be remembered that during the run on that bank many depositors went to the postal savings bank, but their funds were refused because of this arbitrary limitation. Lift this limitation and there will be \$100,000,000 of deposits inside of a year.

Mr. MOORE. If the rate of interest is the same?

Mr. STAFFORD. Without the rate of interest,

Mr. MOORE. The remarks of the gentleman from Tennessee [Mr. Moon] the other day might indicate that there was no real lack of confidence on the part of small depositors in the present savings banks. That might account for the paucity of deposits in the postal savings bank.

Mr. STAFFORD. At that time I spoke at length on that feature of the system, and took a different position to that taken by the gentleman from Tennessee. He admitted that he had not been very zealous in his advocacy of this institution. I believe it is a fixed institution.

Mr. MOORE. The gentleman himself has every confidence

in the institution?

Mr. STAFFORD. I have every confidence in it, and foreigners and others who wish to deposit their funds in the postal

savings banks because they have not confidence in existing savings banks, go to the postal savings bank and receive this meager 2 per cent. It is a disgrace to the United States Congress that the United States is paying less than any other country on the face of the globe for these savings banks' de-

Mr. GOULDEN. As a member of the committee, and giving a great deal of attention to this matter, what does the gentle-

man think should be the maximum limit?

Mr. STAFFORD. As the bill passed the House there was no limit, and rightly so. Why should there be any limit? Why should not a man be permitted to draw his money out of a stocking and place it in the postal savings bank, which goes into the arteries of trade by being redeposited in regular banking institutions? In the beginning the private banks looked at this institution unfavorably, but they now admit that it has not affected them adversely, and they are getting this money from the Government at the low rate of 2½ per cent.

Mr. GOULDEN. I want to know if the gentleman was in

favor of the bill that passed this House?

Mr. STAFFORD. If the gentleman had been here he would know that I spoke in favor of it.

Mr. PLATT. Does not the gentleman wish to limit the deposits? Most of them do.

Mr. STAFFORD. You will have to excuse me from talking on that. That is another question entirely.

Mr. McLAUGHLIN. Will the gentleman yield?
The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Michigan?

Mr. STAFFORD. I yield.

Mr. McLAUGHLIN. This question of the expense of the system is interesting. I presume the cost of originally outlining the service and installing the service has all been charged up as a matter of initial expense, and that will not have to be incurred again. Are any reforms in process or in contemplation that will eliminate some of the expense?

Mr. STAFFORD. That was the very item I referred to in speaking generally. It was that kind and character of expense which was incurred at the start, and which will spread itself over the entire system so long as the system is in existence, the auditor had taken into account in arriving at this

million dollars of deficit.

Mr. McLAUGHLIN. I presume there were some improper charges made. Are those to be eliminated or are changes in

the system to be inaugurated?

Mr. STAFFORD. I do not wish to go into this subject extensively, but the personnel that is now employed in the Post Office Department here that is handling these accounts is in a position to handle twice the amount of deposits without incurring any additional expense. They have to have a unit of force to do a certain amount of work, but it is able to adjust itself to twice the amount of deposits without increasing the

Mr. McLAUGHLIN. Does the gentleman think some charges have been improperly made?

Mr. STAFFORD. I do not think they ought to have charged

at the beginning all these originating costs.

Now, if the gentleman will pardon me, I wish to go on to the consideration of this new feature which has been of so much interest to the public during the past year. The parcel post is an established institution. It is a success. rated, as we all know, only a year ago, on January 1, 1913.

During the course of that year there have been some radical changes made in the rates and as to the zones by the Postmaster General. I have taken the time to glance over some statistics compiled by the Post Office Department, and perhaps they may be of interest to this committee. In a return that was made from the 50 largest post offices in the country, from October 1 to October 15, it was shown that but 5 per cent of the parcels deposited were for local delivery, and that 30 per cent of the parcels that were delivered in these 50 largest post offices had been received from other post offices for delivery, and that the remaining 65 per cent of all the parcel-post mail handled was sent for dispatch to other than the 50 returning post offices. According to those figures 95 per cent of all the parcel-post mail was carried by the railroads of the country.

It may be interesting also to know that 15 per cent of the aggregate parcel-post mail was of 1 pound and less, and that 80 per cent weighed from 2 pounds to 11 pounds, and that the average weight per parcel of parcel-post mail carried during this semimonthly period was 1 pound and 11 ounces.

In estimating the cost of this service the department only

took into consideration, according to the tabulations, the cost of delivery of this 35 per cent-30 per cent that had been received from outside offices and 5 per cent for local delivery-for deliv-

ery in these respective 50 offices, and the cost of the delivery of that 35 per cent equaled 3.3 cents per parcel. No charge was made whatsoever, even as to this 35 per cent, as to 60 or 80 per cent of this 35 per cent which was carried by letter carriers. The department was acting upon the premise that if a letter carrier was not overburdened with other mail and could carry it without extra cost, it should not be charged up to the parcel post; and so, according to the returns in New York City here, 76 per cent was carried by regular carriers without cost, and in Chicago it was 80 per cent.

As to that which was dispatched for carriage on the railroads or outside of the office of deposit, namely, 95 per cent of the total, 68 per cent of all the parcel-post mail was for delivery in the second, third, fourth, and fifth zones, or those zones which distance from 50 miles to 1,000 miles. Under the weighing that was had in 1899 for six months it was estimated that the cost of mail matter for carriage on the railroads was a little above 5 cents a pound. On the weighing of the mails, based upon the payments to railroads, in 1908 the average rate for mail alone was 3.79 cents a pound, and for mail and equipment included,

2.46 cents a pound.

Now, I recognize that it is not fair to compare the rate of 3.79 cents a pound or 5 cents a pound for parcel-post matter, because it would have first to be determined whether the average haul was the same, and the average haul of this mail matter on this

computation was 620 miles.

But here, so far as the charge of 5 cents for the carriage of 1 pound of mail matter under the revised rate to the second zone is concerned, we have merely 1.7 cents allowed for the cost of transportation on railroads, the cost of handling by the railway mail clerks, and the cost of collection. In these computations no consideration whatsoever was made of those elements Yet the figures show that it costs 1.4 cents per pound for every pound of mail matter handled in railway post-office cars by the railway mail clerks.

We are all in favor of the parcel post; but I think, after giving it as good consideration as I possibly can, that some of the rates that have been put into effect are noncompensatory. I do not conceive how you can collect a mail package of pound, have it go through the local post office, have it dispatched on the railway trains, distributed by the railway mail clerks, and then delivered, which last service is estimated to cost 3.3 cents, and after traveling a distance of 150 miles, and

have the rate of 5 cents compensatory.

It is true that, according to the most recent computation, for the first 15 days of October an average of \$60,000,000 annual revenue will be received for this service. But when this system has been fully established and all the varying services properly paid for; when the total expense, including a proper payment to the railroads of the country for the haulage of this great additional tonnage, and a charge for the expense of screenwagon service, electric-car service, mail-messenger service, and all the other characters of service with which the parcel post is directly chargeable, but to which no adequate payment is now being made. I question whether there will be much if any profit left when all these elements of expense are included.

Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has used 40 minutes, and

has 10 minutes remaining.

Mr. STAFFORD. The railroads have been the butt of attack from every source. It is hard to find anyone who will say a word in favor of a just treatment of the railroads. The railroads are not receiving any compensation for the hauling of this large additional tonnage. In the last appropriation act we provided that 5 per cent increase should be granted, in the discretion of the Postmaster General, to those railroads whose pay was arranged prior to January 1, 1913. The only additional return to the railro ds from this source has been \$1,700,000. Other than this small percentage, which does not equal even 5 per cent on the amount paid to the railroads, they will receive no other return for the carriage of parcel-post mail, in the New England section, until July 1, 1917. There will be no other extra compensation to the railroads for this extra tonnage in the far western section until July 1 next; none in the great middle western section until July 1, 1915; and none in the South until July 1, 1916. It may be that during these years, before we are obliged to pay the railroads for this added weight, there will be a showing of a large surplus in postal revenues; but I ven-ture the prediction that when all these costs of this service, four years hence, are properly charged up to the United States Government, as they certainly will be, there will not be any showing of any large return of profit, and very likely a deficit will be shown.

Mr. SAMUEL W. SMITH. Will the gentleman yield?

Mr. STAFFORD. I am glad to yield.

Mr. SAMUEL W. SMITH. I have been called out of the Hall. I should like to ask the gentleman if he has been discussing the question whether the parcel post is a paying institution?

Mr. STAFFORD. The gentleman has been very faithful in

his attendance here, not only to-day but during the entire time given over to general debate; but evidently he did not hear what I had just been stating.

Mr. SAMUEL W. SMITH. I was called out.

Mr. STAFFORD. I have been going into that question quite extensively and giving the figures, and showing that the department has not taken into consideration elements of cost which must ultimately be taken into consideration by the department. In New York City alone 76 per cent of the parcel-post mail that was delivered was not charged as being an expense at all, the department assuming that because a letter carrier had a little extra space and could carry a small parcel, therefore it was not a proper item of expense. I also referred to the cost of transportation on the railroads, for which there has been no charge made in this computation. I say that considering these and other elements of cost it is impossible for me to believe that you

can carry a pound parcel 150 miles for 5 cents.

I was going to give some consideration to the recent modification of express company rates which has been ordered by the Interstate Commerce Commission, as many of you know, under that provision of the act of Congress which directs the Interstate Commerce Commission to apply reasonable rates for the carriage of express matter. Those greatly reduced rates become effective February 1. I can only summarize by saying that as to this character of service it is my opinion that under the existing rates the express companies will have no fear of competition in any zone beyond the third or the fourth zone in packages weighing over 10 pounds. Under the basis of charges for express carriage the Interstate Commerce Commission has formulated rates on a scientific basis. They allow 10 cents for collection, 10 cents for delivery of every package, and then they allow 25 cents as the minimum freightable charge in all the zones, which are five in number, except the fourth, which is the intermountain region, where they allow a minimum charge of 50 cents. In addition to that, they allow the amount of 15 cents per block for space used in the first zone, which is that territory, generally speaking, north of the Ohio and east of the Mississippi, and 20 cents in the second zone, described generally as the southern territory; 24 cents in the third and fifth zones, the third being the territory west of the Mississippi up to about the Rocky Mountain district, and the fifth the Pacific coast district; and 28 cents in the fourth zone, or intermountain

Now, in the first zone is the minimum charge, where the density of express business is greatest, which is 10 cents for collection, 10 cents for delivery, 25 cents the minimum freight charge, and 15 cents per block of 50 miles, making an aggregate of 60 cents expressage per 100 pounds for each block, which is about 50 miles.

As to the item of allowance per block for space, which varies in the different zones, that is reduced one-quarter of a cent for each additional block the express matter is carried over the entire part of the country. The Interstate Commerce Commission also bases the charge on the shortest practical route, so that the shipper gets the benefit of the shortest distance.

Now, this power to change rates and change zones and bringing new mail matter within the purview of the Parcel Post Sys ton was passed by Congress with the direct intendment that the I. terstate Commerce Commission should supervise these changes and should not give their consent until after investigation of the facts. But we are informed that the Interstate Commerce Commission has absolutely failed to perform these duties as Congress intended; that they have only, in fact, viséed the findings of the department officials, accepted their figures as facts, and did not go into any separate investigation at all. This is a great power, without limitation, to be vested in any

Postmaster General.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SAMUEL W. SMITH. I yield to the gentleman 10 minutes more.

I have nothing but praise for the ability Mr. STAFFORD. of the Postmaster General, of his conscientious attention to duty, but I believe the power of changing classifications is too great a power to be vested in any department head, no matter how much faith we have in his integrity of purpose, without some supervision and control over the matter similar to that which was directed to be vested in the Interstate Commerce Commission.

Recently the Postmaster General has put in force an order that brings books under the zone system of charges. I fully approve of the extension of the parcel-post rates so as to include books, but if he has the power to include books he has power to include second-class and all other classes of mail matter without review, judging from the action of the Interstate Commerce Commission, by any outside body.

There are many other provisions of the law that I would like to refer to, but before concluding my remarks I wish to speak briefly as to section 6 of the bill that we report, the famous section 6 that seeks to lift assistant postmasters out of the

classified service.

I approach that in the spirit of nonpartisanship. I do not wish my consideration of that subject to be considered as viewing it any way from a partisan standpoint, but rather from a Postal Service attitude. From my acquaintance with the postal affairs I sincerely believe that it is for the best interest of the Postal Service to have continued always in service some executive officer who is not the creature of political rule, who is there at all times, fully acquainted, efficient, and can give the very best advice and service as to the needs of the service. And particularly is that required during a change, when postmasters are being changed by change of administration. They are efficient men or otherwise they would not be retained. The weakness of the position of gentlemen on the other side is that they seek to remove these men under the guise that they are inefficient, and yet they want to substitute men appointed merely for political purposes. If they believe that these men are creatures of the spoils system and are inefficient, which the Postmaster General strongly dissents from, and they are believers in the merit system, why not give an opportunity to those of the grade of supervisory officials, such as cashiers, superintendents of delivery and registery now under the classified service, who merit the promotion to this higher position of assistant postmaster, at present under the civil service in each respective post office?

I hope the other side will not go to the extreme of opening this great business service to the attacks of the spoilsmen. In this great business system, where it is absolutely necessary to have efficiency, you ought not to make it the subject of the spoils system, and I sincerely hope that gentlemen on the other side will not invade thus this sanctum of business efficiency.

[Applause.].

Mr. SAMUEL W. SMITH. Mr. Chairman, I intended to yield the remainder of my time to the gentleman from Kentucky [Mr. Langley], but I do not see him present. Therefore I suggest that the other side proceed.

The CHAIRMAN (Mr. RUSSELL). Does the gentleman from

South Carolina control the time?

Mr. FINLEY. Mr. Chairman, I will say to the gentleman from Michigan that my understanding is that there will be but one more speech on this side.

Mr. SAMUEL W. SMITH. That is my understanding, and that the gentleman from South Carolina was going to close for that side.

Mr. FINLEY. Is the gentleman through?

Mr. SAMUEL W. SMITH. Yes; the gentleman from Kentucky [Mr. Langley] is not here, and therefore I yield up the remainder of our time.

Mr. MOON. Then the gentleman is through with his side of the debate?

Mr. SAMUEL W. SMITH. Yes.
Mr. MOON. Mr. Chairman, I now yield 50 minutes to the gentleman from South Carolina [Mr. Finley].
Mr. FINLEY. Mr. Chairman, I do not think that in discussing a great appropriation bill such as is before the House at this time partisanship or sectionalism should have a place. The Postal Service of the United States, as has been stated The Postal Service of the United States, as has been stated on this floor hundreds of times, is the one all-important, far-reaching Government service which extends to every person in any community in this country, and spreads out to the people not only of this great country, but also to every part of the known civilized world. I have been here for many years, having been elected eight times, and I have seen this service grow from one requiring an appropriation of \$89,000,000 per annum for its support to the present bill, which, in round numbers, carries \$306,000,000. It may be interesting to call attention to the origin of the Postal Service in the United States. As has been so often and so truthfully stated, the fathers of the Republic builded even more wisely than they knew. The Postal Service is mentioned in the Constitution of the United States in probably fewer lines and fewer words than any of the other great subjects treated in that great fundamental law. It is provided that "Congress shall have the right to establish post offices and post roads."

I have quoted the Constitution literally, and that is all there is to it, but it was found that after this country had embarked upon its career as one of the family of nations, what was most necessary was that an efficient postal service should be given

to the citizenship of the country, a service that was extended as the needs of the country demanded, a service that should grow year after year, and in this day the bill before the House for the support of the Postal Service of the United States is the largest appropriation bill, I believe, that has ever been introduced into any parliamentary body appropriating money for any single purpose. Such has been the growth of the Postal Service, and I call attention to the fact that the growth of the country has kept pace with the development of the Postal Service in the United States. Originally, I believe, Benjamin Franklin was the first Postmaster General, and I have heard it stated, and I believe it to be an historic fact, that in its origin the record of the service consisted of a single-entry daybook which he carried about with him under his arm. That was more he carried about with him under his arm. than a century ago.

Go back as far as 1800 and we find that the total annual expenditures were only a little over \$200,000. The expenditures were exceeded by the receipts by something like \$66,000. The following tables, taken from the Postmaster General's annual report to this Congress, show receipts, expenditures, and development of the Postal Service of the United States for the past 113 years.

Growth of the Postal Service.

Thus it is seen that for many years the service dragged along, until about 1880. Then it was that the American people concluded to take their proper place in postal development, and the Postal Service has been extended accordingly. To-day, in point of wealth, in point of power, and in point of influence, the American people are richer by far than any two other nations under the sun. I stated here, years ago, that no country could possibly become great and powerful in the council of nations unless that country had a proper and efficient postal service. There were then and there are now those who believe that some of the nations of Europe are destined to compete with us in the final contest for industrial supremacy. I disputed that proposition 10 years ago. I said then, and I repeat now, that when China—that country great in area, in resources, and populated by a yellow race—is developed, its development will come largely because of the extension of its postal system. also said that if China is ever developed, if it ever reaches the high point in the state of progress that its people and its resources should command, then it will be that North America will be the final competitor with that great country in the

affairs of nations. One race against another? Not necessarily. As I take it, the race will be one of industry, of achievement in the arts and sciences, in the manufactures. I believe that in 20 years war will be an impossibility on account of aeroplanes and submarine boats. It has often been stated that the country which excels in the production of iron and steel is necessarily the greatest nation.

Now, if this be true—and I do not think it altogether true—then China has a greater area, has a greater mileage of navigable rivers, as great an extent of seacoast, greater deposits of steel, iron, and coal, and has a working population equal to that of the balance of the world combined. Thus when my friends speak about exploiting China I say to them that the time will come when we will compete not with Japan but with China—a China developed and a China with an efficient postal service. Then my friends on the Pacific coast will have a proposition to meet not so much of race as of industry and one which may stagger the civilized countries of the earth.

Now, Mr. Chairman, so much for this. I wish to state that I shall not attempt to discuss the various items of appropriations carried in this bill, but I will content myself by saying that the estimates submitted by the Post Office Department were prepared carefully; they were pared closely, and when they came to the Committee on the Post Office and Post Roads we found that these items in a great majority of instances could not be reduced. In a few instances we have raised these estimates, in others we have lowered them, and when the bill is finally passed I give it as my opinion that the sum total carried in the Post Office appropriation bill of this year will be about what was submitted by the Department to the Congress, not the same in every item of appropriation, but in the total.

Mr. Chairman, there has been a great deal said here about new legislation and about the iniquity of tacking on a matter that is subject to a point of order under the rules of the House. You can not bring in new legislation or legislation that changes existing law without that proposed legislation being subject to the point of order that it is not in order, and on a single objection it may be stricken from the bill. That is true, but since I have been, for 15 years, in Congress I have never seen a year, with the possible exception of one or two. I believe, when this course was not a necessity. And why? This country, being as great as it is, with its numerous and diverse interests coming from every section of the country, and with Congress here to register the will of the people, it has been found time and again that the only way to secure immediate action and get legislation was by tacking on riders to an appropriation bill. I have no apology to make for this course of procedure. It has been done a great many times. It is necessary in most instances and it is necessary in this. I state my position, therefore, to be that I am in favor of that course, because when the people demand legislation the best way to get it is the shortest and the quickest way, and that, I believe, has always been the rule that has guided the Post Office Committee in reporting new legislation.

As to this legislation, I shall go over it briefly. Section 1 is the Post Office appropriation bill proper. Section 2 corrects a defect in the law relative to weighing of mails when the weighing is interrupted by flood or unavoidable causes. Nobody will dispute the rightfulness of that propositon. Section 3 requires railroad companies carrying the mail to furnish railway-mail clerks transportation. This, I believe, has been found necessary because a number of clerks living at some distance from the terminals and from the end of their routes were prohibited by the railroad companies from doubling back a few miles just out of town to their homes, and so on. That is my recollection of the proposition. It amounts to very little, one way or the other, except to the railway-postal clerks. Section 4 provides that the Postmaster General may hereafter lease terminal railroad post offices for a period not exceeding 10 years. Now that the postal business actually handled in the country has been increased on account of the amount of through mail, mail that can not be made up well at the initial post office or in railway post-office cars, as it can be by being transferred to a terminal post office at the end of the route, it is found economical that there should be at various railroad stations throughout the country these terminal railway stations. There it is that mail is separated and the mail routed and made up for the various parts of the country. This makes for economy in the Postal Service. And while I am on this proposition I had just as well mention another matter that has been in my mind for some time. I believe that when some one conducting the Postal Service of the United States undertakes. in a sensible and efficient way, to reduce the cost of the service it will be found that mail can be best routed, can be best made up, outside of a traveling post-office car, except as to mail that is to be delivered between stations—to illustrate, mail taken on that is to be delivered between Washington and Greensboro, N. C., and so on.

I believe it will be found that this is one economy that can

be placed in effect and will result in a great saving.

Section 5 provides for the expenses of two delegates to the International Postal Union at Madrid. We have postal treaties with 32 other nations. Those countries have a convention once in five years, which goes over postal affairs as they are related one country to another. They also formulate rules and promulgate regulations for the government of international mail. In 1915 this convention will meet at Madrid, and we are to send two delegates; but those delegates, as provided in the proposed legislation, are to be from the department. In other words, it is not to be something to be given to "lame ducks." They are to be experts from the Post Office Department—men who know their business, and men who will go there with knowledge of what they are to do and be able to discharge their duties

I shall purposely omit section 6 for the present. Mr. FESS. Will the gentleman yield there?

Mr. FINLEY. Certainly.

Mr. FESS. The Member has impressed me not only with his great ability but with his sincerity, and that is why I ask this question. What I want to know is: Do you mean it is necessary to have section 6 in here in order to make this bill effective?

Mr. FINLEY. I will say to the gentleman that this section 6—one, so to speak, by itself—I will discuss it when I come to it in the same plain, straightforward way, I hope, that has always marked my discussions in this House and elsewhere.

Mr. FESS. The reason I asked the question-

Mr. FINLEY. I am coming to it.
Mr. FESS. You spoke a moment ago about the rider being necessary, and what is interesting me is whether it is necessary

Mr. FINLEY. A rider in an appropriation bill? Mr. FESS. Yes.

Mr. FINLEY. Often they are necessary. I will say to the gentleman this, that 99 per cent of the postal legislation since I have been in Congress has been in the way of riders on appropriation bills. In fact, I will say that 99.9 per cent of the legislation that is of importance and of moment to the American people has been brought about in that way.

Mr. FESS. Now, do you mean that that is necessary?

Mr. FESS. Now, do you mean that that is necessary?
Mr. FINLEY. Well, I say that on account of the diversity
of opinions that prevails everywhere, and men being weak—not
referring to the membership of the House, but to other bodies,
and other people who have something to say about it—on account of those foibles and weaknesses incident to humanity, it is necessary.

Mr. FESS. And then it would be better to put it in as a rider

than bring in a bill of itself?

Mr. FINLEY. I will say to the gentleman this, that when you bring in one of these propositions as a separate bill, coming from the Post Office Committee and passed by the House, it goes to some other body. I am not criticizing any other body, but if the bill found a resting place in an unexplored section of a pigeonhole in that other body, and was never heard of or found, it would not be unusual.

Mr. FESS. Now, is it not true that a rider is always an excuse for a thing that you can not help or bring in inde-

Mr. FINLEY. Not always. But I will say to the gentleman what I repeated before here, that a rider is a short, quick, and expeditious way of securing legislation. Now, a rider on this appropriation bill goes over to the Senate. They may amend it there; they may make it better, or they may make it worse. They may leave it out. However, when it goes to conference with such high-minded and patriotic citizens as my friend the gentleman from Tennessee [Mr. Moon] and my distinguished friend from Michigan [Mr. SAMUEL W. SMITH] and your humble colleague, whose diffidence is well known, as conferees, if an attempt was made to override the action of the House in conference on a matter of importance you would know about it long before the attempt was successful.

Mr. FESS. Then we are to understand that this rider is put in here because it is necessary and because it can not be gotten

in any other way?

Mr. FINLEY. I do not admit that. I will say to the gentleman that all of that will come up in its regular order. And I I do not admit that. I will say to the gentleam going to discuss section 6.

Mr. FESS. Is it not true that in order to embarrass a man who wants to vote for this measure you put this in because you think that thereby you will get some votes that otherwise you

would not get?

Mr. FINLEY. Oh, no. If there is anything in the world that the Post Office Committee of the House is noted for, it is for its utter frankness and its entire freedom from anything that would look like a willingness to allow somebody to take advantage of it or a willingness on its part to take advantage of some one else.

Mr. FESS. It would appear to me that the President would be very loath to veto a bill that carried the necessities for the running of the Government, while on the other hand if it were merely a question of principle in repudiating the merit system he would be apt to act quickly. Does not the gentleman think there is something in the mind of the committee along that line?

Mr. FINLEY. Well, I belong to the committee, and I will

say to the gentleman that I try to keep my promises.

Mr. LOBECK. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Nebraska?

Mr. FINLEY. Certainly.
Mr. LOBECK. Are not these riders put on these appropriation bills generally the expression of the majority of Congress, as introduced by bills brought in by various Members, representing their views?

Mr. FINLEY. Well, generally that is true.
Mr. LOBECK. And in accordance with wishes of the people?
Mr. FINLEY. Generally, that is true; and it is necessary

in a majority of instances.

Now, section 7 provides for the compensation of railway postal clerks and substitutes for railway postal clerks receiving injuries in the Railway Mail Service, letter carriers in the City Delivery Service, railway postal clerks or special delivery clerks, rural carriers, and so forth. For many years, as those present all know, it has been the practice on the part of the Government to give railway mail clerks compensation for injuries received, or if they die or are killed certain sums are usually given to those dependent upon them. Now, this is simply to extend the provisions of the law to other postal employees than railway mail clerks if killed or injured in line of duty.

Section 8 provides that \$200,000 be expended by the Post Office Department for experimental purposes in purchasing and operating railway mail cars. Now, the question of railway mail pay comes up annually, and I suppose there are no two Members of this body who will agree, if they agree that the railroads are paid too much, as to how much they are overpaid, or who will agree, if they think they are paid too little, as to how much they are underpaid. Here is a proposition that gives to the Post Office Department what has been asked for many times.

There are those who believe that Congress should take over many, and, in fact, all, of the means used in the operation of the Postal Service. I am not one of those; but if there is any

abuse, I would be glad to see it remedied.

I want to say that to a very large extent my distinguished friend from Wisconsin [Mr. Stafford], who has just preceded me, submitted figures and deductions which in many respects are the same as those I had compiled for use on this occasion. I will try not to use all of them. This happened certainly without any conference between him and myself, and without any knowledge on our part of the action of the other. I want to state this, that while the Postal Service since 1904 has increased so largely in the matter of expense—which has more than doubled—yet the railway pay has increased only 18 per cent. I may say but for the economies brought about since 1906 in the way of the blue tag, shipping mail sacks, publications of various kinds by freight, and a reduction in railway mail pay, the expenses for this branch would be at least eight millions greater.

There are many people who are honest and to some extent correct in their belief, who think that too much money is paid for this service. Let us see about it. If too much is paid, it is paid to the great trunk lines. If there is too little paid, it is paid to the small railroads, those short-line railroads, apartment-car railroads, and so forth. I know of an instance where, as I recollect, the amount paid to the railroad for something like 30 miles of carriage of mails between important townsboth of them second-class post offices and with thriving villages and towns between them and a prosperous and well-to-do people all along the line—the railroad, as I recollect, receives less for carrying the mails than is paid to many of the railway postal clerks.

I think it is only something like \$1,200 or \$1,500. It is a very small amount, so that this railroad is not compensated at

all for the service rendered the Government.

When you consider the growth of the Postal Service, when you consider the increased number of magazines that are printed in this country, you will understand the tremendous increase in the weight of the mail carried. Most of you know something about the blue-tag system inaugurated by the department. That grew out of something that took place in the Post Office Committee in 1907, as I remember. The same is true as to railway-mail equipment. In view of these things, I want to ask my friend from Wisconsin [Mr. Stafford] if he does not think that this experiment of the Government owning its own railway post-office cars will solve the question whether or not it is cheaper for the Government to carry its mail equipment, the parcels that go through the mails, and also publications that can be carried in storage cars? I give it as my opinion that these cars will be largely used for the purpose of carrying railway-mail equipment, post-office equipment, and such publications as can be carried in carload lots from the place of publication to distributing points, and also in carrying parcels through the mails, in making the parcel-post system more efficient.

It is my opinion that the full cost of the parcel-post system has not yet been ascertained. [Applause.] The full benefits of it have not been reached, either; and when the full benefits are attained, and the service is given complete operation, then we will know what it costs this Government to operate the parcel-post system, and not before. That system is now op-erated largely under departmental orders. Those departmental orders were given with the best light before the department, but there is no one here or elsewhere who believes that this House, this Congress, the Post Office Department, or any other body is infallible. We are all liable to make mistakes. So my opinion is that within the next two years or three years, when this parcel-post system is fully developed, and when all the four weighing divisions of the country have had their weighings of mail, our present ideas as to the cost of the parcel-post system may be materially modified. A 50-pound package going through the mail will entitle the railroads to receive as much as they receive for carrying 50 pounds of letters. I believe that 60 letters, each carrying a 2-cent stamp, weigh about 1 pound. Now, when you calculate that the parcels going through the mails will entitle the railroads to the same pay at the same rate per pound that is paid for carrying these letters, you can see that the time has not yet arrived when we can say what

amount will be paid to the railroads.

So I believe that this provision in the bill, providing \$200,000 to purchase and operate railway mail cars as an experiment, is a wise provision. It will help the Post Office Department to try out, not only carrying the mails generally in its own cars, but to try out the proposition of carrying magazines and other publications that may be issued, transporting them in storage cars from New York or Philadelphia or Boston to Pittsburgh or Chicago or St. Louis or other distributing points. It will enable the department to try out the parcel-post proposition. And until that is done we will not know whether this proposed expenditure of \$200,000 is a good one or a bad one. I believe it is a good one. The meat packers and, to a large extent, vegetable

shippers own their own cars.

Mr. PLATT. Will the gentleman yield for a question?

Mr. FINLEY. Certainly.

Mr. PLATT. Under section 12 of this bill, which provides that the Post Office Department shall have some future part in the selection of sites and in the control of buildings, will it be possible to determine the expenditure for increased buildings, made necessary by the parcel post, and will that be accounted as a part of the cost of the parcel-post system? In my district we have got to have a new post office in the city of Newburgh, chiefly on account of the parcel post, and that building will cost probably \$200,000.

Mr. FINLEY. There will probably be a branch post office at the union station or depot, and the parcel post will be handled

from that point.

Mr. PLATT. And not from the post office? Mr. FINLEY. Of course it will be handled by employees of the post office and the post office will have charge of it.

So, Mr. Chairman, when the parcel post is in full operation it will be interesting to ascertain what is the increase in the weight of the railway mail on account of the packages carried by the parcel post. I believe they are going to weigh the mail in the New England division this year. Next year, I think, they will weigh the mail in the Central West. Those are the two great divisions so far as the parcel post is concerned, because in those divisions are located the great departmental stores. When these weighings are made and when, as I hope, we shall have in operation this system of the Government owning and operating its own railway postal cars—not to an unlimited extent, but to a sufficient extent to enable the Government to try

out the proposition-then we will know more than we know now. I am one of those who in the committee and on the floor of the House and in the committee of conference helped to frame the parcel-post law. I believed that the American people demanded it, and I believe it was a good thing for them and that it will result to the benefit of the people of the country and that it has already resulted to their benefit. It has had the effect of reducing express charges. Up to the inauguration of this system the express companies had a monopoly of carrying packages exceeding 4 pounds in weight.

While I am on this proposition I want to say by way of repetition that a parcel or package going through the mail is freight, so to speak, and it ought to bear all the expense incident to its receipt, separation, its carriage, and its delivery to the consignee from first to last. I am not one of those who believe that any man or any section or any particular business in this country has the right to special benefit coming to it in the way of charges of the Government for services performed for less than

the service costs the Government.

In view of that, I say that you must take the Postal Service as a whole, and while it will be impossible to figure the cost of the parcel post to a cent, we can approximate it as we do with many other divisions of the Postal Service.

Section 9 in relation to the rural carrier carries an increase of approximately 7 per cent. I read an editorial the other day in a newspaper, whose editor ought to have known better than to write such an editorial, to the effect that these carriers required no equipment, that they were without expense in this respect, or something like that.

Now, every Member in this House who has any knowledge of rural carriers is aware of the fact that each rural carrier has an equipment that costs from \$300 to \$600. It depends on the locality, it depends on the section of the country, on the condition of the roads, on the climate, and so on. And just here, if I may ask, with the parcel post in full operation, what will be the effect on these carriers? Most of them, or the majority of them, ride in buggies. Do you think, with the weight increased in the parcel-post packages to 50 pounds, that they will be able to ride in buggies very long? Some one very sensibly stated the other day that they would require spring wagons. I have no doubt about that, and that they will have spring wagons specially constructed for use in the service to properly conduct that service. So that this equipment of \$300 to \$600 will be vastly increased by the inauguration of the parcel post by reason of the amount of mail and packages they will have to carry. These matters all taken together mean that they will perform larger duties and will be at a much greater expense.

Mr. FESS. Will the gentleman yield Mr. FINLEY. Certainly.

Mr. FESS. The increase in the wage is not greater than the increase in the amount of work added by the parcel post, is it? Mr. FINLEY. No, not at the present time; but when the parcel-post system has reached its full development, then the question would have to be answered in the negative with stronger emphasis. In other words, with the full development of the parcel-post system this 7 per cent increase would not compensate them for the increased service they have to perform by reason of the parcel post.

Mr. MADDEN. Will the gentleman yield? Mr. FINLEY. I will yield. Mr. MADDEN. As to what the gentleman said about the necessity of spring wagons which the carrier will have to have. Will he not also have to have a set of scales to weigh the parcels that come to him from residents in the rural districts? suggest that it might be necessary, and probably will be, to have these scales a part of the wagon—built into the floor of the wagons—so that they will be a permanent fixture. will be added to the cost of equipment. That

Mr. FINLEY. My distinguished friend from Illinois is correct, as he usually is. The increased service that will be demanded of the rural carriers warrants the 7 per cent increase,

and later on a greater increase will be demanded.

Mr. HAMLIN. Will the gentleman yield? Mr. FINLEY. Yes.

Mr. FINLEY. Yes. Mr. HAMLIN. Did the gentleman also take into consideration the fact that the residents along the routes will have to provide a place for the deposit of parcels when delivered by

Mr. FINLEY. That can be regulated by departmental order. Mr. HAMLIN. Complaint comes to me that carriers frequently have to return back to the office packages that they start out with in the morning because there is no place to leave them. They can not deposit them in the boxes, and they do not dare to leave them outside for fear that they will be injured by the weather or that people may come along and take

Mr. FINLEY. I will say that there are comparatively few

Mr. HAMLIN. I think they are getting numerous.

Mr. FINLEY. In my country-I have not traveled in the gentleman's country-the rural routes go along the public highways and houses are generally on the highway. Those who have not the good fortune to live on the highway have a box located at the house of some one else who does live on the highway, so that any package could be left there without very much So I can not quite agree with the gentleman inconvenience. from Missouri that that would be a general condition.

Mr. HAMLIN. I understand it is quite general. More than one carrier told me last week that they were now under the necessity of phoning ahead to different houses for them to meet them at the road and receive packages which they did not dare to leave, and frequently they could not reach the patrons by phone because they did not have any phone, and they had to carry them all the way round their route.

Mr. FINLEY. I will say to the gentleman that proper delivery in the rural service means that no man would be more

than a mile from the rural route.

Mr. HAMLIN. He might as well be 5 miles as 1 mile, so far as the reception of these packages is concerned, if there is no receptacle to leave them in.

Mr. FINLEY. I understand that when there is a package to be delivered to a man who lives a mile or any distance from the public highway, then the package can be left with the person at whose house the box of this man is located.

Mr. RUSSELL. But it is not always at a house. Frequently the roads cross and there is no house there at all, and there are five or six boxes at the crossing of these roads.

Mr. HAMLIN. That is true; and houses are frequently set away back in the field, and besides that, I might not want my package left at this particular house.

Mr. FINLEY. Mr. Chairman, I will say this, that in the early days before the era of digging wells, laying out highways, and of automobiles and railroads, our people had a way of building their houses near some good spring. We have changed that now, and I submit that the people of Missouri will come to that after a time.

The people of Missouri live both on the roads Mr. HAMLIN. and back from the roads. Every portion of our country can be tilled, unlike the country the gentleman has the honor to represent, and so it is already populated now. They can not all live on the big road, but they can all read and do all get mail.

Mr. FINLEY. The same point the gentleman makes in reference to the delivery of packages could be applied to the delivery of registered letters.

Mr. HAMLIN. But there are not so many registered letters, I submit, as there are parcel-post packages.

Mr. FINLEY. All that will change now through the Democratic administration that we have in action.

Mr. RUSSELL. Everything will come around all right pretty

Mr. HILL. Mr. Chairman, will the gentleman yield?
Mr. FINLEY. Certainly.
Mr. HILL. I was going to ask the gentleman if, by executive order, the Post Office Department can make an additional box to hold packages of this sort at the expense of the person who receives the package or at the expense of the Government?

Mr. FINLEY. Oh, it would have to be at the expense of the person who receives the packages. The Postmaster General, under the law, has the right to make such rules and regulations as are necessary for the proper conduct of the Postal Service, when those rules and regulations are not in conflict with the law and when they will be conducive to and result in greater efficiency in the Postal Service. That is about the sum and substance of his power and authority.

All he could do would be to decline to have Mr. HAMLIN. mail delivered to the people who refused to comply with the

Mr. FINLEY. Yes.

Mr. FRANCIS. Mr. Chairman, will the gentleman yield?

Mr. FINLEY. Yes.

Mr. FRANCIS. This bill in section 9 provides a flat rate of pay for all rural carriers on a standard route of 24 miles

Mr. FINLEY. Yes; and I will say to the gentleman that when you come to discriminate and give one rural carrier one rate of pay and another another for like service, I think such a howl will go up over this country as the gentleman would not wish to hear repeated.

Mr. FRANCIS. Is there any comparison between the man who has a paved road to travel and another who has a lake

of mud? Does not one require three times the equipment that the other does? There ought to be some way of arranging the pay of these people in accordance with their trouble.

Mr. FINLEY. I will say this to the gentleman, that some people are fortunate and others unfortunate as to locality. About all the Government can do is to treat everybody on a plane of equality when they perform like service. depart from that rule, you get into trouble.

Mr. FRANCIS. The question is, Are they performing like

The CHAIRMAN. The time of the gentleman from South Carolina has expired. The gentleman from Tennessee has 17 minutes remaining.

Mr. MOON. Mr. Chairman, I yield the remainder of my time to the gentleman from South Carolina [Mr. FINLEY].

Mr. FRANCIS. They are not performing like service. They

are in the same department, doing a certain work. Mr. FINLEY. If the one with the paved road would exchange places with the man who had a mud lake, he would be on a paved road; otherwise not. But we are going to remedy all

that by passing the good-roads bill.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. FINLEY. Just for a question.

Mr. FESS. Does the power of the department without legislation here extend to forbidding patrons from dropping money instead of postage stamps into the box and expecting the letter carrier to put the postage on?

Mr. FINLEY. Oh, yes; the department has that power. Mr. FESS. We have a great many protests along that line.

Mr. FINLEY. I have no doubt. I will say to the gentleman he will never have any general law that confers as many blessings and benefits on the great American people as the Rural Delivery Service does without there being some little inequalities here and there.

Mr. RUSSELL. I had that question up with the department very recently and I was advised that I might inform my constituents that they were not bound to take up the pennies dropped in the box. The carriers said sometimes their hands were cold and numb and they could not pick them up, and the department said they did not have to do so, but if the pennies were put in some pasteboard receptacle, that then they would be required to pick them up. That is the order of the department.

Mr. FINLEY. Now, Mr. Chairman, I will proceed. not have the time to go over all this proposed new legislation. As I have already stated the expenditures for the postal service for 1800 were \$215,914. The expenditures for 1913 were about \$262,000,000, as I recall, and I have already inserted in my remarks a table showing the various expenditures for 10-year periods, beginning with the year 1800. Now, it is remarkable periods, beginning with the year 1300. Now, it is remarkable that in the past 13 years the expenditures have approximately increased 200 per cent. Salaries of postmasters in 1904 were \$22,273,415.63. For 1913 they were \$29,126,662.47. For 1904 salaries of clerks in city post offices, \$21,043,973.86. In 1913 they were \$45,785,826.34. In 1904 City Delivery Service amounted to \$20,585,570.31; in 1913, \$36,732,578.66. Now, during those same years the Railway Mall Service for clerks in 1904 was \$12,106,130.09; in 1913 it was \$22,925,614.11. In 1904 the Rural Delivery Service cost \$12,681,876.90, and in 1913 the expenditures were \$45,702,413.20, total Railway Mail pay for 1904 of \$43,971,847.50, and for 1913 of \$51,959,387.66, an increase of about 18 per cent.

Mr. Chairman, I wish to call attention to this fact: In mentioning railway mail pay a moment ago—the increase in 13 years is about 18 per cent. Now, you would naturally conclude that railway mail pay would increase in proportion with other expenditues of the Postal Service. Not at all; it is only about an 18 per cent increase. That comes about largely because of increased salaries paid to postal employees. In 1907 we greatly reduced railway mail pay, railway post office car pay, and this accounts for the fact to a very great extent that railway mail pay does not show a larger percentage of increase. Now, when this joint commission which has the matter under consideration reports, I am led to believe from what I am told that they will report some new legislation. What that will be I do not know, but I believe that if any change is made in the law that inside of three years from now the railway mail pay and the cost of the parcel post will be increased largely.

Mr. Chairman, as to section 6, it seems to be a proposition that worries everybody on that side of the aisle-Republicans, Bull Moosers, Progressives, and all. I do not think it worries the Progressives as much as it does the Republicans. About the sum total of the argument made by the Republicans amounts to this: "Now you wicked Democrats listen to what I tell you. You are going to hurt yourselves meddling with the civil-service law." That is about the sum and substance of the argument which they make, "You are going to hurt yourselves."

Well, now, if we are going to hurt ourselves, does not my handsome friend from Illinois, the minority leader, want us to do so—not at the expense of patriotism or the good of the country—but if the Democratic Party is going to put itself out of existence on assistant postmasters, would the gentleman, or any other gentleman on that side, not be willing to see the experiment tried? Oh, no! oh, no!

Mr. MANN. You will hurt yourself in so many ways you

will soon go out anyhow.

Mr. FINLEY. Well, I will say to the gentleman that we are in now and his side is out. The children of Israel wandered in the wilderness for 40 years and were afflicted by the Philistines for 40 years. We are through with our affliction. You are going through yours now.

The gentleman is turning his affliction over to Mr. MANN.

the country

Mr. FINLEY. No; the Republicans are self-inflicted, and you are getting what is coming to you. Talk about assistant postmasters, and you have tried to make it one of the greatest propositions here that was ever considered by the American Congress. Even my good-natured friend, that rock-ribbed Democrat from Missouri [Mr. SHACKLEFORD], who is solemn and sedate when all great questions are considered, can not repress a smile when it is suggested that if assistant postmasters are to be tampered with in any way, the country will go to the devil. I do not believe a bit of it. This is no new proposition to me. Some of the older Members here will remember when the Hon. "Charlie" Grosvenor-

Mr. FESS. From Ohio.

Mr. FINLEY. We all know where he is from. He and the Hon, "Pete" Hepburn, the strongest debater I ever listened to in my life, and myself voted conscientiously, from a standpoint of patriotism many times, against the civil service. We voted against it every time it came up and we had the opportunity.

Why, when I was a young Member here I thought it was my duty, when I could not voice my opposition in any other way,

to vote against an appropriation to support it.

Now, I want to say this, that perhaps I am in the most anomalous position of any Member of the House. I had more to do than anyone else in the House with the passage of the classification act of 1907, and also with the recent act classifying rallway mail clerks. I have stated my position, and I have always voted accordingly here. I am going to do it now. I believe when the American people registered their will that the Government of this country should be turned over to the Democrats they looked to the Democrats to take the Government of the country, and believed that that Government could be best conducted from a patriotic standpoint—and from a standpoint of the will of the American people as registered at the polls-when every office which is not, strictly speaking, a clerical office, should be filled by Democrats, unless in some special instances, as a case where on account of the particular fitness of a man or on account of something else equally convincing, he should be retained, although of the opposite party.

Mr. FESS. Now will the gentleman yield?

Mr. FINLEY. I am going to discuss the matter. I have but

a few minutes.

Mr. FESS. You stated you would wait and come back to this.

Mr. FINLEY. I am on section 6 now. Mr. FESS. Will the gentleman yield? Mr. FESS.

Mr. FINLEY. Just for a question.

Mr. FESS. What is the difference between the Democratic policy toward the merit system as expressed in this section 6 and President Jackson's policy of "To the victors belong the

Mr. FINLEY. Oh, Jackson was born in my district, though my people were Democrats long before his time.

Mr. FESS. What is the difference?

Mr. FINLEY. There is a great deal of difference.

Mr. FESS. What is the difference? Mr. FINLEY. I will come to that.

Mr. Chairman, I had a lesson shortly after coming to Congress that taught me something about the civil service. I had a friend, a good Democrat, who attended the same college or university I did. I was in the law school and he was in the

literary department.

He came here from South Carolina. He was one of the census clerks in 1900, the Twelfth Census. There was no civil service about that. These census clerks in my State were divided between the Democratic and Republican parties. I named him and he was appointed. Then I believe he got into the city post office, but he wanted to go into the departmental service,

and I tried for two or three years to get him in. He stood all necessary examinations, and finally I met up with the Republican referee from South Carolina one day in the Post Office Department Building, and what I said to him about the Republican Party and its administration of the civil-service law you will not find in any Sunday-school book in all this country. [Laughter.] Anyhow, when I got through he said, "Oh, Finley, what do you want?" I told him, and he said, "Come around"; and we walked around to one of the bureau chiefs, a big man, one of those next to the head of the department, and the referee wrote something down on a paper. I could not see exactly what he did write, but he wrote anywhere from a line and a half to two lines. I had given him the name of my friend. He handed the slip of paper to an Assistant Postmaster General of the Post Office Department.

Within three days my friend was appointed to a clerkship.

He got it how? Under civil-service law? No.
I stated on the floor of the House years ago, and I repeat it now, that the civil-service law is the football of politics. not want to wipe it all out; not at all. But here is the Republican Party undertaking to make a mountain out of a mole-hill. They are undertaking to take an ant hill and make a Mount Vesuvius out of it. What about? Why, about the appointment of assistant postmasters.

There is not a man in this Hall who does not know that an assistant postmaster in the absence of the postmaster takes his place, and even when the postmaster is present the assistant postmaster has executive duties to perform; and I say in every case like that the man who is responsible and gives bond to the Government should have the right to name his assistant or say at least who is unfit for the place. Under the civil-service law

he can not do that. [Applause.]

The CHAIRMAN. The time of the gentleman from South Carolina has expired. All time has expired. The Clerk will

The Clerk read as follows:

For per diem allowance of inspectors in the field while actually traveling on official business away from their homes, their official domiciles, and their headquarters, at a rate to be fixed by the Postmaster General, not to exceed \$3 per day: Provided, That the Postmaster General may, in his discretion, allow inspectors per diem while temporarily located at any place on business away from their homes, or their designated domiciles, for a period not exceeding 20 consecutive days at any one place, and make rules and regulations governing the foregoing provisions relating to per diem: And provided further, That no per diem shall be paid to inspectors receiving annual salaries of \$2,000 or more, except the 30 inspectors receiving \$2,100 each, \$261,400.

Mr. HAMLIN. Mr. Chairman, I desire to offer an amendment at the end of line 12. After the word "homes" insert the words their offices.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. Hamlin].

Mr. Hamlin. It would then read, "their homes, their offices,

their official domiciles, and their headquarters.'

The Clerk read as follows:

Amend, page 2, by inserting at the end of line 12 the words "their offices."

Mr. HAMLIN. Mr. Chairman, the reason I offer this amendment is to try to cure what seems to me an existing evil in the inspection service which has come to my knowledge.

Of course, we all understand the purpose of the qualifications that have been put in this paragraph by the committee and carried in the law heretofore. The purpose is not to pay these inspectors when they are not actually traveling on official business, but only when away from their homes, their head-quarters, or their official domiciles. But this provision of the law has not always been observed.

For instance, out in my own section, St. Louis being the headquarters, no difference where the inspector may be located or to what district he may be assigned, his home is, of course, where his family is located, and his official domicile is where his office is kept. But the practice seems to have grown up to evade the law and charge per diem for days spent in the office by living a few miles out of the town where his office is located, and then for every day that he spends at his office" transacting business he charges that up to the Government as though he were away on official business.

Now, it may seem that this is hardly possible, but it actually In my section, in my own district, my attention has occurred. was called recently to a case of that kind, and I have down in my office figures and information showing that the inspector who was assigned to the district in which my home city is located has an office in the Federal building in Springfield, Mo., but that he located his family out 25 miles at Marshfield, on the railroad, where the trains run so that he could come in early in the morning to his office and go back home at night. In doing that, every day that he put in at his office at his actual official domicile he charged up to the Government a per diem of \$3, so that one-third of the actual time of 11 months in the last fiscal year for which I obtained the figures from the auditor he put in in Springfield, where his office was located, but charged the Government this extra per diem in addition to his salary.

Now, I think that, of course, ought not to be permitted. understand, of course, the committee does not want to permit it, and I understand the department does not want to permit

anything of that kind.

Mr. MOON. What is the language the gentleman wants to put in? The gentleman says, "From their homes."

Mr. HAMLIN. "Their homes, their offices." Mr. MOON. Well, what is the difference between their official domicile and their office?

Mr. HAMLIN. Home, you mean?

Mr. MOON. No; the language of this bill is-

While traveling on official business away from their homes, their official domiciles, and their headquarters.

The language the gentleman uses does not seem to me to carry any more force than the language of the bill. domicile" and "office" are the same thing.

Mr. HAMLIN. It has not been so construed by some of the authorities. I took this matter up with the authorities down at the department, and they did not consider it that way. They say his official domicile is wherever he resides.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAMLIN. I ask for five minutes more time.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent for five minutes more. Is there objection?

There was no objection.

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from Wisconsin?

Mr. HAMLIN. I do.

Mr. STAFFORD. I rose a moment ago to ask the gentleman's authority for the construction he has given of "official domi-When the committee wrote this provision about eight years ago, as the Chairman well remembers, we sought to correct an abuse similar to that which the gentleman has just described, intending by "official domicile" to mean their offices. Now, has the legal officer of the department or any other official head construed "official domicile" to be synonymous with

Mr. HAMLIN. I can only answer the gentleman in this way, that I talked with the chief inspector about it and he did not construe "official domicile" to mean his office; and while I did not talk to the auditor in person about that particular point, I know he could not have construed it as the committee intended it should be construed, to mean his office, because he allowed this per diem for the days that the record shows the man spent at the place where his office was located.

Mr. STAFFORD. I wish to say that that construction is a forced construction, not giving any effect whatever to the other phraseology, but directly contrary to the express phraseology here, which indicates three places from which the inspector must be absent before he is entitled to his per diem, namely, his home, his official domicile, and his headquarters.

Mr. HAMLIN. Yes.

Mr. STAFFORD. No lawyer would ever construe that provision to make "home" and "official domicile" to mean the same. To give full effect to it you must consider "official domicile" to mean their offices, which was the intendment of the Congress when they enacted it.

Mr. HAMLIN. The gentleman and I agree entirely, and I was absolutely astounded when I found that there was a different construction put upon it. I am quite sure there is no difference between the committee and myself on this matter. only thing is, I want, if possible, to make it so plain that it can not be again misconstrued, so that these fellows will not be permitted to "whip the devil around the stump" and move right outside of the city where their offices are located and then charge the Government a per diem on the days that they are engaged in their offices.

Mr. MANN. Will the gentleman yield for a question? Mr. HAMLIN. I yield to the gentleman from Illinois.

Mr. MANN. Does the gentleman mean to say that the department construes the term "official domicile" to mean the home where a man lives?

Mr. HAMLIN. I ought not to say that the department so construes it; and if I said that, I want to modify my statement. I do not think I said that. I said that I took the matter up with the chief inspector, giving him the facts in this particular case, and his construction was that the law had not been violated; that the headquarters of this particular man were St. Louis, and that his home and domicile was the place where he

lived, and not the place where he happened to have his office. do not mean that the department made that ruling. I took it up with the inspector in charge, the chief inspector.

Mr. MANN. Does the gentleman know how long that construction has existed, as a matter of fact, in determining the pay of these inspectors?

Mr. HAMLIN. All this last year in this particular case. I am sure, and I have a very strong suspicion that it has covered

Mr. MANN. Of course, it is impossible for anyone here to understand how a man's home could be called his official domicile

Mr. HAMLIN. I think so, too, and I was absolutely astounded. I was going to say that there was a Member on the floor-perhaps he is not here at this moment-who was with me and who heard the conversation, and heard what I said. used some pretty strong language. I was very much astounded that such a construction could be put upon it.

I want it fixed in some way so that there can be no doubt about it in the future. I do not know whether the amendment I offer will cover it or not, but it seems to me that it would cover this particular case, because there is no question about where this fellow's office was located, and by putting in the words "their offices," then there can be no doubt about it. That is the reason why I have offered the amendment. At least, I trust that this discussion will make it so plain that it can not be misconstrued in the future.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOON. I think my friend does not add anything to the strength of this section by the language he uses. The words "official domicile" mean, beyond question, the same thing as the language that he offers here. I imagine that the whole complaint does not arise from that language at all, but from the proviso which comes afterwards:

Provided, That the Postmaster General may, in his discretion, allow inspectors per diem while temporarily located at any place on business away from their homes, or their designated domiciles, for a period not exceeding 20 consecutive days at any one place, and make rules and regulations governing the foregoing provisions relating to per diem.

If any such incident occurred, I do not think it could occur by the construction placed on the other language. The discretionary power under peculiar circumstances given to the department of giving an extra per diem when away from the place of business temporarily is the ground probably of the gentle-man's complaint. But it is absolutely essential that the department should have some discretion, because of the peculiar work that must at times be performed.

Mr. HAMLIN. Is the proviso the gentleman read in the exist-

ing law to-day?

Mr. MOON. It is

Mr. HAMLIN. Then that was not the excuse given by him? Mr. MOON. The gentleman from Missouri was talking with somebody that did not know what he was talking about; it was not the head of the department?

Mr. HAMLIN. I was not talking with the Postmaster

General.

Mr. MOON. The gentleman was not talking with the First Assistant Postmaster General, was he?

Mr. HAMLIN. No.

Mr. MOON. He gave you an explanation that was not correct. This has been the practice all along. I do not think that any fraud has been perpetrated at any time under this section. I do not see any force in the gentleman's amendment, for I do not think it would affect the matter at all.

Mr. HAMLIN. I do not agree with the gentleman that this

privilege has not been abused.

Mr. MOON. I am not undertaking to say that it has not been abused. Wherever a discretionary power is given, as it is sometimes essential to do, there may be an abuse of it, and it is far from me to say that there has not. I do not know whether there has or has not, but I imagine that there has been no intentional abuse of it.

Mr. HAMLIN. The construction put upon this provision is that they have a perfect right to locate themselves outside of a place where the most business is done, for the purpose of increasing their compensation. That is the way it was stated

Mr. MOON. That could not be done unless it was under the

Will the gentleman yield? Mr. MANN.

Mr. HAMLIN. Yes. Mr. MANN. I would like to ask the gentleman whether the language he proposes to insert might not be construed so that no per diem would be allowed at all; that a man should not be paid a per diem unless he was away from his official office? As

a matter of fact, these inspectors carry their office under their hat, do they not?

Mr. HAMLIN. No. Mr. MANN. I think so; and under the gentleman's amendment I do not see how a man would get away from his office.

Mr. HAMLIN. We might eliminate the word "domicile"

and insert "office." I know that this per diem was allowed, and I know that it has been paid.

Mr. MANN. Mr. Chairman, may I ask the gentleman from Tennessee why they allow a per diem to inspectors who are paid \$2,100 and do not allow it to inspectors who are paid \$2,000?

Mr. MOON. These others are placed in a special service in the cities.

Mr. MANN. There is a difference in the class of inspectors,

Mr. MOON. Somewhat different in their work.

Mr. STAFFORD. I will say to the gentleman from Illinois that these \$2,100 men were transferred from the Railway Mail Service some years ago to the inspector service. At that time they received \$1,800 a year. When the per diem was reduced, through the efforts of the gentleman from Indiana [Mr. Cox], from \$4 to \$3, the following Congress increased the salary from \$1,800 to \$2,100. These railway inspectors are always on the road, and they continue to receive the per diem allowance.

The CHAIRMAN. The question is on the amendment offered

by the gentleman from Missouri.

The question was taken, and the amendment was lost.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from Tennessee in charge of the bill a question or two as to the method of appointing these postmasters whose compensation does not exceed \$180. I have in mind now two instances about which I want to interrogate him.

Mr. MOON. The section under which that inquiry will be more pertinent will be reached later. But while on the floor I might say that the inspectors make the examination and recommendation to the department for the appointment of fourth-

class postmasters whose salary is less than \$180.

Mr. SLAYDEN. That is just it. Do they not go invariably from their homes to the post office and at a very considerable expense to make these very minor appointments?

Mr. MOON. I imagine that it costs something.
Mr. SLAYDEN. That is the point. I have in mind two such trips made by post-office inspectors where the actual cost of travel and hotel bills to the Government was 80 per cent of the entire amount of the revenues of the office. It seems to me that common sense and good business judgment suggest that that method should be changed. I am not hunting patronage, permit me to say, in these \$180 and \$50 post offices.

Mr. MOON. I do not know any method that could be

adopted that would be cheaper.

Mr. SLAYDEN. What was the old method?

Mr. MOON. He was appointed by the Fourth Assistant Postmaster General

Mr. SLAYDEN. But after his visit and expense accounts like this?

Mr. MOON. Oh, no; after the ascertainment heretofore that he was a capable, honest man, and a Republican.

Mr. SLAYDEN. As we have no men in my district that measure up to that standard-capable, honest, and Republican-I am not concerned on that score.

Mr. MOON. Then the gentleman could find an honest and

capable man who is a Democrat,
Mr. SLAYDEN. Yes; and I think save the Government a great deal of money by a return to the old method. I happen to know that an inspector with whom I have personal acquaintance thinks that it is a waste of time, that might perhaps be given to other and more important work, and is an unnecessary cost to the management of the Post Office Department.

Mr. MOON. That may be true, but that rule can not pre-

vail until you change the civil-service law.

Mr. SLAYDEN. I am ready to change it in many particulars. [Laughter.]

Mr. Chairman, will the gentleman yield? Mr. MANN.

Mr. SLAYDEN. Yes.

Mr. MANN. I could not hear all of the conversation which took place.

Mr. SLAYDEN. It was very enlightening.

Mr. MANN. I thought possibly it would be still more enlightening if my distinguished friend would submit his inquiry to our former distinguished colleague from Texas, who is now

running the Post Office Department,
Mr. SLAYDEN. I will say to the gentleman that I am inclined to think that if it were submitted to him, without any

pressure from other directions, he would not set up too many obstacles to certain reasonable modifications of the civil-service

Mr. MANN. If the gentleman will permit, I desire to say that from my experience and knowledge of the distinguished Postmaster General I do not think he is one who is subject to passing whims or that he yields to outside pressure to any great extent. He is a man of his own mind. He was when he was in the House, and I have no doubt that he still is. I suspect that if my distinguished friend from Texas will submit his inquiry to the Postmaster General, his and my former colleague in the House, he will get full information on the subject.

Mr. SLAYDEN. What I am trying to do, I will say to my distinguished friend from Illinois, is to get from the chairman of the committee some information as to how a saving can be made.

Mr. MOON. Oh, I can tell the gentleman as to how a saving can be made.

Mr. SLAYDEN. I had understood that this was to be an ad-

ministration of economy, and I hope you will.

Mr. MOON. If that is all the inquiry is directed tosaving-I will say that the sending of an inspector down there to make a report would cost something, of course, and there is no way to correct that as I can see except to have the Postmaster General make the appointment in the first place.

The CHAIRMAN. The time of the gentleman from Texas has expired.

The Clerk read as follows:

For traveling expenses of inspectors without per diem allowance, inspectors in charge, and the chief post-office inspector, and expenses incurred by inspectors not covered by per diem allowance, unusual and extraordinary expenses necessarily incurred for maintenance by inspectors over and above per diem allowance while traveling on official business in connection with the postal service of Alaska, and for the traveling expenses of four clerks performing stenographic and clerical assistance to post-office inspectors in the investigation of important fraud cases, \$43,750.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word. In order that my speech which was interrupted may have something like symmetry and a proper conclusion, I desire to call the attention of my friend, the distinguished chairman, one concrete case that has just come to my observation, which causes me to impede the progress of his bill. At Echo, in Coleman County, Tex., there is a post office with annual receipts of \$50. The railway fare from the home of the inspector to the nearest railway station to that post office is \$12.30. trip can not be made under about three days. At regular hotel rates in that section, that would amount to \$9 more. Other expenses are necessary to this trip on account of the fact that they have to go to the country. It is more expensive to travel when you get away from the railroad. All this makes the actual expense to select a postmaster for that place, with a revenue amounting to \$50, amount to the sum of \$39.30, leaving \$11.70, as I make the calculation. There ought to be some way of correcting that sort of thing.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. SLAYDEN. Certainly.

Mr. MADDEN. Would not the suggestion that the office be abolished be a good one?

Mr. SLAYDEN. I will say to the gentleman from Illinois that I have recommended the abolishment of an office in the

Mr. MADDEN. This one?

Mr. SLAYDEN. No; not this one. Mr. MADDEN. That would be the best remedy.

No; I think not. Mr. Chairman, it is neces-Mr. SLAYDEN. sary and it is quite customary to have post offices established throughout some States, although probably it is not in a State like Illinois—thickly settled and of comparatively small area as Illinois does not make a very great spot on the map. It is necessary to maintain unremunerative offices in some of the new countries in which individuals have built railroads, and not the Government, and which are being settled up rapidly. begin small, and these people ought to have postal facilities. and they have them, let me say. Occasionally, as happened in the case I refer to, which I recommended for discontinuance, it has been one temporarily established for the convenience of the employees of the railways. In this case it was the Santa Fe Railroad, which corporation was building a great, long piece of road through the State to shorten the distance between the Atlantic and Pacific Oceans. When they ceased work at a quarry, the population moved with the road to another place. There was no longer a necessity for keeping the office, and I recommended its discontinuance. It is possible that by exerting a reasonable amount of influence I might have maintained that office and, possibly, have had something to do with the appointment of the postmaster, but in the public interest I abandoned any such selfish thought. [Applause.]

Mr. TOWNSEND. As the gentleman always does.

Without objection, the pro forma amend-The CHAIRMAN. ment will be withdrawn.

There was no objection. The Clerk read as follows:

For payment of rewards for the detection, arrest, and conviction of post-office burglars, robbers, and highway mail robbers: Provided, That of the amount herein appropriated not to exceed \$5,000 may be expended, in the discretion of the Postmaster General, for the purpose of securing information concerning violations of the postal laws and for services and information looking toward the apprehension of criminals, \$25,000

Mr. MANN. Mr. Chairman, I move to strike out the last Is the gentleman from Tennessee able to inform the House how many post-office robberies there were in the last

fiscal year? Mr. MOON. What is the inquiry of the gentleman?

Mr. MANN. Mr. MANN. How many post-office robberles were there? Mr. MOON. I do not believe the hearings show that fact.

Mr. MANN. Well, I did not know but what the gentleman had that information. I know we have just had a report on the subject

Mr. MOON. I know we have; but I do not recall the report. Mr. MANN. It is quite a large document, giving the list. It looked enormous, and I wondered if there was any way of preventing that. When hundreds and hundreds of post offices are robbed every year it looks as though there ought to be some appropriation sufficient to try to stop it.

The CHAIRMAN. Without objection the pro forma amend-

ment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

OFFICE OF THE FIRST ASSISTANT POSTMASTER GENERAL.

For compensation to postmasters, \$30,750,000.

Mr. MOON. Mr. Chairman, I offer to amend, page 4, line 6. After "\$30.750,000" add:

Provided, That hereafter, in determining the gross receipts upon which the salary of the postmaster shall be based, stamps, stamped envelopes, and postal cards sold in large or unusual quantity to any person to be used in mailing matter at other post offices or in mailing matter diversed from other post offices shall not be included, whether the sale be made with or without solicitation by the postmaster.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amend, page 4, line 6, by inserting, after "\$30,750,000," the fol-

lowing:

"Provided, That hereafter, in determining the gross receipts upon which the salary of the postmaster shall be based, stamps, stamped envelopes, and postal cards sold in large or unusual quantity to any person to be used in mailing matter at other post offices or in mailing matter diverted from other post offices shall not be included, whether the sale be made with or without solicitation by the postmaster."

Mr. MANN. Mr. Chairman, I reserve a point of order. Mr. MOON. Mr. Chairman, it is subject to a point of order; there is no question about that. It is done now, and the department advises us it is only done by regulation or a rule down there which is in force and has been for years. It is deemed by the department better to have this included in the law.

Mr. MANN. I know there was such a regulation. This is to cover small towns and post offices adjacent to large cities, I take it, in the main?

Mr. MOON. Yes.

Mr. MANN. We have a regulation to that effect now?

Mr. MOON. Yes.

Mr. MANN. Will this add anything to the value?

Mr. MOON. Well, by regulation is not a good way to conduct a department.

Mr. MANN. I do not know. Regulations are made under the law, and there is a book of regulations; there are regulations that we could not put into a law.

Mr. MOON. We submit this at the request of the department

Mr. MANN. Is this a request of the Post Office Department? Mr. MOON. Yes; this letter is from the department on that subject

Mr. MANN. Can not we have this letter read? Mr. MOON. The Clerk will read the first part of it and I will read the balance of it.

The Clerk read as follows:

Post Office Department, First Assistant Postmaster General, Washington January 15, 1914.

CHIEF CLERK, Post Office Department:

The following suggestions are made for changes in the bill making ppropriations for the service of the Post Office Department for the scal year ending June 30, 1915:

Page 4, line 6, after "\$30,750,000," add:
"Provided, That hereafter, in determining the gross receipts upon which the salary of a postmaster shall be based, stamps, stamped envelopes, and postal cards, sold in large or unusual quantities to any persons to be used in mailing matter at other post offices, or in mailing matter diverted from other offices, shall not be included, whether the sale be made with or without solicitation by the postmaster."

This is now done by regulation, but it is believed that it should be made a part of this appropriation act so that it may be enacted into law.

Mr. TOWNSEND. Will the gentleman yield?
Mr. MOON. I yield to the gentleman from New Jersey. Mr. TOWNSEND. I would like to have the chairman of the committee explain a little, if he can, as to who is to determine what constitutes a "large and unusual" amount of postal supplies, and I am moved to ask him that question for this reason: A town in my district was deprived of city delivery privileges a year and a half or two years ago while inspectors of the Post Office Department were trying to decide whether their sale of postage stamps and postal cards, and so forth, was "large and unusual," and whether or not they should ever be given the privilege of city delivery. I will say to the gentleman that my own political activities were responsible for a part of that large sale, and that a further large sale resulted from certain philanthropic and charitable work of the ladies of that town, which has since been kept up regularly. And I can see very easily how a law like this might operate with

very great injustice to towns of that kind. Mr. FINLEY. If the gentleman will excuse me, this is where the purchased stamps and stamped envelopes and cards are to be used at other post offices than where purchased.

Mr. TOWNSEND. That is my question. Suppose a person in this town I speak of should buy two or three hundred dollars' worth of stamps, use them on envelopes containing circulars, and give them to her husband and tell him to take them over to New York and have his clerk address and send them out, as happened to be the case. They were used elsewhere, but were used for social and philanthropic purposes of the town, nevertheless.

Mr. MOON. I take it that we can not determine a question of that kind by a regulation. The department must determine about that under conditions which arise in each and every case. Mr. MANN. Mr. Chairman, while I think I will withdraw the point of order, I wish to say that when I first came to Congress I had a portion of Cook County, outside of Chicago, where there were some post offices. They were all close to the city. A postmaster came to me at one time with this proposition:

"A gentleman who lives in my town comes to the office and desires to buy postage stamps. I do not think he puts the mail into my office. He has an office down town. Shall I refuse to sell him stamps or not? If I refuse to sell him stamps, I am sure to have a row with him, because in his opinion he is entitled to go into any post office and lay down a \$5 bill and ask for \$5 worth of stamps. It is his practice to stop in my post office on the way to the train and buy stamps nearly every morning.

I put it up to the Post Office Department. "What should the postmaster do? What would you do were you the postmaster? Would you refuse to sell stamps to a man who furnishes the current coin of the realm, which obliges you to sell stamps to him? It is a great deal more convenient for the man to buy his stamps at that office, where he did not have to go out of his way to do it, than it was to go down town and send over to the post office at considerable delay or trouble to himself."

Upon the advice of the Post Office Department at that time, with no knowledge of what these stamps were being used for, the man was told to sell the stamps unless he believed they were being used improperly. They were not sold in large quantities at any time. I do not know what you can do in these cases unless a man keeps in a perpetual row with somebody.

I withdraw the point of order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I reserve the point of order. I think the older members of the committee will recall that some 8 or 10 years ago it was alleged a serious abuse had crept into the administration of the Post Office Department through the postmasters of small communities soliciting the sale of post-office supplies to people who resided in other communities. The purpose of the solicitation was to increase the salary of the local postmaster. I am strongly of the opinion that the regulation the chairman of the committee has read to the House, and which is now sought to be made into permanent law, was made by the Post Office Department primarily to prevent the postmasters working up salaries through such sale of stamps.

The gentleman from New Jersey [Mr. Townsend] has given the committee an instance where, I think, no one would condemn the practice of buying stamps under conditions as mentioned by him. The object of that unusual stamp cale in the town he names was not primarily to increase the compensation of the postmaster, but to enlarge and facilitate the social or industrial life of that community. Now, if we make permanent law of the regulation, it is not possible for the Post Office Department to waive the statute law.

If the regulation remains or if the practice continues as it is now, in such cases as that mentioned by the gentleman from New Jersey the Postmaster General can waive his own regulation and not visit on the postmaster the result of that unusual

sale of stamps.

I think we can all have faith and credit enough in any Postmaster General to believe that such a discretion can be safely lodged with him; but while, on the other hand, if permanent law is made of it, then in such instances as have been cited the postmaster must suffer. Although his work has been increased and the duties of his office has been enlarged, he gets no additional compensation, because of the rigid law which the Postmaster General can not waive.

Mr. MOON. Mr. Chairman, I do not feel that the gentle-man's apprehensions are altogether justified. The fact is that there is no law at this time for the postmaster doing the very things that have been done and which we are asking to remedy

by the enactment of law authorizing it.

We have complained always, and I think very properly, of the assumption of the right to legislate in the department by making regulations that go into effect beyond the regulatory power of the Government, and I apprehend that this is one of those cases where it would be wiser to confer the jurisdiction by law when there is a real doubt of the authority of the department by regulation to continue the practice that has gone on.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if I may be

permitted and the gentleman has finished-

Mr. MOON. Yes.

Mr. ROBERTS of Massachusetts. If I may be permitted a moment more of time, I want to say that there is a condition in the section of country from which I come which may not obtain in the vicinity of the other large cities of the United States. In and around the city of Boston, within a radius of 10 miles of the statehouse, we have some 28 or 29 separate municipali-Some of those are towns. Now, the business activities of the towns

The CHAIRMAN. The time of the gentleman from Massa-

chusetts has expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. Does the gentleman reserve his point of

Mr. ROBERTS of Massachusetts. Yes; I reserved the point of order, and I supposed that this discussion was going on under

The CHAIRMAN. The gentleman has been proceeding under the point of order. If he desires to go on further, he must get unanimous consent of the committee.

Mr. ROBERTS of Massachusetts. Then, Mr. Chairman, I ask

unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to proceed for two minutes. Is there ob-

There was no objection.

Mr. ROBERTS of Massachusetts. The business activities of those smaller towns all center in the big city. The business men come out into the small towns practically to sleep, and they want postal facilities. They are willing to buy their postal supplies in these small towns in order that they may have for their families adequate postal facilities. Yet when we make a law that such sales will not increase the postal facilities and will not give the postmaster a better salary and those things that go to a larger office we prevent thereby the Post Office Department in meritorious cases waiving its own regulations.

But, Mr. Chairman, while I have these views I realize that the committee and the Post Office Department have probably given the matter much more consideration than myself, and I

shall not insist upon the point of order, but will withdraw it.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Tennessee [Mr. Moon].

The amendment was agreed to. Mr. GOOD. Mr. Chairman, I move to strike out the last

The CHAIRMAN. The gentleman from Iowa [Mr. Good] moves to strike out the last word.

Mr. GOOD. Mr. Chairman; this item, providing for the compensation of postmasters, carries an appropriation of \$30,750,000. If the gentlemen on that side of the aisle who have been talking so loud and long about economy really desire to practice economy, here is an opportunity to save to the Government, according to the report of the Commission on Economy and Efficiency, \$4,512,900, and at the same time improve the Govern-

That commission points out that the work of first-class and second-class postmasters is in the main done by the assistant The assistant postmasters receive but a small postmasters. compensation in comparison with the duties performed by them, and the commission states that if 20 per cent were added to the amount of the salary of the assistant postmasters, and that salary given to the postmasters in lieu of what they now receive, and the postmasters were obliged to give their time to the Government service, the offices of the assistant postmasters could be dispensed with entirely and a saving effected of \$4,512,900. At the same time the Government service would be improved.

Now, you certainly stand for improvement in the Government service. But do you stand for real economy? Do you stand for those things that you have been preaching all of these years? There is not a line here with regard to the service that is required of the postmasters. If they did what was wrong in the past, that ought to have been corrected; but that is no excuse for now appropriating \$30,750,000 to perpetuate this

wrong in the Government service.

Mr. BARTLETT. May I ask the gentleman a question?

Mr. GOOD. Certainly.

Mr. BARTLETT. Does not the gentleman know that, under a rule now enforced by the Post Office Department, postmasters are required to give all their time and attention to the post office, and that a number have been removed because they did not do it?

Mr. GOOD. I know there is such a rule. There has always been such a rule; it has not been changed, but it has been

violated.

Mr. BARTLETT. Violated by your party when it was in power.

Mr. GOOD. There is such a rule, as the gentleman knows, with regard to revenue collectors in the different States; but the gentleman knows that of 50 revenue collectors he can count on the fingers of his two hands all who are giving all their time to the Government service.

Mr. BARTLETT. That was the rule when the gentleman's

party was in power, but it is not the rule now.

Mr. GOOD. Yes; they are doing it now. Not one-fourth of the men employed as revenue collectors are obeying the law in that respect.

Mr. FITZGERALD. They are mostly Republicans.

gentleman ought not to criticize them too strongly.

Mr. GOOD. Oh, no; not all of them.

Mr. BARTLETT. They are Republicans that we have not

been able to get out yet.

Mr. GOOD. The gentleman says that the law was violated. Unquestionably that is true. Why not correct the law now, when we have the opportunity? Why not limit this appropriation so that no postmaster who does not give all of his time to the Government service can receive any part of this \$30,750,000?

Mr. MOON. I will state to the gentleman that that is a rule

of the department now.

Mr. Chairman, it is hardly necessary for the gentleman to attempt to obtain a partisan advantage on a matter of pure business like this. This appropriation, which amounts to \$30,-700,000, is only \$500,000 more than the last appropriation. ordinary increase in this item of expenditure heretofore has We have added an immense been a little over 3 per cent. amount of work on account of the parcel post, and it has been necessary to increase the number of these officials. Yet this appropriation asked for now is hardly commensurate with the increased demand of the service.

I take it that the facts and figures presented are sufficient to enable the House to realize that the department is going very slow in the matter of the increase of appropriations, and that it is only seeking the amount that is necessary to give an efficient and effectual service to the public. It is a very small increase in an item of \$30,000,000.

Mr. GOOD. The gentleman is aware of the fact that a great many of the postmasters of the first and second class are not

giving their time to the Government service.

Mr. MOON. I am not aware of that, because I do not know of anything of that kind. All of them down our way seem to be attending to their business pretty well. The gentleman possibly is aware of the fact, as most of us here are aware, that there is an order of the department which requires that post-masters shall devote their time exclusively to the duties of their

Mr. FOSTER. Does not the gentleman think that the Postmaster General now in office will enforce that order?

Mr. MOON. I think so.

Mr. FOSTER. And remove any man who does not obey that order

Mr. GOOD. «Can the gentleman cite a single instance where he has attempted to remove anyone for that reason?

Mr. FOSTER. Democrats are attending to the public business, and it is not necessary to remove them. Can the gentleman cite any particular instance where they are not doing it?

Mr. GOOD. Can the gentleman cite any single instance, except where the administration wanted to remove a Republican postmaster and appoint a Democratic postmaster, that it has enforced any such order?

Mr. FOSTER. Can the gentleman cite a single instance of a Democratic postmaster who is not staying in the office eight

hours a day and attending to business?

Mr. GOOD. I think I could cite a good many. Mr. FOSTER. Will the gentleman cite one? I am quite sure that if the gentleman will show the Postmaster General any Democrat who has been appointed who is not giving his time and attention to his office that Democrat will be removed. And further than that, let me say that since the election Republicans who are holding office are very careful to give eight hours' time to the office. If they did not do it before the election, they are trying to do it now.

Mr. GOOD. It developed a day or two ago in a hearing that a Democrat appointed a revenue collector is not giving his entire time to the duties of the office, and he is drawing the salary.

Mr. FOSTER. Knowing what a good business man the Secretary of the Treasury is and how he has done things in the past, if the gentleman will show the Secretary of the Treasury that that internal-revenue collector is not giving his attention to the office, I am sure he will be removed. Under this Democratic administration they are requiring that these officials should do the public work and not put it on some subordinate.

Mr. FITZGERALD. Mr. Chairman, in a special message to Congress on the 4th of April, 1912, the President of the United States, Mr. Taft, who was a Republican President, stated that if postmasters in first and second class post offices were enibraced in the classified service and required to devote all of their time to the public service, the annual saving would eventually represent many millions of dollars.

In a public address made by me on April 11, 1912, which attracted some attention, in referring to this message I made

this statement:

These postmasters are the appointees of the President; they are under the control of the executive branch of the Government; they are subject to the rules and discipline of the Post Office Department. It is the duty of the Postmaster General to require from them the services for which they are paid. If they do not devote all their time to the public service, let the President command them to do so and to refrain from the arduous work of endeavoring to conduct the chaotic affairs of the Republican Party. The demoralization of the Postal Service is easy to understand. It could hardly be otherwise since the establishment of the custom in recent years of putting it in charge of the head of the Republican national machine.

Under Republican administrations it had been the custom for some years to appoint the chairman of the National Republican Committee Postmaster General, so that there might be no mistake as to the partisan character of the men appointed as postmasters in the first and second class post offices in the country. The abuse became so great under Postmaster General Hitchcock and Postmaster General Cortelyou that President Taft, a Republican President, was compelled to cry out against the existing condition and to admit that these partisans not only did not give their time to the public service for which they were paid, but that evidently he was helpless to

compel them to do so.

The so-called Economy and Efficiency Commission to which the gentleman from Iowa refers, and for which perhaps he has more respect than I have, spent \$260,000 in its work. have challenged from time to time anyone to point to a single original recommendation which that commission has made which has resulted in the saving of a single dollar to the United States. This contention that by having postmasters in the first and second class offices put in the classified service and compelled to devote all their time to the public service, and that thus over \$4,000,000 would thereby be saved by dispensing with the services of the assistant postmasters in the offices, indicates the ridiculous character of the recommendations made.

Take the city of Chicago, the city of New York, the post offices in Brooklyn or Philadelphia or Boston or any one of gan.

the other first-class offices in the country, and they are the ones I am most familiar with, so far as my observation goes the men who conduct these offices are compelled to give a full day's time to their service, and they require those under the title of assistant postmaster, or some other title, to perform the duties that the assistant postmasters are now performing.

I am somewhat surprised, in view of all the controversy recently in the House about preserving the services of these highly qualified assistant postmasters in the post offices throughout the country, that my friend from Iowa should make a suggestion which would help to eliminate these partisan Republicans, who were never subjected to examination but were covered into the classified service. I have been informed by the Postmaster General himself, in conference with him about the selection of a candidate for postmaster in the community from which I come, that any person considered for appointment to the postmastership must understand and must agree to devote eight hours a day to the work of the office, and that unless after he be appointed he devote eight hours a day to the work of the office he can not continue in the service of the Government in such a position under this administration, whatever

may have been the practice under former administrations.

Mr. SAMUEL W. SMITH. Mr. Chairman, I do not feel like letting the statement of the gentleman from Illinois go unchallenged that Republican postmasters have been unfaithful in the discharge of their duties. I think I have named or recommended 200 different men as postmasters, and I know of no more faithful, competent men than they have been during the last 16 years. In the sixth congressional district of Michigan there are the cities of Pontiac, Flint, and Lansing, and I do not think it is possible to name a business man in any one of those cities who has been more faithful and conscientious in the discharge of his duty or who has put in more hours than have the postmasters of those cities, and this is true of the postmasters throughout the district. Therefore I say, Mr. Chairman, that I hardly feel that the statement of the gentleman from Illinois is warranted that the Republican postmasters throughout the country have been derelict in the discharge of

Mr. FITZGERALD. Mr. Chairman, the charge made against the Republican postmasters did not originate with the Democrats, but with a Republican President, President Taft.

Mr. SAMUEL W. SMITH. It originated right over there on

that side a few minutes ago.

Mr. FITZGERALD. That is what the President of the United States said, that they were devoting their time to business.

Mr. SAMUEL W. SMITH. I took no exception to the statement of the President.

Mr. FITZGERALD. I did not originate it. I took the statement of the President of the United States, who was a Republican, when he sent a special message to Congress and called attention to the fact that the men he had appointed to office had failed to give their time and devote their talents to the service to which they had been appointed, and asked Congress to remedy the situation.

Mr. SAMUEL W. SMITH. I was not replying to the gentleman from New York. I was replying to the gentleman from Illinois [Mr. FOSTER].

Mr. FITZGERALD. Oh, well, my statement stands, never-

theless.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word. I have not stated that Republican postmasters were un-I do not know what the condition was faithful to their duties. in the sixth district of Michigan, but I would undertake to say that the postmasters of the sixth district of Michigan were not asleep during the campaign and the candidate for Congress in that particular district, whoever he might be on the Republican ticket usually could depend on them to do some political work for him. I know something of some postmasters in some sections of the country, and while I do not say this of all of them, I do know that some of those men with whom I happen to be acquainted were men who did not give eight hours time to the post office, and a great many of them gave much less. can not let the gentleman from Michigan lecture me because I did not say they were unfaithful but they did political work. The gentleman from New York [Mr. FITZGERALD] a few moments ago read what the President of the United States said, and he was a Republican President, and it became so bad that even the President himself called attention to it, crying out against

Mr. SAMUEL W. SMITH. It would trouble the gentleman or anyone else to name any more faithful and patriotic servants than the Republican postmasters in the sixth district of Michi-

Mr. FOSTER. Oh, I suppose the gentleman is so imbued with republicanism that he could not see a bad thing in one of them in the sixth district of Michigan, and I have no doubt they did what they could to elect the gentleman with all the power they could use.

Mr. GOOD. Mr. Chairman, will the gentleman yield? Mr. FOSTER. Yes. Mr. GOOD. Is it not a fact that there has been considerable complaint from that side of the House that Republican post-masters were simply doing the political work for Members of Congress of the respective districts and were not giving their time to the public service?

Mr. FOSTER. Why, they have proven it in a great many

Mr. GOOD. I will say that you intend here to increase this appropriation by \$500,000. You do not cut down the appropriation, and does not that prove one of two things, either that you intend to pursue the same policy or that your postmasters are

less efficient?

Mr. FOSTER. No. Let me give the gentleman a concrete illustration. In the district that I have the honor to represent it was shown that a postmaster was not giving his time and attention to the post office. It was further shown that in that particular office that man was the Republican leader, the acting chairman, the man who looked after the political affairs of that particular county, and when they removed him and put in a good, faithful, loyal Democrat they also took out one employee from that office, reduced the force, for he was not necessary, and so the clerk was transferred to another office, saving that much to the Government.

The CHAIRMAN. The time of the gentleman from Illinois

has expired.

Mr. MADDEN. Mr. Chairman, it affords me great satisfaction to see this political linen being washed across the aisle. We who live in a territory that is never affected by politics, either Democratic or Republican, are greatly amused in listening to these arguments of patriotism on both sides, first by a Republican and then by a Democrat, each trying to prove that his particular Representative is holier than the Representative

on the other side. I assume that men will be human, whether they are Republicans or Democrats, or whether they are postmasters or what they may be; that they will try to exercise their rights of citizenship, and if they have been appointed to a very easy place by some influential friend and that friend happens to be in the public eye and applies to the public conscience for elecand this chap can add a little strength to the strength already accumulated by this man who favored him, he is going And I do not complain about that, and I do not believe anybody else does, but the only complaint that can be made in any case is, perhaps, that the other fellow's fellow is

doing the thing against the man who is complaining.

Now, everybody knows this kind of colloquy is, if I may be allowed to use a street expression, "bunk," and it has not anything to do with the merits of this bill; and that the postmasters will continue to serve the public in their capacity as postmasters to the best of their ability, and if it takes eight hours to do the work they will give it, and if it only takes two they will only give two, and if they have political meetings to attend they will find some way of scheming around to get to them regardless of what the regulations might be; and I would not give three cents for a postmaster who would not do it; and we can philosophize all we like on this or any other subject that you can think proper to name, but you will find everybody does it when you find him actively at work, whether it is in the Democratic or Republican ranks. And I hope that we will be able to go on with the bill and pass it on its merits, and that we will quit washing political linen on the floor of the House. [Applause.]

Mr. MANN. Mr. Chairman, my colleague from Illinois [Mr. FOSTER] is usually very amiable, but for a moment he lost his amiability in what he said concerning the gentleman from Michigan [Mr. Samuel W. Smith]. I do not know what the facts may be, but if the postmasters in the sixth district—if that is the number represented by the gentleman from Michigan [Mr. Samuel W. Smith]—have devoted their efforts toward re-electing him to Congress, I am sure the consensus of opinion in the House is that they could have performed no more patriotic

[Applause.]

Mr. FOSTER. I am not complaining of the gentleman from Michigan about his services, except his votes on that side of the

House.

Mr. MANN. I understand. Mr. Chairman, I want to say this about the postmaster at Chicago, the present postmaster, and, so far as my recollection is, every postmaster who has

been there since I can remember has given most of his attention to the work of that office: The present postmaster at Chicago is very diligent in attending to the business of his office, and I can assure the gentlemen here that you are much more apt to find the postmaster at Chicago in his office than you are to find any Member of Congress on the floor attending to his And I notice, while we are discussing whether postmasters attend to their business, that out of a House of 435 Members there are probably not to exceed 100 Members present attending to the work of their office; and so far as I have learned, without attempting to make any criticism at all, at any time-so far as I have learned, no one of the postmasters who is accused of neglecting the duties of his office is engaged in delivering lectures on the Chautauqua in order to add to his emoluments. [Applause.]

Mr. BRYAN. Mr. Chairman, in view of the admitted argument here that the duty of the Republican postmasters of the country are to take care of their Representatives in Congress and look out for their political districts, and in view of the fact that it is shown that in the sixth district of Michigan they did so well, it seems to me it is fully demonstrated that the postmasters generally are a very inefficient set when we look at the plight of the Republicans in their representation on the floor of this House. [Laughter and applause on the

Democratic side.]

MESSAGE FROM THE SENATA

The committee informally rose; and Mr. DENT having assumed the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 1745. An act providing for the establishment of a term of the District Court of the Eastern District of North Carolina, at

Wilson, N. C.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 1745. An act providing for the establishment of a term of the District Court for the Eastern District of North Carolina, at Wilson, N. C.; to the Committee on the Judiciary.

POST OFFICE APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Assistant cashiers, assistant superintendents of delivery, assistant superintendents of money order, assistant superintendents of mails, assistant superintendents of registry, assistant superintendents of stations, bookkeepers, cashiers, chief mailing clerks, chief stamp clerks, examiners of stations, finance clerks, foremen of crews, special clerks, stenographers, superintendents of carriers, superintendents of delivery, superintendents of mails, superintendents of money order, superintendents of registry, superintendents of second-class matter, and superintendents of stations, 2,400, at not exceeding \$1,300 each.

Mr. BUCHANAN of Illinois. Mr. Chairman, I move to amend, on page 9, line 10, by inserting the word "seven" after the word "stations," instead of the word "two."

Mr. MOON. I reserve a point of order on that.

The CHAIRMAN. The Clerk will report the amendment.

Mr. FITZGERALD. Let the amendment be reported.

The CHAIRMAN. The Clerk can not report it, because he does not have it at the desk. Will the gentleman from Illinois

Mr. Buchanan] state his amendment over again?

Mr. Buchanan of Illinois. On page 9, in line 10, after the word "stations," amend by inserting the word "seven" in lieu of the word "two," making it read "seven thousand four hundred" instead of "two thousand four hundred."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 9, line 10, strike out the word "two" and insert in lieu thereof is word "seven."

Mr. BUCHANAN of Illinois. Mr. Chairman, my information in regard to this matter is that, as it reads now, it will give about 6 per cent of the clerks an opportunity to secure a salary of \$1,300. This amendment gives a larger number of the clerks an opportunity to secure the increase above \$1,200, namely, \$1,300. It seems to me that, taking into consideration the recent heavy work the clerks have had to do, due to the parcel post, with more than \$3,000,000 profit to the Government, they are entitled to some consideration in this matter, and I hope the chairman of this committee will withdraw his point of order and permit the Members here to vote, at least, on this question, due to the high cost of living and the extra effort necessary to be made by these employees, that they should be given more consideration in regard to salary than they have received in the past.

And I want to say in this connection that the chairman of the committee is one who is recognized as having been fair at all times in consideration of the employees in the Post Office Service. In making the statements that I have, it is not for the purpose of casting any reflection on the chairman or any other members of this committee, but I hope the gentleman will withdraw his point of order, and that this will be given favorable consideration.

Mr. Chairman, I doubt the wisdom of making Mr. MOON. this increase here without consideration being given the matter in hearings before the committee. I have seen nothing that seems to justify a change in this amount. The gentleman wishes the number changed from 2,000 to 7,000.

Mr. MURRAY of Massachusetts. The gentleman simply means to allow 7,000 clerks to get an increase of \$100 a year;

is that it?

Mr. BUCHANAN of Illinois. Yes.

Mr. MOON. I will have to insist on the point of order, and I hope the gentleman will come before the committee in regard to the matter.

Mr. MANN. Mr. Chairman, this is not subject to the point

Mr. MOON. I wish the gentleman would withdraw it until some consideration has been given to it by the committee. I will say to the gentleman, however, that I am in favor of any proposition that looks to the betterment of these employees, so far as consistent with the public service and the interest of the Treasury. Before doing anything of this kind the question ought to be investigated; but there has been no request for such an investigation, and consequently no investigation has been made.

Mr. MANN. I would like to inquire of the gentleman from Tennessee [Mr. Moon] if he has withdrawn the point of order?

Mr. MOON. I will withdraw the point of order; yes.
Mr. MANN. I am sure he would not want to insist upon it. If this amendment is subject to a point of order, most of the

items in this bill are subject to a point of order.

Mr. MADDEN. I would like to ask my colleague a question. Is it his intention to increase the number of cashiers, superintendents, assistant superintendents, and managerial officers in the Post Office Department by this amendment? That is what it does

Mr. BUCHANAN of Illinois. It increases the number who

will be able to secure \$1,300 a year.

Mr. MADDEN. I think my colleague has offered his amendment in the wrong place. I think, if I may be allowed to make the suggestion, that his intention was to increase the number of special clerks that would be raised to \$1,300. But to increase the number of men in this branch of the service would put the service all out of balance.

Mr. BUCHANAN of Illinois. I do not so understand.

Mr. MADDEN. Oh, yes; that would be the result.
Mr. BUCHANAN of Illinois. It is under this classification

that we want to increase them.

Mr. MANN. Mr. Chairman, will my colleague yield on that? Mr. BUCHANAN of Illinois. Yes.

Mr. MANN. It is the next item that carries the \$1,200 clerks, but that item includes the word "clerks." The item on which my colleague proposes to increase the number does not include the word "clerks."

Mr. MURRAY of Massachusetts. It says "special clerks"

Mr. MANN. No; the gentleman is mistaken. On line 16 you will find the word "clerks."

Mr. MURRAY of Massachusetts. Ought we to insert the word "clerks" as an amendment in line 6?
Mr. MANN. That is another proposition.
The CHAIRMAN. The time of the gentleman from Illinois

has expired.

Mr. MURRAY of Massachusetts. Mr. Chairman, I was observing, when the gentleman from Illinois raised his objection, that the difficulty might be met by inserting after the words 'special clerks" in line 6 the single word "six."

Mr. FITZGERALD. That can not be done. A point of order

can be made on that.

Mr. MURRAY of Massachusetts. The gentleman from Tennessee [Mr. Moon] withdrew his point of order.
Mr. FITZGERALD. That was because it was not subject to

a point of order.

Mr. MURRAY of Massachusetts. Mr. Chairman, on the merits of the main proposition may I inquire of the chairman of the Committee on the Post Office and Post Roads whether or not the matter of salaries of clerks in the \$1,200 grade has not frequently been considered in some form or other by the Post Office Committee, so that this is not an entirely new matter?

Mr. MOON. All of these items have been considered in some form or another from time to time.

Mr. BUCHANAN of Illinois. My understanding of this matter is that if this amendment were adopted we would have 1,000 more at \$1,300 a year.

Mr. ROBERTS of Massachusetts. Five thousand more.

Mr. BUCHANAN of Illinois. Yes; 5,000 more, at a salary of \$1,300 a year instead of \$1,200, as provided by law here. That is the purpose of the amendment-putting more in the class of clerks at \$1,300.

Mr. MOON. Does the gentleman propose to take them out of

the \$1.200 class?

Mr. BUCHANAN of Illinois. That is the purpose. That is my intention-to take them out of the \$1,200 class and put them into the \$1,300 class.

Mr. MOON. I do not think that a matter of this importance ought to be disposed of here without some hearing of the officials of the department and the persons interested, and I suggest that the gentleman let the matter be passed over until we can give it attention

Mr. BUCHANAN of Illinois. I will agree to that. Does the gentleman mean to take it up at the end of the bill?

Mr. MOON. It can be considered in the Senate committee. Mr. BRYAN. Mr. Chairman, I am interested in this matte Mr. BRYAN. Mr. Chairman, I am interested in this matter, and I am not willing to allow this amendment to be passed at The matter is one that the postal clerks have specially considered and have taken up very carefully, and this is the place for the amendment.

I have received some information in connection with the matter, and it seems that there are more than 17,000 clerks in the \$1,200 grade. Of this vast number, unless the bill is amended in the House, but 1,000, or less than 6 per cent, can be given a wage increase during the next fiscal year. When it is taken into consideration that many of these clerks, probably 5,000 in all, have not been promoted in five or six years, the need of

a larger allowance in this grade is apparent.

The clerks who would benefit by these increases are particularly deserving of recognition at this time. The majority of them entered the service 10, 15, or 20 years ago, when the entrance salary was \$600 or less per annum. They have worked through the years prior to the salary-classification law, when wage increases were uncertain; they have worked the long uncertain hours of the postal clerk before the eight-hour day was established; they have stood the brunt of the burden in the offices for the past decade.

If the bill in its present form is not altered to permit of more increases from \$1,200 to \$1,300, the department will not be able to grant to thousands of skilled distributors a wage commensurate with the work they must perform. The post-office distributor is a specialist, whose trained brain and expert knowledge of train schedules and city street numbers make him the most valuable adjunct of the large postal army. To better fit himself for his duties he must constantly study distribution schemes upon his own time-the department never has granted to clerks any time off for scheme study.

The last report of the Postmaster General states that a surplus of \$3,840,000 has accrued in the past year. In fairness to the men who have made this surplus possiblethe skilled expert workers in the ranks who have been denied salary promotions for the past five or more years—a more liberal provision should be made by the present Congress to the clerks in the

\$1,200 grade.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. Murray] has expired.

Mr. FINLEY. Mr. Chairman, I regret that I can not support this amendment. I will say to those who are advocating it that the classification act of 1907 has been most liberally dealt with, both in this Congress and in the last Congress. The increases made in the number to be promoted annually have been quite liberal. Here, in the grade above \$1,200, the Post Office Committee think they have dealt liberally with this class.

I will say to the gentleman from Illinois [Mr. BUCHANAN]

and to those who are advocating this increase that the places above \$1,200 are generally supervisory positions. Some of them are worth more than \$1,300, of course. The Post Office Committee gave hearings on this subject, and as to this particular grade I think we were not asked to grant anything. After these hearings we made what we considered a liberal allowance and inserted a provision in the bill for 2,400.

Mr. CALDER. What is the increase in the number over last

year?

Mr. FITZGERALD. The increase is 296.
Mr. FINLEY. The increase is 296. A great many of these employees are filling supervisory positions. There may be some distributors among them, but I will say to my friend that the

majority of distributors do not receive an amount in excess of \$1.200. That is my opinion. So the motion of the gentleman from Illinois [Mr. Buchanan], if carried, means an increase of \$500,000 in the amount of this bill. I do not mean to advance that as an argument why the motion should not pass if it is necessary and proper, and if it will add to the efficiency of the service; but as one of the members of the Post Office Committee I can not concede that it is necessary for the efficiency of the service, nor do I concede that it is necessary for the proper

Mr. GOULDEN. Will the gentleman yield?

Mr. GOULDEN. How many men are there who would be subject to this increase from the \$1,200 to the \$1,300 class, if there was sufficient money? How many could be advanced to

Mr. MOON. Seventy-five per cent.

Mr. FINLEY. I will say to the gentleman that in the bill before the House provision is made for an increase of 75 per cent of all clerks from \$1,000 to \$1,100 in second-class offices, and from \$1,100 to \$1,200 in first-class offices; 75 per cent of the clerks.

And what per cent from \$1,200 to \$1,300? Mr. GOULDEN.

That is what I want to get at.

Mr. FINLEY. The figures are approximately 2,400.

increase of 296 over last year.

Mr. BUCHANAN of Illinois. If this amendment passes it will give about 2,000 clerks an opportunity to increase their

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, the \$1,300 class of special clerk was created about two years ago for the purpose of encouraging men in the service to become expert distributors. This bill provides for the promotion of 1,000 men of that class.

It never was the intention of the committee or of Congress to pay \$1,300 to anybody except expert distributors. The men in the service know this. I do not know how many distributors there are in the Postal Service, but surely not anything like the number of expert distributors who would be provided for in

the amendment of my colleague.

The committee gave very careful consideration to this question. I think it may be fairly said that the post-office clerks have no better friends in Congress than the members of the Post Office Committee, and I think it may be said further that the members of the committee have gone to great length to do what they thought should be done for the men in the Postal We all realize that they are men who are deserving Service. of the best possible treatment; but I think that if the postoffice clerks themselves were called upon to consider the question now before the House, with all the facts before the committee when it considered this question, they would conclude exactly what we concluded and make the same recommendations that we did.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. MADDEN. Surely.
Mr. BUCHANAN of Illinois. The increase in the postal business on account of the parcel post has brought a surplus to the Post Office Department, and that has been due largely to the efficiency of these distributing clerks.

Mr. MADDEN. I do not agree with my colleague.

Excuse me. I thought the gentleman was going to answer my question. I think I need not say that the clerks have no better friend than I am. I think this recommendation of the committee does them ample justice.

Mr. MURRAY of Massachusetts. What are you proposing to

do for the clerks?

Mr. MADDEN. We are providing for the promotion of a thousand men, who are expert distributors, from \$1,200 to \$1,300, in this very item.

Mr. MURRAY of Massachusetts. Over how many offices is

that likely to go?

Mr. MADDEN. That is for the Postmaster General to de-termine how many expert distributors there are and who can

be provided for.

Mr. MURRAY of Massachusetts. In the total number of offices you provide for assistant postmasters, and so forth, there are 2,350. Now, 1,000 men is a lot, but that is less than 1 man to an office.

Mr. MADDEN. A great many offices have no expert distributor at all.

Mr. MURRAY of Massachusetts. How many?

Mr. MADDEN. I will not undertake to say. I have talked with these men myself.

Mr. MURRAY of Massachusetts. I want to follow the gentleman, because I know that he is a friend of the clerks.

Mr. MADDEN. Gentlemen, I think, who are trying to force an increase in the promotion of this grade are doing the clerks an injustice, because I think the men on the Post Office Committee have yielded to every reasonable demand, and these men have every reason to be satisfied and are satisfied.

Mr. REILLY of Connecticut. Mr. Chairman, I think what the gentleman from Illinois intends to do for the ordinary clerk can not be done in the manner in which he suggests. You will notice that the paragraph provides for assistant cashiers, assistant superintendents of delivery, assistant superintendents of money orders, and several others, but does not provide at all for clerks.

Mr. MURRAY of Massachusetts. It does for special clerks.
Mr. REILLY of Connecticut. But the special clerk is an
expert and not counted as a clerk; he is a grade higher.

Mr. MURRAY of Massachusetts. Are there not several in

Mr. REILLY of Connecticut. No; except in the very large offices. If this provision offered by the gentleman from Illinois [Mr. Buchanan] should pass, under the administration of department affairs it is possible that the officials in charge of the Salaries and Allowance Division would promote no clerk at all to \$1,300, though such is not probable. All might be supervisory officials, so that he is not taking the right way to do it, in my opinion. You might not have a clerk that would get \$1,300, because it is a matter of discretion. There is a bill introduced here, a separate bill, which provides for an adequate increase to all the clerks, going as high, I think, as \$1,500 in grades, that will make the required promotions, and has so much merit in it that I have no doubt it will pass. Even if this amendment should be adopted I am afraid it will not do what gentlemen are proposing. I am afraid, under the amendment offered by the gentleman from Illinois, the regular clerks will not be taken care of.

Mr. J. I. NOLAN. You are only providing in the bill for the promotion of 1,000 men out of 17,000.

Mr. REILLY of Connecticut. We are taking care of an actual increase of 296 over last year's bill in this paragraph, but really we are providing for about 1,000 new \$1,300 men.

Mr. MURRAY of Massachusetts. Over how many offices?

Mr. REILLY of Connecticut. Over the entire country. can be placed in any office the department sees fit. The thing I am getting at is, I want it made certain that the men you are giving the promotion to shall be really provided for in the paragraph, but by passing the proposed amendment you will not

be giving that guaranty.

Mr. BUCHANAN of Illinois. Mr. Chairman, my colleague, the gentleman from Illinois [Mr. Madden], stated that these

clerks did not want this increase.

Mr. MADDEN. Oh, I did not say that the clerks did not want it.

Mr. BUCHANAN of Illinois. I beg the gentleman's pardon, so understood him.

Mr. MADDEN. I said that they were satisfied.
Mr. BUCHANAN of Illinois. I have here a letter from one of the officials of the National Federation of Post Office Clerks, and he says:

and he says:

Knowing you to be an earnest advocate of remedial legislation for the postal employees, I wish to enlist your support in having two sections of the pending Post Office appropriation measure altered:

First, On page 9, line 10, provision has been made for 2,400 employees in the \$1.300 grade. This will permit the department to grant increases to only 1,000 clerks in that grade. As there are 17,000 clerks in the \$1.200 grade, it necessarily follows that less than 6 percent of them will receive increases. The men in this grade, for the most part, are the skilled distributers, whose services are of the highest value to the Government. Because of the expert knowledge and skill of these employees, the Postal Department has been enabled to absorb easily and readily the parcel-post deluge of the past year. Probably one-third of the clerks in the \$1,200 grade, or approximately 5,000, have not been granted wage increases in six years. And unless a more liberal provision is made in this bill, these men can not be given the additional remuneration commensurate with the added responsibilities and labors they are called upon to perform.

This amendment is offered for the nurpose of giving these

This amendment is offered for the purpose of giving these \$1,200 clerks \$1,300. That is the desire of the postal employees themselves, and I think it is unfair for the gentleman from Illinois to say that they do not desire it. They not only desire it but believe it right that they ought to have it.

The CHAIRMAN. The time of the gentleman from Connec-

ticut [Mr. Reilly] has expired.
Mr. BUCHANAN of Illinois. I want to say, Mr. Chairman, that I have not heard one of these post-office clerks criticize the Post Office Committee.

Mr. MOON. Mr. Chairman, the department thought it advisable to ask for an increase for 296 men in this particular grade. That has been granted in this bill. There has been no suggestion whatever that any more was needed or required, nor has anybody connected with the clerks been before the

committee and made any suggestion in regard to it. Both of my friends from Illinois say that the clerks would be glad to have the increase. I have no doubt they would be glad to have it made \$10,000, as far as that is concerned. But, Mr. Chairman, no reason has been advanced why this should be done, in my judgment. I suggest to him again that it is a matter which, if there be any sound reason which has not yet been offered, he would better bring before the committee in some shape before the bill is finally passed upon.

Mr. BUCHANAN of Illinois. I will be willing to pass this

over by unanimous consent.

Mr. MOON. But I do not want to pass it over; I want to dis-

pose of it now

Mr. FITZGERALD. Mr. Chairman, I am opposed to this amendment. The paragraph as carried in the bill provides for 2,400 employees of various classes to receive annual compensation of \$1,300. It does not provide for clerks, but it does provide for special clerks who have been characterized as expert distributors. Five or six years ago Congress, after considerable controversy, passed the classification act by which the maximum compensation of post-office clerks was fixed at \$1.200. What is proposed now apparently by the gentleman from Illinois [Mr. BUCHANAN] is that, instead of providing 2,400 employees of these various grades to receive \$1,300 a year, we shall provide that 7,400 employees, with an increased expenditure of \$500,000, shall receive \$1,300 a year, in the hope that the Post Office Department would be coerced into designating 5,000 clerks receiving a maximum salary of \$1,200 a year as expert distributors, so that they might come in as special clerks. This bill carries \$306,000,000, practically the estimates of the department. It provides for the increase of 15 per cent in the number now in this grade over those receiving \$1,300 during the current year.

I pointed out early in the session that the estimates of the Secretary of the Treasury, while showing an apparent surplus of \$26,000,000 for the next fiscal year, were grossly misleading, because they eliminated all provisions for the sinking-fund requirements, eliminated all provision for deficiencies, and placed to the credit of the Government \$13,000,000 which the Secretary of the Treasury estimated had been appropriated, but could not be expended; so that, even according to his own figures, the surplus revenues for the next fiscal year are but \$13,000,000. His estimate eliminated \$10,500,000 of deficiency estimates, which are now pending before the Committee on Appropriations. The estimate took no account of the authorization for the Alaskan railroad, \$1,000,000 of which is asked at this time, with authorizations up to \$35,000,000. It took no account of authorizations

for good roads, with a bill pending here for the expenditure of \$25,000,000 for that purpose.

The pending Post office bill treats fairly all of the employees of the Postal Service, and I believe that our highest duty is not to attempt to curry favor by unduly advancing them, but to perform our duty by standing by this committee and resist this attempt to increase in this way by \$500,000 the appropriations in

this bill. [Applause.]

Mr. BRYAN. Mr. Chairman, by some kind of classification or understanding here it seems that only special distributors are to be affected. They may be classified as special dis-tributors, but the fact is they are assistant cashiers, assistant superintendents of delivery, assistant superintendents of mail, assistant superintendents of registry, and a whole string of employees, as seen here on page 9 of the bill. It is desired to raise the salary of 7,400 of these men instead of 2,400. When we come to consider the matter of half a million dollars, of course it is a large sum, and I do not blame the chairman of the Committee on Appropriations for trying to hold down some of the expenses of the Government. That is his particular duty and his particular function, but when we consider the responsibilities, consider the burden that is upon the postal clerk and the expense of living, I do not think \$1,300 a year is too much at all, and I do not believe this Congress ought to be parsimonious about the salaries of these men. Consider the parcel post, consider the surplus that is brought in there, consider the postal savings, and these cashiers and distributors and these clerks have all of that to handle. We only want a small part of the surplus which arises from the parcel post given to these men that do the work, and I think they are entitled to it as a matter of right.

Mr. COX. Mr. Chairman, it has been said that the Post Office Committee has been very liberal with the clerks. The argument has been made, upon different grounds, that if this increase is granted there will be an increase in salary of 5,000. One of the grounds is that the burden of the clerk has been increased because of the parcel post. Grant that to be true; this bill carries all the way through its proportionate increase in the number of clerks to take care of that increased burden.

We have provided that all the way through this bill, so that argument falls to the ground. If their burdens have been increased, we have increased the number of clerks to carry on the additional burdens.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. COX. For a question only. Mr. BUCHANAN of Illinois. The fact is their work has been increased under the parcel post system, and the gentleman would have great difficulty in telling anyone who is working in the service that it has not been increased; and if the gentleman does not know that he had better seek information.

Mr. COX. I only yielded to the gentleman for a question. If there are any favored employees working for the Government to-day they are the postal clerks in the country. Why, they get their 15 days' lay off, and 30 days' lay off, and so forth, and they are carried in this bill along with the railway mail clerks to the extent that if they get injured while in line of duty they get their \$2,000. There is no ground for this increase in number, in my candid judgment, at all, and as the gentleman from New York [Mr. FITZGERALD] well said it is certainly time that some one shall get on the floor of this House and talk for the taxpayers of this country. [Applause.] At least it is true on this side of the House, because the burden is upon our shoulders, gentlemen, and I would like to call attention to the platform on which we ran the last time, and I would like to call attention to the platform of 1908, when we deliberately burned the Republican Party in words for its extravagance; and yet men who were elected upon that platform last fall come upon the floor of this House here and propose to increase the number of clerks from 2,000 to 7,000, and increase the pay \$100 per man. There is no need of it; there is no necessity for it. The bill carries along its natural proportionate increase, the automatic increase in pay each year, and, as the Postmaster General before our committee testified, there is no necessity for increasing any salaries in this bill. While he commended the entire personnel of the department—every employee, clerk to the highest one immediately under him—still he said there was no necessity of

increasing the salary of any one.

The CHAIRMAN. The time of the gentleman has expired.

Mr. J. I. NOLAN. Mr. Chairman, the gentleman who has just taken his seat believes the people of this country are going just taken his seat believes the people of this country are going to support the Democratic Party in their policy of economy, but if they are going to economize at the expense of the men in the public service of this country getting \$1,200 a year, and from that down to \$600 a year, I think the Democratic Party will find in the future that they are very much mistaken. [Applause on the Republican side.] Now, Mr. Chairman, it is all right enough to go before the people of this country on a campaign platform of economy. You heard here some years ago of a billion-dollar Congress, but the people of this country have become accustomed to a billion and a half dollar Congress, and do not expect the legislators of this country to economize at the expense of the underpaid public servants, especially those who are getting less than \$100 a month. Now, here is the case of 17,000 men in the Postal Service of this country, and you are providing for an increase of something like 6 per cent-supervisory officials-and the gentleman talks about the provisions that are made for the extra clerks to take care of the extra work in connection with the parcel post. I want to know how many expert distributors are provided for? They are necessary to expedite the work of the parcel post. A considerable number of the extra men are needed to take care of the work of the postal savings banks.

Mr. MOON. Will the gentleman yield?

Mr. J. I. NOLAN. I will.

Mr. MOON. Now, here is a system of transportation and carrying of mails that requires the service of quite a number of people. Does the gentleman feel that he is better prepared to tell this House the number of clerks needed to carry on this work than the department that is carrying on and transacting this business:

Mr. J. I. NOLAN. No; I do not intend, Mr. Chairman, to tell this House or this Post Office Committee. I believe they are competent to judge, but I think they have made a mistake in this instance; that there is sufficient reason to grant more than 1,000 increases to men at \$1.200. It may be 7,400 is somewhat high in comparison with 2,400, but I do not think the Committee on the Post Office and Post Roads have granted a sufficient number of increases to take care of the men who are justly entitled to the \$1,300 grade, and I do not think that the Democratic Party or any other party are justified in their policy of economy in taking it out of the men who are working for that sort of wages.

Mr. MURRAY of Massachusetts. May I briefly say, Mr. Chairman, that when this amendment was first suggested, I was greatly tempted to vote for it, because it seemed to be along the line of increasing the salaries of 5,000 clerks of the country. I have a high appreciation of the value of the services of many of the post-office clerks, especially in the large cities, I believe that many of the clerks in the \$1,200 grade are underpaid rather than overpaid. They are selected men from the civilservice list who have won their positions after hard tests along mental and physical lines. Any amendment which has for its purpose an increase of salary for deserving clerks will receive my support, and I have no doubt the support of the committee. However, the explanation of the chairman of the committee, the explanation of the gentleman from Connecticut [Mr. Reilly], the explanation of the gentleman from Illinois [Mr. MADDEN], and the statement of the chairman of the Appropriations Committee [Mr. FITZGERALD] have seemed to me most convincing, and I briefly want to say, for the reasons advanced, that I shall withhold my vote from supporting this amendment.

The CHAIRMAN. The question is on agreeing to the amend-

The question was taken, and the amendment was rejected. Mr. J. I. NOLAN. Mr. Chairman, I desire to offer an amend-

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 9, line 10, after the word "stations," in line 10, strike out the word "two" and insert in lieu thereof the word "five."

Mr. J. I. NOLAN. Mr. Chairman, in other words, this provides for 3,000 additional over what we have already provided

The CHAIRMAN. The question is on agreeing to the amend-

The question was taken, and the amendment was rejected. The Clerk read as follows:

Assistant superintendents of stations, clerks, stenographers, superintendents of carriers, superintendents of second-class matter, and superintendents of stations, 6,600, at not exceeding \$1,100 each.

Mr. MANN. Mr. Chairman, I move to strike out the last word. We have been here all day.

Mr. MOON. Let us go down to the end of that section there. Mr. MANN. What does the gentleman mean by the end of the section?

Mr. MOON. Down to the figures in the paragraph.

Mr. SABATH. If we do, there are several amendments to be offered later on.

Mr. MOON. I ask the Clerk to read at present:

The Clerk read as follows:

And to provide for the promotion of 75 per cent of the clerks in first-class post offices from the fifth to the sixth grade, and for the promo-tion of 75 per cent of the clerks in second-class offices from the fourth to the fifth grade; in all, \$44,470,000.

Mr. MOON. At that point I offer this amendment.

The CHAIRMAN. The gentleman from Tennessee [Mr. Moon] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 10, in line 12, after the word "grade," insert the following: "And for the employment of substitute clerks at \$800 per annum in place of clerks injured while on duty, and for the payment of \$2,000 in case of death of a post-office clerk by injury while on duty and not due to their own negligence."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order

Mr. MANN. I reserve a point of order on that. Let us see what it is when it is in print.

Mr. MOON. It is subject to a point of order. That is con-

Mr. MANN. From the way it reads it says, "death while on duty." Of course, that would include everyone who dies.

Mr. MOON. The intention of it is to give pay to those who

are injured in the line of duty.

Mr. MANN. But that is not what it says.

Mr. MOON. I know. It will have to be corrected in that re-

Mr. FITZGERALD. I suggest that we let it go over.

Mr. MOON. I suggest that it be read as it should be corrected.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:
On page 10, line 12, after the word "grade," insert:
"And for the employment of substitute clerks at \$800 per annum in place of clerks injured while in the line of duty, and for the payment of \$2,000 in case of death of a post-office clerk by injury while in the line of duty and not due to their own negligence."

The CHAIRMAN. The gentleman from Wisconsin [Mr. Staf-FORD] reserves a point of order.

Mr. MOON. Now, let the gentleman make it if he wants

Mr. STAFFORD. I withdraw it.

Mr. FITZGERALD. I reserve it. This applies only to clerks. Mr. MOON. I will state to the committee that there is a section in this bill, No. 7, that not only covers clerks but all other employees engaged in the handling of mail. But that very section is subject to a point of order, and probably it will go out on a point of order.

The CHAIRMAN. Does the gentleman from Wisconsin [Mr.

STAFFORD] withdraw his point of order?

Mr. STAFFORD. I stated, Mr. Chairman, that I withdrew it.

Mr. FITZGERALD. I reserve it, Mr. Chairman. The CHAIRMAN. The gentleman from New York reserves the point of order.

Mr. FITZGERALD. The paragraph that the gentleman suggests applies not only to clerks but also to certain other employees in the Postal Service. This amendment applies only to clerks?

Mr. MOON. Yes

Mr. FITZGERALD. It seems to me that if this bill is to carry a provision for the payment of money to any class of employees in the Postal Service who are killed while in the line of duty, when it is put in the bill it ought to cover every class to which it is to apply. One provision might get through and another might not, and I suggest to the gentleman to let the matter go over until we can have a chance to look at the provision suggested.

Mr. MOON. I will suggest to the gentleman from New York that the bill as drawn does not contain the amendment I offer. The amendment is offered at the request of the department, for the purpose of carrying out largely the provisions of section 7, which appear in the latter part of the bill.

Mr. ALLEN. Mr. Chairman, will the gentleman yield? Mr. MOON. Yes. Mr. ALLEN. There was an intention to offer the same amendment at each point, was there not?

Mr. MOON. Yes.
Mr. MANN. Will the gentleman permit a suggestion? Mr. MOON. At each one of these sections we will offer it. The House can adopt it or not, just as it pleases. It is subject to a point of order.

Mr. FITZGERALD. The provision that the gentleman offers, for instance, does not have the condition that the money shall be exempt from the payment of debts of the deceased?

Mr. MOON. No; it does not.
Mr. FITZGERALD. If the gentleman persists in pressing his proposition at this time I shall insist on my point of order. I suggest that the gentleman ought to be willing to let it go over

until to-morrow, so that we may examine it.

Mr. MANN. Why does not the gentleman from Tennessee offer section 7 at this time as an amendment to the bill?

Mr. MOON. We prefer to offer it the other way, to take up each class of employees as we come to it. But it is for the House to determine whether the employees ought to have it or not.

Mr. MANN. But section 7 would cover the entire subject if a point of order is not made.

Mr. MOON. If a point of order is not made to section 7, we shall expect to go through the bill and provide in each place where it applies.

Mr. MANN. Why not offer section 7 now? Mr. MOON. Gentlemen have suggested, Mr. Chairman, that they desire to have section 7 offered. Of course I am in favor of that section. I will ask the Clerk to report section 7, to which I will offer the amendment.

The CHAIRMAN. The Clerk will report the section.

The Clerk read as follows:

Page 28, line 11, section 7-

Mr. MOON. That would be in lieu of the amendment I offered, Mr. Chairman.

The Clerk read as follows:

Page 10, line 12, after the word "grade," insert the following: "That hereafter the Postmaster General shall have authority"—

Mr. MANN. It should come in after the sum, I think.

The CHAIRMAN. The gentleman offered his amendment to go in after the word "grade."

Mr. MANN. It should come in after the paragraph.
Mr. MOON. It would be well to have it come in as an independent section after the paragraph.

The CHAIRMAN. Does the gentleman from Tennessee offer

it as a new paragraph? .

Mr. MANN. He offers it as a part of this paragraph, and then he expects to follow that up by offering a further amend-

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Clerk read as follows:

After line 12, insert the following: "That hereafter the Postmaster General shall have authority to employ acting employees in place of all employees or substitutes hereinafter mentioned who are injured while on duty, who shall be granted leave of absence with full pay during the period of disability, but not exceeding one year, then at the rate of 50 per cent of the employee's salary for the period of disability exceeding one year, but not exceeding 12 months additional, and to enable the Postmaster General to pay the sum of \$2,000, which shall be exempt from payment of debts of the deceased, to the legal representatives, for the benefit of those dependent on him for support, of any railway postal clerk, substitute railway postal clerk, supervisory official of the Railway Mail Service, letter carrier in the City Delivery Service, rural letter carrier, post-office clerk, or special-delivery messenger who shall be killed while on duty, or who, being injured while on duty, shall die within one year thereafter as the result of such injury: Provided, That no compensation shall be paid any such employee for any injury occasioned by his own negligence."

Mr MANN Now Mr Chairman—

Mr. MANN. Now, Mr. Chairman— Mr. SISSON. Mr. Chairman, I reserve a point of order on the section

The CHAIRMAN. Does the gentleman make the point of order?

Mr. SISSON. I reserve the point of order on the section.

The CHAIRMAN. Does the gentleman from Mississippi desire to be heard on the point of order?

Mr. SISSON. No. I simply want to reserve the point of

Mr. MOON. Mr. Chairman, there seems to be a disposition to quit for the evening, and I therefore move that the committee do now rise.

The motion was agreed to

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Hay, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 11338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes, and had come to no resolution thereon.

EULOGIES ON THE LATE REPRESENTATIVE WILDER.

Mr. PAIGE of Massachusetts. Mr. Speaker, I ask unanimous consent for the present consideration of the following order.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent for the present consideration of an order which the Clerk will report.

The Clerk read as follows:

Ordered, That Sunday, February 8, 1914, be set apart for addresses upon the life, character, and public services of the Hon. WILLIAM H. WILDER, late a Representative from the State of Massachusetts.

The SPEAKER. Is there objection? If not, it will be so ordered.

There was no objection.

LEAVE TO EXTEND REMARKS.

Mr. PARK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on Senate joint resolution No. 5.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD on Senate joint resolution No. 5. Is there objection?

There was no objection.

LETTER OF GEN. H. H. BINGHAM.

Mr. VARE. Mr. Speaker, I ask unanimous consent to print in the Record a letter written by my predecessor in this House, Gen. Bingham, after the Battle of Gettysburg in 1863.

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD by printing the letter referred to by him. Is there objection?

There was no objection.

The letter is as follows:
[Gettysburg letter of Gen. H. H. Bingham, written to his sister, Mrs. John B. Coryell, while he was a captain on the staff of Gen. Winfield S. Hancock.]

Headquarters Corps,

Near Harpers Ferry, Va., July 18, 1863.

Dear Sister: Do not think I have forgotten you; I wrote you immediately after the battle concerning my safety and, if I mistake not a letter since, but perhaps I am wrong. Well, I came safe and sound out of the last engagement and have no objection to going into another to-morrow, provided always that we whip them. Gettysburg was a hard fought and fairly won battle—God grant us many such victories—and those of them that are spared will soon return to our homes wiser and better men.

and those of them that are spared will soon return to our homes wiser and better men.

By the by, I will tell you how I spent my Fourth of July night, About 8 o'clock in the evening I laid myself on the ground—and it was wet and foggy at the time—to rest for the night. I had nothing to put under or above me—on the field we take nothing in the shape of bed clothing. About 12 o'clock I awoke and found that I was in a complete pool of water that nearly covered me, and it was raining terribly. I got up and stood by, or rather against, a tree until daylight, but unfortunately this tree was within 20 or 30 feet of some hundred wounded, dying, and dead rebels, and together with the groans and crices for water and the rain I passed a night the remembrance of which I can never forget. I would not have been surprised to have my hair gray my agony at times was so intense. But that is

only one of the sad scenes in the great conflict. The morning after the battle I went over all the battle ground and I saw that which gave rise to the old expression, "Dead heaped on dead."

Our general—I mean Gen. Hancock—was the hero of the fight. Oh, but he is a gallant man. When we rode along our line of battle, while the enemy were advancing in three perfectly formed lines, every man looked up and saw the perfect soldler in their general, and as he spoke to them here and there cheer after cheer ascended, for all have and had the most unbounded confidence in him; but he was wounded during the heaviest part of the engagement. We assisted him from his horse, and there on his back he lay and gave us order after order to execute. Said he, in giving me one of the many orders which we executed: "Mr. Bingham—he always calls the gentlemen of his staff. Mister—take those two regiments on the left of this line, lead them to the left flank of Well's front and pour enfilading fire in that line of rebels just advancing." I led them within 20 yards of the rebel line, and poured a raking fire into the enemy that caused a breaking of their ranks and a promiscuous retreat.

It was at that time that I lost as beautiful a white horse as it is possible to obtain. I hope the general will soon return. He is now in Philadelphia. I am very well. Write soon. I suppose you know I am judge advocate of the Second Corps. When Gen. Hancock received command of the corps he took me with him. Love to all.

Direct,

H. H. BINGHAM,

H. H. BINGHAM, Headquarters Second Corps, Washington, D. C.

Your brother Harry.

I forgot to say that Jim is in this army now. I saw him some days to. He is very well. ago.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 3638. An act providing for the issuance of patent to

Joe Joubert.

IMMIGRATION.

The SPEAKER. House bill 6060, the general immigration bill, ought to be transferred from the House Calendar to the Union Calendar. If there be no objection, it will be so trans-

There was no objection.

ADJOURNMENT

Mr. MOON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p. m.) the House adjourned until Wednesday, January 21, 1914, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were sev erally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 5884) granting to the people of the State of California the right of way upon and across the United States fish reservation at Baird, Shasta County, Cal., reported the same without amendment, accompanied by a report (No. 177), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 122) authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes, reported the same without amendment, accompanied by a report (No. 178), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. RUSSELL, from the Committee on Invalid Pensions, to which was referred the bill (S. 832) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 174), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 834) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 175), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 833) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain wid-

ows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 176), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows: By Mr. BRUCKNER: A bill (H. R. 11968) providing for a

survey of Pugsley Creek, in the State of New York; to the Committee on Rivers and Harbors.

By Mr. LEVER: A bill (H. R. 11969) making appropriations for the printing and publishing of maps and reports relating to the kelp beds on the Pacific coast; to the Committee on Appropriations

By Mr. BOWDLE: A bill (H. R. 11970) granting pensions to members of the military organization of 1862 known as the Squirrel Hunters; to the Committee on Invalid Pensions.

By Mr. QUIN: A bill (H. R. 11971) providing for the construction of a concrete or cement walk from the entrance gate of the national military cemetery at Natchez, Miss., to the sidewalks of the city of Natchez, Miss., at the corner of Pearl and Oak Streets; to the Committee on Military Affairs.

By Mr. DALE: A bill (H. R. 11972) to provide for the purchase of a site and the erection of a public building thereon at the city of Brooklyn, in the State of New York, near the plaza at the east end of the Williamsburg Bridge; to the Committee on Public Buildings and Grounds.

By Mr. HUMPHREY of Washington: A bill (H. R. 11973) making timberlands available for homestead settlement, and for other purposes; to the Committee on the Public Lands.

By Mr. SELLS: A bill (H. R. 11974) to pension widow and minor children of any officer or enlisted man who served in the War with Spain or the Philippine insurrection; to the Committee on Pensions.

By Mr. TRIBBLE: A bill (H. R. 11975) authorizing the reduction of postal rates on agricultural, horticultural, dairy, and poultry products; to the Committee on the Post Office and Post Roads.

By Mr. GREEN of Iowa: A bill (H. R. 11976) to amend the act of August 24, 1912, fixing the rate on fourth-class mail matter; to the Committee on the Post Office and Post Roads

By Mr. STONE: A bill (H. R. 11977) to authorize and direct the payment of pensions monthly; to the Committee on Invalid

Also, a bill (H. R. 11978) to declare Lincoln's birthday a legal holiday; to the Committee on the Judiciary.

Also, a bill (H. R. 11979) to create a board to correct military records; to the Committee on Military Affairs.

Also, a bill (H. R. 11980) providing for the erection of a public building at Spring Valley, in the State of Illinois; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 11981) to establish a fish hatchery and fish-culture station in the sixteenth congressional district of Illinois at a point to be selected by the Secretary of Commerce; to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 11982) authorizing the Secretary of War to deliver to the city of Chillicothe, Ill., two condemned bronze or brass cannon, with their carriages and a suitable outfit of cannon balls; to the Committee on Military Affairs.

Also, a bill (H. R. 11983) to establish an agricultural experiment station in the sixteenth congressional district of Illinois; to the Committee on Agriculture.

By Mr. BYRNES of South Carolina: A bill (H. R. 11984) providing for the disposition of the tax on cotton collected during the fiscal years ended June 30, 1863, to June 30, 1868; to the Committee on War Claims

By Mr. SHACKLEFORD: Resolution (H. Res. 382) providing for the immediate consideration of the bill (H. R. 11686) empowering the United States, in certain cases, to aid the States and the civil subdivisions thereof in the construction and maintenance of rural post roads, and for other purposes; to the Committee on Rules.

By Mr. KAHN: Resolution (H. Res. 383) providing for the appointment of a committee to investigate charges concerning lobby influences in the passage of the act relating to the Metro-politan police force; to the Committee on Rules.

By Mr. LA FOLLETTE: Joint resolution (H. J. Res. 196) authorizing the delivery to the proper authorities of Columbia County, Wash., of two condemned bronze or brass cannon or fieldpieces with suitable outfit of cannon balls; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Also, a bill (H. R. 12002) granting an increase of pension to Margaret Connelly; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12003) granting an increase of pension to Cynthia C. Edwards; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12004) granting an increase of pension to

Joseph Walker; to the Committee on Invalid Pensions Also, a bill (H. R. 12005) granting an increase of pension to Mary A. Carter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12006) granting an increase of pension to Mary McCartin: to the Committee on Invalid Pensions.

Also, a bill (H. R. 12007) granting an increase of pension to John P. Campbell; to the Committee on Invalid Pensions.

By Mr. GOEKE: A bill (H. R. 12008) granting an increase of pension to John H. Anderson; to the Committee on Invalid

Pensions.

Also, a bill (H. R. 12009) granting an increase of pension to William Brown; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12010) granting an increase of pension to

John W. Reinoehl; to the Committee on Invalid Pensions. By Mr. GOULDEN: A bill (H. R. 12011) granting an increase of pension to Jeremiah Haley; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 12012) granting a pension to Lydia Waltenbaugh; to the Committee on Invalid Pensions.
Also, a bill (H. R. 12013) for the relief of Aaron L. Abbey;
to the Committee on War Claims.

By Mr. HAWLEY; A bill (H. R. 12014) granting a pension to Charles W. Clark; to the Committee on Pensions.

Also, a bill (H. R. 12015) granting an increase of pension to

Albert A. Smith; to the Committee on Invalid Pensions.

By Mr. HELM: A bill (H. R. 12016) granting a pension to Charles C. Watson; to the Committee on Pensions.

By Mr. HAWLEY: A bill (H. R. 12017) for the relief of George E. Zimmerman; to the Committee on the Public Lands.

By Mr. MAGUIRE of Nebraska: A bill (H. R. 12018) granting an increase of pension to William M. Orr; to the Committee on Pensions.

Also, a bill (H. R. 12019) granting an increase of pension to Arthur L. Brown; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12020) granting an increase of pension to Thomas E. Heskett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12021) granting a pension to Mary A. Bishop; to the Committee on Invalid Pensions,

Also, a bill (H. R. 12022) granting an increase of pension to Ruth B. Martin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12023) granting an increase of pension to James D. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12024) granting an increase of pension to Andrew N. Coffey; to the Committee on Invalid Pensions, By Mr. MAPES: A bill (H. R. 12025) for the relief of John J.

Waters; to the Committee on Military Affairs.

Also, a bill (H. R. 12026) for the relief of Samuel E. Cooper;

to the Committee on Military Affairs.
Also, a bill (H. R. 12027) for the relief of Peter Duchane; to the Committee on Military Affairs.

Also, a bill (H. R. 12028) granting a pension to Emma L. Conger; to the Committee on Invalid Pensions

Also, a bill (H. R. 12029) for the relief of Gerhard Heyboer; to the Committee on Military Affairs.

Also, a bill (H. R. 12030) for the relief of John Shields; to

the Committee on Military Affairs.

Also, a bill (H. R. 12031) for the relief of Samuel N. Raymer; to the Committee on Military Affairs

By Mr. PARKER: A bill (H. R. 12032) granting a pension to Sarah J. Ogden; to the Committee on Invalid Pensions

Also, a bill (H. R. 12033) granting a pension to Mary E.

Newcomb; to the Committee on Invalid Pensions. Also, a bill (H. R. 12034) granting a pension to Katherine Reardon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12035) granting an increase of pension to Austin Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12036) granting an increase of pension to

Charles M. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12037) granting an increase of pension to Amyel Baker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12038) granting an increase of pension to Charles La Marsh; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12039) granting an increase of pension to William Hemstreet; to the Committee on Invalid Pensions.

By Mr. POST: A bill (H. R. 12040) granting an increase of pension to James T. Lott; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 12041) granting a pension

to Olive E. Myer; to the Committee on Invalid Pensions. By Mr. STEPHENS of Nebraska: A bill (H. R. 12042) for the relief of the Medawakanton and Wahpakoota bands of Sioux Indians, otherwise known as the Santee Sioux Indians; to the Committee on Claims,

SENATE.

Wednesday, January 21, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. Oliver and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of Lincoln Branch, American Continental League, of Hubbard, Ohio; of General Daniel Morgan Branch, American Continental League, of Philadelphia, Pa.; of Valley Forge Branch, American Continental League, of Philadelphia, Pa.; and of Robert Morris Branch, American Continental League, of Philadelphia, Pa., remonstrating against any appropriation by Congress for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. THOMAS presented memorials of sundry citizens of Lyons, Colo., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. OLIVER presented memorials of Yorktown Branch, American Continental League, of Philadelphia, Pa.; of Nathan Hale Branch, American Continental League, of Philadelphia, Pa.; of Andrew Jackson Branch, American Continental League, Fal.; of Andrew Jackson Branch, American Continental League, of Shenandoah, Pa.; of General Sullivan Branch, American Continental League, of Pittsburgh, Pa.; of Anthony Wayne Branch, American Continental League, of Philadelphia, Pa.; and of Molly Pitcher Branch, American Continental League, of Philadelphia, Pa., remonstrating against any appropriation by Congress for the calculation of the so-called "One hundred". Congress for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were

referred to the Committee on Foreign Relations.

He also presented a petition of Valley Hill Council, No. 59, Daughters of Liberty, of Parkesburg, Pa., and a memorial of Local Council No. 109, Daughters of Liberty, of Monaca, Pa., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

Mr. BRISTOW presented a memorial of sundry citizens of Hanover, Kans., remonstrating against the enactment of legislation to prohibit the sale, manufacture, and importation of distilled liquor containing alcohol except for certain specifical which was referred to the Committee on the purposes. Judiciary.

He also presented a memorial of sundry citizens of Morgan-ville, Kans., praying for the enactment of legislation to prohibit the sale, manufacture, and importation of distilled liquor containing alcohol except for certain specified purposes, which was referred to the Committee on the Judiciary.

Mr. ASHURST presented resolutions adopted by the Socialist Party of Yuma, Ariz., praying for the enactment of legislation authorizing Government ownership of all the mines of the United States and the Territories thereof, etc., which were referred to the Committee on Mines and Mining.

Mr. GALLINGER. Mr. President, I have a letter from Rev. George Brown Thomas, pastor of St. Paul's Methodist Episcopal Church, of Manchester, N. H., from which I desire to read a

As pastor of the largest Methodist Church in the State I am writing to beg you, not only as an individual, but as representing practically a united body of citizens who are members of this church and parish, to support the immigration bill which will soon come before your body, introduced into the House by Mr. Burnett and known as House bill 6060. Probably a separate bill will be introduced into the Senate, if it has not already been introduced, under a different name, but containing the same provisions, particularly the educational restriction.

After much study and observation and experience I am convinced that we face no other peril greater, if as great, than the tremendous influx of foreign peoples who are totally illiterate.

My correspondent goes on to discuss the matter somewhat fur

My correspondent goes on to discuss the matter somewhat furin detail, which I will not read. I move that the letter be referred to the Committee on Immigration.

The motion was agreed to.

Mr. KENYON presented a memorial of sundry citizens of Humboldt County, Iowa, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry clerks and letter carriers employed in the post office at Oskaloosa, Iowa, praying for the enactment of legislation providing for the retirement of incapacitated civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. WEEKS presented a memorial of Hebrew Progressive Lodge, No. 177, Independent Order B'rith Abraham, of Boston, Mass., remonstrating against the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

Mr. BURLEIGH presented a petition of York Pomona Grange, Patrons of Husbandry, of Maine, praying for the passage of the so-called Lever agricultural extension bill, which was ordered to

lie on the table.

Mr. SIMMONS presented a petition of sundry citizens of Rocky Mount, N. C., praying for the construction of two new bat-tieships, which was referred to the Committee on Naval Affairs.

He also presented a petition of sundry citizens of Elm City, N. C., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigra-

SENATOR FROM ALABAMA.

Mr. WALSH. Mr. President, I desire to make a privileged The Committee on Privileges and Elections, to which was referred the credentials of Frank P. Glass as a Senator from the State of Alabama, have considered the same, and I am directed by that committee to submit a report thereon. I ask that the report may be read.

The VICE PRESIDENT. The report will be read.

The Secretary read as follows:

[Senate Report No. 164, part 1, Sixty-third Congress, second session.]

CREDENTIALS OF FRANK P. GLASS AS SENATOR FROM ALABAMA.

CREDENTIALS OF FRANK P. GLASS AS SENATOR FROM ALABAMA.

Mr. Walsh, from the Committee on Privileges and Elections, submitted the following report (to accompany S. Res. 249):

The Committee on Privileges and Elections, to whom was referred the credentials of Frank P. GLASS as a Senator from the State of Alabama, have considered the same and submit the following report:

At the time the seventeenth amendment became valid as a part of the Constitution of the United States, on the 31st day of May, 1913, and thereafter until his death, on the 8th day of August, 1913, following, the State of Alabama was represented in the Senate in part by Hon. Joseph M. Johnston, holding by election by the legislature of that State for a full term, which would expire on the 4th of March, 1915. Later the governor of that State, the Hon. Emmet O'Neai, designated Hon. Henry D. CLAYTON to fill the vacancy thus occasioned. His credentials were presented to the Senate and by it referred to its Committee on Privileges and Elections, but before any report was made by the committee they were withdrawn by request of the appointee, who declined the place. Subsequently, on the 7th day of November, 1913, the governor issued a certificate by which the Senate was advised that he had appointed Hon. Frank P. GLASS as a Senator of the United States from the State of Alabama. His credentials having been presented to the Senate and by it referred to the appropriate committee, that committee now reports that in its opinion the governor of Alabama had no authority under the Constitution of the United States to make the appointment and that the said Frank P. GLASS is not entitled to a seat in this honorable body.

The right claimed under the appointment depends upon the construction to be given to the seventeenth amendment, referred to, which reads as follows:

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof for six years; and each

as follows:

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for the electors of the most numerous branch of the State legislatures.

"When vacancies happen in the representation of any State in the Senate the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancy by election, as the legislature may direct. direct.

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as a part of the

or term of any Senator chosen before it becomes valid as a part of the Constitution."

It is contended on behalf of Mr. Glass:

(1) That by reason of the last clause of the amendment it is inoperative with respect to any vacancy that may occur by the death, resignation, or expulsion of any Senator who had been elected prior to the 31st day of May, 1913, when the amendment became a part of the Constitution: that during the full period of six years for which any Senator had therefore been elected any vacancies occurring in the office to which he had been elected are to be filled pursuant to the provisions of the original Constitution.

(2) That the amendment is not self-executing and that until Congress or any particular State enacts legislation under which an election by the people for Senators can be held, Senators from such State must be chosen according to the provisions of the original Constitution and that Alabama had no such legislation.

(3) That assuming the amendment to be in force and operative in the State of Alabama, the laws of that State warrant the appointment under the second clause of the amendment, which empowers the legislatures of the States, respectively, to invest the governors thereof to make temporary appointments in the case of a vacancy in the representation of any State in the Senate.

TANUARY 21,

The propositions above itsted, numbered 1 and 3, were both adverge on bealt of the Charty the the grossed in the control of the

election to fill a vacancy in the House of Representatives. (1 Hinds' Precedents, 640, Hoge's Case.)

It is here contended that, whether the case was correctly decided or not, the determination constituted a construction of the Constitution by the only tribunal entitled to pass upon the provisions involved, and that when the identical language is found employed in the seventeenth amendment it is to be given the significance thus attributed to it. The force of the Hoge case as a precedent is somewhat weakened, however, by the fact that it was urged by Mr. Clay in the debate that the Pennsylvania statute was broad enough in its terms to cover the case of experience of the committee of the committee it is immaterial whether the case is accepted as authority or not. If it is rejected and the conclusion is reached that Alabama is not now equipped to hold an election, it will, in the opinion of the committee, be necessary that she assemble her legislature to make provisions. Some of the States anticipating the eventual success of the amendment, long before Congress for consideration, enacted laws to meet the contingency of its adoption. Okiahoma made specific provisions in her constitution for the election of Senators. It is quite generally conceded that here is one their senators. It is quite generally conceded that here of Senators. It is quite generally conceded that these laws, though enacted before the amendment was adopted, may be availed of. Still other States have election laws so general and comprehensive in their terms as to reach to the case of officers whose election by the people might in the future, speaking with reference to the time of the enactment of such laws, it is the opinion of the committee that Alabama is thus provided, and that there exists no obstacle to the holding of an election for Senator in the legislature, when the legislature will be in session prior to the committee that Alabama is thus provided, and that there exists understantive, and the legislature of the sanction of such laws. I

whose office the vacancy has occurred; and in all cases in which a special election is directed in a district composed of more than one county, such election must be directed to be held on the same day in each county.

"445. How conducted and certificates given.—Special elections are to be held and conducted, the returns thereof made and certificates given, and, unless otherwise expressly provided, regulated in all respects by the provisions in relation to general elections."

It is difficult to understand why all the necessary machinery for the conduct of an election to fill a vacancy in the Senate is not provided by these sections of the Alabama statutes.

That State seems to have been one of those which anticipated the necessity of conducting an election by the people for United States Senator, for it provided in section 332 as follows:

"General elections: for whom held—General elections throughout the State shall be held for governor, lleutenant governor, attorney general, State auditor, secretary of state, State treasurer, superintendent of education, commissioner of agriculture and industries, three railroad commissioners, no two of whom shall be elected from the same congressional district; State game and fish commissioner, chief justice and associate justices of the supreme court, supernumerary judge, and electors for President and Vice President of the United States, and such other officers as may be required by law to be elected by the voters of the entire State."

And by section 331:

"State and county officers who are elected by the people.—The following officers in this State shall be elected by the qualified electors thereof: Governor, lieutenant governor, attorney general, State auditor, secretary of state, " " and such other officers as may be required by law to be elected by the people."

Though the heading to the section, probably the work of the compiler rather than the legislature, designates the officers to which it relates as "State and county officers," the act itself speaks of all offic

officers in the State who may be required by law to be elected by the people.

The statutes are so plain in terms, so comprehensive in their scope, that it is difficult to conceive how the view could be entertained, if it was, that Alabama is under the necessity of convening her legislature in extra session if the view that the amendment is presently operative as to her should obtain.

But were they much less so they might still be adequate for the purpose. The method prescribed by the amendment for the election of Senators is the same as that laid down in the original Constitution for the election of Representatives. Concerning the filling of vacancies the identical language used in the Constitution respecting Members of the House is employed in the amendment. The most liberal rule has been established by long practice in the House concerning that provision of the Constitution which directs that the legislatures

of the States shall prescribe the time, place, and manner of holding elections for Senators and Representatives. A careful examination has failed to disclose that any special legislation had been enacted concerning elections of Representatives in either New Hampshire or Georgia prior to the first appearance in Congress of Members from those States, and yet they were admitted apparently without question.

The condition which prevailed in Pennsylvania and which gave rise to the Hoge case obtained in practically all the original States. An examination of the statutes under which their first Representatives were elected and which made provision for subsequent elections will reveal that few if any of them made provision for elections to fill vacancies. Apparently the doctrine of the Hoge case, either that the statutes covering the case of regular elections should be held applicable or that in the absence of legislation the governor could prescribe rules for the conduct of such elections, was generally accepted. Though the fourth section of the first article reposes in the legislatures of the States, respectively, the authority to prescribe the rules for the conduct of congressional elections, it is the settled practice after repeated contests to admit the first Representative sent by a State, though they are, as is usually the case, elected under laws enacted by Territorial, not State, legislatures. (See Hinds's Precedents, 644 and 648.)

The Fifty-sixth Congress admitted Robert W. Wilcox as a Delegate from Hawail, though there was no law of the islands specifically reaching to the case of the election of such an official. The election was conducted, however, under the forms prescribed by the local law for the election of members of the legislature, and having been found to have been fairly conducted was approved.

Under similar conditions the present Delegate was seated, upon a contest, by the Fifty-ninth Congress. (1 Hinds's Precedents, 675.)

Had Alabama proceeded to elect a Senator to fill the unexpired portion

Therefore the committee respectfully recommend the adoption of the following resolution:

"Resolved, That Frank P. Glass is not entitled to a seat in the Senate of the United States as a Senator from the State of Alabama."

ADDITIONAL VIEWS OF SENATOR THOMAS J. WALSH.

VIEWS EXPRESSED BY SENATOR THOMAS J. WALSH OF MONTANA, A MEMBER OF THE COMMITTEE ON PRIVILEGES AND ELECTIONS, RELATIVE TO THE VALIDITY OF THE CREDENTIALS OF HENRY D. CLAYTON AS A SENATOR FROM ALABAMA.

The committee has had under consideration the credentials of Hon. Henry D. Clayton, appointed by the governor of Alabama to fill a vacancy in the representation from that State, in the Senate, occasioned by the death of Hon. Joseph M. Johnston. The very grave duty is imposed upon the committee of determining whether, under the Constitution of the United States, in view of the seventeenth amendment thereto, proclaimed as a part of it on the 31st day of May, 1913, the governor of Alabama has any power to fill by appointment the vacancy which thus arose. The amendment in question is as follows:

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for the electors of the most numerous branch of the State legislatures.

"When vacancies happen in the representation of any State in the Senator the executive authority of such States shall issue write of alex.

of the State legislatures.

"When vacancies happen in the representation of any State in the Senate the executive authority of such States shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancy by election as the legislature may may empower the executive thereof to make temporary appointments until the people fill the vacancy by election as the legislature may direct.

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as a part of the Constitution."

or term of any Senator chosen before it becomes valid as a part of the Constitution."

It is contended—

1. That by the third clause of the amendment a vacancy occurring by reason of the death, resignation, or expulsion of any member elected before it took effect must be filled in the manner prescribed by the original Constitution; that is, temporarily by appointment by the governor, and thereafter by selection by the legislature; and

2. That the governor has the power which he has attempted to exercise by virtue of a statute which authorizes and requires him to fill by appointment all vacancies which may occur in any State office when no other mode is prescribed by law.

I. It is asserted on the one hand that the plain meaning of the clause of the amendment referred to is that the right of no Member who had been regularly elected or appointed prior to the time the amendment became valid as a part of the Constitution should be open to question, nor should the term for which he was elected be either extended or abneviated in consequence of it; that the election or appointment of a Senator, valid when it occurred, should remain valid, and that he should be entitled to sit for the entire term for which he was elected or appointed, any provision of the amendment to the contrary notwithstanding; and that all vacancies occurring after the amendment became valid as a part of the Constitution—that is to say, after it was ratified by the legislatures of three-fourths of the States—must be filled in the manner prescribed by it; that is, by election by the people, the governor having power to appoint until an election may be held only if the legislature of his State shall chose to clothe him with such authority.

Against this view it is urged on behalf of the appointee of the gov-

governor having power to appoint attending the legislature of his State shall chose to clothe him with such authority.

Against this view it is urged on behalf of the appointee of the governor that the word "term" as used in the concluding clause of the amendment has an entirely impersonal significance, that it refers to the period of time, and the whole period of time, for which any Senator was elected, and that such term'is not cut short even by the death of the Member. In this view it is proper to speak of the term of Senator Johnston as still subsisting. A great wealth of authority is adduced to give sanction to the idea that it was in such sense that this important word was used. The basic idea upon which the contention thus made rests is set forth with unusual clearness and force by the Supreme Court of the State of Wisconsin in the opinion in the case of State ex rel. Bashford v. Trear (138 Wis., 536), from which the following quotation is made:

"The office, the term, and the incident—a specific salary—may exist for any period of time without the office being filled or without there being any method provided for filling it.

"Upon such method being provided and the office being filled, the incumbent takes it with its fixed term and incident. If he goes out during such term and another steps in, the latter does not take a new

term, but takes a part of the same term prior thereto enjoyed by his predecessor. The form continues during the fixed period with its jack each succeeding the other. Where another licembert goes in at the commencement of the full term prescribed by law, such full term becames and the problems of the full term problems of the full term, so far as not yet run, becomes his term in the constitutional sense. The full term problems of t

resentation from which a vacancy occurs being required to issue writs of election to fill the same as in the case of a vacancy in the delegation in the House of Representatives, though the governor may be empowered to make a temporary appointment pending an election. What reason can be assigned as to why vacancies now occurring should not be filled in the same manner?

These considerations but enforce the conclusion that the third clause means, and means only, what it plainly says, that the amendment shall neither lengthen nor shorten the term of any Member, whether the word "term" is used in a personal or an impersonal sense, and does not mean what it does not say, that this amendment shall be inoperative during the term for which any Senator is chosen.

It was argued that the word "chosen" in the clause in question, not had applicable to the case of a Senator holding by appointment, leads to the term of a Senator holding by appointment, leads sense. Even if that should be admitted, the conclusion urged, as shown, would not follow. But, though unusual, the word is not at all inapt to express the idea of a selection by the governor. He is required to choose, in order to make an appointment, quite as much as is the legislature, or as are the people in electing. No such nicety is exhibited in the use of terms in the Constitution. By it each State is authorized to "appoint," in such manner as the legislature may direct, a number of electors of President and Vice President equal to the whole number of Representatives to which the State is entitled in Congress. Though it is authorized to "appoint," each and every State now elects, and it has been judicially held that such procedure meets the constitutional requirement.

That provision of the Constitution found in Article V of the Constitution dealing with amendments, which provides that no State shall without its consent, be deprived of its equal suffrage in the Senate, is conceived in the constitution of the Amendment, Alabama is, for a time, without its full quota

"[No. 65-H. 55.]

"An act to provide for the filling of any vacant office of the State or any county or any municipality when there is no provision of law for filling such vacancy."

"An act to provide for the filling of any vacant office of the State or any county or any municipality when there is no provision of law for filling such vacancy.

"Be it enacted by the Legislature of Alabama:

"1. That when any office of the State, of any county or municipality thereof, is vacant from death, resignation, removal from the municipality, county, or State, or because the former incumbent absconds, or because an incumbent has been removed for ineligibility, or when the office is vacant from any other cause, and there is no way provided by law for the filling of such vacant office, the governor is hereby empowered and required to appoint a qualified person to fill the unexpired term of such office."

It is argued that United States Senators are not officers of the United States, neither is the office any such holds an "office under the United States," but an "office of the State" within the meaning of this statute, which, with much force and convincing logic, is said to contemplate not only offices then existing but those which might thereafter be created by law; not only those concerning which there was at the time of the enactment of the statute no express method provided for filling vacancies, but as well to those which, by any event, should be found vacant, and in relation to which there existed no express provision of the law for filling the vacancy.

If it should be admitted that a United States Senator is an "officer of the State," the question would still remain as to whether the second clause of the amendment does not contemplate and require future affirmative action on the part of the legislature before the governor becomes vested with the authority to appoint. That question will be canvassed later.

Various provisions of the Federal Constitution are referred to in this connection clearly establishing that as the phrase is used in them Senators and Representatives are not to be regarded as "officers of the United States." Thus in section 1 of Article II it is provided that—

"No Senator or

But it does not by any means follow that because Senators and Representatives are not within the purview of particular provisions of the Constitution or of particular Federal statutes referring to efficers of the United States they are necessarily officers of the States, respectively, from which they come.

It has been expressly held in Kentucky that Members of the House of Representatives are not "State officers" as that expression is used in the constitution of that State. A provision thereof required that certain vacancies should be filled by election "at the next succeeding annual election at which either city, town, county, district, or State officers are to be elected." It was held that the office could not be filled at a November election at which only Members of the House of Representatives were elected. (Neely v. McCollum, 53 S. W., 37; Eversole v. Brown, 53 S. W., 527; Donelan v. Bird, 118 S. W., 178.)

Language found in the opinion of Mr. Justice Miller in Ex parte Yauborough (110 U. S., 657) clearly implies that in the opinion of that tribunal Members of Congress are not State officers. We read therein as follows:

Eversole v. Brown, 52 S. W., 527; Donein n. Bird, 118 S. W., 178.)

Eversole v. Brown, 52 S. W., 527; Donein n. Bird, 118 S. W., 178.)

Library and M. L. S. 657 (188) and the state Miller in Exparity of M. M. S. 188. M. 18

executive authority thereof shall issue writs of election to fill such vacancies."

The new amendment, in its second clause, makes this provision:

"When vacancies happen in the representation of any State in the Semate, the executive authority of such States shall issue writs of election to fill such vacancies."

The system of delegating the power to choose Senators had broken down. It was everywhere in disrepute and in deserved disrepute. The jealousy of the people was aroused. They recalled the power which they believed had been unwisely delegated and determined to make their own choice, by direct vote, for Senators, even to case of vacancies, leaving to each State, if it saw fit to do so, to invest the governor thereof with the power to fill a vacancy by making a temporary appointment which should be effective only until an election should be held, as the legislature might direct.

The power to elect is by the amendment restored to the people, but the people of each State may, if they care to do so, vest in the governor power to fill a vacancy by appointment until an election can be held.

This clearly contemplates a deliberate purpose on the part of the people of the State, having this provision of the Constitution as it now exists in mind, to clothe their governor with such power by appropriate legislative action. The provision in question quite manifestly contemplates future affirmative action or the part of the people of the State, speaking through their legislature.

It is not to be understood that the view is expressed that if a State legislature, in anticipation of the ratification of the amendment, had passed, in form, a statute, declaring that in case the amendment should become valid by ratification the governor should be empowered to

appoint, its effect to make timely provision would be abortive. Congressional legislation in which many of the framers of the Constitution participated affords a justification for such action by a State.

"When the amendment of the Constitution of the United States relative to the choice of President was pending, and also an election of President, Congress passed an act providing that whenever that amendment should be adopted the Secretary of State should give notice to the executive of every State, who should notify the electors of his State; and these electors were to vote in the mode thereby prescribed. But as this ratification might not be known in season to all the electors, it was also provided that in such cases the electors might vote in conformity to the original Constitution and also in conformity to the amendment; and when the votes were counted those certificates only should be opened which contained the votes given in conformity to the Constitution, as it was in force on the day fixed by law, at the time of the meeting of the electors. (Act of Mar. 26, 1804.) (Pratt & Allen, 13 Conn., 119-128.)"

That case considered a statute of the State of Connecticut which was passed in anticipation of the adoption of an amendment to the constitution of that State. The power of appointment of sheriffs was at first given to the legislature. An amendment was submitted providing for their election by the people. The act in question, passed before the amendment was adopted, prescribed the manner in which the election should be conducted in case the amendment proposed became effective. It was held to be quite within the power of the legislature to pass such a law.

It is asserted, however, that the surrender on the part of the people of a State of the power themselves to elect a Senator by direct vote, or even to fill a vacancy, is not to be presumed from any statute general in character, however comprehensive its terms, and not passed obviously in view of the provision of the amendment under consideration.

of a State of the power themselves to elect a Senator by direct vote, or even to fill a vacancy, is not to be presumed from any statute general in character, however comprehensive its terms, and not pessed obviously in view of the provision of the amendment under consideration. People of each State are entitled to an opportunity to make a deliberate choice as to whether they will or will not invest their caleft executive with the extraordinary power contemplated by that part of the amendment upon which the validity of the appointment being considered must rest. The people of the State of Alabama have exercised no such choice. The amendment further contemplates that in case the people of any State should see fit, through their legislature, to repose in their governor the power of temporary appointment, they should fleevise designate the time the appointer should serve; that chosen to displace him. One State might require that a special election be held within 30 days, another 80, another 90, and another might, in the interest of economy, provide that the governor's writ should require the election to fill the vacancy to be held at the time of the next general election. It is conceivable that some State might fat the time of election so that it would coincide with the expiration of a term, and under such a law the person appointed would serve for governor to appoint must, under the amendment, fix the time for the election.

Such a statute would probably not violate even the spirit of the amendment in cases in which the vacancy occurred in reasonable proximity to the time when the election is to be held to choose a Senator for the full term. It is sufficient for the present to advert to the fact that the very language which contemplates action by the legislature to invest the governor with the power of appointment contributions of the proposition to fill the vacancy. It was a proposition of the senate by temporary appointment. It would be scarcely less unjust to assert that they had find a very language with the r

Mr. WALSH. Mr. President, I am directed by the Committee on Privileges and Elections to submit the following resolution, which I ask may be read.

The resolution (S. 249) was read, as follows:

Resolved. That FRANK P. GLASS is not entitled to a seat in the Senate of the United States as a Senator from the State of Alabama.

The VICE PRESIDENT. The report and accompanying resolution will be placed on the calendar.

Mr. ROBINSON. Mr. President, in connection with the submission of the report, I desire to submit a request on behalf of the senior Senator from Kentucky [Mr. Bradley]. That Sena-He desires to be allowed four days in which to file views of the minority. I ask unanimous consent that the senior Senator from Kentucky be permitted to file a minority report within four days from this date.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and permission is granted.

SENATOR FROM MARYLAND.

Mr. SUTHERLAND. On behalf of myself and the senior Senator from Vermont [Mr. DILLINGHAM] I beg leave to submit the views of the minority on the credentials of Blair Lee as a Senator from the State of Maryland. I ask that the views may be printed in the RECORD and that they also may be printed in the usual form.

The VICE PRESIDENT. The views of the minority submitted by the Senator from Utah will be printed in the RECORD and also as a Senate report.

The views submitted this day by Mr. SUTHERLAND are as follows:

[Senate Report 160, part 2, Sixty-third Congress, second session.] CREDENTIALS OF BLAIR LEE AS SENATOR FROM MARYLAND.

CREDENTIALS OF BLAIR LEF AS SENATOR FROM MARYLAND.

Mr. SUTHERLAND (for himself and Mr. DILLINGHAM), from the Committee on Privileges and Elections, submitted the following views of a minority, to accompany Senate resolution 247:

I find myself unable to agree with the majority of the Committee on Privileges and Elections in holding that BLAIR LEF is entitled to a seat in this body as a Senator from the State of Maryland. The report of the committee in support of the applicant's right to the seat, while it recites the facts in detail and discusses at some length the contention of Senator Jackson, the sitting member, that he is entitled to retain his seat until the adjournment of the Maryland Legislature, fails to set forth the reasons for the conclusion of the committee that the election of BLAIR LEE was valid. The precise ground upon which this conclusion of the committee rests is therefore more or less a matter of surmise.

I. It was contended before the committee that the election of Mr. LEE could be sustained upon the grounds (1) that the provisions of the seventeenth amendment, that "When vacancies happen in the representation of any State in the Senate the executive authority of such State shall issue writs of election to fill such vacancies," carries with it as an incident the power on the part of the governor, thus authorized to issue a writ of election, to fix the conditions upon which the election shall be held; and (2) that the laws of Maryland in force prior to the adoption of the seventeenth amendment constitute sufficient legislative foundation for the election. I am unable to agree to either view.

The seventeenth amendment provides that two Senators from each

legislative foundation for the election. I am unable to agree to either view.

1. The seventeenth amendment provides that two Senators from each State shall be elected by the people thereof, instead of being chosen by the legislature, as provided in the original Constitution. This amendment, however, left intact paragraph 1, section 4, article I of the Constitution, which provides:

"The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof, but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators."

This provision is mandatory and exclusive in form. The right and duty of prescribing the various elements of an election is thereby devolved upon the legislature alone. The legislative authority is not limited to general elections; it applies to all elections, special as well as general.

volved upon the legislature alone. The legislative authority is not limited to general elections; it applies to all elections, special as well as general.

By the seventeenth amendment when a vacancy happens the authority of the executive is limited to issuing the writ of election, a purely ministerial act. If there were no other provision in the Constitution governing the subject, there might be reason for claiming that the authority to issue a writ of election carried with it by implication the authority to fix the time, places, and manner of holding such election, but here the Constitution in express terms devolves the latter power upon the legislature, and it is contrary to all reasonable rules of construction to hold that an authority thus expressly vested in one body is taken away and given to another by mere implication. The meaning of the Constitution seems to be perfectly clear. It is that the legislature must fix the time, places, and manner of holding all elections, including elections to fill vacancies, and, this having been done, in case of a vacancy the governor issues his writ of election, but such legislative foundation must exist before the executive act of issuing the writ can be effective. The reasons are obvious. The legislature will prescribe these conditions by general law which will be the same in all cases, while if the power is held to be in the governor to fix them in connection with the issuance of his writ the rules may differ in every case. In one case he may call an election upon 2 days' notice, in another at the various county seats; in one case that the manner of voting shall be by Australian ballot, in another by a totally different form of vote. If the governer has the incidental power to fix the time, it follows, of course, that he likewise has the power to fix the places and manner, since all are equally necessary to an election. Every condition of an election would therefore rest not upon uniform law but upon the unrestrained discretion of the governor in each case. Such a r

reserve to Congress the power to make or alter such regulations; namely, such regulations as the legislature is authorized to prescribe. It was evidently contemplated that the legislature might in some instance fall to prescribe the time, places, and manner of holding elections, in which event Congress could supply the omission by itself making the regulation; and it was further contemplated—and this is no less important—that the legislature might make unwise or improper regulations, in which event Congress could correct them by alteration; but if the power to make regulations in the case of special elections belongs to the governor Congress is powerless to interfere, however a supply property of the contemplated of

specific meaning of which to the contrary is made perfectly clear by the context.

The legislature sometimes recognizes this rule by express language, as for example in section 1 of the Revised Statutes of the United States where the interpretation of various words is declared "unless the context shows that such words were intended to be used in a more limited sense." But the rule is the same whether included in the interpretation clause or not. Thus in Dean of Ely v. Bliss (2 De G. M. & G., 471) it is said:

"There has been a great deal of discussion, which I am not surprised

sense." But the rule is the same whether included in the interpretation clause or not. Thus in Dean of Ely v. Bliss (2 De G. M. & G., 471) it is said:

"There has been a great deal of discussion, which I am not surprised at, in regard to the meaning of the words: but it is to be observed that although the meaning of the words is defined by the statute, yet that statute declares (what would have been supplied if it had not been so expressed) that the words are not to have that meaning attached to them in the interpretation clause if a contrary intention appears."

The general rule is stated in Wilberforce on Statutes, page 297, that—"The real purpose of an interpretation clause is to define the meaning of words when nothing else in the act is opposed to the particular sense which is thus plreed upon them."

In Second Sutherland's Statutory Construction, section 359, some English cases are cited to the effect that the statutory interpretation clause "could be satisfied by applying it to the word where there was nothing in the context to interpret it otherwise," and that the clause "should control where the words occur without being accompanied by any others tending to show their meaning; or to interpret words which are ambiguous or equivocal, and not so as to disturb the meaning of such as are plain." And again, in section 360, the same author says:

"On the other hand, general statutory definitions and rules of interpretation will apply when the statute in question is not plain; or, in other words, does not define and interpret itself. Where positive provisions are at variance with the definitions it contains, the latter, it seems, must be construed as modified by the clear intent of the former, on the principle that the special controls the general."

So it is said in 36 Cyc., 1106:

"But the interpretation clause should be used only for the purpose of interpreting words that are ambiguous or equivocal and not so as to disturb the meaning of such as are plain."

In L. R. 7, H. M. of L., 493, it is said:

"Even

a word must be under all circumstances. We rather think that it merely declares what persons may be comprehended within that term where the circumstances require that they should."

Other cases to the same effect might be cited.

Applying these rules to the case under consideration, it seems clear that the interpretation clause can not be held to extend the various or any of the election laws of Maryland to the election of a United States Senator, since in every case where the word "election" is used the intention of the legislature to not have it so applied unmistakably appears. Not only is this so, but this intention is emphasized by the specific provisions of the Maryland statutes providing for the nomination of United States Senators by the people and their election in pursuance of such nominations by the legislature. That the interpretation clause is not to receive the rigid application for which Mr. Lee's advocates contend is apparent upon a moment's reflection. The language of this clause is that the word "election" is to include elections of officers under the laws of the State or the United States.

Specific provision is made for the election of Representatives in the Congress of the United States. Is the word "election" as here used to be construed to include elections of State officers or to include the election of any other than Representatives in Congress? Clearly not. Again, provision is made for the election specifically of the mayor of Baltimore City on the Tuesday next after the first Monday in the month of May, 1899, etc. Is the word "election" here to be construed to include the election of officers to be elected under any law of the United States or any other officer than the one specifically named? Again, clearly not. These illustrations emphasize the rule laid down by the authorities that the interpretation clause is intended only to be resorted to in cases of doubt and is not to be followed where the contrary intention is clearly apparent in the substantive legislation.

II. I find myself

The seventeenth amendment contains the following saving clause:

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution."

Constitution."

I think this provision was inserted out of abundance of caution to prevent the seventeenth amendment being so construed as to legislate any sitting Member out of office. In the case of a Member elected for a regular term its effect is to preserve to him his seat until the expiration of the term for which he was elected. In the case of such a Senator the precise day when his term ends is fixed, but it seems to me it can not be doubted that it was also intended to save the seat of a Member who had been chosen by the governor to fill a vacancy. True, in that case the term does not end upon a particular day; it ceases upon the happening of an event, or, rather, as will be shown in a moment, upon the happening of one or the other of two events.

day; it ceases upon the happening of an event, or, rather, as will be shown in a moment, upon the happening of one or the other of two events.

In this view, when does Senator Jackson's term expire? The clause was intended to allow the sitting Member to serve the term which he would have served if the seventeenth amendment had not been adopted. Senator Jackson was appointed to fill the vacancy caused by the death of Senator Rayner, under the provisions of article 1, section 3, paragraph 2, which provides that—

"If vacancies happen by resignation or otherwise during the recess of the legislature of any State, the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies."

It has been several times held by the Senate, after thorough consideration, that the appointee in such case holds until the incoming legislature elects his successor or finally adjourns without an election. If this holding is not to be repudiated by the Senate it follows that the term of Senator Jackson was until the happening of one or the other of these events, namely, the election by the ensuing legislature of his successor or the final adjournment of the legislature is now precluded from electing a successor, and Senator Jackson's term would, therefore, not expire until the adjournment of the Legislature of Maryland, which, by constitutional limitation, must occur by April 7 of this year.

It is said however, that inasmuch as the seventeenth amendment

precluded from electing a successor, and Senator Jackson's term would, therefore, not expire until the adjournment of the Legislature of Maryland, which, by constitutional limitation, must occur by April 7 of this year.

It is said, however, that inasmuch as the seventeenth amendment provides for election by the people and inhibits an election by the legislature, that Senator Jackson's term would expire when his successor was elected by the people. But to so hold does violence to the language of the saving clause. True, the seventeenth amendment provides for an election by the people, but notwithstanding this the term of Senator Jackson is not to be affected by this or any other provision of the seventeenth amendment. It is therefore as though the saving clause had said: "The foregoing provision for an election by the people is not to be so construed as to affect the term of any Member heretofore chosen." In other words, the provision for an election by the people does not become operative so far as Senator Jackson's seat is concerned until he has served the term which he would have served if the amendment had never been adopted.

The former decisions of the Senate as to the term of an appointee of a governor are borne out by the language of the Constitution. The executive is authorized "to make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies." Obviously the phrase "until the next meeting of the legislature. The power of the governor to appoint and not the term of service of his appointee. The power of the governor to make a temporary appointment must be exercised before the next meeting of the legislature. The meeting of the legislature that primary authority is incapable of acting and continues to be incapable of acting so long as it is in recess. During that period, and that period only, the secondary appointing power, amely, the governor, which shall then fill such vacancies." If the vacancy be filled, the appointee's term is at an end; if not filled, t

GEORGE SUTHERLAND.

WILLIAM P. DILLINGHAM.

REPORTS OF COMMITTEES.

Mr. PERKINS, from the Committee on Naval Affairs, to which was referred the bill (S. 4007) to authorize the Secretary of the Navy to enter into contract for use by the Government of dry docks at Hunters Point, San Francisco, Cal., reported it without amendment and submitted a report (No. 163) thereon

Mr. MARTIN of Virginia, from the Committee on Appropriations, to which was referred the bill (S. 2773) to increase the limit of cost of the public building authorized to be constructed at New Orleans, La., asked to be discharged from its further consideration and that it be referred to the Committee on Public

Buildings and Grounds, which was agreed to.

Mr. RANSDELL, from the Committee on Commerce, to which was referred the bill (S. 126) to permit citizens of the United States to be admitted to Government tuberculosis hospitals, asked to be discharged from its further consideration and that it be referred to the Committee on Public Health and National Quarantine, which was agreed to.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. STERLING (for Mr. JACKSON) :

A bill (S. 4126) amending the act of Congress approved June 26, 1912, regulating the admission of pupils to the public schools of the District of Columbia; to the Committee on the District of Columbia

By Mr. SHERMAN:

A bill (S. 4127) granting an increase of pension to William Day; to the Committee on Pensions.

By Mr. KENYON:

A bill (8. 4128) for the relief of Abraham Judd; to the Committee on Military Affairs.

By Mr. CHAMBERLAIN:

bill (S. 4129) granting a pension to Milton W. Hollister (with accompanying papers);

A bill (S. 4130) granting a pension to Arabella Roberts (with

accompanying papers); and A bill (S. 4131) granting an increase of pension to Eliza J. Sumner; to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 4132) to correct the military record of William H. Richhart; to the Committee on Military Affairs. A bill (S. 4133) granting an increase of pension to Willis

Layton; and

A bill (S. 4134) granting an increase of pension to George W. Hayes (with accompanying paper); to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 4135) granting an increase of pension to Henry M. Chase; to the Committee on Pensions.

Mr. WEEKS. By request I introduce a joint resolution pro-

posing a constitutional amendment relating to the Federal control of insurance

The joint resolution (S. J. Res. 103) proposing an amendment to the Constitution of the United States was read twice by its title and referred to the Committee on the Judiciary.

AMENDMENT TO THE DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. KENYON submitted an amendment providing for the use of the money due the estates of deceased colored soldiers, sail-ors, and marines of the Civil War, etc., intended to be proposed by him to the District of Columbia appropriation bill, which was referred to the Committee on the District of Columbia and ordered to be printed.

COOPERATIVE AGRICULTURAL EXTENSION WORK.

Mr. STERLING. I submit an amendment, in the nature of a substitute, intended to be proposed by me to the bill (S. 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto and the United States Department of Agriculture. I ask that the amendment lie on the table and be printed.

The VICE PRESIDENT. The amendment will lie on the table

and be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto and the United States Department of Agriculture, which was re-ferred to the Committee on Agriculture and Forestry and ordered to be printed.

I concur in the foregoing views.

RAILROADS IN ALASKA.

Mr. CHAMBERLAIN (for Mr. LA FOLLETTE) submitted an amendment intended to be proposed to the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railways in the Territory of Alaska, and for other purposes, which was ordered to lie on the table and be printed.

THE TELEGRAPH AND TELEPHONE AS ADJUNCTS TO POSTAL SERVICE.

Mr. NORRIS. I desire to make a motion to discharge the Committee on Post Offices and Post Roads from the further consideration of Senate resolution 242. I have reduced the motion to writing in the form of a resolution. I ask that it be read, and then, I believe, under the rule, it will have to lie over for one day.

The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution (S. Res. 250), as follows:

Resolved, That the Committee on Post Offices and Post Roads be discharged from further consideration of Senate resolution 242, directing the Postmaster General to send to the Senate certain information relative to governmental ownership and control of the telegraph and telephone facilities.

The VICE PRESIDENT. The resolution will go over one day under the rule.

LABOR CONDITIONS IN MINING DISTRICTS IN COLORADO.

Mr. THOMAS. I submit a resolution and ask to have it read and referred to the Committee on Education and Labor.

The resolution (S. Res. 251) was read and referred to the

Committee on Education and Labor, as follows:

The resolution (S. Res. 251) was read and referred to the Committee on Education and Labor, as follows:

Whereas a difference between the coal miners and the operators of coal mines in Colorado, and notably in the counties of Huerfano and Las Animas in said State, culminated in a general strike in September last, which is still unsettled and which disturbed condition has resulted in violence, bloodshed, and disorder; and
Whereas the military forces of the State were mobilized in October last by the governor of the State for the protection of life and property, and have since then been in occupation and control of said counties, notwithstanding which the said strike continues with no prospect of an early termination; and
Whereas it is asserted—

(1) That a system of peonage has been established in said counties by certain of the employer companies in order to continue the operation of their mines.

(2) That the immigration laws of the United States have been and are being violated by some of said operating companies for the same reasons by bringing in laborers under contract.

(3) That many persons have been arrested, imprisoned, and subjected to arraignment, examination, and punishment without due or any process of law, and in violation of their constitutional rights as citizens of the United States.

(4) That a republican government has had no existence in fact in said counties for many years, all the officials thereof having been nominated, chosen, and maintained in their several positions by some of said operating companies, through whose agencies many foreign employees have been naturalized without regard to the requirements of the Federal statutes in relation thereto, and whose votes have been under the control of said companies.

(5) That military tribunals have been created and are in operation for commitment, trial, and conviction, notwithstanding the courts are and have at all times been open and engaged in the administration of justice.

(6) That all attempts and overtures at arbitration of or a settl

by the executive authority of the State and a large proportion of the citizens of the State as by the miners involved: Therefore be it Resolved, That the Senate Committee on Education and Labor is hereby directed to make a full investigation of the industrial conditions existing in said counties of Las Animas and Huerfano and in such other portions of said State as are involved therein for the purpose of ascertaining whether the matters and things hereinabove set forth are true, and why the disputes and differences causing said conditions have not been adjusted, and to make such report and recommendations as in its judgment are pertinent and justified by the facts. Said committee or any subcommittee thereof is hereby empowered to sit and act during the sessions of Congress, or of either House thereof, at such time and place as it may deem necessary; to require, by subgema or otherwise, the attendance of witnesses and production of papers, books, and documents; to employ stenographers at a cost not exceeding \$1 per printed page; to take and make a record of all evidence taken and received by the committee and keep a record of its proceedings; to have such evidence, record, and other matter required by the committee printed. The chairman of the committee or any member thereof may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee or subcommittee thereof. Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default or who having appeared refuses to answer any questions pertinent to the investigation herein authorized, shall be held to the penatices provided by section 102 of the Revised Statutes of the United States. The expenses of such investigation shall be paid from the contingent Expenses.

ELECTION OF SENATORS.

ELECTION OF SENATORS.

Mr. WALSH. Mr. President, I desire to give notice that on Friday next, January 23, at the conclusion of the routine morning business, I shall ask the Senate to take up for consideration

Senate bill 2860, providing a temporary method of conducting the nomination and election of United States Senators.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had, on January 20, approved and signed the following act and joint resolution:

S. 3484. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large; and

S. J. Res. 5. Joint resolution providing for the appointment of a commission to consider the need and report a plan for national aid to vocational education.

REVIEW OF DECISIONS OF HIGHEST STATE COURTS.

Mr. ROOT. Mr. President, according to the notice that I gave yesterday, I ask unanimous consent for the immediate consideration of the bill (S. 94) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary. approved March 3, 1911. The bill was reported by me yesterday from the Judiciary Committee, and, as I stated, a similar bill has already passed the Senate once. Twice, after full consideration, it has been unanimously reported from the Committee on the Judiciary

The VICE PRESIDENT. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consid-

The bill had been reported from the Committee on the Judiciary with an amendment, on page 2, line 3, after the words "have been," to insert "in favor of the validity of the treaty or statute or authority exercised under the United States or may have been," so as to make the bill read:

may have been," so as to make the bill read:

Be the cnacted, etc., That section 237 of chapter 10 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, is hereby amended by adding thereto the following:

"It shall be competent for the Supreme Court to require, by certiorari or otherwise, any such case to be certified to the Supreme Court for its review and determination, with the same power and authority in the case as if it had been carried by appeal or writ of error to the Supreme Court, although the decision in such case may have been in favor of the validity of the treaty or statute or authority exercised under the United States or may have been against the validity of the State statute or authority claimed to be repugnant to the Constitution, treaties, or laws of the United States, or in favor of the title, right, privilege, or immunity claimed under the Constitution, treaty, statute, commission, or authority of the United States."

The amendment was agreed to.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engressed for a third reading, read the third time, and passed.

WOMAN SUFFRAGE.

The VICE PRESIDENT. The morning business is closed. Mr. ASHURST. Mr. President, I send to the desk and ask to have read a request for a unanimous-consent agreement.

The VICE PRESIDENT. Under the rule, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	Perkins	Smoot
Bacon	Johnson	Pittman	Stephenson
Bankhead	Jones	Pomerene	Sterling
Borah	Kenyon	Ransdell	Stone
Bristow	Kern	Reed	Sutherland
Bryan	Lane	Robinson	Swanson
Burleigh	Lippitt	Root	Thomas
Burton	Lodge	Saulsbury	Thompson
Chamberlain	Martin, Va.	Shafroth	Walsh
Chilton	Martine, N. J.	Sheppard	Weeks
Cummins	Nelson	Sherman	Williams
Dillingham	Norris	Shively	Works
Gallinger	Oliver	Simmons	
Hollis	Overman	Smith, Md.	

Mr. MARTINE of New Jersey. I am requested to state that the Senator from South Carolina [Mr. SMITH] is absent from the Senate on account of business connected with the committee of which he is chairman.

Mr. BRYAN. I desire to state that my colleague [Mr. FLETCHER] is absent from the city and is paired with the Sena-

tor from Wyoming [Mr. Warren].

Mr. RANSDELL. I wish to announce that my colleague [Mr. Thornton] is absent on account of sickness.

The VICE PRESIDENT. Fifty-four Senators have answered to the roll call. There is a quorum present. The Senator from Arizona [Mr. Ashurst] presents a request for a unanimousconsent agreement, which will be read.

The Secretary read as follows:

The Secretary read as follows:

It is hereby agreed, by unanimous consent, that on Monday, the 2d day of February, A. D. 1914, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of Senate joint resolution No. 1, the same being a joint resolution proposing an amendment to the Constitution of the United States extending the right of suffrage to women; and that, at not later than the hour of 4 o'clock p. m., on Friday the 6th day of February, A. D. 1914, the Senate will proceed to vote upon all amendments that may then be pending, all amendments that may then be offered, and upon the said joint resolution, through the regular parliamentary stages, to its final disposition: Provided, houcever, That during the debate thereon each Senator, if he so desires, shall be entitled to speak for 10 minutes and no longer upon each amendment that may then be pending or that may then be offered to the said joint resolution.

The VICE PRESIDENT. Is there objection?

The VICE PRESIDENT. Is there objection?

Mr. BRYAN. I object, Mr. President.

The VICE PRESIDENT. There being objection-

Mr. ASHURST. I move that so soon as Calendar No. 114, being Senate bill 3491, relative to cooperative agricultural extension work, shall have been disposed of-which, if I understand the parliamentary situation, follows the present unfinished the Senate shall then proceed to the consideration of Senate joint resolution No. 1, being Order of Business No. 52, which has been recommended by and unanimously reported from the Committee on Woman Suffrage.

Mr. SMOOT. Mr. President, I would like to ask the Senator from Arizona if it would not be very much better for him to request that the joint resolution be made a special order, rather than to make a motion of the kind which he has made, at this

Mr. ASHURST. I appreciate the question and the experience of the Senator from Utah, but I fear that if the joint resolution is made a special order, consideration for one moment only would deprive it of its position on the calendar, whereas I wish it to have such parliamentary status that it would require unanimous consent to lay it aside; in other words, I want a vote taken on the joint resolution and to have it disposed of.

If making it a special order would put it in a position where it may not be laid aside except by unanimous consent, of course would cheerfully agree to that.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Arizona what is the status of the joint resolution

upon the calendar?

ASHURST. This joint resolution, which proposes an amendment to the Constitution conferring the right of suffrage upon women, occupies the first place on the calendar, which,

however, gives it no preference at all.

Mr. WILLIAMS. It does, in this way, that when the time comes to take up the calendar, naturally this joint resolution becomes the first matter for consideration unless a motion is made and carried or unanimous consent is obtained-one or the other-to take up something else.

Mr. ASHURST. But when the calendar is taken up for consideration under Rule VIII, one objection will carry the joint

I want to get it into a situation-

Mr. WILLIAMS. But after a certain time the Senator from Arizona can move that the Senate take up the joint resolution

for consideration.

Mr. BACON. The Senator can make the motion at that time that the joint resolution be taken up, notwithstanding the

Mr. WILLIAMS. The Senator can move that the joint reso-

lution be taken up after a certain time.

Mr. BACON. No; notwithstanding there is objection, the joint resolution may be taken up by a majority vote.

Mr. WILLIAMS. It comes up first on the calendar.
Mr. ASHURST. I will say to Senators that I have no pride
of opinion on the subject. I do not care how or by what method we reach the consideration of the joint resolution so

long as the joint resolution is voted upon.

I suggest to the Senator to let the joint resolution come up in its regular order when the calendar is being considered. The joint resolution comes up first upon the calendar. For one, I do not think that any exceptional

methods ought to be pursued with regard to its consideration. Mr. THOMAS. Mr. President-

Mr. ASHURST. I yield to the Senator from Colorado. Mr. THOMAS. I think the motion of the Senator from Arizona is appropriate and is the best method of bringing up this joint resolution for the consideration of the Senate. The calendar is frequently called when it is not expected by a great many of us that it will be reached, and as a consequence important measures may go over at a time when, if that were not the case, they could be taken up in regular order.

It is true that while this measure, because it occupies the first place on the calendar, is not entitled for that reason to any special consideration, it is also true that it is an im-

portant measure and it ought to be disposed of. If the Senate is not prepared to give its assent to the measure, let us know it and get it off the calendar. If, on the contrary, as a good many of us hope, it will command a majority vote of the Senate, then the sooner that is done the better; and if some special arrangement can be made concerning it whereby we will know when it is to come up it will be much better than to leave it in a position where it may come up at some time when some of us who desire to participate in its discussion may be absent.

I do not think that the suggestion made by the Senator from Mississippi [Mr. Williams] is entirely pertinent; that is, that there is no reason why we should make this joint resolution the subject of any special consideration. The same suggestion would have been applicable, at least, to many measures, among which would be that which is now the unfinished business and upon which we will vote to-morrow. I have observed that the way in which to get the attention of the Senate to measures is to assign them by special motion to some particular time and occasion. When that is done we can transact a good deal of business, and when it is not done these matters go over from day to day on objection.

Mr. WILLIAMS. If the Senator will pardon me, what I said was that I did not want this resolution to be given any exceptional standing except by unanimous consent. Of course, there are motions that can be made with regard to it under the plain, parliamentary law of the Senate, and those motions, of course, would be voted upon when made. I was merely suggesting to the Senator from Arizona that he would obtain no advantage by the adoption of his motion, because, so far as taking it up is concerned, whenever the calendar is sounded it comes first, anyhow,

Mr. THOMAS. That is true.
Mr. WILLIAMS. Only unanimous consent could displace it.
Mr. THOMAS. But the calendar is not reached every day, as the Senator well knows. I do not want to insist upon any exceptional method by means of which this matter is to be brought to the attention of the Senate, nor do I understand that the motion of the Senator from Arizona is an exceptional On the contrary, he is following the course which I observe has been taken here whenever Senators desire to get any measure of importance before the Senate for consideration. In consequence I hope that his motion will prevail.

Mr. SMOOT. Mr. President, I was only trying to assist the

Senator from Arizona-

Mr. ASHURST. I appreciate that.

Mr. SMOOT. In getting this matter before the Senate. Under the rules of the Senate I believe the Senator from Arizona can proceed in only two ways. One is to ask-

Mr. THOMAS. May I say a word? Mr. SMOOT. If the Senator will wait until I finish-

Mr. SMOOT. If the Senator will wait affect I missing.

Mr. THOMAS. I was simply going to say that I have no desire to insist obstinately upon the motion made by the Senator from Arizona. I would also be very glad to yield to the superior knowledge and experience of the Senator from Utah as to the method to be pursued.

Mr. SMOOT. As I was saying, I think the Senator from Arizona has two ways to proceed in this matter. One is by asking unanimous consent, which, as I understand, he has done and it has been refused. The other way, in my opinion, for the Senator to proceed is to give notice that, at the conclusion of the consideration of the Smith-Lever bill, he will then move to take up Senate joint resolution No. 1 for consideration.

Mr. GALLINGER. Mr. President, I will suggest to the Senator from Arizona, in addition to that, that if that motion prevails the joint resolution then becomes the unfinished business. I concur with Senators who have suggested to the Senator from Arizona that it would be better to give notice of a motion of that kind. Under the rules, I think we could hardly vote that we should take up at a given time a certain bill and at another given time a certain other bill. We do not know what will be before the Senate; but the Senator can give notice of a motion to take up the joint resolution, and I feel very sure that the motion will prevail, whatever the fate of the resolution itself may be.

Mr. ASHURST. Mr. President, my first duty is to thank the Senators who have indicated what I believe to be the best way to reach the situation. Therefore I will withdraw the motion I just made, and will give notice that, immediately upon the disposition of the cooperative agricultural extension bill, to wit, Calendar No. 114, Senate bill 3091, I shall then immediately move that the Senate proceed to the consideration of Senate joint resolution No. 1, Calendar No. 52, which motion, if carried, will make the joint resolution the unfinished business of the Senate.

Mr. JONES. Mr. President, I should like to ask the Senator-I have not had time to examine the calendar-whether there has been any arrangement made for the disposition of the agricultural-extension bill?

Mr. ASHURST. Nothing more than that the Senator from Georgia [Mr. SMITH] has given notice, which appears upon the calendar, that, immediately upon the final disposition of the Alaska railroad bill, he will move to proceed to the considera-

tion of the agricultural-extension bill.

Mr. JONES. Of course, no one knows how long that bill will be under consideration by the Senate or whether or not it may be displaced by something else, so that it leaves the time when the Senator will make his motion, it seems to me, very uncertain. I want to suggest to the Senator-I may be mistaken, but, as I understand, in the morning hour when the ordinary routine or morning business is concluded a Senator can ask unanimous consent for the consideration of any particular measure, and if that is refused be can then make a motion, notwithstanding the objection, to proceed with its consideration, and if adopted that consideration will continue until 2 o'clock on any day unless the matter is sooner disposed of.

Mr. ASHURST. I appreciate all that the Senator from Wash-

ington says.

Mr. JONES. I thought that might be the better way to do it. Mr. ASHURST. I am inclined to follow the suggestion made by the Senator from Utah [Mr. SMOOT] and the Senator from New Hampshire [Mr. Gallinger], although I appreciate the interest manifested and the suggestions made by the Senator from Washington [Mr. Jones].

Mr. JONES. I just thought that possibly the Senator might give notice, for instance, that on Friday next, after the routine morning business shall have been concluded, he will ask the Senate to proceed to the consideration of the joint resolution, and that this might get his resolution sooner before the Senate.

Mr. ASHURST. I shall give close attention to the progress of business, and at the conclusion of the agricultural-extension bill, when that bill is disposed of, I shall immediately rise and ask permission to be heard to make this motion.

The VICE PRESIDENT. The calendar, under Rule VIII, is in order. The first business on the calendar will be stated.

The first business on the calendar was the joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women. The Secretary read the joint resolution.

Mr. THOMAS. In the absence of the Senator from Arizona [Mr. ASHUEST], who, I see, is not in his seat, I suggest that the joint resolution go over.

Mr. BRISTOW. Why should it go over, Mr. President?

Mr. BRISTOW.

Why not pass it?
Mr. GALLINGER. Why not take the vote now?

Mr. THOMAS. I simply call attention to the fact that the Senator is not here.

Mr. BRISTOW. But what is the use of putting it over? Why not vote on it and pass it? Perhaps we can pass it

and get it out of the way.

Mr. THOMAS. I understood the Senator from Arizona had announced the course he would follow with reference to it, and it might not be observed by proceeding with it now. I am ready to take it up now.

Mr. BRISTOW. I should not think the Senator would want it passed over if we can pass it now, unless he wishes to make

an address on it.

Mr. ASHURST entered the Chamber.

Mr. SMOOT. Mr. President, I see the Senator from Arizona has entered the Chamber.

There being no objection, the Senate, as in Committee of the

Whole, proceeded to consider the joint resolution.

Mr. ASHURST. Mr. President, I was called into the marble room by a gentleman from Arizona, and upon my return I find that Senate joint resolution No. 1 has been taken up for consideration.

Mr. WILLIAMS. Why not go ahead and let some of the Senators make their speeches upon it now?

Mr. GALLINGER. Why not vote on it? All right; let us vote. Mr. LODGE.

Mr. ASHURST. I think the measure is so important that something should be said on it. As soon as I can get my breath I propose to be heard on it.

Mr. GALLINGER. But the Senator will have only five min-utes under the rule. If the Senator can get the joint resolution passed, will he not forego his speech and deliver it in Arizona at some time?

Mr. ASHURST. I shall be very glad to do so.
Mr. THOMAS. If the Senator will assure us that it will Dass

Mr. GALLINGER. Let us vote. We can not give that assurance, of course

The VICE PRESIDENT. The resolution is in the Senate as in Committee of the Whole and open to amendment. If there be no amendment to be proposed, the joint resolution will be reported to the Senate.

The joint resolution was reported to the Senste without

amendment.

The VICE PRESIDENT. The resolution is in the Senate and open to amendment. If there be no amendment to be proposed. the question is, Shall the joint resolution be read a third time?

Mr. ASHURST. Mr. President, much as I should like to forego the delivery of what I have prepared, I am balancing in my mind whether or not it is my duty to deliver this speech.

Mr. LODGE. I suggest that the Senator deliver the speech after the joint resolution is passed.

Mr. ASHURST. If we can have a roll call, Mr. President-Mr. GALLINGER. We will have a roll call.

Mr. LODGE. We will have a roll call right off.

Mr. CHAMBERLAIN. Mr. President, I think this matter is of enough importance to justify our hearing the Senator upon I assume there is not a Senator here who will insist upon the five-minute rule being applied to the Senator from Arizona in the discussion of the joint resolution. The question is not one that can be laughed down by the Senate when the Senator gets up to address the Senate, and the people of this country will be heard from in reference to it.

I think, therefore, the joint resolution ought to be treated with the greatest courtesy and the greatest consideration, as it will be by the people of some of the States, even if there is a disposition on the part of some persons in the Senate to laugh the matter out of court. I think the Senator from Arizona ought to deliver his speech, and deliver it now, and let the RECORD show who objects to its further consideration.

Mr. ASHURST. I will do so.

Mr. WILLIAMS. Mr. President, there has been no disposition to laugh the question out of court. There was a very natural disposition, in which the Senator from Arizona joined, to laugh at his embarrassment for a moment because the question had been precipitated upon him unexpectedly. It is not only a serious question, but it is about the most serious question with which the American people have been faced for quite a long time. Men assuredly can have permission to laugh when a fellow Senator finds himself in an embarrassing situation; and the dignity of the Senate should not forbid that momentary cheerfulness and mirthfulness in which all human beings are permitted to share.

Mr. GALLINGER. As I made an observation concerning the matter, I wish to assure my friend from Oregon [Mr. CHAM-BERLAIN] that there was no levity on my part. I shall vote for the joint resolution when it is submitted to the Senate; but it occurred to me that as we had reached it, and there was a disposition manifested to vote on it, we might forego speech making in connection with it.

I should like to hear the Senator from Arizona, but he will not change a vote. Every Senator has made up his mind how he is going to vote on the joint resolution, and no oratory will change a single vote. So it occurred to me that if we could vote on the joint resolution immediately, and dispose of it, it would be better to do so than to postpone it and open it up to general debate.

That was my feeling; and any suggestion from me was made

by a friend of the joint resolution.

Mr. ASHURST. Mr. President, I have no pride of expression but I believe the adoption of this amendment to the Constitu-tion of the United States is one of the most important reforms we can put into effect. I do not want to imitate the bad example which was set during the trial of the seven bishops, in When the court was about to rule in favor of the defendants, one of the attorneys-I forget whether it was Finch or Pollexfen-was so anxious to make a speech that he thereby nearly lost his case by reason of other witnesses coming in during the delay.

I do not wish to occupy such an attitude as that; but since I had the honor to be chosen to report the joint resolution, and since it proposes an amendment to the Constitution of the United States of America and has to do with the political liberty of 30,000,000 people, I do think I ought at least to say something about it. It may be that I shall not change a vote. Certainly there will be no oratory on my part that will change a vote. Certainly there will be no oratory on my part that will change a vote, because, even if I could, I should not attempt or essay any oratory in the delivery of this address.

Mr. McCUMBER. Mr President—

Mr. ASHURST. I yield to the Senator from North Dakota.

Mr. McCUMBER. Before the Senator proceeds, this being an intercept of the senator proceeds, this being an intercept of the senator proceeds.

important subject, running under the five-minute rule now, and

since we can not dispose of it in that time, I ask that the matter may go over. The Senator can take it up at another time in the proper order and discuss it. I ask that it go over.

Mr. ASHURST. Of course, if I am to be limited to five

minutes, it would be useless for me to attempt the delivery of my address, because it would take an hour and a half for me

The VICE PRESIDENT. The Chair would be compelled, of course, to rule that, except by unanimous consent of the Senate, the Senator would be limited to five minutes.

Mr. MARTIN of Virginia. I ask unanimous consent that the five-minute rule be not applied to the Senator from Arizona in discussing this matter this morning.

Mr. WILLIAMS. I join in that request, Mr. McCUMBER. I object to the request unless it is applied to everyone who may address the Senate upon this subject.
Mr. MARTIN of Virginia. I will enlarge the request to

Mr. McCUMBER. I do not think the rule ought to be suspended simply with reference to one Senator, and I do not think we ought to dispose of this matter in one day. No one expected it would come up for final disposition at this time. We ought to discuss it at length and fully. For that reason, in order that the Senator himself may not feel embarrassed in its full discussion and may not have to hurry, and in order that the Senate may have time to ponder upon the words he shall say in reference to it, I make the suggestion and object to the present consideration of the joint resolution and ask that it be passed over.

Mr. WILLIAMS. Mr. President, I ask unanimous consent that, so far as this particular joint resolution is concerned, the five-minute rule shall be suspended with regard to all Senators who choose to address themselves to it.

The VICE PRESIDENT. During the morning hour? Mr. WILLIAMS. Yes; during the morning hour.

Mr. LODGE. That would block the whole calendar.
Mr. SMOOT. That only applies until 2 o'clock to-day, and the Senator will not be through with his speech by that time.

Mr. WILLIAMS. During this morning hour and other morning hours, as long as the joint resolution is before the Senate.

Mr. LODGE. Such a unanimous-consent agreement would block the calendar absolutely.

Mr. WILLIAMS. It would until the joint resolution is dis-

posed of, or until some agreement is made to take it up.

Mr. LODGE. Why would it not be much better at the proper time to move to take it up? There is no objection on the part of the Senate to taking it up, as I understand.

Mr. WILLIAMS. The practical result of it would be that the

Senator from Arizona could go ahead this morning and open the discussion.

Mr. LODGE. If it applies only to this morning, I have no objection.

Mr. MARTIN of Virginia. That is all.

Mr. WILLIAMS. Then, to-morrow morning we can take it up and do the same thing over again for somebody else, or

refuse to do it, as we choose.

Mr. BRISTOW. Why does not the Senator from Arizona move to take up the bill? That will obviate the five-minute

Mr. SMOOT. He can not do that until 2 o'clock.

Mr. BRISTOW. At 2 o'clock the joint resolution would have to give way to the unfinished business; but the Senator can move to take it up, and then the five-minute rule will not apply. Mr. GALLINGER. That is true.

Mr. BRISTOW. He could discuss it until 2 o'clock, when it

would be displaced by the unfinished business

The VICE PRESIDENT. The Chair would like to know a little something about the rules. The Chair has been of the opinion that during the morning hour a Senator could not move to take up a bill if there was an objection to it-

Mr. BRISTOW. An objection would put it over.
The VICE PRESIDENT. But that after 2 o'clock a Senator could move to take up a bill.
Mr. GALLINGER. That is right.
Mr. BRISTOW. As I understand the rules, an objection on the part of any Senator will put over any bill during the morning hour, under Rule VIII.

Mr. LODGE. Oh, no.

Mr. BRISTOW. But if a motion is made to take it up and the motion prevails, it is before the Senate.

Mr. LODGE. The rule is clear, I think, if the Senator will

permit me.
The VICE PRESIDENT. The Chair has no opinion at all in regard to the matter.

Mr. LODGE. I will read Rule VIII:

ORDER OF BUSINESS.

At the conclusion of the morning business for each day, unless upon motion the Senate shall at any time otherwise order, the Senate will proceed to the consideration of the Calendar of Billis and Resolutions and continue such consideration until 2 o'clock; and bills and resolutions that are not objected to shall be taken up in their order, and each Senator shall be entitled to speak once and for five minutes only upon any question; and the objection may be interposed at any stage of the proceedings, but upon motion the Senate may continue such consideration. proceedings, but upon motion the beating of the consideration of any matter shall be determined without debate.

The Senator has nothing to do but to make his motion, and if it is carried he can continue his remarks without limitation.

The VICE PRESIDENT. Let the Chair make a further inquiry. If the motion is made and carried, the joint resolution becomes the unfinished business, does it not?

Mr. GALLINGER. Oh, no.

Mr. LODGE. Not in the morning hour. Mr. GALLINGER. It falls at 2 o'clock.

It falls at 2 o'clock. Mr. LODGE.

The VICE PRESIDENT. The Chair will say that it has been ruled otherwise in this body and has displaced other unfin-

Mr. SMOOT. Let me call attention to section 3 of Rule VII:

Until the morning business shall have been concluded and so announced from the chair or until the hour of 1 o'clock has arrived no motion to proceed to the consideration of any bill, resolution, report of a committee or other subject upon the calendar shall be entertained by the presiding officer unless by unanimous consent.

The VICE PRESIDENT. That was the view of the Chair. Mr. LODGE. But the morning business has been concluded for some time.

Mr. SMOOT. But not until 1 o'clock.

Mr. LODGE. Oh, yes; it says "or until 1 o'clock." The morning business has been concluded. Of course it is open to the Senator to move to proceed to the consideration of the joint resolution. That lasts until 2 o'clock.

Mr. ASHURST. I move that the Senate proceed to the

consideration of Senate joint resolution No. 1.

Mr. LIPPITT. I understand that action will allow the Senator to go on until 2 o'clock?

Mr. GALLINGER. Yes; if the motion is carried.

Mr. LIPPITT. I had intended to relieve myself of some remarks and ideas that I had upon monopoly in connection with Alaska about 2 o'clock or some time during the afternoon, and I do not want the Alaska bill displaced.

Mr. WILLIAMS. It can not be displaced. Mr. GALLINGER. The motion is not debatable.

The VICE PRESIDENT. The question is on the motion of the Senator from Arizona that the Senate proceed to the consideration of Senate joint resolution No. 1.

The motion was agreed to.

Mr. ASHURST. Mr. President, I rise to address the Senate in favor of Senate joint resolution No. 1, which was, on June 1913, reported favorably from the Committee on Woman Suffrage.

Observant persons will not fail to notice that marked changes in the political and social affairs in the United States are now slowly taking place. Conditions under which we have been living are changing, for society and government are dynamic, not static, in character.

CONSTITUTIONAL AMENDMENTS.

Only a few years since some of the most profound citizens of this Republic believed that by reason of the complicated procedure and large majorities required it was difficult, if not impossible, to amend the Constitution of the United States, and some eminent statesmen even urged that strained constructions should be placed upon the Constitution so as to change somewhat the structure of our political system, bring it into conformity with the dynamic conditions of the day, and thus secure needful reforms.

Dicey says of amending the Constitution of the United States:

The sovereign of the United States has been roused to serious action but once during the course of 90 years. It needed the thunder of the Civil War to break his repose, and it may be doubted whether anything short of impending revolution will ever again rouse him to activity. But a monarch who slumbers for years is like a monarch who does

Speaking in the Senate of the United States on the 5th day of July, 1909, Hon. H. D. Money, a scholar, orator, and statesman whose services here added glory and usefulness to this body, said:

Mr. President, I am one of those who believe that there will never be another amendment to the Constitution of the United States.

* * * I do not believe this amendment—income-tax amendment—to the Constitution will ever be a part of it. * * *

But, contrary to the opinion which a few years since prevailed among many thinking people, within the past 10 months two amendments to the Constitution of the United States have been proclaimed, and they were adopted under the procedure which is indisputably complicated and involved. The adoption of these amendments, in addition to the valuable reforms they will bring about, has convinced the American people that our Federal Constitution is a living, breathing, dynamic force that protects persons as well as property, and that it is not a procrustean bed of fixity, incapable of amendment or change.

The belief that the Constitution of the United States may be

amended, and that in some particulars it ought to be amended, is not confined to any one political party. It extends to all of them, thus demonstrating that the "let-alone," noninterference, careless, laissez faire policy does not meet the demand of the present day. Indeed, one of the most needful of all reforms would be a constitutional amendment which will remove the obstacles, prolixities, and delays now incident to securing an amendment to our Federal Constitution, and unless an amendment be adopted providing for an easier method of amending the Constitution there will soon be a widespread demand for a national constitutional convention.

The "fathers" of the Constitution were not sanguine enough to suppose that the organic law which they framed was so perfect that it would never be altered. The experience of the Government under the Articles of Confederation had produced the

belief that there was need of a system of amendment by which the Constitution could be made to conform to the requirements

of future times.

The idea that some provision should be made in the instrument of government itself for the method of its amendment is peculiarly American. Provision for the regular and orderly amendment of an instrument of government first appears in the Pennsylvania frame of government of 1683. A similar provision reappears in the act of settlement of 1683, in the Pennsylvania frame of 1696, and in the Pennsylvania charter of privileges of 1701. Each of these documents provides that it shall not be altered, changed, or diminished "without the consent of the governor" "and six parts of seven of the assembly."

It is difficult to avoid the conclusion that it was the expectation of the members of the Federal Convention that a frequent use of the amending power would be exercised. They doubtless thought that the plan adopted would secure the desired end whenever the popular will would justify a change. But whatever may have been the view of the "fathers," it is now obvious that the methods of amendment as provided in the Constitution are so unreasonably clumsy and unwieldy that it is the duty of the statesmen of the present day to submit some plan whereby amendments may be brought about within a reasonable time and by a method less complex.

A government which assumes to be fixed and unalterable will soon become wholly unsuited to the circumstances of the nation and will have a tendency to degenerate into a despotism or will

produce a revolution.

While it is quite true that marked changes in our political and social conditions are occurring, it is none the less true that these changes are taking place slowly. Indeed, it is impossible that it should be otherwise, for no wound or disease of the body politic ever healed except by slow degrees. Many honest and well-intentioned persons "view with alarm the hasty judgments of the people"; but, in truth, the judgments of the people are not hasty. The judgments of the people are extremely deliberate. The great mass of the people patiently bear present ills; they turn from old ideas, customs, forms, and ways with much reluctance, and usually with doubts and misgivings. It is almost a natural habit to try to preserve what is established. Those who "view with alarm the hasty judgments of the people" may give their perturbed spirits rest, for if any fault be found with the mass of the people, it is not because they act too hastily but because they act too slowly and with too much deliberation and conservatism. Consider, for instance, how long the American people permitted themselves to be poisoned by impure and adulterated foods; reflect with what patience the people have suffered the delays and defeats of a pure-fabric bill; think how uncomplainingly the people still pay for woolens and frequently receive shoddies, because we will not pass the pure-fabric bill; reflect how many years the people permitted Members of Congress to ride on free passes over the railroads. Consider how long the people permitted public men to publish recommendations of patent medicines and other nostrums. Consider how uncomplainingly workingmen face danger in mines, in the fields, on the railroads, and in the workshops. Consider how long the American people tolerated a protective-tariff system which robbed the many for the enrichment of the favored few. Think how cheerfully and how

regularly the poor tax themselves to support the Federal Government, the State, the county, and the city. Consider with what patience the people permitted the Armor-plate Trust to take \$77,000,000 from the Public Treasury and then furnish only \$52,000,000 worth of armor plate to the Government. When we hear a timid "statesman" expatiating on the "hasty action of the masses," let us reflect that these same masses have been trying for 22 years to get a seamen's bill enacted into law, so that human life at sea may be made safer and our seamen released from an odious, involuntary servitude which has been imposed upon them, but that even to this good hour

the bill is not yet a law.

When we hear a "reactionary" stating how fearful he is of the tumultuousness of the masses and their inordinate and impatient "demand for hasty legislation," we should ask that reactionary how many years the people waited in vain for a parcel post, although everybody in the United States wanted a parcel post save and except the express companies. Consider how faithfully-and generally with what good nature-a large number of our fellow citizens toil in unsafe places or with un-Let us hear no more of our constitutions, safe machinery. institutions, and laws being overthrown by the hasty judgments of the "masses and the mobs." No people except the patient American people would have so long and so uncomplainingly suffered these abuses, looking the while with the eye of faith and optimism into a future which inevitably would correct these evils in the fullness of time. The American people seem to believe that "the foresight that waits is the same genius that creates.'

A vast majority of the people are busy earning a subsistence and have not the time necessary to give to the constant agitation necessary to the promotion of these great reforms, and they must of a necessity leave to their public servants, in large measure, the duty of putting into execution these needful and if we, as their chosen, honored, and well-paid offichanges. cials, fail to exert ourselves to the uttermost to accomplish these reforms which the people demand, and to which they are

so justly entitled, we are faithless trustees.

There is no doubt that the invention and adoption of improved means of transportation; the ready communication among the people afforded by the telephone, the telegraph, and the post office; the facilities for obtaining information and intelligence afforded by the schools, the newspapers, and the magazines have been powerful factors in the removal of many delusions, much ignorance, injustice, prejudice, and superstition that has hindered and hampered civilization in its efforts to make human life broader, more useful and beautiful; but in value, power, and utility, over, above, and beyond all these inventions and accomplishments of civilization which have rendered human existence more comfortable, stands political lib-

Political liberty invests the citizen with an appreciation of his or her duties and responsibilities. Political liberty is not a means to an end, but is itself the end. Political liberty is valuable to a citizen, because it secures to the citizen safety of person, secures the power to assist in selecting public officials, secures the opportunity to rebuke by ballot the extravagance of public officials. It makes the individual citizen part and parcel of the sovereign-that is to say, the ruling-power. It makes the individual citizen the peer-the equal-of every other individual citizen. It stimulates and excites the individual to aspire to excellence for himself and the Government.

When the workingmen—that is to say, the men who perform physical labor-were denied the right to vote, their condition was little better than that of the slave. Indeed, it is doubtful if their economic situation was as comfortable as that of the serf. In the Colonies at the time of the Revolutionary War much, if not most, of the physical labor was performed by slaves and indentured servants. Wages of the workmen were not quite \$1 a day, and the elevation of the laborer above a mere serf has been accomplished largely by his ballot and his adherence to organization and the trade-union. One of the wisest things which organized labor has done was to cease its passive attitude toward woman suffrage and to commence an earnest, active contest in its behalf.

As late as 1834, in England, six agricultural laborers were convicted and sentenced to seven years' penal servitude for unitedly asking for an increase in wages of 1s. per week. Under the laws in force in England at that time this was treated as a conspiracy, and these men were promptly convicted and transported to Australia. They became famous in history as the "six men of Dorset." One of these, George Lovelace, wrote in his diary a vivid description of the horrors they underwent while being transported. Then arose in England a tremendous agitation for their release, and 50,000 workingmen, in a procession, marched by the official residence of the then premier, Lord Melbourne, to present a petition in behalf of the "six men of Dorset." Their release finally came in 1837, and in May of last year a monument was erected in their native village in Dorsetshire to these martyrs in the cause of political liberty.

History is largely an account of man's struggle for freedom, and from the beginning of the human race down to the present time its tendency has been toward liberty-mankind reaching

out for freedom and immeasurably attaining it.

American civil liberty is the fruitage of many centuries of earnest and patriotic endeavor. The preservation of civil liberty will always depend upon the vigilance and zeal of those who love freedom, and if a people do not love liberty well enough to contend for it, if a people prefer turgid quietude to the boisterousness of liberty, they may be sure that the usurpers of power will sooner or later impose tyrannies and despotism upon them.

AMERICAN CITIZENS.

The rights attaching to an American citizen may be divided into two classes-that is to say, civil rights and political rights. On the ground of public policy minors, incompetents, and others are frequently denied political rights. The right of suffrage-that is, elective franchise or the right to vote-is a political right which, upon grounds of sound public policy and due regard for the genius of our form of government, should never be withheld from a class of citizens fairly and in good faith proved to be worthy of possessing such right.

This question as to who is an American citizen was left somewhat in doubt by the Constitution of the United States until the adoption—if, indeed, it were really adopted—of the four-teenth amendment, in 1868, when that amendment, in the first section thereof, created a distinct Federal citizenship, as fol-

lows .

ARTICLE XIV.

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. * * *

The right to vote is a political right, and under our American theory and practice of government restricted suffrage is the only character of suffrage which has ever existed in any of the

States of our Federal Union.

Under our American system the right to vote is a political right granted by the majority to those who are deemed worthy and competent to participate in the management and functions of government. No such thing as a national voter, in the real, true, and strict sense of that term, is known to our system. The very fact that the qualifications of voters in the various States of our Federal Union are not uniform, and that a citizen may be a qualified voter in one State and yet not be a qualified voter in another State, demonstrates that the qualifications of voters are fixed and determined by the State. A great many persons—indeed, a vast number of well-informed persons—believe that the fourteenth and fifteenth amendments to the Federal Constitution made all citizens national voters, but such is not the case. Neither the fourteenth nor fifteenth amendment, nor the two amendments in pari materia, made every citizen a

I have no sympathy with the fifteenth amendment to the Constitution. It is true that the amendment, as was said by the United States Supreme Court in United States v. Reese et al. (92 U. S., p. 214; 23 L. Ed., 563), does not confer the right of suffrage upon anyone, but simply prevents the States from giving any preference in respect to suffrage to one citizen of the United States over another citizen on account of

race, color, or previous condition of servitude.

The fifteenth amendment should not have been adopted, and, above all things, it should not have been adopted in the spirit The fifteenth amendment was the result that prompted it. of a bitter, vindictive, ungenerous, and unjust feeling that surged through the country after the Civil War. It was a part and parcel of reconstruction days, when magnanimity, generosity, moderation, restraint, and justice were practically obsolete national virtues. It was part of the wild saturnalia such as usually follows long and destructive wars, in which the base and sordid passions and vices have riotous indulgence. It was a part and parcel of carpetbag times-a part of the times when graft permeated every department of Government, and an obscene brood of harpies, in the form of ignorant negro officials, were imposed upon the white people of the Southern States.

The fifteenth amendment was not adopted to aid the negro or to ameliorate his condition, but it was adopted for the purpose of irritating, vexing, and humiliating the South by forcing corrupt government upon the southern people. But, sir, the southern people could not be humiliated nor degraded, for they were as brave a people as ever drew a sword or wore a plume, and amidst the shock and desolation of war, when the earth beneath their feet seemed to slip and the stars above their heads to shift, they did nothing unbecoming or unworthy of their inspiring, gallant, and heroic history and lineage, Thus the fifteenth amendment remains as an angry scar upon our American system and serves as a warning to any who would attempt to legislate for an ignoble or unworthy purpose.

Mr. GALLINGER. Mr. President-

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Arizona yield to the Senator from New Hampshire?

Mr. ASHURST. Certainly. Mr. GALLINGER. The fifteenth amendment reads as fol-

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Does the Senator say that he takes issue with that amendment

of the Constitution as to the principles enunciated?

Mr. ASHURST. I want to be courteous to the Senator. I have just stated what I thought about that amendment.

Mr GALLINGER. I am greatly at a loss to know why the Senator, who is so earnestly and eloquently advocating the extension of the right of suffrage to a class to which it is now denied, should take issue with the fifteenth amendment, which is along the same line.

Mr. ASHURST. I appreciate the suggestion of the dis-tinguished Senator, but nevertheless that is my firm opinion of

the fifteenth amendment.

The PRESIDING OFFICER. The Senator from Arizona will

proceed.

Mr. ASHURST. In order therefore that a widespread misapprehension regarding the effect of the proposed amendment may be cleared away, I will state that the ratification of this proposed amendment, if submitted to the States, will not, ipso facto, confer the right of suffrage upon anyone, for, I repeat, that the right of suffrage is not a necessary attribute of national citizenship, as was held by the Supreme Court of the United States in The United States against Reese et al., above quoted. The right to vote comes from the State, but the right of citizens to be exempted from certain discriminations comes from the United States. right to vote has not been granted nor secured by the Federal Constitution, but the right to be exempt from certain discriminations is granted and secured by the Federal Constitution; thus, this proposed amendment, if adopted, secures to females the right to exemption from being discriminated against because they are females. This amendment, if adopted, would not interfere with the "grandfather" clause in the constitution or laws of any of the States. It would not interfere with the constitution of any State which exacts of its citizens certain requirements and qualifications before they are permitted to vote, save and except that the State would not be permitted to deny to a citizen the right to vote simply, solely, and only upon the ground that that particular citizen was a female. The adoption and ratification of the proposed amendment would have precisely the same effect as if the amendment read as follows:

No State, when it enacts its laws fixing the qualifications requisite for its voters, shall refuse to permit a woman to vote for the sole and only reason that she is a woman.

Political liberty was by no means achieved either by the successful conclusion of the Revolutionary War or by the forma-tion of our Federal Union. The Federal Constitution of 1787 provided in section 2, Article I:

The House of Representatives shall be composed of Members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

Thus leaving each State to prescribe the qualifications of

voters in such State.

At the close of the Revolutionary War the lingering vestiges of monarchy, aristocracy, and class rule were to be observed. The historians tell of the boldness with which these vestiges of aristocracy and class rule were attacked, and further tell us that in the States which, upon the advice of the Continental Congress of 1776, took up civil government and formed constitutions in the early days of the Revolutionary War-very little of what would now be called the rule of the people was recognized. Political rights were hedged about with restrictions which would now be thought unbearable. The right to vote and to hold office was not dependent on manhood, patriotism, integrity, virtue, or learning, but on acres of land, on religious opinions, on dollars, pounds, shillings, and pence. In one State the qualification of a voter was 50 acres of land or personal property to the value of £30. In another State it was a

property tax. In still another State the voter had to be a quiet and peaceable man with a freehold of 40 shillings or personal estate worth £40. To be a voter in South Carolina the man must have believed in a future state of reward or punishment and possess a freehold of 50 acres of land. To vote in New York the man must have been seized of a freehold worth £20 York money, or pay a house rent of 40 shillings a year, have his name on the list of taxpayers, and exhibit a tax receipt. Massachusetts the requirements were a freehold estate yielding £3 a year income or the possession of an estate worth £60. In Connecticut the qualifications were an annual income of \$7 from a freehold or real estate rated on the tax list at £134.

The right to vote, even when secured, did not carry with it the right to hold office. Thousands of men who on election days went to the polls were by the law debarred from holding even the office of sheriff, taking a seat on the bench, becoming a member of the legislature, or reaching the high place of governor of a State. No infidel, no agnostic, no atheist, no freethinker, no Jew, no Catholic could be governor of New Jersey, New Hampshire, Connecticut, or Vermont,

Not content with restrictions such as these, the constitutions of many States went further and required that the governor should not only be rich, but pious. In one State he must have an estate of £100, and in another £500, in another £5,000, in another £10,000; in yet others he must own 250 or 500 acres of land. For a seat in either branch of the State legislature qualifications were of the same kind. The people of New Hampshire thought it necessary that each Senator should be seized in his own right of a freehold estate worth £200. Massachusetts placed her requirements still higher, and would suffer no man to become a member of the upper branch of her general court who did not have a freehold of £300 or personal property of £600. For the lower branch the sum was one-third as great. A man who aspired to a seat in the Council of New Jersey or to the Senate of Delaware must have owned £1,000 of real or personal estate; in Delaware, 200 acres of land. Senators in North Carolina were required to own 300 acres; representatives in South Carolina must have owned 500 acres and 10 negroes; and in Georgia, 250 acres.

When the Constitution of the United States was written no forward step was taken on this particular subject, for no man could vote for a Member of the National House of Representatives who could not vote for members of the most numerous branch of his State legislature, and thus the various restrictions imposed on suffrage by the constitutions of many of the States were reimposed by the Constitution of the United States. The spirit of democracy, of civil and political liberty, however, was strong. During the 10 years which followed the inauguration of George Washington 8 State constitutions were made or amended, and by almost every one political liberty was greatly extended.

Pennsylvania abolished her religious test and left the ballot in the hands of every tax-paying male. South Carolina opened the polls to Catholics and Jews. New Hampshire abolished forever the religious qualifications once required of her governors and legislators, took off the tax, and gave suffrage to every male inhabitant 21 years old.

Delaware enfranchised every free man who had resided two years in the State and had paid his taxes, and no longer asked him if he believed in the existence of the Trinity and in the divine inspiraton of the Testaments. Kentucky and Vermont went further, and by the constitutions of these States manhood suffrage—that is, qualities of head and heart—were for the first time in our history made a part of the political system of the United States.

Thus it was that between the day when Washington was inaugurated President and the closing of the eighteenth century many of the old limitations on the civil and political rights of man were effaced from the law of the land. In general, it may be said that the property qualification was greatly reduced and that the democratic principle of suffrage, based on patriotism and integrity, was fast spreading.

CONTEST FOR FREE PRESS JUST AS STRENUOUS AS CONTEST FOR A FREE BALLOT.

The privileges which the English-speaking people hold to be of inestimable value-to wit, suffrage based upon patriotism and integrity instead of upon property, a free press, and freedom of religion-have not been easily acquired or easily maintained. The contest for a free and untrammeled press has been just as keen and intense as the contest for a free ballot.

In England, until the expiration of the licensing act, May 3, 1695, it was by no means certain that the publication of a newspaper was not illegal. The Court of Star Chamber de-livered an opinion that it was unlawful to publish without

the judges pronounced that it was a misdemeanor at common law to publish any news of a political nature without the express approval of the licensors of the King. Even John Milton's Paradise Lost narrowly escaped severe mutilation, and with difficulty obtained "leave to print" from the King's licensors.

A fair sample of the unfriendly attitude of the aristocratic classes toward the newspapers at this time is well disclosed by Sir Roger L'Estrange, who, in May, 1680, in first exercising his authority as licensor and censor of the press, and in explaining the attitude of the privileged and ruling classes, amongst other things, said:

A newspaper makes the multitude too familiar with the actions and councils of their superiors and gives them (the multitude) not only an itch, but a kind of colorable right and license to be meddling with the Government.

Article I of the first amendment to the Constitution of the United States was a rampart reared for the protection of the American people against those persons who believed that republican governments were dangerous delusions, and for the security of the people against legislative, executive, and judicial usurpations, just as the Bill of Rights and the Great Charter were reared by the English people for their own protection against the encroachments of the royal prerogative.

Even the Congress of the United States once passed a lawact of July 14, 1798-which declared it to be a crime to publish any false, scandalous article concerning Congress or the President, and making it unlawful to stir up sedition against the United States. The manifest purpose of this sedition law was to shield the Federal Government from damaging criticism and, among other things, to assist in the reelection of John Adams as President by preventing any criticism of his administration. The sedition law was of a transient nature, limited to short duration and expired by effluxion of time on March 4, 1801.

The constitutionality of the sedition law was vigorously assailed with great ability and earnestness, and was defended with equal vigor. This sedition law was impugned as being directly opposed to the letter and spirit of the Constitution of the United States and as wholly inconsistent with the rights of citizens and the liberty of the press. It never came before the United States Supreme Court, but Mr. Vice President John C. Calhoun, writing in August, 1832, said that from the date of the formation of the Constitution in 1787 down to 1832 only one question of a political character had been settled in the public opinion, and that that question was the unconstitutionality of the sedition law.

In some attempts to vindicate the sedition law of July 14. 1798, it was contended that the freedom of the press guaranteed by the first amendment to the Constitution of the United States was only such freedom as was guaranteed to the press by the common law of England, and that under and by the terms of this amendment to the Constitution Congress was simply prohibited from abridging the "common-law freedom" of the press. A mere statement of this contention will at once disclose to our view its extreme danger and harmfulness, for had such a construction been adopted it would have guaranteed only a very narrow, restricted, or, rather, no freedom of the press. as above pointed out, the judges in England, at the close of the reign of Charles II had pronounced it a misdemeanor to publish any news of a political nature without the authority of the duly appointed licensors.

It is difficult to estimate the number of prosecutions conducted under this sedition law, but sufficient it is to observe that each prosecution still further served to swell the tide of indignation against it and its authors, and the heat of popular resentment against the sedition law was undoubtedly one of the features of the campaign which promoted the triumph of

Thomas Jefferson and the defeat of John Adams in 1800.

Of course it will be remembered that "liberty of the press" does not mean that anyone is thereby licensed to print false scandals of other persons, but it simply means that all persons have the right to speak and print their opinions upon any subject whatever, without any prior restraint on or any subsequent penalty for publishing, so long as they do not injure another in his or her person, reputation, or property, and do not attempt forcibly to subvert the Government.

We must not forget that in many of the governments of antiquity liberty degenerated into license, and that with many of the ancient rulers the word "liberty" became an excuse or pretext for measures which transformed liberty into license and destroyed the very things which made liberty valuable. Indeed, the history of the world furnishes us with many painful and shocking examples of men who have spoken rapturously and sometimes with flaming eloquence of liberty and patriotism license, and, indeed, near the close of the reign of Charles II but who simply used such speeches as a disguise or mask to

conceal the fact that they were subverting true liberty and

plundering the public revenues.

We in this age who are not restrained to establish and publish a newspaper or print our sentiments therein and who march in a phalanx on election day to the polling places, there to exercise our great American prerogative, seem to think that these rights were born with us, are inherent in us, and seemingly it never occurs to us that our patriotic ancestors gave up their liberty, shed their blood, and sacrificed their lives in order that we might enjoy these privileges which we of to-day accept as a matter of course and sometimes perform grudgingly; but these rights, nevertheless, mean very much to a people who value true freedom. American citizenship is an inheritance which has been achieved and maintained only by virtue of stupendous sacrifices that have been made by those who have gone before to secure for us this inestimably valuable boon.

Under a government where citizens enjoy freedom of speech, freedom of religion, and a free ballot extended to all competent persons the people will probably have equity and justice and will enjoy equal opportunity. Under a government where justice and equity prevail, where freedom of speech, freedom of religion, and the ballot are extended to all who are worthy will also be found true success and happiness. It is such a State that children should be taught to revere. It is such a State whose history men and women will read and treasure. It is the example set by such a State that other States will seek to emulate. It is the State which guarantees liberty of opinion, freedom of speech, freedom of religion, justice, equity, and equality of opportunity for which men will fight, but when the State fails to preserve equity, justice, equal opportunity, freedom of opinion, freedom of speech, and freedom of religion patriotism will not be robust. The physical, mental, and moral condition of the people making up a State have very much to do with determining the good fortune and prosperity of that State.

If a people do not have equality of opportunity, if they do not enjoy justice and equity, if those who perform physical labor are obliged to work so continuously to earn a mere subsistence that they have no time remaining for rest, relaxation, or repose, no time remaining to devote to music, philosophy, poetry, or history, no time remaining to devote to the family, there can not be in the true and real sense any prosperity in the

Markets, trade, and material prosperity, of course, mean much to the glory of a nation, but they do not mean so much as do equity, justice, equal opportunity, a free ballot, and a fair count. The citizen who possesses the right to vote holds in his or her hand the attribute of sovereignty; that is, the right and power to be and remain one of the rulers.

The American people have already surmounted incredible difficulties and accomplished stupendous achievements, and in order to obtain a clear view of what will be accomplished in the future by this marvelous American people we should for a moment here review the Nation's progress during the 125 years that have run through eternity's glass since George Washington was inaugurated as the first President.

Commencing with the inauguration of President Washington, April 30, 1780, and extending down to this good hour, a great Nation was, and still immeasurably is, in the making; fundamental principles of government of infinite importance to the human race are being applied and tested; new ideas are constantly taking hold, new truths constantly being discovered; reforms have been made in manners, customs, institutions, and laws; time-honored usages and a ruling aristocratic class have been swept aside; a population has pushed its way westward, founded towns, cities, and States, built roads, bridged rivers, joined great lakes by waterways and canals, built fac-tories, mined for metals, and dealt on a gigantic scale and in a new manner with the economical and financial problems in a vast country where nature has poured forth her treasures and resources with such generosity and extravagance that imagination's most remote excursion does not measure them. Never before has any other people presented to the world a more interesting spectacle.

During all this progress the larklike voices of millions of Americans have been heard singing in Freedom's morn, for through the veins of the American people there flows that ethereal fluid, the ichor-the red blood which animated Rienzi, Winkelried, and those who gave us the story of William Tell—the spirit of liberty. Amidst all their vicissitudes the American people have been preserved by the God of eternities, who holds safely in the hollow of His hand the destiny of nations as easily as He would grains of sand.

It must not for one moment be imagined that we have reached the zenith in improvement in our laws, institutions, or national progress. There are myriads of secrets still locked within the bosom of the hills and mountains. Undiscovered secrets are lurking in the air above us and in the earth beneath our feet. Raging rivers which now pour their destructive and seemingly uncontrollable flood to the seas will yet be harnessed

and made to do man's imperial will.

"Human life could be prolonged an average to our entire population of 14 years in the United States if the people were properly informed in self-preservation, as was demonstrated in

the report on national vitality.

"The annual death loss in the United States is approximately seven to the thousand in excess of what it should be under improved conditions, making an unnecessary loss of life in 90,000,-000 of people of approximately 630,000 men, women, and children annually, whose lives ought to be saved. This annual loss, upon any reasonable basis, may easily be estimated at the commercial value of two thousand millions of dollars annually.

"Nearly as great a loss is due to the loss of efficiency and the loss of productive power of nearly 3,000,000 persons who are sick, on an average, during the year and who must be cared for

during such preventable illness.
"During the Spanish War, in four camps—Chickamauga. Alger, Meade, and Jacksonville—there were over 19,000 cases of typhoid fever, with a loss of 1,460 of the finest young men in

America, nearly all of which was preventable.
"The preventable deaths in the United States were caused by polluted water, impure and adulterated foods and drugs, foul air, bad ventilation, ignorance of the health laws, of hygiene, of exercise, of foods, and of self-care, and to epidemics and various preventable diseases, such as tuberculosis, typhoid and malarial fevers.

"A splendid illustration of what can be done is shown in the control of yellow fever in Cuba. In 1896 yellow-fever deaths in Habana, Cuba, amounted to 639 to each 100,000, but after the American occupation and the great discovery of James Carroll, Lazier, Walter Reed, and Agrimonte the death rates fell in 1900 to 124; in 1901, to 6; in 1902, in 1903, and in 1904, to none.

"Except for this discovery it would have been impossible for the United States to have built the Panama Canal, and on the Panama Canal the death rate, even in that tropical country, is not much more than one-half what it is in the United States." See report on Senate bill No. 1, Sixty-second Congress, second

One hundred and twenty-five years ago the person who would , have suggested the possibility of the locomotive, the telephone, the telegraph, gas jet, or electric light would have been regarded as a lunatic.

Reviewing, therefore, the enormous progress this Nation has made, and considering the spirit which animates our people, it would be just as sensible to attempt to draw out leviathan with an hook as to attempt to stop or stay our progress; as well attempt "to bind the sweet influence of the Pleiades, loose the bonds of Orion, bring forth Mazzaroth out of his season, or guide Arcturus and his shining sons" as to try to circumscribe

or set a limit to the destiny of the American people.

It is nearly 400 years since the celebrated chancellor, Sir Thomas More, gave to the world that curious philosophical work under the title of "Utopia," in which he described an imagi-nary country and people and added a new word to the English language. Nearly every proposed plan for the improvement of government and society since More's time has been called Utopian. While experience has probably proved that many of More's suggestions were indeed Utopian because they were incompatible with some of the inherent and congenital qualities of human nature, it is also quite true that many of his sugges-tions are to-day recognized by people of humanitarian impulse as principles which make for the strength, happiness, and progress of a state. For instance, he wrote:

If you suffer people to be illy educated and their manners to be corrupted from their infancy, and then punish them for those crimes to which their first education disposed them, what else is to be concluded from this but that you first make thieves and then punish them?

He also wrote:

And can it be thought that those who heap up an useless mass of wealth not for any use that it is to bring to them, but merely to please themselves with the contemplation of it, enjoy any true pleasure in it? The delight they find is only a false shadow of joy.

Mr. President, a contest to be met in the future, indeed, one of the greatest constructive works remaining to be accomplished is the abolition of poverty. This will not be done by force or violence, but by that progressive and forward-moving spirit which has always animated the American people. It will be accomplished by statesmen who realize that "bad straw makes bad brick," and that the way to treat governmental, economical, and political problems is to analyze them and test them

just as a chemist in the laboratory tests his problems.

I realize, of course, that there are many profound thinkers who believe that poverty is a thing inseparable from mortal life and human destiny; that it is an insolvable problem; and that the abolition of poverty is Utopian or phantasmagorial, but just so surely as at midnight there is busy a centrifugal force which in due time will whirl the world into the gladsome presence of the morning, just that surely in the fullness of time will poverty be abolished. Sweatshops, crowded slums, and starving children will some day be only a horrid memory. extension of the ballot to women will be a helpful influence in assisting to solve this great problem of the future.

Antoine Frederick Ozanam, writing in 1840, referred to "the duty to bring solace to the suffering classes and seek the aboli-

Ozanam pointed out that the worker, whether physical, in-tellectual, or moral, had a natural right to a wage which, in addition to providing for proper support for the worker and the support and education of his family, would also provide that the worker might retire in old age and enjoy the fruits of his toil. He further points out that if the worker receives any less than these things he has practically sold his life.

Our countrymen, however, are a trifle impatient with those public men who so continuously direct attention to abuses and evils, but who omit to suggest a remedy. Therefore I shall suggest one of many remedies that might be applied; and I have not the slightest doubt that the application of the one I propose would reduce poverty to a degree where it would cease

to be a national evil.

At the present time we are expending, in round numbers, about \$500,000,000 annually to pay the expenses of wars of the past and in preparing for wars we pretend to think may come in the future. Let us appropriate two-fifths of this sum each year, or \$200,000,000 annually, for a "home reserve fund,"

to be expended as follows:

Let the United States Government annually acquire, by purchase, if necessary, 50,000 small farms throughout the various States as may be most suitable and practicable, build com-modious dwelling houses thereon, and each year place 50,000 citizens, without any expense or cost to such citizens, into actual possession of these farms, carefully providing that these "home-reserve farm lands" shall not be alienated, hypothecated in any way, or transferred under any pretext by the citizen inducted therein. It would be necessary carefully to provide that the citizen installed into such tract of land and home could not be divested thereof under any pretext or pretense whatever, but would hold the same for his or her lifetime, and upon his or her death the same would revert to the Government home-reserve lands, again to be utilized for like homereserve purposes.

It should clearly be set down that the investiture of a citizen with such allotment of land would not preclude his or her acquiring any other lands by purchase, gift, devise, descent, or in any other legitimate way, but that whenever the needs and requirements of the Government made it necessary to acquire more lands for home-reserve purposes and no public lands were available all lands in excess of 5,000 acres belonging to any one person or corporation might be condemned under the law of eminent domain and such excess land applied to homereserve purposes, after condemnation proceedings in a court of competent jurisdiction and upon just compensation being paid by the Government to the owner thereof for taking from such person or corporation the lands owned by him or it in excess

The home-reserve plan would not, of course, be made compulsory upon any citizen, but optional only, and should provide that such land must be cultivated in good faith.

These tracts of land, with decent dwelling houses, could be provided at an average cost to the Government of about \$4,000

per farm.

Along with this plan, as a direct concomitant thereto and in connection therewith, should go the building of good roads, so that the isolation of rural life would be lessened and the

produce of the farm taken to market easily.

This plan would afford industrious and worthy citizens of the United States an opportunity to engage in small farming and other ways of independent living—would afford them an opportunity to get from under the landlordism of another—an opportunity to get back to the soil.

Thus, within a generation, millions of people who previously had been poverty stricken would be, if not on the road to wealth, at least removed from the terror of the ever-present rent gatherer-would feel that no matter how fiercely the

inclement winds of winter raged they would at least have a place whence they could not be driven and where by careful, honest, and industrious lives they could make the land furnish forth their daily fare. In this manner the unwise and unhealthy congestion of population in our great cities would soon be absorbed.

Population in the United States has overtaken production of foodstuffs. Ten per cent of our population is without food; we have built up cities at the expense of rural life, and must now turn our attention toward making agriculture a preferred vocation.

The building up and maintaining the fertility of the soil is a vast problem, and upon its correct solution depends the future

of America. It is a problem of enormous magnitude.

Only 12 per cent of the arable land of our Nation is yielding anywhere near the maximum return, and less than 40 per cent of our arable land is cultivated at all. Thus, along with the home-reserve farm plan should come the problem of systematic attention to inducing the people scientifically to cultivate the soil under the instructions of trained farm demonstrators or county agents, who would teach each farmer how to apply the best methods, how to breed and care for live stock, how to increase his yield, and how not to exploit his soil, but how to enrich and preserve it.

Thus the people, if given this opportunity and encouragement, would annually turn millions of tons of plant food and live stock into the market. This plan would take from the cities broken, discouraged, and heartsick men and women and convert them into dignified, honest, industrious, and happy

citizens.

This plan would promote law and order. It would increase patriotism and loyalty to country. The Government which affords a place in which the citizen may, within his little domain, be supreme, the country which affords a place in which the citizen may command even a king not to enter unbidden, is the country for which men will face shotted guns and will

resolutely fight.

This plan may be opposed by some persons as "socialistic," maternalistic," or "paternalistic," but no matter by what epigram you choose to stigmatize it, how Utopian you may deem it, how impracticable or visionary it may appear at first glance, it nevertheless will bear the closest investigation, and you will observe at once its simplicity. A truth is usually simple and without involvements or complexities. The proposed remedy is infinitely better than the present brutal and degrading system which forever precludes a large majority of our citizens from getting from under the landlordism of others.

The plan is constitutional and will run the gantlet of the most unfriendly court. In addition to its being constitutional, it is that which is also important, it is "institutional." It would not be "confiscation," it would simply be "restoration."

Between the 28th day of September, 1850, and June 30, 1909, public lands aggregating 159,125,734 acres of the property be-

longing to the people were by Congress directly and indirectly granted to various railroad companies, and of the vast amount of land thus granted the patents have issued for 115,473,986 acres thereof. These lands were granted to the railroad companies without the corporations paying to the Government so much as a penny or a sprig of peppercorn therefor; and it has been calculated that these lands are to-day worth at least \$600,000,000. To those, therefore, who hake their heads, who wash their hands with imperceptible soap in invisible water, and reject this proposed plan. I say it is equally as moral, righteous, and constitutional to build a home for the worthy, deserving citizen and to assist him and give him an opportunity to make his life worth the living as it was to give away these 159.125.734 acres of land to the railroad companies, and it must not be forgotten that along with these grants of the public lands which went to the railroad companies it was enacted and nominated in the bond in some of the grants that the railroad companies should not pay any taxes on their roadbed, superstructure, or rolling stock.

It should not so much be the duty of Government and business to extend charity as to dispense justice, and we would better learn now than later that in the end, as a Nation, it does not cost one-fifth the sum of money to keep people out of the jails and hospitals that it does to maintain them therein. So, I repeat, the extension of the ballot to women will increase the number of voters who desire to bring about the reduction of

The first prominent man in the United States to declare for woman suffrage was he who went from the ground floor of a log cabin to the highest eminence of human distinction— Abraham Lincoln. In 1836 he published in the Sangamon County Journal a letter to his constituents, stating that he was in favor of granting the ballot to all citizens possessed of certain qualifications, "by no means excluding females."

The equal-suffrage movement in the United States, however, owes, if not its origin, at least its earliest and ablest discussion, to the sisters Grimké. Sarah and Angelina Grimké were both born in Charleston, S. C.; Sarah in November, 1792, and Angelina in February, 1805.
Mr. SHAFROTH. Mr. President, will the Senator yield for

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Colorado?

Mr. ASHURST. Certainly.

SHAFROTH. Will not the granting of the right of franchise to women open up to them many occupations in which women have not now the opportunity of obtaining labor, thereby increasing the demand for their labor, and consequently increasing the compensation which will be paid women?

Mr. ASHURST. That is very true, and I thank the Senator

for that valuable suggestion.

Mr. SHAFROTH. Is the Senator going to cover that subject

in his remarks?

Mr. ASHURST. I think the very terse statement of the Senator from Colorado covers it better than I could myself, and thank him.

Mr. SHAFROTH. I should like to hear the Senator from Arizona on that subject, for his speech is very interesting to me. Of course, I am delighted to have the atten-Mr. ASHURST. tion of the Senator.

To resume; they were the daughters of Hon. John Grimké, a colonel in the Revolutionary War and later a judge of the

Supreme Court of South Carolina.

A Representative in Congress declared from his seat that women had no right to send up petitions to Congress, whereupon Angelina Grimké fully and eloquently answered him. Her reply convinced thousands of the correctness of her views and was in part as follows:

was in part as follows:

Every citizen should feel an intense interest in the political concerns of the country, because the honor, happiness, and well-being of every class are bound up in its politics, government, and laws. Are we aliens because we are vomen? Are we bereft of citizenship because we are the mothers, wives, and daughters of a mighty people? Have women no country, no interests staked on the public weal, no partnership in a nation's guilt and shame? Has woman no home nor household altars, nor endearing ties of kindred, nor sway with man, nor power at the mercy seat, nor voice to cheer, nor hand to raise the drooping or to bind the broken? The Lord has raised up men, whom he has endowed with "wisdom, understanding, and knowledge," to lay deep and broad the foundation of the temple of liberty. This is a great moral work in which they are engaged. No war trumpet summons to the field of battle, but Wisdom crieth without, "Whosoever is of a willing heart, let him bring an offering." Shall woman refuse her response to this cail? Was she created to be a helpmeet for man—his sorrows to divide, his joys to share, and all his toils to lighten by her willing aid, and shall she refuse to aid him with her prayers, her labors and her counsels, too, at such a time, in such a cause as this?

But, Mr. President, it is sometimes argued that when women

But, Mr. President, it is sometimes argued that when women vote men will no longer be chivalrous toward them. Sir, the language of eulogy has been exhausted over that work of Miguel de Cervantes, Don Quixote, which for 300 years has delighted mankind. Cervantes, by his book, is said to have overthrown chivalry; but whether or not that be true, whether or not it be true that the age of chivalry has gone, of one thing I am certain, and that is the age of justice is at last here.

It is, or at least ought to be, an axiom of American liberty that a class of persons obedient to the laws as are the women; a class of persons which has a peculiar care for the rights of others; a class which is taxed upon its labor and property for the support of the Government, which is liable to punishment for acts which the law makes criminal; which is patriotic, learned, and in a large measure capable of the highest degree of efficiency in the useful arts and sciences; which is patient beyond esti-mate and constantly pouring forth costly sacrifices for the common good of the species, should not be denied a voice in the enactment and enforcement of the laws and concerns of the

Government.

"Government is simply a tool in the hands of the people for the fashioning of that people's civilization." Government is strong or weak, capable or deficient, according to the people who control and make up that government. In this Republic the "people" constitute the Government. They are its creators and its maintenance; they are the Government. That the granting of the elective franchise to women would add to the strength, efficiency, justice, and fairness of government I have not the slightest doubt, and this is especially true in the United States, where all power is reposed in the people with universal suf-frage as the primal basis of its exercise. "The people" includes women who can not be denied those political privileges and responsibilities without doing violence to the fundamental principles of our Government.

It is anomalous and archaic in a free Republic, professedly made up of, controlled by, and administered for all the people, to deny to one-half of its citizens the right of exercising a valuable function of citizenship, to wit, the elective franchise, and thus preclude that one-half from the right and power to say what law or polity shall be its rule of conduct. And this anomaly becomes odious and abhorrent when we reflect that the particular one-half of citizenship thus excluded is the identical one-half from which springs so much wisdom, courage, cheer, hope, and good counsel. In this Republic we are in constant warfare against fraud and violence, avarice and cupidity, and in behalf of liberty and justice whose success will be accelerated by extending the franchise to women, in whom the materialistic is generally submerged for the idealistic; a class of voters which 'ooks to all laws and movements as to how such laws and movements will affect her children; how such laws and conditions will promote morals, human health, and human progress, more spe-cifically than as to how this or that particular law or polity will develop or serve material or property interests. In other words, as has been said, "Man looks after the affairs of life, but woman looks after life itself.

Woman's sphere, her ideals and her duties, make her the inescapable and essential conservator of human life, charged as she is with the duty of conserving the human race; and it is in harmony with political and natural justice to accord to her the right to say what laws shall assist her in bringing about the

betterment of her economic conditions.

There are some persons who believe that when women vote all human problems will easily and expeditiously be solved; indeed, there are some persons who imagine that woman suffrage is the panacea for all ills-that it will teach us how to find the pot of gold at the rainbow's end and will teach us how to eat our cake and keep it. Such persons, of course, are doomed to severe disappointment. Woman suffrage will not of itself bring Nirvana; it is not the magical alembic which will transmute the baser metals into gold, but woman suffrage will, as the years glide by, bring a gradual, general change in our social and economic conditions, and more and more will be observed a truer justice, a spirituality, a morality, and an idealism running through our laws.

Amongst the many reforms that woman suffrage will probably assist in bringing about are the following:

A strict attention to the laws concerning sanitary regulations, food supply, educational, and moral conditions.

Scientific conservation of the public health.

Laws providing for good roads, so that the transportation of crops and all plant foods may be easier and cheaper. The road builder is a valuable person, as good roads are the bands which will hold in unity, amity, and friendship the people of our Nation.

Laws which will make for a system which will see to it that the workers who create wealth and prosperity shall have an equitable share of that wealth and prosperity which they create.

Laws which will make for a system allowing those whose labor creates wealth ample time for relaxation, for pleasure, and reading, so that life shall no longer mean to the worker a ceaseless moil for a subsistence, but will mean happiness, improvement, health, good cheer, and an opportunity to enjoy some of the blessings of the prosperity which he deforms himself to create.

Laws requiring employers to provide reasonably safe places in which to work and reasonably safe machinery with which to work.

With woman suffrage a public office will truly become in spirit and in letter a public trust. When women vote no longer will public office be viewed as booty or plunder that has been captured from a defeated enemy, but will be viewed simply as an honorable opportunity to serve the common good of all the

When women vote we shall have wholesome prison reform. Until recently we assumed, to say the least, an ungenerous, if not inhuman, attitude of remorseless revenge toward a man who walked away from the prison gate. Very often the convict" was kicked out of every place he attempted to make his abode, and was met on all sides by averted glance and civil leer. An "ex-convict" who succeeded in concealing his identity and in making a good citizen out of himself in a community where his past was unknown was immediately ostracized and annihilated if found out.

The prison has been defined to be the connecting link between civilization and savagery. The system of brutally maltreating prisoners has never produced any good whatever, but it has increased crime, poverty, and sorrow. Brutality never reforms the offender.

We have been very slow to learn that it is our duty to reform and reclaim, save and rehabilitate, instead of ruin people convicted of crime. What possible good can come to the State by beating, starving, brutalizing, torturing, and degrading persons convicted of crime I have never been able to discover.

Some years ago a very eminent man advanced the theory This same man pubthat "the criminal is born, not made." lished a large number of sweeping assertions referring to the criminal as "of a race apart"; but these assertions have been upset and exploded by scientific researches, and the students of criminology to-day lay the responsibility for a large proportion of criminality at the door of society.

Should a philosopher desire to study human nature experimentally he could do so very well at a prison, for undoubtedly nine-tenths of the prisoners are there by occasion-that is to say, their lapse or crime is due mainly to bad social conditions.

Twenty years hence, when the muse of history shall come to write of the magnitude of the social revolution and of the changing of the old order which is occurring in our Nation now, but which we do not see because it is so near us, it will then be pointed out that woman suffrage was made a part of our American system because for centuries governments had been going to war without asking the consent of the women that furnished the sons, who after the carnage of battle, are heaped into a trench in "one red burial blent."

The waste of all governments through war is world-wide. Through war and its related agencies the taxes of the world are about double what they were in 1896.

Through militarism the world is living beyond its means and is borrowing the means of the coming generations.

Since the formation of our Federal Union, in 1787, for each

dollar that as a Nation we have paid out for promoting the arts of peace, the development of agriculture and the mechanical sciences, for the facilitation of internal trade and intercourse, and for the diffusion of knowledge, we have paid out \$700 for the purpose of military aggression or defense.

On February 12, 1849, the Committee on Agriculture of the House of Representatives submitted a report indorsing the views of the Secretary of the Treasury, together with a bill creating a new department of the Government to be known as the Department of the Interior, and in support of the bill the report, among other things, stated as follows:

The general fact remains unaffected that war and preparations for war have been regarded as the chief duty and end of this Government, while the arts of peace and production whereby nations are subsisted, civilization advanced, and happiness secured have been esteemed unworthy the attention or foreign to the objects of this Government. It seems to us that this should not always continue, but that we should, as a wise people, reorganize the Government so far as to fulfill these duties also, which are suggested by the nature, aspirations, and wants of our race as physical, moral, and intellectual beings; that it should do something toward protecting the people against those internal enemies—ignorance, destitution, and vice—as well as against those foreign foes who may invade or who it is apprehended may assail us.

The pen of the future historian will point out that the women of the world became weary of passing through the valley of the shadow of death, bearing sons as a bloody sacrifice to the Moloch of war. If their sons are to be thus sacrificed, they demand that they shall have a voice as to when war shall be

declared.
"But," say some persons with fertile and winged imagination, "women do not go to war, hence they should have no voice in determining the matter." The conclusion is not well founded, for female courage, female patriotism, and female influence are a "war power," or, rather, are just as much sinews of war at times as are ball cartridges. I reply that women do the work of the Red Cross and the hospital, and frequently the heavier and more important work which the men leave behind them. Their patriotism is just as virile, their devotion to country just as unswerving, as that of the men. History records many instances of the bravery, daring, dauntless courage, and prowess of women on the battlefield.

Let no man believe that when women vote the Nation will be any the less quick to avenge a wrong, or that the American people will fail at any proper time to unsheath their swords in defense of Liberty's altars.

But, sir, while I have enumerated certain laws which will probably be enacted in the future under the influence of woman suffrage, I am not so simple-minded as to suppose that all reforms can really be accomplished by statute laws. humanitarian impulses, morality, equity, and justice, even hap-niness itself, come from within us, not from without. You can not make people wise, virtuous, or just by legislative enactment. You can not legislate discernment into a fool. No law, however beneficent, can give wisdom to the simpleton, frugality to the spendthrift, virtue to the debauchee, nor liberality to the miser. The patient must minister to himself. A man may be a well-

lubricated intellectual machine, but if his springs of justice and equity are dried up, if his patriotism and ideality lie dead or dormant, he is really of little value to his country.

Until we realize that education, correct examples, fair play, the cultivation of ideals, and a spirit of brotherhood are more important than legislation, we shall continue to suffer abuses in spite of the most beneficent statute laws.

The argument has frequently been made that in the early days of the Government woman did not need the ballot for her protection, and that, therefore, she does not need the ballot Putting aside the question as to whether women needed the ballot in the early or formative period of our American system as academic only, we must view the question as it presents itself to us in the light of the facts, conditions, and

circumstances of this present day.

In the early days, or formative period, of our Government the situation regarding both men and women was vastly different from what it is to-day, for before steam and electricity were harnessed, before the factories were built, all or nearly all of the clothing and other necessities of life were manufactured in the home by a system of cottage industry, and each home was a private factory. The woman was largely the spinner and the weaver; she prepared the food and made the clothing for her own household; and even the food supplies offered for sale in the cities and villages were prepared by cottage industry. The household was the center of production, and most of the supplies were manufactured or prepared by rudimentary hand processes. Home life and industrial life were one and the same, and women were not obliged to cope with the industrial prob-lems that present themselves to-day. With the advent, however, of steam and electricity, the construction of factories, and the enormous industrial and economic development, beginning about the year 1830, the cottage industry declined. With the advent of many ingenious contrivances and machines to which steam and electricity were applied household industry vanished. The women have gone into the factory, and now we have in the United States over 7,000,000 of women wage earners and 2,000,000 of children wage earners. The woman is now required to study wages, dividends, tariffs, organizations of labor, transportation, the safety of machines, and factory sanitation. Therefore it will be seen at a glance, since the system of cottage industry has been abandoned and woman has been taken from her spinning wheel and wool carding at home to the factory, there to work with hundreds of others, under the eye, perhaps, of an employer whose sole desire is to wring from her labor the largest amount of profit she is capable of producing for him. that the necessity of the ballot in order that the women may have a voice in the shaping of proper laws for their protection is apparent.

Mr. SHAFROTH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Colorado?

Mr. ASHURST. Certainly. Mr. SHAFROTH. If the Senator will yield, I wish to say right here that the influence of women upon the laws of the State of Colorado, especially with relation to the rights of property and the treatment of children, has been such as to place the people of that State, according to the opinion of the Interparliamentary Union which met in London three years ago, in the position of having the very best laws with relation to child treatment and child labor of any people in the entire

Mr. ASHURST. In my researches in the preparation of this paper I was especially attracted to the fact to which the Senator from Colorado has so properly adverted. I thank him for

the suggestion.

The housewife to-day does not weave or spin, as she did during the days of cottage industry, but must purchase clothing for those under her care. She pays for woolens, but usually gets a fabric that is half cotton, because we have been remiss in our duty respecting the passage of a pure-fabric law, I opine that if the women could vote they would soon see to it that a law was passed which provided that when they paid for woolens they received woolens. The majority of the women are equally powerless now in the matter of food supplies. In the days of cottage industry she had her own smokehouse and knew the kind of meat she was serving to her household, but now, since her sphere has been expanded far beyond her home, in a large measure she must buy beef, mutton, bacon, and hams, and in assuming that it is pure she must trust to the inspectors she had no voice in appointing. Under the present conditions she must trust to the integrity and capability of the inspectors and supervisors, whom she had no voice in selecting, to pass upon the quality of the milk for her household, and the only practical way in which to enable her to see to it that she receives pure fabrics, clean and wholesome food supplies, and other things which mean the physical, and even the moral, health of her children is to invest her with the right to a voice in selecting these various governing agents which are to manufacture, prepare, and inspect these necessities.

Whether the present system is superior to the cottage industry is a question I do not discuss, but this much is true, that our present industrial system has taken from the women the opportunity they had under cottage industry to inspect all these

We hear the opponents of equal suffrage say that "It is woman's place to direct her house and her children." Sir, that is indeed a choice assortment of words, but how about the brutality of a system which denies to woman the right and opportunity to have sensible and wholesome laws and regulations to assist her in procuring pure foods, pure fabrics, and sanitary houses?

Therefore, to those who say that women did not need the ballot in the early or formative period of the Government, I say in reply that the problems which presented themselves for solution in the early period of the States differ vastly from the problems now demanding attention and solution.

One of the arguments the antisuffragists have advanced, or rather the statement iterated and repeated by them with the most assurance, is that "The right to vote detracts from woman's nobility of character and would unsex her."

The argument is not sound, and those who advance it seem to forget that there would have to be a new creation, a new heaven, and a new earth to transform the feminine into the masculine, to make the mother forget her child and turn a deaf ear to the supplication of the helpless.

The nervous energy, time, effort, and prudence which women exercise daily in their personal, individual problems in the matter of attempting to inspect, select, and purchase food, clothing, and shelter for the protection of those within their household is a sufficient guaranty that they will not be degraded or lose any of their nobility of character by spending

half an hour every two years going to the polls.

Even the fiercest tunuits and ravages of war do not detract

from the nobility of character of some men.

When Sir Philip Sidney lay mortally wounded on the battle field a cup of cold water was brought to him; lifting it to his parched lips, he saw an expiring private soldier staring at the cup with burning and anguished eyes, and he handed the water to the dying soldier, saying, "Friend, thy necessity is yet greater than mine."

The long and weary years of the Revolutionary War, filled as they were with misfortunes, disasters, and desperate car-nage, did not disturb the quiet dignity of George Washington, and at all times his pride and honor revolted from the thought

of doing what did not become a true man.

Andrew Jackson inherited or imbibed from his mother a love of purity, and from the days when as a small boy he saw the British dragoons sweep along the red roads of Waxhaw Creek and dye them yet a deeper red with the blood of American militiamen, all through his long and tumultuous career, down to the time when for him the tattered flag of war was folded forever, he was stainless.

A hundred battles did not harden nor indurate Robert E. Lee, and he was from first to last the accurate gentleman,

the brave soldier.

The thunder of the guns never caused Stonewall Jackson to lose his innate gentleness, and every night, looking upon the "serene and shining pathway of the stars," he held communion with his God.

Voting will not lessen affection, and political affairs can not make women false to their inborn instincts or cause them to lose

one jot or tittle of their soft and loving tenderness

Women are particularly qualified for and entitled to political perty. As a class they always stand against violence and fraud; they always support the cause of liberty and progress and have been the chief mainsprings which have inspired, encouraged, and consoled great and useful men.

The history of woman is the history of her effort to assuage pain and purify society. Her history is one of temperance, fru-

gality, and industry.

Moreover, women are especially qualified to vote and act as a balance wheel to men in great contests, for they have demonstrated that fortitude and passive courage are the virtues of misfortune, sorrow, and defeat, while moderation, coolness, and restraint are the virtues of victory and prosperity. Women voters are capable of as much restraint as men, for we do not forget that men's passions and spirits amid the whirlwinds, simooms, siroccos, and tornadoes of politics rise to such a high

tide that we frequently do things for our political parties that we would under no circumstances do for ourselves.

De Quincey says, in his autobiography:

I do not wish, in paying my homage to the other sex and in glorifying its possible power over ours, to be confronted with those thoughtless and trivial rhetoricians who flatter women with false lip worship and, like Lord Byron's buccaneers, hold out to them a picture of their own empire built only upon sensual or upon shadowy excellencies. Though the sexes differ characteristically, yet they never fall to reflect each other, nor can they differ as to general amount of development; never yet was a woman in one stage of elevation and man—of the same community—in another.

Mr. President, I am about to conclude, and I have spoken at some length, because I believe the subjects that I have dis-

cussed are vital to our best interests as a nation.

With justifiable and patriotic pride many Americans boast of their belief that our beloved country now takes her position as the mightiest and greatest of the nations of the earth, but the question obtrudes itself: Is the Nation really great, or is its position simply fickle and hollow but imposing? The answer is that a nation's greatness is not to be measured by markets and stock exchanges.

Of what avail to the State are the brazen gates, the swelling domes, and widening arches, if within the State equity may not be found? Of what avail to the State are the sculptured architraves, fluted pilasters, the roofs of fretted gold, if social and economic justice be denied so completely to the working masses that there is invisibly, but nevertheless indelibly, writ-ten upon them the legend which appeared on the metal ring of the serf of the feudal lord, "Gurth, son of Beowolph, is the born thrall of Cedric of Rotherwood," or "Wamba, son of Witless, is the thrall of Cedric of Rotherwood."

The State is not prosperous nor truly great if within its borders there exists an industrial system under which a great majority of the people are crushed and stupified by poverty. and the physical workers completely give up their lives to the exactions of toil, but nevertheless scarcely obtain a subsistence and enjoy none of the beauties, comforts, luxuries, and glories of civilization which they have created. The Nation is not truly great if its women are denied the right to become a part

of the governing power.

Therefore I indulge the hope that the Senate may adopt this resolution, and so far as in our power lies, write justice, equity, equal opportunity, and ideality into our laws and thus proceed one step further in seeing to it that this shall be a nation of courageous, constructive people, a land of opportunity and hope, where justice as well as charity shall prevail.

During the delivery of Mr. ASHURST'S speech, The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

Mr. HOLLIS. If it is agreeable to the Senator from Oregon [Mr. CHAMBERLAIN], I ask unanimous consent that the unfinished business be temporarily laid aside until the Senator from Arizona has completed his remarks.

The PRESIDING OFFICER. If there be no objection-

Mr. CHAMBERLAIN. I was going to say that I believe there is one Senator who is prepared to address the Senate on the unfinished business, but if he has no objection I should like to have the Senator from Arizona conclude his remarks. think it will take only a short while for him to do so.

Mr. LIPPITT. I suggest that perhaps a very proper way would be for the Senator from Oregon to have the Alaska bill laid before the Senate, and if the Chair should see fit to recognize me, I would then be very glad to yield to the Senator from

Arizona to finish his remarks. Mr. CHAMBERLAIN. I will make that request. I ask that

the unfinished business be laid before the Senate. The PRESIDING OFFICER. The Chair lays before the Sen-

ate the unfinished business, which will be stated.

The Secretary. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

The PRESIDING OFFICER. The Chair recognizes the Sen-

ator from Rhode Island upon the unfinished business.

Mr. LIPPITT. If the Senator from Arizona should like to have me yield to him, I would be very glad to do so. May I ask about how long a time he expects to occupy?

Mr. ASHURST. I shall speak as rapidly as I may.
Mr. LIPPITT. I hope the Senator will not.
Mr. ASHURST. I think I will finish in about half an hour.
Mr. LIPPITT. I hope the Senator will take a reasonable time to finish.

Mr. ASHURST. I thank the Senator. The PRESIDING OFFICER. The Senator from Arizona will proceed.

After the conclusion of Mr. ASHURST's speech,

RAILROADS IN ALASKA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the

Territory of Alaska, and for other purposes.

Mr. LIPPITT. Mr. President, the steps which have led to the introduction to the Senate of the Alaskan question in its present form were taken because for some years now, in fact since 1906, the conditions of the Territory of Alaska and of the people of Alaska have constituted the most disappointing feature of American progress. Up to that time the Territory was expanding; its people were hopeful. At that time, owing to circumstances which it is not now necessary to consider, the coal lands were withdrawn from entry by ex-President Roosevelt. Since then the people of Alaska have been using every possible effort to have those coal fields opened in some way, so that their resources might be made available. In that they have been disappointed.

Mr. GALLINGER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Rhode
Island yield to the Senator from New Hampshire?

Mr. LIPPITT. Yes.

Mr. GALLINGER. There are so few Senators present that I

make the point of no quorum.

The PRESIDING OFFICER. The Secretary will call the

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Martine, N. J.	Shively
Bacon	Hitchcock	Nelson	Smith, Md.
Bankhead	Hollis	Norris	Smith, Mich.
Borah	James	Overman	Smoot
Brandegee	Jones	Perkins	Stephenson
Bristow	Kern	Pittman	Stone
Bryan	Lane	Pomerene	Sutherland
Burton	Lea	Ransdell	Swanson
Chamberlain	Lippitt	Reed	Thomas
Cummins	Lodge	Robinson	Thompson
Dillingham	McCumber	Root	Vardaman
Fall	McLean	Saulsbury	Williams
Gallinger	Martin, Va.	Sheppard	

Mr. BACON, I desire to say that my colleague [Mr. SMITH of Georgial is necessarily absent from the city.

Mr. SMITH of Michigan. I desire to announce the unavoidable absence of my colleague [Mr. Townsend] from the Senate to-day on official business.

The PRESIDING OFFICER. Fifty-one Senators have answered to their names. There is a quorum present.

Mr. LIPPITT. Mr. President, when I was interrupted by the roll call. I was stating the conditions in Alaska which led to the introduction of the pending bill. In consequence of them a commission was appointed about a year ago to study the situation in regard to its railroad development and to report to the Con-That commission, after a very hurried visit to Alaska, reported upon lines of railroad which they thought would serve the interests of that community, and recommended that those railroads, which would cost about \$35,000,000, be built by the Government. Promptly two bills were introduced to accomplish that end, and referred to the Senate Committee on Territories. The Senate Committee on Territories proceeded to take those bills under consideration, and to give hearings, which are contained in a report of some 700 pages that has been submitted to the Senate. That report divides itself under three heads.

Certain people appeared and testified in regard to the resources of Alaska in an attempt to justify the construction of railroads and to show that the amount of money that has been suggested to be appropriated could be wisely spent. Certain other people then appeared, not in opposition to the construction of railroads in Alaska, not in opposition to the statements which had been made about the value of the resources of Alaska, but protesting against Government construction of railroads, and saying that they and their associates were willing and would be glad to build railroads in that Territory if the restrictions that tied up the coal fields were removed, and one or two other conditions of less importance were properly adjusted.

That testimony left the proponents of this bill in the situation that they had advanced no important argument in favor of Government ownership of railroads, and in answer to the claims of those who wished to build the roads themselves, they put in in rebuttal, through Mr. WICKERSHAM, the Delegate from the Territory, an attack upon some people who had been connected with Alaska, claiming that the entire resources of that Territory were monopolized. On page 614 of the hearings Mr. WICKERSHAM testifies:

Mr. Wickersham. There can be no railroad building in Alaska except by two influences, one the Government and the other the Morgan-Guggenheims. That is all there is to it. They have got that country

by the throat, so far as transportation is concerned, and unless the Government comes to the rescue of its own property in the Territory of Alaska it will all be taken over by these big interests.

He submits various statements to support that assertion. Mr. President, I have examined those statements with great care, I have studied the testimony as carefully as I know how, and I think that no more unfounded, frivolous charge of monopoly was ever put forward, and that it is nothing more than an attempt to stampede the judgment of the country in favor of this step toward Government ownership of railroads by influencing them to believe that no other power can open Alaska.

The testimony in regard to the resources of Alaska has been very ably, eloquently, completely, and, I think, very fairly set forth by the Senators who have spoken in favor of the pending bill. I do not want seriously to question the testimony that has been given in regard to those resources. I am not, however, quite so enthusiastic about some of Alaska's possibilities as are a number of these gentlemen. I agree that Alaska has agricultural possibilities for the production of garden stuff, possibly for the production of grain, for the production of hay, and for the pasturing of cattle to some extent. I think perhaps that feature of it is properly summed up in the testimony of Prof. Piper, one of the Government officials in connection with the Agricultural Department who testified on this subject, when he said that he thought Alaska might raise agricultural

products for local consumption but not for export.

Alaska, without doubt, has great mineral resources, particularly gold. She probably has great copper resources. There are gentlemen—the Guggenheims and their associates—who have made a very expensive attempt to develop what seemed to them the most promising of those copper resources. It is in evidence in the hearings that in reply to a question from one of the stockholders of their company asking when they might expect dividends or some return from that development, the officers of the company said that they could not tell, but that it would certainly be many years. So that, while those copper resources are perhaps rich, they have not yet brought any return to the gentlemen who have spent many millions of

dollars in developing them.

Alaska has very large coal fields. They consist of one coal field about 25 miles from the coast opposite Controller Bay, called the Bering River field, said to contain somewhere in the neighborhood of 50 square miles. Then, there is what is called the Matanuska field, a little farther north, which is said to contain in the neighborhood of from 80 to 100 square miles. The character of the coal in these two fields is said to be substantially similar, being in part anthracite and in part bituminous and in part at least of high quality; but it is very badly broken up in its geological formation, so that there is great doubt whether the veins are continuous, and it is also so crushed that there is difficulty in finding lump coal suitable for some purposes. In addition to these two fields, there is a field of lignite coal, called the Nenana field, near Fairbanks, in the interior, which is of value perhaps to the people in the interior but not valuable for export purposes.

The evidence presenting these facts is the evidence in regard to the resources of Alaska. I might go much further in describing them, but anyone who is interested in that phase of the subject will find it so thoroughly presented in the speeches which have already been delivered here that it is unnecessary

for me to repeat it.

The next testimony presented was in regard to the construction of railroads by private individuals. There have been in Alaska three serious attempts to build railroads. Copper River Railroad, which has been built from Cordova up the Copper River by what is known as the Alaska Syndicate, composed of the Guggenheims; the firm of J. P. Morgan & Co., and their associates. That road was built chiefly for the purpose of developing the copper mines in which those gentlemen were interested.

There is, then, at the next point along the coast, a proposal by a Mr. Ryan to build a road of about 25 miles in length to open the Bering River coal fields. There is at the next point north, at Seward, a partially-constructed railroad of which, under the hands of different owners and through many difficulties, about 71 miles are built toward the Matanuska coal fields, the intention being to go on into the interior of the

country to the Tanana River and to Fairbanks.

The other transportation of Alaska consists of a line or lines of steamboats which run from St. Michaels down the coast to the mouth of the Yukon River, and up the Yukon River and the Tanana River to various points in the interior, and I may say that this great river system will always be a very important means of transportation in any development that may come to Alaska.

Mr. President, I do not want to go into these questions in unnecessary detail. I hope to confine my remarks to a short space, so I will simply say here that there is in the testimony plenty of evidence by different people, in the first place, that the Ryan road to the Bering River coal fields will be built; that the parties interested in it intend to build it, want to build it, and have the capital to build it, provided only that those fields are opened to entry and coal can be obtained from them when the read is built. In the same way, there is plenty of evidence that the road from Seward to the interior will be built to the Matanuska coal fields, and will be built to Fairbanks, provided the coal fields are open.

This is the evidence of Mr. Jemmett, who is now the manager of 11 allied banks in Canada, who, with their associates, own that property, and it is the evidence of Mr. Patrick, who is the attorney of those gentlemen. They testified that they were willing and would be glad to extend the road and that they could

get the capital to extend it.

In regard to the Copper River Railroad, the extension of which is not so important, the evidence is not so strong, but Mr. Jemmett testified that he was told by the owners of that road that they also would build on into the Tanana Valley if they could get coal. The testimony up to this point, therefore, is that Alaska has resources; that those resources are unjustifiably tied up; that she has energetic and enterprising people of the same type as the Americans who opened the plains and won the West; and that they are ready to attempt the opening and development of Alaska, provided the crushing hand of Government interference is removed from her resources.

Mr. CHAMBERLAIN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Rhode

Island yield to the Senator from Oregon?

Mr. LIPPITT. I yield.

Mr. CHAMBERLAIN. What does the Senator think about the contract, which was offered in evidence and which is in the Senate hearings, between the representatives of the so-called Cunningham claims and the Guggenheim interests, which places practically the best part of the Bering River coal fields in the hands of the Guggenheims, who own the transportation into Chitina?

Mr. LIPPITT. The claims of the Cunninghams were for about 6,000 acres of the Bering River coal fields, the testimony in regard to which shows that it is more than 50 square miles in area. Whether they take up the best part of them is something that no living man knows, because no living man knows what is the best or where it is, or, if he does, he has not tes-

tified, so far as I know.

In regard to the Cunningham claims, that is a subject of the long ago, about which there was much discussion on both sides, with which I am not very familiar, and which has little bear-ing upon the present subject of discussion. The contract to which the Senator refers was one by which the Cunninghams proposed to give to the Alaska Syndicate, who were then contemplating the building of the Copper River road, a right to those 6,000 acres, and one of the Guggenheims, in behalf of the Alaska Syndicate, agreed to accept the option which they gave them for the purpose of having coal, or of knowing that they could get coal, which they could develop, provided they extended their railroad up to the Bering River fields. getting the property represented by the option, because it was held up by the Government and the claims were disallowed, the Copper River Railroad never did build up to the Bering River

Mr. CHAMBERLAIN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Rhode

Island yield further to the Senator from Oregon?

Mr. LIPPITT. I am simply stating what I understand to be the facts. As I have stated, they never did build the railroad into the Bering coal fields. Without knowing anything about the legality or otherwise of the Cunningham claims, I will say that whatever may be the right or wrong of that matter I do not believe that any possible profit can ever come to the people of this country as a whole that will in any way compensate them for the great loss that has arisen because that extension of the Copper River Railroad was not built and the . production of coal in Alaska was not begun at that time.

I now yield to the Senator from Oregon.

Mr. CHAMBERLAIN. I simply call attention to that to show the disposition of the syndicate which had built the Cordova & Northwestern Railroad. They had already acquired at the end of the line the Kennicott mines, the most valuable copper mines in the country. That is conceded.

Mr. LIPPITT. I do not concede it.

Mr. CHAMBERLAIN. It is pretty generally conceded, and it is conceded, the Senator will find, in the evidence.

Mr. LIPPITT. The evidence is that they have tried for several years to make a dollar out of them, and they have not been able to make a cent, and they can not tell when they will.

Mr. CHAMBERLAIN. The evidence does not show that. The evidence shows that it is the most valuable copper mine in Alaska, and, further than that, it shows that the company built the road for the purpose of bringing out the ore.

Mr. LIPPITT. Certainly.

Mr. CHAMBERLAIN. But I call attention to the attempt of the syndicate to obtain control of the coal mines in the Bering River field for the purpose of showing that the same syndicate was undertaking to control not only the copper mines of Alaska, but the coal mines as well; and, as evidence of that, just as soon as those coal mines were held up the Alaska Syndicate abandoned the extension of its road into the coal fields.

Mr. BURTON. Mr. President, there are two or three questions which I should like to ask the Senator from Rhode Island. The PRESIDING OFFICER. Does the Senator from Rhode

Island yield to the Senator from Ohio?

Mr. LIPPITT. Yes. Mr. BURTON. The Cordova & Northewestern Railway is the same as the Copper River Railway, is it?

Mr. LIPPITT. Yes.

What is the distance from the main line of Mr. BURTON. that railway to these coal fields? About 30 miles?

Mr. LIPPITT. There are two different routes, I think. I do not remember exactly; but one is in the neighborhood of 30 miles and the other in the neighborhood of 50 miles.

Mr. BURTON. Which is the one that was proposed—the Cop-

per River Railway?

Mr. LIPPITT. I do not know which one they proposed at the time they built their road, but the report of the commission which investigated the conditions recently suggested two alternative routes-I think I am right-from the Copper River road to the Bering River coal fields.

Mr. BURTON. One of about 30 miles and the other of 50

Mr. LIPPITT. About that.

Mr. BURTON. Which is regarded as the better harbor-Controller Bay or Cordova?

Mr. LIPPITT. Cordova.

Mr. BURTON. Quite the better? Mr. LIPPITT. Quite the better.

Mr. BURTON. Did the commission come to the conclusion that a good harbor could be developed at Controller Bay?

Mr. LIPPITT. The commission did not visit Controller Bay; but Mr. Ryan, who represents the parties interested in building a railroad from Controller Bay to the coal mines, which would be only some 23 miles long, is confident of being able to build a harbor there at a cost of somewhere in the neighborhood of a million and a half dollars. Mr. Wickersham, the Delegate from Alaska, in the course of his testimony, says that he thinks Mr. Ryan's plan for getting out coal from the Bering River coal fields is by far the best; and Mr. Jemmett, the manager of the Alaska Northern, says he has no doubt that road will be built if the coal fields are opened.

Mr. BURTON. Which is the Alaska Northern—the one that

goes to the Bering River coal fields?

Mr. LIPPITT. The Alaska Northern is the one that goes from Seward to the Matanuska coal fields.

Mr. BURTON. What is the distance from nearest point of the Bering River coal fields? What is the distance from Cordova to the

Mr. LIPPITT. About 90 to 100 miles. Mr. BURTON. So it would be about 60 miles on the main

line, and then 30 miles on the proposed branch?

Mr. LIPPITT. Thirty or forty miles; somewhere in that neighborhood.

Mr. CHAMBERLAIN. Thirty-eight miles.

Mr. LIPPITT. I am informed by the Senator from Oregon that it is about 38 miles.

Mr. BURTON. Thirty-eight miles is the length of the proposed branch from the Copper River line to the Bering River coal fields?

Mr. LIPPITT. Yes. I will say in regard to that matter that Mr. Ryan testifies that he can take coal from the Bering River coal fields at 96 cents per ton less than it can be taken down over the Copper River Railroad, and he states that he is willing to take a contract from the Government to land coal at tidewater there for \$2.50 per ton.

Mr. BURTON. What is the obstacle in the way of building

that road?

Mr. LIPPITT. The fact that the Bering River coal fields are tied up, and nobody can enter a claim there.

Mr. BURTON. There is no obstacle in the way of right of

Mr. LIPPITT. There is no obstacle in the way of right of

way.
When I was interrupted by the distinguished Senator from Oregon [Mr. CHAMBERLAIN] I was on the point of taking up an examination of the claims of monopoly. The only strong argument that has been advanced in favor of having this railroad built by the Government, at an initial expense of \$35,000,-000 and at an ultimate expense which nobody will undertake to say, is the argument that unless the Government builds railroads in Alaska nobody but Mr. Morgan's firm or the Guggenheims can build them there. Let us first examine the evidence which is relied on to establish that claim in connection with the Alaska Northern Railroad, running from Seward about 71

miles into the interior at present and planned to run farther on.

This road at one period of its career was called the Alaska Central, and was owned by Frost & Osborne, of Chicago, promoters interested in several other schemes, evidently ambitious, vigorous, and enterprising men. They took their securities to the Sovereign Bank of Toronto, Canada, and borrowed money from it. The Sovereign Bank of Toronto, Canada, was a bank with resources of about \$22,000,000 in 1905 and in 1906, when this event occurred. It had branches in numerous parts of Canada, and the firm of J. P. Morgan & Co. had a stock ownership in it amounting to about one-sixth of the total capitalization, which was slightly under \$4,000,000, and acted as its New York agent.

Frost & Osborne failed. Their failure caused the failure, or the approaching failure, of the Sovereign Bank of Canada. Eleven banks of Canada—the allied banks, as they have been since called-in order to prevent the catastrophe which that would have brought upon the Canadian banking system, undertook to give help to the Sovereign Bank. They took over all the assets and all the liabilities of that bank, among which were the bonds of the Alaska Central Railroad running from Seward, afterwards and at present known as the Alaska They have practically wound up the affairs of the Northern. Sovereign Bank of Canada, except that they never have been able to realize anything upon the interest they have in this railroad at Seward. They testify that the face of the obligation left against those bonds is somewhere in the neighborhood of \$3,000,000, and that with interest charges the total amount of the obligation will be between four and five million dollars.

All the interest that the firm of J. P. Morgan & Co. have in this railway is the possibility that this stock in a bankrupt bank of Canada, whose assets for nearly eight years have been in course of liquidation, and on which it has been impossible to realize, may at some time pay something back. Mr. Jemmett, the manager of these allied banks, who has charge of this failed institution, says that he does not believe they will ever get anything. Others who have had experience in that sort of an operation, I think, will be very strongly inclined to agree with him.

I have no doubt that the firm of J. P. Morgan & Co. have long ago crossed off from their books and marked as worthless any interest they may have in the assets of that bank. Even if they get anything out of it, it probably will not be either the stock or the bonds of this railroad. It will be what is received in the form of cash or securities by the allied banks. They can only get something provided some capital, either their own or that of somebody else, goes into the development of that road. As it stands, it is worthless, and always will be.

To attempt to say that this possible residuary interest, far off in the future, controls in any way the construction or the operation of that railroad, is too far-fetched a proposition for my business mind to conceive. Mr. Jemmett testifies that neither Mr. Morgan nor any representative of his has any voice or management in the disposition or control of these funds, the way they stand now.

The testimony on the point of the Morgans not having an interest in this road is repeated in various plac s in this testimony by Mr. Jemmett and by Mr. Patrick. Nevertheless, Mr. Wickersham repeatedly and continually claims that they have a large interest. I want to read some of it. I read from Mr. Wickersham's testimony at page 633 of the Senate hearings. Mind you, this bank failed eight years ago, and this testimony was taken within a few months.

The truth about this Alaska Central is that the J. P. Morgan bank in Canada, the only J. P. Morgan bank in Canada, put up this money, and the J. P. Morgan bank to-day owns the whole of the Alaska Northern.

Was there ever a more unfounded assertion?

Senator CHAMBERLAIN. That is denied, I think?

Mr. WICKBERSHAM. No: Mr. Jemmett told the facts, from which that inference may be fairly and justiy drawn.

Senator CHAMBERLAIN. I think that was denied by Mr. Patrick, if I remember, at the time the hearings were had before the Territories Committee before.

Mr. PATRICK. They do not own one dollar of it.

Then, further over, in another place, on page 653, I find the following:

Mr. Patrick. Neither the Morgans nor the Sovereign Bank own the road nor own any interest in it. I will state that the securities were transferred to the Canadian banks which aided the Sovereign Bank.

Mr. Balliane. Transferred the trusteeship only.

Mr. Patrick. And if there should be any equity left, if the security should be more than sufficient to pay back the money advanced, then the Sovereign Bank might have some equity in the proceeds—the money that might result after settlement. But no title and no ownership and no interest exists in this railroad property. It is owned by the railway company, in which the Sovereign Bank is neither stock nor bond holder.

And the only connection Mr. Morgan has with it is through

the Sovereign Bank.

Mr. President it seems to me that with that testimony clearly and repeatedly given anybody who undertakes to say that that road is monopolized by Mr. Morgan or Mr. Guggenheim must do so for some ulterior purpose. We know what the purpose is. It is to try to convince the public of this country, who do not examine these subjects and who can not do it, that there is a great and overpowering monopoly there.

So much for the Sovereign Bank and Morgan monopoly of the

Alaska Northern. Now, let me go a step further.

We have Mr. Ryan wanting to build to Controller Bay to We have Mr. Ryan wanting to build to Controller Bay to get the coal out of the Bering fields. Mr. Wickersham, in his testimony, read to the committee the charter which Mr. Ryan got from the State of New Jersey. He put the charter in evidence. It is in the testimony. It is signed by four or five people, as was required by the State of New Jersey. None of them are names that are well known in any way. Mr. Wick-ERSHAM promptly says that those are dummy incorporators, and because they are dummy incorporators they must represent Mr. Morgan. The question was asked Mr. Wickersham, "Is this all you know about it?" Mr. Wickersham replied: "Yes; that is all I know about it."

Mr. Ryan himself promptly comes forward and says that the firm of Probst & Wetzler are the people that are backing it, and that neither Mr. Morgan nor Mr. Guggenheim has any interest at all in the property. He brings before the committee a representative of that firm, who, under eath, testifies to the same fact. Nevertheless, the charge is still made that Mr. Ryan's road is dependent upon these interests. Mr. Ryan appeared in my office yesterday, not solicited by me, and confirmed to me these statements. There is repeated evidence about them

in the testimony.

Now let us come to one other, and really one of the most remarkable of all of the statements. Up the Yukon River, starting from St. Michaels, there runs a line of steamboats. It is owned by the Northern Navigation Co. The people interested in the Northern Navigation Co. also own the Northern Commercial Co., this being a trading company with stations, posts, and stores at various points on the Yukon River, which are supplied by the steamers of the allied navigation company. The navigation company runs on up to Fairbanks on the Tanana, and up to Dawson on the Yukon.

There has been great competition on that river. thought in the past that there was a great deal of business to be done there, and various people came in and ran steamboats there. That has resulted in the business being so overdone that there are to-day 43 idle steamboats on that river. It has resolved itself, for the moment, into the hands of these people running from St. Michaels up the river from the mouth, and steamers connected with the White Pass Railroad, approaching from the other direction of Alaska, running down the river to Dawson and to Fairbanks.

The claim is repeatedly made by Mr. WICKERSHAM that Mr. Morgan owns and dominates either the Northern Navigation Co. or the Northern Commercial Co., or both. They are not very large companies, as I understand; nevertheless, they do all the

business that there is there.

The attorney for those companies in Washington is Mr. John Sidney Webb. He appeared in my office yesterday and showed me some telegrams from the owners of those properties, denying that Mr. Morgan or Mr. Guggenheim had any interest in them whatever. I told him that perhaps he might have it made more definite. He telegraphed to his people, who are the managers of that line and the principal owners-that they are the. principal owners, at least, is undenied—the Sloss people, of San Francisco, and their associates. He telegraphed to them, and received in reply a long telegram which I will put into the

An analysis of that telegram shows that the stock of these two companies, the Northern Commercial Co. and the Northern Navigation Co., is owned by the Alaska Commercial Co. to the extent of 65.24 per cent, by the Alaska Goldfields Co. to the extent of 26.77 per cent, by the International Mercantile Marine Co. to the extent of 5.34 per cent, and that they have in the

Co. to the extent of 5.34 per cent, and that they have in the treasury 2.65 per cent.

The stockholders of the Alaska Commercial Co. are given in detail here. The stockholders of the Alaska Goldfields Co. are all people in London except some gentleman by the name of Liebes. The board of directors is given here. It consists of the Slosses, Mr. Gerstle, Mr. Fairbanks, and other gentlemen, all of whom live in the West, I believe, and none of whom have any connection with Mr. Morgan, as I understand. By the way, the telegram denies that either Mr. Morgan or Mr. Guggenheim has any control or power over that railroad in any way.

I ask permission to incorporate this correspondence in the

I ask permission to incorporate this correspondence in the Record without reading.

The VICE PRESIDENT. Is there any objection? The Chair hears none

The correspondence referred to is as follows:

[Copy of night letter.]

SAN FRANCISCO, CAL., January 20, 1914.

SAN FRANCISCO, CAL., January 20, 1914.

John Sidney Werr,

Bond Building, Washington, D. C.:

Capital stock of Northern Commercial Company, three twenty-four thousand shares preferred at five dollars; sixteen thousand two twenty-eight shares common at hundred dollars. Northern Navigation Company, two hundred twelve thousand two hundred shares preferred at five dollars; sixteen thousand two hundred shares preferred at five dollars; sixteen thousand two hundred shares common at hundred dollars; held in following percentages of both companies; Combined Alaska Commercial Company, sixty-five decimal two four; Alaska Goldfields, twenty-six decimal seventy-seven. International Mercantile Marine, five decimal three four. Treasury, two decimal sixty-five. Only stockholders of Alaska Commercial Company, Sloss, Gerstle, Niebaum, and Greenewald families, Washburn, and Louis Greenbaum. Stockholders Alaska Goldfields—all London people except Liebes. Alaska Commercial represented on board directors by Leon and Louis Sloss, Mark and William Gerstle, Fairbanks, Greenbaum, Greenewald, Daniels; Alaska Goldfields, by Philips, Isaac and Julian, and Leon and Arnold Liebes; International Mercantile Marine by T. H. Clarke. Fifteenth director in Camden, New Jersey. We reiterate all statements made in our telegrams February tweifth and thirteenth, nineteen twelve.

LEON SLOSS, President.

[Analysis of telegram.]

Mr. LIPPITT. The only way of connecting Mr. Morgan with this company as a grasping monopolist, which is the position in which he is being represented in this matter, is that the International Mercantile Marine Co. owns the small amount of 51 per cent of the stock. That came about years ago, when the International Mercantile Marine Co. was formed, by their having some steamers out on the Pacific coast which were taken into these properties and were paid for in stock. Mr. Morgan's firm, as is well known, formed the International Mercantile Marine Co. His firm undoubtedly still have a powerful influence in the direction of that company. Because, however, this small amount of stock in it is owned by the International Mercantile Marine Co., which is a company of enormous size, which extends its activities into many parts of the world, which is a trans-Atlantic steamship company; because it happens through the failures and the difficulties of doing business away out on the coast of Alaska to have this small percentage of interest in that transportation company, it is pretty far-fetched to claim that Mr. Morgan owns and controls and dominates it, or has anything to do with the matter. The fact undoubtedly is that

Those are the facts in regard to the three companies that are doing and are talking about doing transportation business in Alaska. If anybody can see in those facts anything to justify the claim that all Alaska is in the hands of a crushing monopoly, he can see something that is beyond my vision. I can not imagine why either the firm of J. P. Morgan & Co. or the firm of Guggenheim Bros. should wish to invest another dollar in They have already made an investment there of many, many millions. They are the only ones who have really, seriously, and energetically, and with capital behind them, taken hold of the resources of Alaska to try to see if something was to be gotten out of them. The testimony given by Mr. Dickeson,

the manager of the White Pass Railroad, is that they have not

made a dollar in dividends, and they can not tell when they will.

If any further evidence is needed on this question, Hon. James S. Davenport, a Member of Congress from the State of Oklahoma, wrote to the firm of J. P. Morgan & Co. in regard to the question whether they did or did not have a large interest in the transportation systems of Alaska. He handed me their answer this morning. I knew nothing about it until two or three minutes before it was put into my hands. It is dated yesterday—January 20. I will ask to have the Secretary read it.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

7. P. Morgan & Co., Wall Street, corner Broad, New York; Drexel & Co., Philadelphia; Morgan, Grenfell & Co., London; Morgan, Harjes & Co., Paris.]

Co., Philadelphia; Morgan, Grenfell & Co., London; Morgan, Harjes & Co., Paris.]

New York, January 20, 1914.

Hon. James S. Davenport, M. C.,

House of Representatives, Washington, D. C.

Dear Sir: We beg to acknowledge receipt of your letter of the 19th instant calling our attention to a statement made during a debate on the Alaska railway bill that the Alaska Nordicate held or exercised a control of the White Pass & Yukon Route and the Alaska Northern Railway, and asking for a specific reply as to whether or not the Alaska Syndicate, our house, or M. Guggenheim's Sons have any interest or control in any railway or water lines in Alaska other than the Copper River Railway and the Alaska Steamship Co.

The Alaska Syndicate owns the Copper River & Northwestern Railway, running from Cordova, on the coast, to Chitina, with a branch line from Chitina to the Kennicott mines.

The Alaska Syndicate owns 41 per cent of the capital stock of the Alaska Steamship Co.

Neither the Alaska Syndicate, M. Guggenheim's Sons, nor ourselves have or ever have had any interest in the White Pass & Yukon Railway, The Alaska Syndicate, M. Guggenheim's Sons, or ourselves have not and never have had any interest in the Alaska Northern Railway or its predescessor, the Alaska Central Railway.

The firm of J. P. Morgan & Co. were stockholders in the Sovereign Bank of Canada, but were not represented on the board, nor did they have anything to do with the management of the bank. The bank failed and was placed in the hands of a receiver. At the time of the failure we learned that the bank had made loans either to the Alaska Central Railway, or one of them, as collateral. We had no previous knowledge of such loans nor any interest therein.

We paid our double liability as stockholders in said bank in cash and received therefor shares in the International Assets Co. (Ltd.), a Canadian company formed to liquidate the bank, which company, we believe, now holds whatever interests the Sovereign Bank had in the Alaska Northern Railway. If the liqu

Mr. LIPPITT. Mr. President, I have put in denials from almost everyone connected with the management of these properties of the statement that they are dominated and controlled by the interest which Mr. Wickersham asserts is throttling Alaska.

Mr. CHAMBERLAIN. May I interrupt the Senator?

Mr. LIPPITT. Certainly.

Mr. CHAMBERLAIN. I did not happen to be in when the first part of the letter was read. Was there any denie of the Posting statement which Mr. Ballaine made in reference to Mr. Perkins and what he had to say about the loan for railway construction?

Mr. LIPPITT. There was no denial of the fact that Mr. Perkins, as representing the house of J. P. Morgan & Co. in 1909, was strenuously urged by Mr. Ballaine to induce his company to finance an extension of the Alaska Northern Railroad; that Mr. Perkins visited Alaska to consider the question; that subsequently Mr. Ballaine went to New York hoping that he would receive a consent to his proposition and financial support; and that he was told that the firm of J. P. Morgan & Co. did not care to entertain the proposition. In other words, the testimony the honorable Senator from Oregon has referred to is to the effect that the firm of J. P. Morgan & Co. were earnestly solicited to build a line which, if they had consented to do, would have given them this very control that it is now claimed they have; that they refused to do it, although if they wanted this thing which they are claimed to want and claimed to have, here was the easy, manifest, ready way of doing it; and that instead of showing this grasping spirit they said that for various reasons they did not care to enter into the transaction.

Mr. President, what I was about to say before this interruption is, that if all these charges were absolutely true that have been made of monopolizing the transportation systems and resources of Alaska and we were still in the conditions in which our Government was and the conditions of doing business that we were in 20 years ago we might seriously consider it; but today, with an all-powerful Interstate Commerce Commission controlling the railroad situation in this country, with laws that are so powerful that even great railroads commanding hundreds and hundreds of millions of capital can be broken apart almost with the stroke of a pen, what danger is there of new railroads up in that undeveloped, barren, and almost waste country being developed by the same men? If I were an Alaskan, I would not care whether the railroads were owned by one man or a hundred or a thousand men so long as the Interstate Commerce Commission were here to fix their rates, to dictate to them how they should run their trains, what kind of cars they should run, and all the other details of railroad management. The day has gone by when this country needs to be stampeded by any such cry of monopoly.

Mr. LANE. Mr. President-

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Oregon?

Mr. LIPPITT. Certainly.

Mr. LANE. I should like to say to the Senator from Rhode Island that if I were in Alaska trying to get freight in there or food to last for a year's supply and had to pay \$120 a ton to get it, and if I had only a few hundred dollars in my pocket, I would take a good deal of interest about who was collecting the toll on the freight.

Mr. LIPPITT. Of course in that case he would not get his

freight in.

I was saying, when the distinguished Senator from Oregon interrupted me, that I think the Interstate Commerce Commission has ample power to handle any such situation if it existed.

I see no signs of its existence.

Under these circumstances the whole question resolves itself into the proposition whether or not in this country we are to abandon our time-honored policy of trusting to the initiative and the courage and the enterprise of our own citizens, our private citizens, our individual citizens, to develop our re-Mr. President, the glory of our country and its strength lie in the individual men who for the last 20 years have been grappling with just such problems as are presented to us to-day in Alaska. They have won their way across the deserts to the Pacific coast and they have built up industries of every kind.

Mr. President, we hear the much-abused phrase "private interests." It is the private interests that have built up this country-private interests run by private men. Farms and facories and forges and furnaces and mines and railroads, all the instruments of agriculture and commerce and manufacture, have been built up by private individuals who have put their energy, their lifeblood into the separate and special control of the separate and special industries that were under their eyesight.

The question that has now come to us is whether we are to abolish all that long continuous system of development that has built up the prosperity of which Americans so often boast.

If the only thing that had been developed were such things as farms and factories, probably we might hesitate, but, Mr. President, I picked up the other day a book by Mr. Howard Elliott, who has recently been made president of the New York, New Haven & Hartford. He gives the rates of transporting freight in this country and abroad. I will put the tables into the RECORD. Before I do so let me state that for the United Kingdom of Great Britain the cost per ton per mile is 2.33 cents, for Germany it is 1.41 cents, for Austria 1.45 cents, for Holland 1.32 cents, and for the United States of America 0.741 cent. That is a marvelous result to be obtained in a new country, a sparsely settled country, like ours.

But let me go on and show you something of the conditions under which it has been obtained. The cost of labor shown in another part of this volume is 60 per cent of the whole cost of the railroad business, and the average wages paid railroad employees per year in the United Kingdom are \$270, in the German Empire \$388, in France \$260, in Austria \$277, and

so on for the different countries.

Mr. WALSH. Mr. President-Mr. LIPPITT. May I finish Mr. LIPPITT. May I finish the sentence? Whereas in the United States of America the wages are \$733. In other words, the rate of wages is more than double the wages paid in the other railroad countries of the world, while we have a rate for transportation that is from one-half to two-thirds only of the

rate that is charged in those countries. I will now yield to the Senator from Montana.

Mr. WALSH. I desire to inquire of the Senator from Rhode Island, without intending at all to combat the conclusion to which his argument would lead, whether the discrepancy between the cost of transporting freight in this country and in Europe is not assignable in a very large measure to two facts: First, that in Europe, taking Germany particularly, the vast tonnage of low-grade freight is transported by canal, thus elevating, as a matter of course, the average cost of transporting such freights as are carried by railroads; and, second, inasmuch as the distances over which freight is carried in Europe are very much less than in this country, the terminal charges necessarily become a higher factor in the cost of transportation.

Is it not a fact that those two elements may account for very much of the difference which thus is most fortunately in our

favor in the matter of freight?

Mr. LIPPITT. It is quite possible that some of the conditions which the Senator from Montana instances may account for some of this difference. Passengers are not largely carried on freight boats, and there is a very material difference in the passenger rates between this country and abroad. The first-class passenger rate in Germany is 3 cents a mile, in England 4 cents, and there are different figures which I will not take the time at this moment to read. But in addition to all that the fact remains that whatever may be the conditions which might modify this result, nobody accustomed to commercial matters can question for a moment that it is enormously creditable that the great men who for these long years have been building up our railroad system in this country should have been able to give us an average rate that is anywhere near the average rate abroad, when the cost of labor here is more than double the cost of the labor that they have to use abroad.

The table referred to is as follows:

1		Cents.
1	United Kingdom	2. 33
1	Germany	
1	France	
Į	Russia	
1	Austria	
1	Hungary	
1	Denmark	
1		
1	Holland	
ł	Switzerland	
1	United States	. 741

And here are some figures for capitalization per mile of road: United Kingdom Germany ___ \$275, 000 \$275,000 114,000 144,000 81,000 118,000 67,000 58,000 82,000 117,000 Germany
France
Russia, including Siberia
Austria
Hungary
Denmark Switzerland _____ United States____

And here are the average wages paid railroad employees per

year:	
United Kingdom	282
German Empire	1
France	. 5
Russian Empire	1
Austria	-5
Hungary	2
Italy	
Switzerland	
United States	100

The argument which I want to make out of this circumstance is simply this: That we have organized in this country a set of railroad builders who have given us magnificent results under the system which we have so long used; that they are perfectly ready to undertake the problem of Alaskan transportation; and that there is no necessity of stepping outside of an agency that we know all about to employ one the results of whose management no man can foretell.

Mr. President, when the inhabitants of this country shall come to look to their Government for the direct management of their commercial development I think they will begin to lose the characteristic which is the most valuable that the people of a nation can possess, the faculty of initiative, of courage, and of independence. Anyone who has had experience in the employment of men knows that the one difficult and almost impossible thing to procure is a man of personal initiative, a man who will go outside of the beaten track, who will do something to-morrow differently from what he did yesterday, who will discover effective ways of meeting new problems. It is the possession of that faculty which has built up this country. The circumstances of our development has educated for us a class of men who are preeminent among all the people of the world in that respect. This Government ownership is the first world in that respect.

step toward diminishing that independent spirit among our people.

Government building and Government management lead to extravagances of all kinds. It leads to a government by a bureau instead of a government by your neighbors and friends. I believe that one of the very worst things that could be done to Alaska would be to take away from her the opportunities which a great country like that possesses for the development of men and substitute for it a system of business that is controlled by a Government several thousand miles away which is too busy and too dilatory to give it the close attention that it needs.

Mr. NORRIS. Mr. President, I want for a few moments to address the Senate upon an amendment to the bill that has been printed and that I expect to offer when the proper time arrives. I should like to have the Secretary at this point read the amendment.

The VICE PRESIDENT. It will be read. The SECRETARY. On page 8, after line 20, add:

The President of the United States is hereby further empowered, authorized, and directed to construct or cause to be constructed, not less than 10 nor more than 20 vessels suitable and appropriate for the freight and passenger service between the ports of Alaska and other ports on the eastern and western shores of North America and the ports on the eastern and western shores of South America. Said vessels shall be constructed as near as may be so that they will be suitable for use in aid of the Navy of the United States as a merchant marine. After the same are constructed, the President is hereby authorized, upon such terms as he may deem best to lease the same to the Panama Railroad Co. For the purpose of building said vessels the President is hereby authorized to raise money and to expend the same in accordance with the terms provided in this act, not exceeding the amount of \$15,000,000.

Mr. NORRIS. Mr. President, in my judgment, if this amendment were added to the bill it would go a great ways toward the carrying out of the purposes and the objects of the proposed law providing for the building of railroads in Alaska.

I am just informed that the Senator from Vermont [Mr. DIL-LINGHAM] had expected to follow the Senator from Rhode Island [Mr. LIPPITT]

Mr. DILLINGHAM. It makes no difference. I would just

as soon follow the Senator from Nebraska.

Mr. NORRIS. I had a talk with the Senator from Oregon [Mr. CHAMBERLAIN], and he told me that he did not know of anyone who was going to address the Senate on the bill to-day, but I am perfectly willing to yield to the Senator.

Mr. DILLINGHAM. I am perfectly willing to wait until the Senator has discussed his amendment, and then I will take the

Mr. NORRIS. It will be seen, Mr. President, from the reading of the amendment that it probably goes a great deal further than is necessary for the carrying out of the objects of the bill, and yet I believe it must be admitted, from the evidence that has been presented before the committee and statements made on the floor here by Senators in discussing the bill, that the bill itself is not complete unless we make pro-vision for the carrying of the products of the mines of Alaska from the shores of Alaska to the different ports of the country.

I confess, however, that while in my judgment I think it would strengthen the bill and carry out its purposes more completely, the greater purpose in my mind in offering the amendment, and the greater object I have in view, is to develop the commerce between the ports of North and South America—to develop if possible the trade that everybody admits ought to be developed with the ports of the different countries of South America.

The Panama Canal, now nearing completion, will be used mostly by ships of foreign nations. If we should pass this kind of an amendment it would enable the Government of the United States to put vessels upon the waters of the Atlantic and the Pacific Oceans to ply between the ports of North and South America, so that the trade that every American citizen is anxious should be developed between this country and South America could be developed and could be brought to us, where, as a matter of geography and as a matter of business and as a matter of commerce, most of it ought to be.

It is undisputed, I think, that while the combinations existing in Alaska have made it necessary, in the judgment of those who are behind this bill, to urge the building of railroads by the Government of the United States in that Territory, in addition there is a combination between the owners of vessels that ply between the shores of Alaska and the ports of the Pacific coast. This was brought out quite extensively by the Senator from Montana [Mr. Walsh]. It was mentioned in some detail by the Senator from Washington [Mr. Jones], and also by the junior Senator from Washington [Mr. Poindexter]. So, after we have developed the coal fields of Alaska and the mines and have brought her products to her shores, they must be shipped to the ports of the Pacific coast and other places upon vessels

owned by men who, it is conceded, I believe, are already in control of the situation, and who would have it within their power to exact such rates as would practically nullify the legislation that we would pass here, as far as the railroads are concerned.

Mr. GALLINGER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. NORRIS. I yield to the Senator.

Mr. GALLINGER. Mr. President, I think it is safe for me to say that heretofore there has been rather a wide difference of opinion between the Senator from Nebraska and myself as to the best means of rehabilitating our almost entirely vanished merchant marine.

Mr. NORRIS. I am going to discuss that subject, I will

say to the Senator, before I conclude.

Mr. GALLINGER. I assume that the Senator in this amendment has in view the probable development, to some extent at least, of the American merchant marine, which is a commendable object; but I will call the attention of the Senator to one fact in connection with his amendment. Heretofore we have thought that in developing our trade with South America it was desirable to have ships that left our great ports, like Boston, New York, Baltimore, and Philadelphia, carrying the commerce of our great country. It seems to me that this amendment provides simply that the products of Alaska shall be carried in these ships to South and Central America. Does the Senator think there will be a commerce of sufficient consequence to warrant the investment of, as I think, from ten to twenty

million dollars in building ships for this purpose? Mr. NORRIS. No; and the Senator has not grasped the real object of the amendment. Of course, as a parliamentary proposition, I had to prepare an amendment that would be in order on this bill. I think the fact that these railroads will come down to the ports of Alaska makes it in order as a parliamentary proposition to offer this amendment, although I have not believed, and I do not believe, that the ships I have provided for here would all be used or could all be used in carrying coal from Alaska. I do not believe that you can put that kind of a construction on the amendment. If the amendment were adopted, I think the President would have some of those necessary vessels engaged in the carrying of coal from Alaska to other ports, wherever the other ports might be found to be located, with a view of making the traffic profitable, but the larger number of them would undoubtedly be engaged in the general carrying of freight and passengers between the eastern and the western ports of both North and South America. is the object of the amendment. If it would not bear that construction, then I am mistaken in its language.

Mr. GALLINGER. I trust that the amendment will bear that interpretation. I fear that it does not or can not bear the interpretation. However, that is a matter which can be

carefully looked into.

Mr. NORRIS. Oh, yes; I will say to the Senator if it can not bear that interpretation any amendment that is necessary to give it that interpretation would not only be desirable, but

would be readily supported by myself.

Mr. President, I am not going to take up the time of the Senate in discussing the question of trade with South America. I assume that all Senators and all citizens of the country are anxious that the trade with South America shall be developed. We have spent about \$400,000,000 in digging the canal. We brought all those ports, commercially speaking, much nearer to our ports than they were before. The whole world is making preparations to use the canal. South of us all the countries of South America are trading almost entirely with Europe, and it strikes me that everybody in the United States is desirous, if it can be done, of getting at least a portion of that trade which we do not now possess, and that we will not possess until some steps are taken in some way to put the necessary ships on the ocean to develop it.

Mr. WALSH. May I interrupt the Senator? The PRESIDING OFFICER. Does the S Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I yield to the Senator. Mr. WALSH. The Government of the United States owns quite a line of steamships now.

Mr. NORRIS. Yes, sir; I expect to take that up and discuss it shortly.

Mr. WALSH. Is it the opinion of the Senator that when those ships are released from the duties that have been devolved upon them during recent years in connection with the constriction of the canal they would not be available for the purpose he has in mind?

Mr. NORRIS. I think they would be available. I am going to discuss that, I will say to the Senator, shortly. I want now to mention the merchant-marine proposition. That is a question which has been discussed and has been an issue in a good many political campaigns. While, as far as I know, men of all many political campagns. While, as lar as I know, men of an political beliefs are anxious that we should develop a merchant marine, men have disagreed very widely as to how we should obtain it. I think the methods that have been proposed in the past, that were advocated by the Presidents who have preceded the present occupant of the White House, have met such serious objections, in my judgment objections well founded, that there will be no attempt to revive the agitation of obtaining a merchant marine in the method which has been advocated in the past.

I do not believe the American people are in favor of a ship subsidy; I do not believe it is necessary that we should have one in order to develop our merchant marine; but everybody concedes that we are seriously handicapped in that respect, and that in case of war we should be at the mercy of those who owned the ships; we should be compelled to pay what might be asked for them; and in many cases we should be unable to get them at all. So our Navy, to a great extent, would be rendered

When our naval fleet went around the world and when it made its recent trip to the Mediterranean, from which it has just returned, we heard it said that it was necessary to engage foreign ships in order to carry the coal to supply our Navy. seems to me that the adoption of my amendment would furnish a method of getting a merchant marine that would not be expensive, and that the United States would be able to obtain vessels, in case it needed a merchant marine, without paying a dollar for the use of the ships which are provided for in the amendment. The amendment provides that the President may lease these ships when they are constructed to the Panama Railroad Co. It is my theory that, if the amendment be adopted and the ships should be constructed, the President will avail himself of this discretion to lease the vessels to the Panama Railroad Co.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. NORRIS. I yield to the Senator. Mr. BRISTOW. Why not simply make an appropriation and authorize the Panama Railroad Co. to construct the ships and operate the line-it is there to do it if the means are providedinstead of going the roundabout way of having the ships constructed by the Government and then leased to this corpora-

tion, the stock of which is owned by the Government?

Mr. NORRIS. That would do very well; but such an amendment would not be in order, as a parliamentary proposition on this bill. A separate bill to that effect, if enacted into law, would accomplish the same thing which this amendment seeks to accomplish; but every Senator knows that between the introduction of the bill and the reaching of the stage of parliamentary procedure, which we have now reached on the pending bill, there are many dangerous steps and a great many obstacles to

Mr. GALLINGER. Mr. President, if the Senator from Nebraska will permit me, I think the Senator is somewhat influenced by the rules of another body in reference to the parliamentary procedure. We have no rule of relevancy here in the matter of amendments, except in reference to appropriation bills, and I feel sure that the Senator's amendment would be equally relevant and pertinent to this bill if he should draft it along the line suggested by the Senator from Kansas [Mr.

Mr. NORRIS. It would not be any better, in my judgment, than my amendment, although I concede it would be just as good, and I would just as soon support it; but I should like to say, while it does not bear directly on this question, in reply to the Senator from New Hampshire [Mr. GALLINGER], that my observation for several years, and my experience for a very much shorter time, of what is in order and what is out of order in the Senate, depends to a great extent upon the individual opinions or perhaps the wishes of some of those Senators who have been here so long that they carry in their minds and in their recollections rules that are not printed in the book. I think I have seen a good many instances where points of order have been made, and made by those Senators, and everybody has conceded at once that the points of order were well made. I do not want to run up against that kind of a proposition.

Mr. President, the Panama Railroad Co., as the Senator from Kansas [Mr. Bristow] has said, is a corporation, every dollar of the stock of which is owned by the United States. It has been operating a railroad in Panama and a line of steamships from Colon to New York and part of the time to Philadelphia, I believe, ever since we have been engaged in the construction of the Panama Canal. It is a corporation that goes into the market the same as any other corporation engaged in transportation, advertises, and does business in exactly the same way, and attempts to get business the same as do other corporations, excepting, perhaps, that it does not charge, and las not charged, the Government as high a rate in transporting articles to Panama as the owners of private steamships have charged.

Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. NORRIS. I again yield to the Senator from Kansas. Mr. BRISTOW. I desire to say that the Panama Railroad Co. competes for Government business with private lines, and, if the private lines underbid it, it loses the business.

Mr. NORRIS. Certainly; but, as a matter of fact, to the extent of their capacity, as a rule, they underbid the private

Mr. BRISTOW. Very frequently it loses important ship-ments because the private lines underbid it.

Mr. NORRIS. I have here in my hand the official report of

the board of directors to the stockholders of the Panama Railroad Co. for the fiscal year ended June 30, 1913. It is a very comprehensive and full report, showing operations both of the railroad and the steamship lines; and I have found from an examination of the figures that are itemized here that, as a rule, they have carried freight cheaper than any other line between New York City and Panama, and that, as a rule, the Government has paid less per ton to them than to anyone else.

Mr. BRISTOW. Mr. President, if the Senator from Nebraska

will kindly yield-

The VICE PRESIDENT. Does the Senator from Nebraska. yield to the Senator from Kansas?

Mr. NORRIS. I yield to the Senator. Mr. BRISTOW. I think it has to do it or it does not get the business

Mr. NORRIS. That may be; but my statement is that it does do it and that it does get the business.

Mr. GALLINGER. Mr. President, I wish to ask the Senator

if the statement to which he alludes shows the profits and losses of this corporation?

Mr. NORRIS. Yes, sir. Mr. GALLINGER. Has it been a profitable corporation?

Mr. NORRIS. Yes; I will give those figures. I am about to come to that point in my address where I expected to put those figures into the Record.

Mr. GALLINGER. It is important in giving the figures, I

think, Mr. President, that the initial cost should be taken into consideration.

Mr. NORRIS. I do not have that, I will say to the Senator. Mr. CUMMINS. Mr. President—— The VICE PRESIDENT. Does the Senator from Nebraska Mr. NORRIS.

yield to the Senator from Iowa?

Mr. NORRIS. I yield to the Senator from Iowa. Mr. CUMMINS. I ask the Senator from Nebraska whether it be not true that shortly after the United States acquired the stock of the Panama Railroad and the steamship company there was not a very marked reduction in the general freight rates from New York to Colon or to Panama? I am under the impression that those who are familiar with it believe that the ownership of this property by the United States brought about a reduction of about \$3 a ton in those rates. I think I got that from the Senator from Kansas [Mr. Bristow] in some fashion or other, and if the Senator from Nebraska can not answer the question, I am sure that the Senator from Kansas

Mr. NORRIS. I had not expected that the question would be asked or I should have marked it, but in this report some--I do not feel as though I am justified in taking the time of the Senate to look it up now-there is a statement as to the price per ton charged by various transportation companies from New York to Colon; and I was impressed with the fact that the price per ton by the Panama Railroad Co. was lower than any of them. I want to say to the Senator that I am under the impression-I do not believe there is any doubt about der the impression—I do not believe there is any doubt about it—that what he has stated is true; that when the Panama Railroad Co. commenced to engage in the business of transporting freight and passengers from New York to Colon, it did reduce the freight charges very materially.

Mr. CUMMINS. My understanding is that not only did they charge less than the rates formerly prevailing, but that these competitive influences reduced the rates of the independent carriers between these solutions.

riers between those points.

Mr. NORRIS. Yes,

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. NORRIS. I yield to the Senator.

Mr. BRISTOW. I do not now remember the exact figures, though I was very familiar with them at one time; but I was told by one of the general officers of the Panama Railroad Co. that so great was the reduction in rates between New York and Colon as a result of the competition between the Panama Railroad Co. and Steamship Line and other steamship lines that at one time he was approached by the representatives of some European line with the view of entering into an agreement as to rates and increasing the rates over what they were, because those representatives of foreign interests said the rates were too low, these gentlemen, of course, not understanding that the stock of the Panama Railroad Co. was owned by the United States Government, thinking that it was still a private line, as it was during the French ownership of the company. He declined because he said the business was very profitable to the Panama Steamship Line, and there was no occasion for any advance in rates.

Mr. NORRIS. Mr. President, I am very much obliged to the Senator from Kansas [Mr. Bristow] for that observation, and I want to say that it is in accordance with my recollection of the situation. I do not believe there is any doubt whatever

Mr. President, for the fiscal year ended June 30, 1913, the steamship line operated by the Panama Railroad Co. had a total revenue of \$2,151,157.99 and a total expense of \$1,929,-668.07, leaving a net revenue after the payment of all expenses of \$221,489.92. I have an itemized statement of the income and of the expenses, but unless some other Senator desires it put into the RECORD, I shall not encumber the RECORD with it.

Mr. GALLINGER. I think it would be very important in making that estimate that we should have the interest on the original cost of those ships

Mr. NORRIS. I think so.

Mr. GALLINGER. And that we should have also the expenses, the overhead charges, as they might be called.

Mr. NORRIS. As I understand, they are all included. Mr. GALLINGER. Do they include the salaries of the officials who have control of those ships, or are they Government officials who receive salaries for other reasons?

Mr. NORRIS. It includes all the salaries of officials of the Panama Railroad Co., and those who control these ships are such officials; but it does not, of course, include Government

Mr. BRISTOW. If the Senator will pardon me for interrupting him so often, I desire to say that the officers employed by the Panama Railroad Co. are not Government appointees at all, any more than are the officer and employees of the Santa Fe Railroad Co. or of any steamship line. They are simply the employees of a corporation which is run just exactly like any other corporation. The directors are selected by the Secretary of War, who holds the stock in trust for the United States Government.

Mr. GALLINGER. I am not talking about the Panama Railroad Co. I am talking about the steamship company.

Mr. BRISTOW. The steamship line is operated by the Panama Railroad Co.

Mr. NORRIS. That is only one of the operations of that railroad company. They operate, as I said in the beginning, the railroad and also a line of steamships.

Mr. GALLINGER. The Government owns the steamships,

The Government owns all of the stock of this corporation. The Panama Railroad Co. owns the railroad and owns some of the ships and charters other ships. I will give a list of them shortly.

Mr. GALLINGER. It is very evident, of course, Mr. President, to the most casual thinker that if the Government is going into business in competition with private parties and the Government constructs factories and runs them in opposition to private parties, the private concerns are necessarily going to the wall in competition with the Government, it seems to me.

Mr. NORRIS. I take it that the Government could do that; but I do not have the remotest idea that the Government would

want to do anything of the kind.

In the next place, this is not building a factory, but supplying what the Senator himself a while ago suggested ought to be supplied in some way, although I do not mean to insinuate that it ought to be supplied in this way.
Mr. GALLINGER. No.

Mr. NORRIS. But it will supply a need of the Government; I think we will all admit that.

Mr. GALLINGER. I have no doubt that the Government can do anything and everything it chooses. The Government can take over every private business in this country if it wishes

Mr. NORRIS. But I am speaking, if the Senator from New Hampshire will permit me, particularly now of the merchant marine. The Senator from New Hampshire as well as myself and all other Senators are anxious that the Government should be supplied; and I think this would supply it-at least to the extent of the ships that we would build.

Mr. GALLINGER. Mr. President, my conviction is-I may be wrong about it; time will demonstrate that if it is ever attempted that it will be the most expensive merchant marine

that any country ever engaged in building or in operating.

Mr. NORRIS. My own idea is that it would be much cheaper for the Government to construct these ships, lease them to the Panama Railroad Co., and have them used for the purpose of developing commerce between our country and South America and Central America and Mexico, and between our own ports, than it would be to engage to pay a subsidy to private persons to build the same ships to go into the same business, and then, when we need the ships, if we ever do, to take them over at a cost that would perhaps be increased greatly by the very exigency of the occasion.

Mr. GALLINGER. All of the ship lines which are now receiving what the Senator chooses to call "a subsidy," which is simply mail pay, do so under the act of 1891; and there is a provision in that statute that the Government may take the ships at any time that it chooses when there is an exigency.

Mr. NORRIS. Yes; but it has to pay for them.
Mr. GALLINGER. It has to pay for them, of course.
Mr. NORRIS. In this case it could take them from the Panama Railroad Co., a corporation which it owns, and it would

not be necessary to pay for them.

Mr. GALLINGER. But somebody must have paid for them in

Mr. NORRIS. Certainly; the Government will pay for them in advance.

Mr. GALLINGER. They did not grow down in the region of the Panama Canal; they had been constructed at somebody's

Mr. NORRIS. Nobody contends anything to the contrary; but whatever benefit there would be, the necessity of the Government being able to get ships in case it needed them would be met at least to the extent of the number of ships that we would

build, and there would be no probability or possibility of the Government being held up at the time it took the ships.

Mr. BRISTOW. Mr. President—
Mr. NORRIS. I yield to the Senator from Kansas.

Mr. BRISTOW. I merely want to say, in connection with this matter, that I do not believe the Panama Railroad, if it were owned and operated by the Government in a direct way, as we operate the Post Office Department, would ever pay. think the only practicable way to operate the Panama steamship line and the Panama Railroad is just as it has been done, as a separate, individual corporation that is run as a private business and not as a Government function. The facts are that the Panama Railroad Co, and its steamship line in their entire operation are run just the same as any chartered corporation that is under the ownership of private proprietors. If anyone will study—if the Senator will pardon me for taking so much of his time—the operations of the Panama Railroad since its stock has been acquired by the United States Government, and what that company has done in connection with Panama and in the construction of the canal, he will perceive that it stands out to-day as the greatest achievement in history in civil administration.

Mr. NORRIS. I should like to add to what the Senator has said that during all the time the Government has been operating this road I have yet to hear of the first instance where there has been in connection with the operation and the management of the Panama Railroad Co. one single instance of graft, with the exception of the one instance which was recently given some publicity in the newspapers and which I think is now under investigation. That is a record which very few railroads in the world can boast of in the same length of time.

Mr. President, it might be interesting-it does not bear directly on the ship proposition, but I am going to call attention to it, because there has been so much said about the Panama Railroad Co .- it might be interesting to notice and call attention to the total revenues and expenses of the Panama Railroad Co. outside of the operation of its ships. The total revenue for the same year was \$1,516,734.43. The total expense of the railroad, outside of the ships, was \$813,795.25, leaving a net revenue of \$702,929.18. That, of course, is the net revenue of the operation of the Panama Railroad Co. proper and has nothing to do with the operation of the ships, which I have mentioned before

Mr. GALLINGER. But, Mr. President, is not that revenue in one sense a fictitious revenue—that is to say, is it not due to the tremendous amount of business given that railroad because of the construction of the Panama Canal?

Mr. NORRIS. Oh, yes.

Mr. GALLINGER. And is it not a fact that as soon as the canal is completed that revenue will largely disappear?

Mr. NORRIS. So far as that railroad is concerned, I think that is true; yes, sir.

Mr. BRISTOW. Mr. President, if the Senator will pardon me again-

Mr. NORRIS. Yes. Mr. BRISTOW. I would not want that statement to go without question, because it is the belief of a great many who have studied the transportation situation in Panama-

Mr. NORRIS. Before the Senator goes on, I will say that I made a mistake in the figures which I gave. I read from the wrong column the figures which I have just given in regard to the Panama Railroad Co. I want to correct them, if the Sen-

ator from Kansas will permit me, while we are on that subject.

The total revenue of the railroad proper was \$4,599,163.13.

The total expenses were \$2,770,310.45, leaving a net revenue of \$1,828,852.68. The figures which I gave before were the figures applying to the Panama Railroad Co. proper since the end of the fiscal year. That would be for four months, commencing with

the 1st day of July and ending October 31.

While I am on that subject, and before the Senator interrupts me again, I should like to give for that same length of time, those same four months, the figures in regard to the operation of the ships proper. The total revenue during those four months that is the latest report we have-ending October 31 from the operation of the ships was \$755,026.81; the total expenses were \$659,245.35, leaving a net revenue for those four months of Now I yield to the Senator from Kansas.

Mr. BRISTOW. Referring to the operation of the Panama Railroad Co. after the canal is completed, a great many who have given careful study to the transportation situation in Panama believe that it will be a profitable line after the canal is in operation, because there will be a great deal of small business which will have to be done over the railroad which can be done very much more cheaply in that way than by ships through the canal. The railroad probably will be run to its full capacity in handling trans-Isthmian freight.

Mr. GALLINGER. If the Senator from Nebraska will permit me, I will ask the Senator from Kansas, who is well informed on this matter, if it is not in contemplation to abandon the steam

railroad and substitute an electric railroad?

Mr. BRISTOW. Yes; because it is believed that it can be run very much more cheaply with electricity that comes from the waste waters of the Chagres River than by other power; and that that will be the proper way to operate it.

Mr. GALLINGER. I had an impression that that was in con-

templation.

Mr. BRISTOW. Yes. Mr. NORRIS. Mr. President, I should like to say that I think the Senator from New Hampshire was right when he said that the revenues from the operation of the railroad company from the work which it has had down there on the Isthmus would be materially decreased after the canal was in operation. I assented to that; but I did not mean to be understood as saying that there would be no further use for the railroad company. That has not anything to do, however, with the particular amendment which I am discussing; but in order to give some additional information to the Senator from New Hampshire I want to read an extract from the report of the president of the Panama Railroad Co., Col. Goethals, contained in the same report from which I have given these figures. He says:

Regarding the future policy of the company as related to the opening of the Panama Canal to commerce, the board of directors, after mature consideration of the topic in conference with the Secretary of War, the company's principal shareholder, decided to continue to operate the railroad and steamship line as at present, except for such modification of existing practices as may be expedient from time to time to meet changed conditions.

Mr. President, in conclusion, I want to say a word about the effect, in my judgment, that would be produced if this amendment were adopted and enacted into law. The ships provided for would not be a drop in the bucket so far as the number of ships that would be necessary to carry on the trade between all the points of North and South America. It is not my idea or my intention, nor do I believe that anybody desires, that steps should be taken to try to get a monopoly of this trade or any part of it by the building of not less than 15 nor more than 20

vessels. If that number is not adequate, it can easily be changed; as experience develops what the necessities are, we can easily give authority to the President to build additional ships if necessary. The idea is that if the ships were built and put upon the Atlantic and the Pacific Oceans to ply between the ports of North and South America through the Panama Canal, it would be a barometer of rates and there would be no danger with that many ships owned by the Government of the United States—for that is what it would mean if they were owned by the Panama Railroad Co.—there would be no danger anywhere in North or South America of a combination of shipowners by which unreasonable and exorbitant rates could be exacted or demanded from commerce. So that, in my judgment, the great benefit that would come would be the stability and the guaranty benefit that would be free; that there would be real genuine competition; and that the charges would be in accordance with the services rendered. Therefore, Mr. President, cordance with the services rendered. Therefore, Mr. President, it seems to me that not only would this amendment assist directly to control the price of coal that would be mined in Alaska, but it would go further and be a complete barometer of rates between all the ports of North and South America.

I promised the Senator from Montana, I believe, that I would

give a list of the ships.

Mr. CUMMINS. Mr. President, before the Senator from

Nebraska leaves that point—
The PRESIDING OFFICER (Mr. Sheppard in the chair). Does the Senator from Nebraska yield to the Senator from

Mr. NORRIS. I yield to the Senator.

Mr. CUMMINS. I do not know whether he has noticed the fact-and if he has not, I think it would be a powerful supplement to his argument-that we are paying now from seven to ten dollars a ton for coal that is used by our battleships on the Pacific coast, which mainly, of course, comes around the Horn in merchant ships. These merchant ships are mainly owned by citizens of foreign countries and sail under foreign flags. should like to know why it is not just as legitimate for the Government to build a merchant ship and use it in carrying coal to its own battleships as it is to own battleships and sail them or steam them around the Horn?

Mr. NORRIS. To my mind, there is no answer to the Senator's argument. It seems to me that it is just as reasonable

to do the one as the other.

Mr. CUMMINS. The ships that are proposed by the Senator from Nebraska are necessary as a supplement to our Navy, and they ought to be built; they ought to have been built long ago.
Mr. GALLINGER. Well, Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. NORRIS. I yield.

Mr. GALLINGER. On that point it is variously estimated that we are paying foreign ships to-day for carrying our com-merce to and fro across the Atlantic Ocean and the Pacific Ocean between two and three hundred million dollars a year. Would the Senator, for the purpose of reducing the cost to the American exporter or the American passenger, be in favor of the Government building a fleet of ships to ply across the At-lantic and across the Pacific Oceans in competition with private corporations?

Mr. NORRIS. In answer to the Senator, let me say that, in the first place, I would not do it for the purpose of helping people to go across. I would not be in favor of that kind of a proposition now, even to carry freight. There is a different condition existing that has developed. We have, however, just about completed the Panama Canal. We wish to get our share of the trade of South America. We are not going to get it unless we do something of this kind. Other ships, flying a foreign flag, are going to use that canal more than we are. have already a corporation engaged profitably in the operation of ships, in connection with which no one, so far as I know, has uttered a word of criticism as to its management, as to its honesty, or as to the ability with which it is managed. Nothing of that kind has been charged. This is simply to give a greater usefulness to that corporation, and enable it to bring the merchants of the United States into contact with the merchants and the business men of South America. Incidentally, it does what the Senator from Iowa has so well suggested; it enables us to use these ships, besides, in case of emergency and in case of war.

Of course, we all hope that necessity will not come, and that these ships may continue forever, or at least as long as they last, to carry on the more peaceful operations of trade between

the ports of North and South America.

Mr. GALLINGER. I will venture to suggest-and I will not interrupt the Senator again-that in case of war the handful of ships that is going to be provided through the Senator's

amendment will not accomplish a very useful purpose. We will need a great many more ships than those as auxiliaries to our warships if we ever get into war with a first-rate power.

Mr. NORRIS. Probably we will; and perhaps when we start out and build the number of ships provided here and get them on the waters we will find that we ought to double the number, and that they are doing good work and increasing our trade, and that by adding some more we will get more trade. may occur; I do not know. In my judgment, however, it is no argument for the distinguished Senator from New Hampshire to say that this amendment should not be adopted because it does not provide enough ships. I take it from what he has said that he is going to vote against the amendment, and yet he is criticizing it because there are not enough ships pro-

Mr. GALLINGER. If the amendment should be agreed to, I want, it to be as perfect as possible. I shall vote against it, in whatever form it is put, if it provides for Government ownership either of railroads or of steamships; but I am going to try as best I can, before the vote is taken on the amendment, to improve it. The Senator will not object to that, I am sure. Mr. NORRIS. I will not; certainly. I shall be glad to have

the Senator's assistance in that respect.

Mr. BRANDEGEE. Mr. President—— The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Connecticut?

Mr. NORRIS. I yield to the Senator. Mr. BRANDEGEE. I will not interrupt the Senator if he desires to proceed without interruption.

Mr. NORRIS. I have no objection to an interruption.

had about concluded my remarks.

Mr. BRANDEGEE. Not having heard the first part of the Senator's remarks, I wish to ask the Senator whether he contemplates that the vessels provided for in his amendment shall enter upon general carrying trade? Mr. NORRIS. Yes.

Mr. BRANDEGEE. Anything that offers?
Mr. NORRIS. Anything that is offered. As the Senator did not hear me, I will briefly state to him that the idea is that if they are constructed they shall be leased by the Government to the Panama Railroad Co.
Mr. BRANDEGEE. Yes; I understand; and operated through

that company Mr. NORRIS.

Mr. BRANDEGEE. Of course, however-that is, I will not say a subterfuge, but a mere agent of the Government in the operation, as are the existing steamships owned by that com-

Mr. NORRIS. Certainly.
Mr. BRANDEGEE. I think the proposition made by the Senator from Nebraska raises a very important issue. If the Government is to build ships and engage in general commerce in competition with shipping lines owned by private capital, it seems to me that before we enter on that policy it would be well to consider carefully where it would probably lead us. It may be desirable to do it; I do not know; but I am free to confess that at first blush and without having given it any particular consideration it seems to me it is likely to lead us into the field and to point a precedent for the Government engaging in various enterprises in competition with its own citizens.

Whether that is desirable or not is another question. I agree that we are already doing that and have been for some years, especially in relation to our Army and Navy equipment. We furnish factories to make armor plate, and we build our ships in Government yards to some extent. All of those activities are in competition with private concerns. But if we are to build ships to bring coal from Alaska to furnish the Navy in part, it seems to me with equal reason we might build railroads from oil fields to bring oil to furnish our ships. I believe oil is coming to be more and more used as a vessel fuel, and that Great Britain especially operates its warships largely with oil fuel.

Mr. NORRIS. If the Senator will permit me right there, I concede that that might be true, and in a proper case I would be perfectly willing to do it; but I do not know of any oil fields that are so out of reach of transportation that already exists that there would be any particular reason why it should be done.

Mr. BRANDEGEE. No; nor I, and I am not familiar with either the oil situation or the coal situation. As I say, we might be justified, for all I know, in engaging in both opera-

Of course, it has been said that the coal of the country is practically monopolized. It has been said that the oil of the country, also, is practically monopolized, and that therefore it

would be justifiable for the Government to establish competition of its own in relation to these matters.

I am merely drawing attention to the general principle of Government entering into furnishing supplies for its own legitimate activities, and then, incidentally, in order to use its equipment in full, filling up with general merchandise in competition with privately owned vessels.

Mr. NORRIS. I think the distinction the Senator draws is very clear. While we are not interested at present, at least, in any of the particular lines that he suggests, so far as I am concerned I would not hesitate in any case if I thought it were necessary, and the most practical way to break up an unreasonable combination by which extortionate rates were charged for transportation, to have the Government engage in it if it could. In this particular case, however, we are in the main, at least, if this amendment should be agreed to and enacted into law, engaging in a field where private parties are not now We are trying to develop, by means of this amendment, our commerce between the United States and all the countries on the Western Hemisphere south of us. The greatest good, in my judgment, that would come from it would be that development, and the effect that the Government owning enough ships to have an effect upon the transportation business would have in equalizing the rates and keeping them fair and reasonable.

Mr. BRANDEGEE. I understand the Senator, and I am not saying what I say at all in a spirit of antagonism, or even of

criticism.

Mr. NORRIS. I understand that.

Mr. BRANDEGEE. I say it simply to understand it clearly, as it strikes me that if commerce in South America with the private citizens of other countries is to be competed for by the United States Government we are entering upon a vast field. If we are not only to compete with foreign citizens for the trade of foreign countries, but are to compete with our own citizens for that trade, it strikes me it would be calculated to discourage individual enterprise if it is known that the United States Government, with its treasury, is to operate in any industry in competition with a private individual. The business does not need to be conducted successfully. Any indebtedness that is incurred can be paid out of the Treasury of the United States.

As to other questions suggested by the Senator, that whereever a combination in a product which is needed by the Government is so strong as to maintain, as he says, extortionate prices, that condition furnishes an excuse for the Government to go into the same business, as I view it, perhaps without warrant of the Constittuion, to engage as a merchant or a competitive business man for the purpose of suppressing combinations which are illegal, it seems to me that is a questionable policy. The thing for the Government to do, if a combination is illegal, is to suppress it by the law which prohibits it, and not to enter upon competition with it. Furthermore—and with one brief observation I shall have concluded—if every one of the particular instances which occur now and then, as illustrated by the amendment of the Senator from Nebraska, is to be followed by the Government going into competition with private citizens and private capital, I fear before long we shall be in the full exercise of socialism by this Government, lacking merely the name to describe properly the activities upon which our Government will have been almost unconsciously embarked.

Mr. WILLIAMS. Mr. President, will the Senator yield just for a moment, in line with a part of what the Senator from Connecticut was talking about?

Mr. BRANDEGEE. Certainly.
Mr. WILLIAMS. Suppose you build a railroad up there which belongs to the Government. There are now 466 miles of railway there. The railways there now pay a tax of \$100 per annum per mile. I take it that the Government railroad would not pay that tax, or does the Senator from Nebraska think it

Mr. NORRIS. No; and I should like to say to the Senator in that connection that he is talking about something that I have not discussed. I have not discussed the railroad proposi-What I have said related entirely to ships.

Mr. WILLIAMS. The Senator from Connecticut [Mr. Bran-DEGEE] was talking about bringing this Government-managed affair into unfair competition with a privately owned enterprise.

Mr. BRANDEGEE. He was talking about steamship lines. Mr. WILLIAMS. I know; but the same reasoning applies to railroads. If a railroad that paid no tax to the Government came into competition in any degree with one that paid a tax of \$100 per mile, it would be only a question of time when the one that paid the tax of \$100 a mile would have to quit running, it strikes me.

Mr. NORRIS. The \$100 a mile-while that has nothing to do with what I am discussing, and I should prefer that it had not been brought into the discussion-I will say to the Senator, as I understand, is the tax. It pays that in lieu of any tax. The Senator certainly would not advocate exempting the railroad from the payment of any tax.

Mr. WILLIAMS. But the Government-owned line would pay

no tax of any sort.

Mr. NORRIS. Unless there was a law providing for it, which could be easily provided. I take it that if we entered upon the acquisition of the railroads of this country we probably would provide, not for a direct tax, perhaps, as the railroads are taxed now by most of the States, but for the payment of some percentage of the income, or something of that kind, in proportion to the mileage, to the different States through which the line would operate in lieu of a tax.

I think, myself, that if the Government went into the railroad business up in Alaska, and built a line parallel to an existing line, and made the rate, as it could, so low as to ruin the other line, below the cost of operation, it would be an unjust and unreasonable thing to do; and I would not by any means advocate

such a procedure.

Mr. WILLIAMS. If the Senator will pardon me, the Government-owned road would not have to reduce the rate below the cost of operation. It could keep enough to pay interest upon what it had cost, and a slight sinking fund; and yet if the other line had to pay the ordinary taxes of the locality and, in Alaska, this \$100 per mile per annum, it would not be long before it would have to go out of business.

Mr. NORRIS. While there is not anything in this bill in

regard to the tax or anything that shall be paid to the local

authorities if the Government operates the road-

Mr. WILLIAMS. There is something in this bill, though, about a railroad to be owned by the Government, which neces-

sarily would pay no tax if we passed this bill.

I was just going to say that. I say, in this particular bill there is not anything that requires the payment by the Government of any tax to Alaska; but the reasons given why we should build this road in Alaska-and in my judgment they are sufficient, although that is a question upon which honest men may disagree-are because the peculiar conditions that exist there make it necessary for the development of Alaska.

Mr. WILLIAMS. I understand that; but what I am trying to impress upon the Senator is that if this bill does pass, it ought to pass with an amendment exempting the railroads now existing there from this tax of \$100 per mile, so as to enable

them to live with Government competition.

Mr. NORRIS. Personally, I do not know whether the \$100 tax is fair or not; but the railroads certainly ought not to be relieved from taxation.

Mr. WILLIAMS. By the way, I think that in a new and growing community like Alaska, where the main thing is to develop its resources, the railroads ought not to be taxed.

Mr. NORRIS. I want to say just a word in reply to what the Senator from Connecticut said about the Government entering

upon different activities.

The proposition before us that I am discussing is not that the Government is going to go into the manufacturing business. If the amendment is agreed to, it is going into a business principally for the reason that there is not anyone now, as far as America is concerned at least, in the business, and we want to develop it. The proposition of going into manufacturing things that the Government uses, and thereby coming into competition with private parties that manufacture the same things, is justified, in my judgment, if, in the opinion of the Government officials, we are not getting a square deal. I myself have taken a great deal of pleasure in reading the announce-ment that the Secretary of the Navy was in favor of building a Government armor-plate factory, because we have been held up by armor-plate factories in the past. Although it would come into competition with private persons engaged in that business, it is justified on two grounds—one, that the Government has a right to make articles needed for its own use; and second, build factories so that in case of emergency it will not be dependent upon private parties for armor plate. It is shown by the Secretary of the Navy and those who have investigated the matter that the Government has been charged exorbitant and unreasonable prices by those private parties.

Now, I want to close my remarks.

Mr. BRANDEGEE. Before the Senator closes, if he will allow me to interpolate one suggestion there, of course the Government has a right to do anything it thinks necessary for the well-being of this country and its people if it will amend its Constitution so as to authorize it so to do. We are, however, not only gradually entering upon the twilight zone and getting

into the penumbra of doubtful authority, but we are pretty well into it already, without ever having amended our Constitution; and we are doing a good many things for which nobody can cite any specific authority in the Constitution. It puzzles smarter men than even Philadelphia lawyers are alleged to be to find warrant or implied authority for many of the Government's activities at the present time.

Mr. WILLIAMS. Raising horses, for example.

Mr. BRANDEGEE. All sorts of things-educating farmers, inspecting all sorts of things, giving information about all sorts of things, and collecting statistics about all sorts of things. is an endless task, it appears to me, and every Congress is filled with propositions to plow farther into that unplowed field.

What I meant to say was that if we want to do these semisocialistic things we should amend the Constitution so as to give us authority to do them. When I say "socialistic" I do not use that word as a term of reproach, but as defining a kind of government and a policy that does not yet exist in this country. There may be many desirable things about socialism, but as applied to a country of this size the fact that somebody believes in the system advocated by the Socialists does not prove that the country will be better off with it.

What I am afraid of is that if propositions like that contained in this bill, and those corollary thereto suggested by the Senator from Nebraska, become the fixed policy of this Government even as to Alaska-because we must bear in mind that they are not tried; they are simply experiments now, only on paper—if they should be tried and should be successful as ap-

plied to Alaska, what will we have in Alaska?

We will have, as it seems to me, a crown colony, run and exploited by the United States Government, with all the transportation owned and operated by the United States Government, both rail and water. Say what one has a mind to say; if the Government owns a railroad in Alaska and the steamboats running from there to Pacific coast points, and perhaps through the Panama Canal and to both coasts of South America, carrying the commerce, exports and imports, to and from Alaska and the rest of the world on this continent, at least, there is no man alive now, and there never will be, and no combination of them, that will ever have the audacity or the effrontery to enter into competition with the resources of 100,000,000 people managed by politicians, for that is the way Government ownership and operation is going to be managed.

When I say "politicians" I do not mean to reflect on anybody. Politics is a respectable calling. It is the science of government. The only way the Government can operate anything is by employing men to do it, and this is a Government of One party beats the other party and takes possession of the Government, and mans and equips the agencies of government with its adherents. If we pass laws to provide that those operatives shall be permanent, and shall be maintained during good behavior, and of efficiency and demonstrated capacity, the minute a party that has been out of power long enough to get hungry enough gets in, I will not say by one pretext or another, but by one theory of policy, irrespective of what might have been their theory when they made the platform upon which they arrived at their destination, we see that suddenly the expert and qualified operatives who have had the experience and who have the capacity are suddenly stricken with inefficiency, and those who have never had any experience in the matter are the most efficient, and they get the jobs.

Mr. WILLIAMS. I wish to ask the Senator if he sees any large movement of that sort going on now?

Mr. BRANDEGEE. I have not seen any large movement, but I have seen a good many alleged attempts and a great deal of literature upon the subject, and I have seen two bills passed in Congress by the votes of the party of the Senator from Mississippi which have done that to a certain extent.

Mr. WILLIAMS. I make the inquiry because I have been anxiously awaiting the rising of the sun of patronage, and it has

not risen yet.

Mr. BRANDEGEE. I have not the slightest idea that enough will be released to satisfy the appetite. Do not let the Senator from Mississippi misunderstand me. I think there will be wail-ing and howling in his State and in his neghborhood long after they have gotten all they can.

Mr. NORRIS. I am very thankful to the Senator for yielding the floor to me. [Laughter.] I will proceed now, and I will reciprocate when occasion arises.

Mr. President, I hope I shall not be interrupted again. I should like to conclude. Every time an interruption comes it seems to me it necessitates something of a reply; but before I undertake to reply I want to do what I started to do when I closed about an hour ago. [Laughter.]

In answer to the request of one of the Senators, I want to give a list of the steamships that were and are operated by the Panama Railroad Co. There are six, as I gather from this report, only two of which are owned by the corporation. Four of them, having a gross tonnage of from nearly 7,000 tons to nearly 10,000 tons, are chartered steamers. Two steamers, one of nearly 4,000 tons and one of nearly 3,000 tons, are owned by the corporation, the Panama Railroad Co.

In conclusion I want to say just a word, while it has not anything to do with the question I am discussing, in regard to some of the suggestions made by the able Senator from Connecticut. He says: "Suppose we build this railroad in Alaska and it turns out to be a success." Well, that would be a calamity.

Suppose we do build it, and it turns out to be successful.

Mr. BRANDEGEE. The Senator need not worry about that. Mr. NORRIS. The Senator evidently is not worrying about it, but he is nevertheless somewhat fearful that it might be.

Mr. BRANDEGEE. Oh, no; if the Senator will pardon me, I never said anything of the kind, if I was in my right mind.

Mr. NORRIS. I can not answer for that, but I think I know what the Senator said.

Mr. BRANDEGEE. I did not say anything about success. said if the Government operated the road and the steamship line nobody would be audacious enough to attempt to compete with them.

Mr. NORRIS. Yes; the Senator said that, but I think the Senator will find he said "Suppose we build this railroad in Alaska and it turns out to be a success," or, "turns out success-

ful," or words to that effect.

Mr. BRANDEGEE. Oh, no. I did say, however, that if it turned out to have a deficit it would have to be paid for out of the Treasury

Mr. NORRIS. Nobody has denied that. Mr. BRANDEGEE. I did not anticipate its success, in my

wildest imagination.

Mr. NORRIS. I am not claiming, either, that it would be a financial success, at least for several years. Perhaps, it will be. I hope so. I think we are warranted in developing that great country, however, and opening up these coal fields, even though we know in advance that the railroad is not going to be a financial success.

But the Senator is also in error, I think, when he fears that if this bill as proposed to be amended should pass, particularly the amendment of which I am speaking, there would be danger of partisan political control of the corporation that would of partisan pointical control of the corporation that would operate the ships. The proposition is to lease these ships to the Panama Railroad Co., a corporation that has been in operation ever since the beginning of the digging of the Panama Canal, and I have not heard, and I do not believe any Senator here has heard, of a single instance in all those years in the operation of that corporation that politics has controlled the appointment of any official or the operation or transactions of the corporation. A corporation owned by the Government with that kind of record, the efficiency of which has never been questioned, can, I think, be trusted to operate these ships in the development of a trade that we are all anxious to develop, and a trade that is now in control of European officials.

If it be unconstitutional, the remedy of the Senator from Connecticut will still exist after the bill is passed. I think it is conceded that the bill, even with the amendment that I have proposed, is constitutional. So I do not believe that that enters into the proposition. It is, in my judgment, a different proposition from entering a field that is now already supplied with commercial facilities. It is entering a great field of transportation that we have been trying for years and years to develop and in which we have made no headway. Private parties have not been able to do it, have not done it, and are not doing When private capital does undertake it, especially where there are but a few ships engaged in the trade, and gets a monopoly of the trade, then exorbitant rates are charged, the people must pay unreasonable rates, and business does not expand or develop. I do not believe that the Government would undertake to destroy any other transportation company if it went into the business, but it would prevent monopoly by making fair rates. When the trade with South America developed in the development of the south America development. making fair rates. When the trade with south America develops, if it ever does, there will spring up in various Atlantic and Pacific ports ships that will engage in this trade owned and operated by private parties. This, in my judgment, will develop a trade that we have been for years trying to develop, and will induce private parties to go into the business.

Mr. GALLINGER. Mr. President—

NORRIS. I hope the Senator will let me conclude. I am about through.

Mr. GALLINGER. I will.

Mr. NORRIS. Although I will yield for a moment to the Senator, if he desires.

Mr. GALLINGER. I was about to suggest to the Senator

that his hope in that respect is chimerical, for the reason that we can never operate ships to South America or to any other foreign country in competition with Germany, France, and England, with their subsidized lines of steamships, running them at

so much less cost than we can run an American ship.

Mr. NORRIS. Now, let us put that argument right up against the argument of the Senator from Connecticut and the Senator from Mississippi, who say, if we go into the business ourselves, private parties can not go into it because they can not compete with us while we are backed up by the Treasury of the United States. Now, the Senator from New Hampshire says that the Government of the United States can not make a success of it. If that be true, then it never will be developed by private parties who, according to the other two Senators, are handicapped away beyond the United States Government. If the Government of the United States could not develop the trade by the ships operated by the Panama Canal Co., then there would be no use for private individuals to undertake it. Hence there would be no objection to this bill on the ground that it would interfere with private parties operating similar lines.

Mr. GALLINGER. I do not think it will interfere much with private parties, but I believe it will be a losing venture on the part of the United States.

Mr. NORRIS. The Senator, I take it, was anxious that we should provide by law for the proper kind of assistance to private ships that should operate between these same points, and that we should pay it out of the Treasury of the United States.

Mr. GALLINGER. Yes; for the transportation of the mails, Mr. NORRIS. These vessels would transport the mail and probably at a less cost than we would have to pay to the subsidized ships that have been provided for in any ship subsidy

bill that has ever yet been proposed.

Mr. GALLINGER. I will interrupt the Senator but a moment further. It is in line with my suggestion for amending the provision. The ocean mail act of 1891, under which we are paying a subvention—I do not call it a subsidy; it is a payment for transporting the mails, perhaps a little larger than the actual cost of transporting them—has several provisions in it that I think ought to be in this amendment; for instance, "that the vessels employed in the mail service under the provisions of this act shall be American-built steamships, owned and officered by American citizens, in conformity with the existing laws, or so owned and officered and registered according to law, and upon each departure from the United States the following proportion of the crew shall be citizens of the United States," and so forth. I will not read the necessary definition.

And further:

That all steamships of the first, second, and third classes employed as above and hereafter built shall be constructed with particular reference to prompt and economical conversion into auxiliary naval cruisers, and according to plans and specifications to be agreed upon by and between the owners and the Secretary of the Navy, and they shall be of sufficient strength and stability to carry and sustain the working and operation of at least four effective rified cannon of a caliber of not less than 6 inches, and shall be of the highest rating known to maritime commerce.

Further, the speed of the vessels is provided for. One of these boats is to be a collier that can go only 8 or 10 knots an hour. It will be of no service in war.

Mr. NORRIS. It would be a good collier in war, would it

Mr. GALLINGER. It would be overtaken by a sailing vessel of some foreign country. You have to have speed in war; you have to have good ships. We would not think of building a war vessel of 12 knots an hour when England is building them of 22 knots an hour. Of course, they would be of no use to us.

Mr. NORRIS. England has a great many colliers that can

not travel 22 knots an hour. Mr. GALLINGER. That is very true; but the Senator is providing now for vessels, he says in his amendment, which can be converted into auxiliary naval vessels in time of war.

Yes. Mr. NORRIS.

Mr. GALLINGER. I wish the Senator would take the law which is now on the statute books and look it over, with a view of perhaps incorporating some of its provisions into his amendment. If the amendment is to be adopted, it ought to be made as perfect as possible.

Mr. NORRIS. Let me suggest to the Senator, I think most of those provisions are covered, provided we are willing to trust the President of the United States, because it proposes to give the authority to the President, and says that "said vessels

shall be constructed as near as may be so that they will be suitable for use in aid of the Navy of the United States as a merchant marine." My own idea is that if the President, the highest authority in the United States, were instructed to build these vessels with that provision in the law, he would see to it that all the necessary things, so far as they could, in a vessel to be used in general business, were incorporated into the plans and specifications of the ships.

Mr. GALLINGER. But the point I was trying to make, and very likely I stated it very awkwardly, is that the provisions relating to their being used as auxiliaries in time of war ought to be enlarged so that they would be of sufficient speed and be constructed according to specifications of the Navy Department so that these would be actually useful vessels. That is the

point I was trying to make.

Mr. NORRIS. I can not conceive of the President, having authority to do that very thing under the bill, that would not do it. He has authority to do everything by this amendment suggested by the Senator. He is instructed to build them "as near as may be" so they will be suitable for a merchant marine. No one doubts, no one can doubt, that any President would under such a law see to it that all of these essentials were looked after.

Mr. BRANDEGEE. Mr. President, simply a word, replying to a remark of the Senator from Nebraska [Mr. Norris]. Senator from New Hampshire says that these vessels could not compete, in his opinion, with foreign vessels which are subsidized. Of course everyone would agree that they could not compete with them and show the same kind of a balance sheet.

They could not profitably compete with them.

Mr. GALLINGER. That is what I meant to say.

Mr. BRANDEGEE. There is no difference between the Senator from New Hampshire and myself. The Senator from Nebraska has attempted to make an argument out of it, though it were a reductio ad absurdum statement. What I distinctly say is that of course the Government can compete as long as the Treasury will hold out to pay the deficit. It is simply another form to pay whatever is necessary to operate them. If the Senator from Nebraska thinks that that situation would be an inducement for a man of private capital to invest his fortune and put it in an enterprise with which he is being competed by all his fellow citizens combined in the form of the United States Government, I disagree with him about the probabilities: that is all.

It occurs to me that if this steamboat-operation proposition should be a success it will be a success because it gets the business. If it gets the business, it will be because somebody else does not get it. In other words, this Government line will either prevent other lines coming in competition or it will drive them out after they have begun to compete, or else the Government will be driven out; one of the two. They can not exist side by side. If the Government stands ready to take all the business that offers between Alaska and the Pacific coast and South America, it is bound to furnish facilities for doing it.

We start with the number of ships provided for by the Senator from Nebraska. If those are not enough to attend to the business, the next Congress will authorize more to be built, if that is the policy of the Government, and the Government is going to attend to this business. If it is the policy of the Government that that business ought to be attended to as other business is attended to and let private capital go in and operate, where it does it can make some money; and then the Government ought to keep out of that business. I do not think we can have both successfully. The Government is either going to succeed or fail in it. It will not fail as long as the people will stand the operation of the unprofitable business.

The Senator from Nebraska has also alluded to the fact that I said there would be danger of political manipulation about the operation of these boats. Of course I do not think there will be any particular trouble about the manning and equipment of the boats, but what I mean to say is that they are to be run as every other Government activity is run, by human beings here in Washington at the heads of the departments, and with changes in political control, changes in the personnel of the operative heads of those boats will make a great change

in the business.

The fact that the Government owned and operated the Panama Railroad in Panama should furnish no precedent for this new embarkation in this Alaska scheme. The Government put on most of the steamboats that the Panama Railroad is operating to build the Panama Canal and to carry the material and the people who went there necessitated by that operation and not with the slightest intention of competing with its own merchants or sailors or citizens in the steamship business.

I do not think there is any reason for the Government now extending its operation in steamboat and railroad properties any more than in any other of the activities of life. I think those things had far better be left with all their troubles to private initiative, private capital. If great provinces like Alaska—and if Alaska, I do not know why not the Philippine Islands—are to be financed and exploited by the United States Government, I fear we are encumbering ourselves unwisely.

I do not know why the Government is under any obligation to develop the Territory of Alaska. There it is, a country such as it is, with its limitations, its climate, its difficulties, and with certain wealth to be achieved. It is to be developed. I do not know why it is necessary because the development is slow or the conditions are hard that the Government should rush in and insist upon developing it immediately. If it does not offer sufficient attraction for the people who subjugated the rigors and the difficulties of this country, which was a primeral wilderness, conquering the great American desert—if the Territory of Alaska does not offer opportunities and inducements enough for people who rose superior to the obstacles here in the United States to enter it and develop it, I see no reason why it should not lie idle. Whenever the commodities that Alaska offers become of sufficient value and the people need them badly enough, I have no doubt private capital will be found to go in and develop them and put them upon the market.

Mr. WALSH. Mr. President-

Mr. BRANDEGEE. I yield to the Senator from Montana. Mr. WALSH. Are we to understand from the Senator from Connecticut that he disapproves the policy which prompted the construction of the Cumberland Road by Government appro-

Mr. BRANDEGEE. I do not know. I do not recollect the facts about the Cumberland Road, to tell the truth.

Mr. WALSH. Does the Senator desire us to understand that he disagrees with the policy that prompted the loan of \$55,000,000 for the construction of the Union Pacific and the Central Pacific roads?

Mr. BRANDEGEE. I do not know. I think the Union Pacific was constructed largely as a war measure.

Mr. WALSH. And the Northern Pacific?

Mr. BRANDEGEE. Oh, far be it from me to regret that any of the transcontinental roads were aided by the Government.

Mr. WALSH. I do not quite understand, then, how the Senator takes the position he does in regard to these great works of internal improvement. The Senator's acquaintance with history is accurate, we all know, and extensive. He knows the manner of the construction of works of internal improvement had been the subject of debate in the halls of Congress here for 20 years, and the policy which was adopted prevailed because it was urged that it was the duty of the General Government to give transportation facilities to the extended regions to the west of the Allegheny Mountains and west of the Mississippi River.

Mr. BRANDEGEE. Certainly; the Government aided in the construction of those railroads.

Mr. WALSH. Then what difference in principal does the Senator find?

Mr. BRANDEGEE. The difference in principal I find is that, instead of aiding a company to go and build a road in Alaska, it is proposed to put the Government into the business as a

Mr. WALSH. Then, if I understand the Senator aright, he would give his approval to some form of aid to private corporations to construct railroads in Alaska.

Mr. BRANDEGEE. I do not know whether I would or not. would want to examine the proposition very carefully, if there was one up, I will say to the Senator from Montana, to see first that it was necessary to get the Government tangled up with any at all, to see that the people of this country were suffering bad enough to even authorize Government aid in the operation of a railroad in Alaska; and I would want to know which railroad it was. I would rather not vote for a bill, if my recollection serves me, which states in substance, as this bill does, that the President of the United States is authorized and directed to build railroads from the Pacific coast of Alaska to the interior, by which language the two termini of the road are accurately described and located, and that he shall be authorized to employ anybody he chooses, at any price he chooses, and to use any money in the Treasury not otherwise appropriated from the Treasury for the purpose of paying them. I would rather vote for a little more particular proposition, even for the Government ownership and operation, if that was proven necessary.

Mr. WALSH. I should not have interrupted the Senator at all except that I understood him to lay down the proposition that he was opposed to taking any steps toward the development of Alaska and preferred to allow it to remain there until private enterprise had developed whatever resources may be there and open to development, and provide the transportation facilities which are requisite; in other words, that he was opposed to the policy of Government aid in the opening up of a new and undeveloped territory.

Mr. BRANDEGEE. Mr. President, I think I can agree to a certain extent with the Senator's understanding of my views.

I would prefer, if left to myself, not to embark the Government in the operation of railroads and steamships in Alaska and from Alaska to other countries at the present time. I do not believe that the necessity exists for committing the Government to that proposition. I do not think the country is suffering bad enough at present to warrant it. However, if the country would abide by the result, I would almost be willing to see the Government try the experiment of operating this railroad in Alaska, because, then, it would deter people from advocating the ownership of all the railroads in this country by the Gov-

Mr. WALSH. Mr. President, I can very easily understand and appreciate the attitude and position of the Senator from Connecticut in his antagonism to Government ownership and Government construction or Government operation of a railroad anywhere, in Alaska or elsewhere, but I was somewhat astonished to hear the Senator from Connecticut-and that is why I assert what seemed to me to be in the nature of a statement that he was opposed to making any effort on the part of the Government toward providing transportation facilities, and that he preferred allowing Alaska to remain as it is until private enterprise, unaided in any way by the Government,

would develop its rich resources.

Mr. BRANDEGEE. The Senator from Montana has gone a good deal further in making an extreme statement than what I intended. I say I doubt if the situation at present necessitates the Government going into the building of railroads and steamships in Alaska. I would not say that the Government ought not to furnish any aid or encouragement to anybody or to any proposition to help develop Alaska. I think we have done a good deal, similar to what we have done in our forest reserves. in the way of making trails and roads, and we have done it also in the Philippines, and probably shall never get our money back; but I think there is a great deal of difference between aiding but I think there is a great deal of difference between adding and guiding and helping financially to a certain extent in the development of a country like Alaska and the pitching of the Government in there as the operating proprietor and putting it in charge of all the transportation lines. Even if it would open up the Territory, I doubt whether it would be wise. The trouble about all these things is that we can not tell whether or not they are wise until we try them; and, if they are unwise, we have the whole thing on our hands and have to pay the deficit.

Mr. DILLINGHAM. Mr. President, I intended to speak this afternoon upon the question now pending, but I understand the Senator from Oregon [Mr. Lane] would like to go on now, and as the hour is late I will give notice that at the conclusion of the address of the Senator from Nevada [Mr. PITTMAN] to-morrow

I shall ask the Senate to indulge me.

Mr. LANE. Mr. President, I shall not make a speech, but I would like to call the attention of Senators to some matters which I think will interest them in connection with the construction of a railway from the coast into the interior of

I differ in opinion from the Senator from Connecticut [Mr. Brandegee]. I think if the road were built to the best advantage, if it passed through a fertile country, first reaching the coal mines, and then over into the great Tanana Valley, that afterwards, if it were handled in an ordinarily businesslike manner, it would pay the Government, or that the Government, at least, would not lose money on the investment. I can understand how, if the Government made a mistake and built a piece of railway in connection with some privately owned railway which controlled the outlet to the sca, that it might, in acquiring the title to such railway and its lands, have to pay too much for the property and lose money by it, thus making a poor investment. I can understand, too, how, if it established a line through a particularly rough country, a country such as the Senator from Mississippi [Mr. Williams] was talking about the other day, where it had to go around or cross large glaciers, it would have difficulty in reaching the interior of Alaska except at an enormous expense.

It is the general impression among people who have been in Alaska, at least I have heard it from a number of them, that

the Copper River line-the Guggenheim line, as we term ithas gotten itself into difficulty with a glacier; and if the Government purchased that line I think it would have a troublesome and expensive piece of property upon its hands, for at the rate at which that glacier is now moving the bridge and the property in the vicinity of it will be crushed like an eggshell within the next few years. Upon the other hand, if the Matanuska coal field can be reached by a cut-off from Prince William Sound, to which the Senator from Montana Walsh] called attention a few days ago, with a tunnel, or from Seward on up the valley of the Susitna River, it is not a difficult proposition. You strike within a few miles of the coast into a region where the country is very good; it is a bit too rainy in the summer to be pleasant, yet vegetation grows there to a size and of a perfection which you would hardly believe The soil is rich; the climate is fairly mild. It has the disadvantage of having a very heavy snowfall, yet it has in connection with it, near by, gold mines and also coal fields, and thus offers inducements to people to build homes. route would open up a fairly good country.

If the Matanuska coal fields contain the quality of coal which it is claimed they do, the Government would immediately tap an immensely valuable property. The coal is needed all along the coast; it is not only needed in the interior of Alaska, but it is needed all along up and down the Pacific coast. There would be plenty of freight for a fleet of steamers were they put upon the route if you could get the coal to the coast at not too great an expense. A railroad properly built would follow a water grade to the sea with no glaciers to contend with, I am in-

formed.

If that road then proceeded up by the easiest grade through the Susitna Valley into the Tanana Valley, it would come into a valley which is several hundred miles long. The Tanana Valley, I presume, is 600 miles long, and in places from 100 to 150 miles wide. There are hundreds and thousands of acres of atrich muck land there as lies out of doors. There are also hundreds of thousands of acres of waste land where there are sloughs, the same as in any other country; yet the Tanana Valley, as you go into it on the boats or as you go through it with your dog sleds and look it over, is as beautiful as this

country; indeed, it is a prettier country than this.

The climate is not a bad one; it gets cold there, to be sure. In the winter the thermometer goes down sometimes as low as 50 degrees below zero, the same as it does in Minnesota; but you would not know it. Unless you saw a thermometer you would not know whether it was 10 below or 50 below, for it is that dry cold which does not chill you, as does the humidity of the Atlantic coast. The men in the Tanana Valley to-day who are working the windlasses in the mines on Cleary Creek and around Fairbanks and on the Chatanika and other streams all through that country are working in their shirt sleeves; they are not working with heavy clothing on, for the reason that if they should do so and bring on perspiration the climate is so dry and cold that it would frost them. They keep under that degree of body heat which brings on perspiration. precaution is necessary also in traveling with dogs. The same

Mr. GALLINGER. Mr. President, I should like to ask the Senator what treatment they give their ears when the ther-

mometer is 50° below zero?

Mr. LANE. I will tell the Senator. When the thermometer is 46° below zero I have been surface. dog team in Alaska and carried my ears along with me and brought them back here. [Laughter.] When you are running you must be careful that you do not get too warm. The cap which they wear in Alaska has nothing but a silk top to it. It has no fur on top; it would be too warm if it had, if you -I think the Senator from New Hampshire might require fur on his-you pull the flap of your cap down over your ears. and when your ears get warm you lift it. You have the flaps off your ears about half the time. I will say to the Senator that humidity is lacking; there is a dryness in the air, and if the wind is not blowing one will have no trouble with his ears nor with his fingers or his feet. He must keep them loosely clad and use a reasonable amount of care. The people there enjoy the winter season, I think, a great deal more than they do the summer time.

It would astonish you to know that the flora of that country is of the greatest variety and the most beautiful I have ever The country is one mass of the most beautiful flowers for miles upon miles and for hundreds of miles.

Mr. SMITH of Michigan. That is so up as far as Grant

Land.

Mr. LANE. That may be so; it is certainly true in the portions of Alaska to which I refer.

When they remove the moss from the soil, as one of the Senators explained the other day, the sun in the summer time thaws it out, say a foot the first year, and then down to two or three feet. Then, you have a muck soil, with the sun shining down

upon it 21 hours a day out of the 24.

In the heat of the day you have, say, 90° and the ice two or three feet down melting slowly and furnishing subirrigation, makes it possible to raise there the finest vegetables I have ever seen in my life, and the largest. I have asked a number of Senators here in the last day or two if they had been over to see the exhibit of vegetables from Alaska in room 115 of the Senate Office Building and have not yet found one who had done so. I would like to have every Senator look at that exhibit, and then I would like to have them say, when they return, if in their respective States, whether in the Delta of the Mississippi or the Beaver Dam land in Oregon-and there lies no better land out of doors than that-they can raise better vegetables in their States. We can not do so in Oregon,

They do raise rye in Alaska. In all of northern Europeknow it well-the Russian, the Finn, and the people who live in Siberia eat rye bread; they do not eat wheat-flour bread. Only a small minority of the people of this earth eat wheat Two-thirds of the people of the earth, from the beginning of its history, have never tasted wheat flour. They use other grains; and anyone can live well and sustain life on bread made from rye flour. They raise barley in Alaska and they ripen oats.

I have seen oats ripen there.

People will go in there to live and they will farm. You can not keep them out, for they can grow the grain for the bread The country has game in it; it has fish in it; it is a beautiful country to look at. The hills of the Tanana Valley are covered with spruce timber, sometimes from 100 to 150 feet high and as straight as a pole. They also have beautiful white birch and balsam, once in a while some tamarack, and willows, and behind almost every willow bush, or behind a great many of them, there is a great big snowshoe rabbit, which is good to The rivers teem with salmon, king salmon, if you please, which are as good and fine a fish as the Columbia River chinook, which is considered the best salmon in the world. Then they have the grayling, and they have the whitefish, and you all know, particularly those from portions of the country where whitefish inhabit the streams, that there is no better fish in the world than the whitefish, as there is no fish richer than the salmon. So the people of Alaska have those sources of food

They have, as I have said, a beautiful country to look at; and, in addition, there is always the lure of gold. Sometimes, when you sink your cellar, you discover gold. I have seen a man up there when digging a foundation for his house out on the benches, when he could not get a claim down in the creek bottom, which claims are staked first-I have seen a man in building his house strike a better gold mine than the best gold mine nearer the creek. There is always a chance that you will dig up a pocket full of gold; and that appeals to everyone. It is the most fascinating way in the world to make money. Everybody likes to see a man get it in that way. He does not take it from anyone; there is not any strife or fight for it.

It requires, however, harder work physically than any other method in the world of acquiring money.

There is the great Tanana Valley, as I have said, stretching hundreds of miles, one of the largest valleys that I know of in America. That valley will fill up with a population; you can not prevent it; you will not be able to keep people out of there, whether you build this road or not. But the conditions now are not calculated to bring about settlement. To get there they must either go through the White Horse Pass and down the Yukon River for 2,000 miles, and then back up 300 miles on the Tanana River in order to reach the town of Fairbanks, and then scatter from there, or else they must go in through the Unimak Pass and through the Bering Sea to St. Michaels, then up the Yukon River a thousand miles upstream on that river, and then 300 miles bucking the current of the Tanana River to arrive at their destination,

When the miner arrives at St. Michaels Island with his freight from the outside perhaps he has a stock of groceries or something of that sort, which he needs for himself or his family for a year's supply, and perhaps he has a bit more which he would like to take in to make a profit on. Whatever he has is very carefully looked over by the agent of the only company which operates on the Yukon River. When I was there there were two companies, but now there is only one company, which has the boats to navigate the river. But before I reach that point I will say that the company has trading stations all up and down the river from near the headwaters of the Yukon

to its mouth, and if you have anything which they carry in stock up there and which might come in competition with them, they decline for one reason or another to take your freight along on that trip; you will have to wait for another boat or the next trip, and it is very expensive to hang around St. Michaels Island, and it is a very unpleasant place in which to stay. I do not apply any of my descriptions of interior Alaska to that island, for there even the willow does not grow more than an inch or two inches high. It is nothing but tundra and moss. They may not take the freight for you at all, but if they do condescend to take it the freight charge from St. Michaels to Fairbanks would be \$90 a ton. When you pay \$90 a ton for freight an bacon and flour your freight comes rather high and makes your food cost you considerably. That is the condition that exists there. If you go farther up the Yukon you fare worse. In the meantime you have to pay the freight from Senttle to the mouth of the Yukon River or else through the White Horse Pass down over the White Horse Railway and then down the Yukon and back up the Tanana, where the transportation facilities are in the hands of the same gentleman or some particular friend of his. It is therefore very expensive for people to go in there to mine, and there is not much inducement for them to go in there and become farmers, if you please. They can not afford to ship farm products out of the country.

There are hundreds and hundreds of miles of that country and hundreds of thousands of acres where it is claimed-the Government does not make so large a claim-that anywhere from three to four hundred bushels of potatoes can be raised The Government says they do actually raise 285 to the acre. bushels-I think that was the quotation given here the other day-and that is a better average than we have in continental United States; it is better than the present average in my State; it is not, however, any better than it was 50 years

ago, but we have partly exhausted our soil.

The soil in most of Alaska where they will undertake farming is inexhaustible.

The cut banks of the Yukon, where the breaking up of the ice has exposed the soil, show it to reach a depth of 50 or 60 feet. It is a seemingly rich soil that goes down no one knows how I myself have been down in it 40, 50, and 60 feet to bedrock in mining shafts.

Mr. GALLINGER. The Senator is very interestingly discussing this question. I have endeavored to acquaint myself as far as I could with the agricultural possibilities of Alaska. The Senator is telling us that it is a wonderfully fertile and productive country.

Mr. LANE. Oh, certainly.

Mr. GALLINGER. I have been looking over the reports of Prof. Georgeson, representing the Agricultural Department in that great Territory, and what he says does not agree with what the Senator from Oregon is stating to us. He reports that the soil is not fertile, and that crops can not be raised without fertilizers. That, in a new country, is rather startling

Mr. LANE. It would be to me also.

Mr. GALLINGER. Because virgin soil is usually rich and does not need fertilization.

Let me read just two lines from Prof. Georgeson. He says:

For this reason the soll soon becomes exhausted-

Mr. WILLIAMS. What part of Alaska is the professor talking about there?

Mr. GALLINGER. He is discussing the agricultural possibilities of Alaska, and I think he goes through pretty nearly all of the Territory.

Mr. LANE. That is what I was going to ask.

Mr. WILLIAMS. I want to know what part the professor refers to, because probably Alaska, like other countries, has some parts that are more fertile than others.

Mr. LANE. I will quite agree with him as to other portions of Alaska. There are parts of that country which will not raise much of anything. The Seward Peninsula never will be an agricultural country, and yet it has much gold in it. I am talking at this time of the Tanana Valley and the Susitna Valley. I am sure I am right about the Tanana Valley, for the reason that I have seen vegetables grown there. I have been in the country, and I have seen them. They do raise them.

I say that it is my opinion that owing to the fact that these people, whatever you may say, are forced to pay an enormous tribute to get their tools, their food, and their other supplies into the country, or to get anything out of it; if the Government was ever justified in building a railroad in a new country and helping to develop it, it is justified in this instance, if it builds

the railroad in the right way. In my opinion there should be

some restrictions placed upon it.

I notice that some enterprising gentlemen have heavily shaded what seem to be the preferred lines. Those are the lines which are favored by the commission. I do not know of whom the commission was composed, and I do not understand just what the Government would be doing in building a road to the Matanuska coal field, and then striking off south and west of Mount McKinley to the Kuskokwim, because that is a very rough country, and I never heard anyone say that it had any agricultural possibilities. I have heard that there are going to be opened up in there some wonderfully rich gold-mining claims in the way of quartz ledges, the richest in Alaska. I was told that. I had that tip from a friend of mine who is well posted on that country.

Just what they are doing up there, unless they are hunting for that gold-laden quartz, I do not know. I would not like to see that done unless I knew more about it. I am only speak-

ing of that which I know.

I would not like to see the Government build a railroad up the Copper River Valley. I have been down the Copper River Valley, from near the head of it to Prince William Sound, and there is not much good agricultural country in there. That is a pretty rough country. There is some fair agricultural land there, but it would not pay the Government or anyone eles to bother with it. The railway that was built in there by the Guggenheims was striking for copper. They were striking out for the copper claims up there. That is all right if the Government is going into that sort of business.

I do not see, however, why Senators do not go over to that exhibit and look at it and see what Alaska raises. It is a wonderful country. It is the most attractive one to me that I ever saw. It is a country that puts vitality and vigor into the people who live there. It is even a health resort for tuber-Tubercular cases do about as well there as they do down in New Mexico and Arizona. There is ozone in the air. Then there are the northern lights that come in the fall and winter, those great northern lights, the aurora borealis, that goes over the sky. When you stand out where you can imagine that if you took two more steps you would be right under the north star, and those lights begin to play, you would think the Creator of the universe was right up in that country "marking down the time" and flashing His streamers across the sky and giving instructions to His assistants elsewhere as to how to carry on the affairs of the other spheres. It is the most wonderfully majestic sight, and one that can not be adequately described.

It is a great country, but it has its disadvantages, too, and much of it is bad country. I do think, however, that it is worthy of this attempt that is being made to open it up, and I do not think any mistake can possibly be made if the Govern-

ment uses ordinary intelligence.

I am not afraid of public ownership. We heard this sort of talk in the city where I live when we undertook to take over our system of waterworks. All the prophecies of evil that we have had here were made to us by those far wiser and those who had much more money than we had; but we have run the municipal water system now for many years, and for years and years we have made a profit from it of three or four or five or six hundred thousand dollars a year by the use of ordinary business methods.

Mr. BANKHEAD. Mr. President, before the Senator takes his seat I should like to ask him a question. The Senator from Oregon has given us a beautiful description of the Alaskan

Mr. LANE. It is not all that way. I am talking of especially favored sections.

Mr. BANKHEAD. The Senator has made it all beautiful by his description.

Mr. LANE. No; it is not all beautiful.

Mr. BANKHEAD. The Senator has told us very interestingly about its possibilities. I should like the Senator to tell us something in relation to the coal possibilities up in Alaska-what coal you have, what you can use it for, what kind it is, how we are to get it, and all about it. That seems to me to be an important question here, because I understand the chief purpose of this immense expenditure of public money and this departure that we are about to make is to secure coal from Alaska for use in the Navy and for use in all of the pursuits along the Pacific coast and in the rest of the country where coal is necessary to produce steam. I should like to have the Senator tell us something about the coal of Alaska.

Mr. LANE. All right.

Mr. BANKHEAD. I should like to know if there is any Senator here who has ever seen an analysis of this coal and knows what its qualities are: how much fixed carbon there is in it. how much sulphur, how much ash, whether it will coke, whether it is a good steam coal, and what its qualities are.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. LANE. I yield; yes.
Mr. THOMAS. I simply wanted to say that that matter has been discussed here during the past few days at very great length by the senior Senator from Oregon [Mr. CHAM-BERLAIN], the Senator from Montana [Mr. WALSH], and I think the Senator from Washington [Mr. Poindextee], so that the RECORD is full of information upon the subject.

Mr. BANKHEAD. Just one moment more.

Mr. LANE. Certainly.

Mr. BANKHEAD. I should like to have the Senator from Colorado point me to some statement, some figures, some specific facts, as to what are the qualities of this coal. It is perfectly easy for Senators to get up and declare that there is an immense quantity of coal in Alaska and that it is good for all purposes. It has been stated here without any qualification that it is a magnificent coal for the Navy. That has been disproven by the Navy itself. The Assistant Secretary of the Navy, after a complete test, not only on a battleship but at the testing grounds at Annapolis, has said that it is not fit for use by the Navy. Now, what can you use it for? That is what I want to know.

Mr. CHAMBERLAIN. Mr. President, I think there is a very great difference of opinion as to what was the result of

this analysis.

Mr. BANKHEAD. I should like to see the analysis. Where

are the figures;

Mr. CHAMBERLAIN. As a matter of fact, the figures are in the reports, and many of them have been incorporated in the RECORD. I am afraid the Senator has not been here while the discussion was going on.

Mr. BANKHEAD. I have not seen that, and I want to

Mr. CHAMBERLAIN. Let me suggest to the Senator that some years ago some coal was gotten out of the Bering River field by a coal miner who had a claim up there, and 30 tons of it was put on board the Nebraska and tested. On the test, as evidenced by the report of the lieutenant in charge, it showed for naval use than Pocahontas coal. analysis which was made of the coal from the Bering River field showed that it ranked at least 79 per cent, as compared with 100 per cent for the Pocahontas coal.

Mr. BANKHEAD. That is a very great difference.

Mr. CHAMBERLAIN. Yes; but if the Senator had heard the discussions here he would have found out that there are affidavits filed here which show that the men who went up there and got that coal put into the sacks gravel and everything

Mr. BANKHEAD. I understand that. It is very easy, of course, to get an affidavit; but here is an actual test made by

Mr. CHAMBERLAIN. Yes: of coal that was brought out

on a sledge under very adverse circumstances.

Mr. BANKHEAD. I do not know exactly what the circumstances were under which it was brought out, but they brought it out, and they have made an actual test on a battleship and have declared it to be unsuitable for that purpose. Then they sent it down to Annapolis, to the testing station, and they say it is unsuitable for the use of the Navy.

I do not know whether this coal will coke or not. I do not know whether it is merely a sort of lignite, or something of that sort. We want to know something about it before we embark on all this expenditure of money. Building railroads in the Senate on paper is very different from building them in Alaska on the ground.

Mr. GALLINGER. Mr. President, if the Senator will permit me, we have already appropriated \$150,000 to try to ascertain whether or not this is suitable coal for the Navy.

Mr. BANKHEAD. Yes; so I understand; and they have

declared that it is not suitable.

I should like to have the Senator from Oregon, or some other Senator, tell me who is going to mine this coal. Everybody who has had any experience in coal mining knows that not 10 per cent of the coal mined in this country is mined on the main line of a railroad. Ninety per cent of it is mined on branch roads built out from the main line, some of them quite lengthy. When you have built all these railroads in Alaska, who is

going to mine the coal-the Government? Is the Government going into the coal-mining business? If so, it must open these mines at a very large expense. It is expensive to open coal mines. If you had a coal mine in Alaska with a capacity of 500 tons a day, it would take 100 miners' houses to accommodate the miners, and those houses must be substantially built in

It will cost large sums to open the coal mines. Who is going to do it—the Government? If so, for what? That is the question-for what? To develop the resources of Alaska? That is desirable in a way, of course; but the main purpose is to reduce the price of coal to the ultimate consumers in a very small section of this country. That is the real purpose of it. Nobody will deny that. The Senator from Oregon will not deny

It seems to me that in view of all these things the Senate ought to be very particular about what it does in this particular case.

If we are ready to go into the Government ownership of railroads, this is a fine beginning. If we are ready for the Government to go into the business of mining coal, this is a good start.

If we are going to spend all this money to build some railroads in Alaska to open some mines to be worked by the Government for the purpose of reducing the cost of coal to somebody, why not let the Government mine coal in Pennsylvania, where it can reduce the cost, if it can be done at all, to a very large number of people?

I do not think the Government can do anything as cheaply as a private individual can do it. It can not build a railroad, it can not operate a railroad, it can not open and operate mines as cheaply as a private individual can do it. That is my experience, and I believe it is the experience of every Senator who does me the honor of listening to me.

I would be willing to have the Government guarantee the interest on bonds sufficient to build railroads in Alaska to the extent that the conditions justify. I would be willing to do that, just as we did in the development of this great western country of ours. Then I would open these coal mines on a lease system under proper regulations and restrictions. I would say to private capital, "Here are these lands. We will not sell them. We do not propose to part with our title in them, but we will lease them to you." More than half the coal produced in the United States is mined on the lease system and not by the actual owners of the land.

I hope the Senator from Oregon will pardon me. I shall be through in a minute.

Mr. LANE. All right.

Mr. BANKHEAD. I would say to private capital, "We will lease you these coal lands on a certain royalty under proper The royalty might be 10 cents; it might be 8 cents; or if the coal is of a very high quality-I have heard it suggested that they have anthracite coal there-the royalty might be 25 or 30 cents, depending on the value of the coal.

Mr. WILLIAMS. If the Senator from Alabama will pardon me, if they would add just one other feature to that, they could for all time prevent monopolization.

Mr. BANKHEAD. Why, of course.
Mr. WILLIAMS. That is this: After limiting the number of square feet that should be allowed to go to any one person, natural or artificial, if they would then declare the lease to be a personal license of privilege and then provide that in case the lessee attempted to re-lease it or to sell it the lease should ipso facto fall back to the Government, no corporation could ever gather together many grants and monopolize the production.

Mr. SMOOT. In answer to the Senator from Mississippi I want to say that I have introduced just such a lease bill, and it is now before the Committee on Public Lands. I expect a favorable report upon it from the Secretary of the Interior, and I shall ask the Senate to vote upon that lease bill at the earliest

Mr. BANKHEAD. I am very glad to hear that the Senator has done so. That idea has always seemed to me thoroughly practical, and I have always been of the opinion that a government which has done what our Government has done from the beginning has made a mistake. There ought to be a limitation upon the amount to go to any one person, natural or artificial, and there should be a personal license, nontransferable. With a nontransferable license, a hundred of them can never get into one hand, and it will never become a monopoly.

Of course these lands are all absolutely the property of the Government at this time, and we can make just such regulations as the Government may think necessary to protect the Government, to protect the consumers of coal, and so on. There will be no trouble about that. I do not want to give

my approval-and I doubt if I do-to the idea that we are going to build railroads in Alaska; that whether they are needed for the development or not we must build the roads at an expense of forty or fifty million dollars for the purpose of some kind of development. I do not want to give my approval to a proposition that is going to authorize the Government, even if they go on and build these roads, to operate coal mines

To repeat what I said, and then I am through. I am perfectly willing to vote-indeed, I would be glad to have an opportunity to vote-for a bill pledging the Government for the interest on a sufficient amount of bonds to build the necessary roads in Alaska, just as we did in building the Union Pacific; and we got it all back.

Mr. WILLIAMS. And in the Philippines we did the same

thing.

Mr. BANKHEAD. In the Philippines we are doing it. I can not see any particular objection to that. But this is an entirely different proposition. I think we ought to be very cautious, and we ought to know more about it than we do, although we have had some very extensive and enlightened discussion on this question in the Senate in the last few days. But we building them on paper. We are opening and developing mines here in the Senate on paper. I want to assure the Senate, from some personal experience, that it is a very different thing when you come to build railroads on the ground and through the mountains and tunnels and opening mines with slides and drifts and shafts, and building miners' houses and everything that pertains to the operation of a coal mine. Those are very different things from what we have had here in the Senate in the

Mr. LANE. Mr. President, I will take but a moment more. wish to call attention to the fact that horses will winter out in the Tanana Valley and come out in the spring fat. They can not do that in any climate unless they have good grass. have seen them there in midwinter as fat as butter. We can not do that in the Willamette Valley, Oreg., for the reason that it is a little too damp and the grass is not nutritious. Over in the eastern part of the State they can. I do not think they can do it in this climate, but I may be mistaken. I would not care to put one of mine out on grass in this part of the country in the winter.

I wish to say in reply to the question of the Senator that the cost of building railroads in Alaska is liable to be exag-There are places where it is difficult, and then there are gerated. miles and miles and miles where the ground is as level as a floor. The little railroad which runs out from Fairbanks to Cleary Creek goes through a country where in many places there is good timber alongside the track suitable for ties, and they put the rails down on top of the moss. They did not in many places have to grade or shovel dirt. There are miles and miles where practically there will be no grading at all in the construction of a railway to the interior of Alaska. There will be more cost for the bridging of streams than for anything else.

In relation to the matter of leasing coal mines, if I had a coal mine or a gold mine I would not lease it to anybody. have seen the leasing business carried on in mines, for I have lived in the vicinity of mines all my life. The man who is the lessee of a mine desires to get at the richest part of the mine, the pay streak, and to do as little timberwork as he can, and he "guts" the mine, as a rule, in order to do so.

guts" the mine, as a rule, in order to do so.

Now, in relation to the Matanuska coal, I have heard from people who live there that it is very good coal; that some of it is almost as good as the anthracite of Pennsylvania. not know that that is true. Much of it, I presume, is like our soft coal on the Pacific coast. It is a good steaming coal, but whether it be good enough to drive torpedo boats at a high rate of speed I do not know. It will do on our coast steamers They use that character of coal all over the coast. It will make steam and plenty of it, and it will coke. I am assured of that on what seems to be good authority. However, I will say that if an honest investigation can prove the fact that the coal is not to be of any value to the Government or the people as a fuel, I would not vote to build one inch of railroad to it. But if it is, as I am told, a valuable coal, a good coal as coal goes, and some of it of superior quality-and there is plenty of it, as I am assured, enough to give tonnage to a railroad with a double track—I would, if it were in my power, build a road to it.

Mr. SMITH of Michigan. Before the Senator retires, from his familiarity with Alaska Territory, I should like to ask him where he thinks the railroad ought to be constructed?

Mr. LANE. I am not an engineer.

Mr. SMITH of Michigan. I understand; but the Senator has

some familiarity with the country.

Mr. LANE. If I were going to that country to tap the richest country with the greatest agricultural possibilities and having the largest deposit of the best coal and good gold mines and at the same time get over into the interior of it, into the great Tanana Valley, I would start here [indicating], very near about Cooks Inlet, at the town of Seward, or near there, and cut across here [indicating] from Prince William Sound and go up the Susitna Valley and over the divide. You do not know it when you pass over the divide; it is so low.

Mr. SMITH of Michigan. What would the mileage be? Mr. LANE. That route, I am told, is not to exceed 300 or 350 miles clear on into the valley.

Mr. SMITH of Michigan. In the opinion of the Senator, would that subserve the purpose? Mr. LANE. That would tap the heart of Alaska. That is

my personal opinion.

Mr. SMITH of Michigan. In the Senator's judgment, it would not require more than about 300 miles of railroad?

Mr. LANE. I think that is all. It would not be far from

Mr. SMITH of Michigan. So the claim that there is a necessity for authorizing a thousand miles is a little extravagant. Mr. LANE. They could go as much farther as they liked to

get in here [indicating].

Mr. SMITH of Michigan. I understand.

Mr. LANE. I am talking about tapping the Tanana Valley near the center.

Mr. SMITH of Michigan. Three hundred miles would subserve every requirement for many years to come?

Mr. LANE. I do not know that. If you bring in a line of railroad, the people will rush in there and the products will have to come out. I am only stating that that is the heart of the proposition, as I understand it. In my opinion, that taps the heart of the Alaska country.

Mr. BACON. Will the Senator permit me to ask him a ques-

tion?

Mr. LANE. Certainly.
Mr. BACON. Leaving out of consideration the question of the development of other resources of Alaska, and limiting the inquiry simply to the question of coal, if you had no other purpose now but to run a railroad to the coal fields, those fields that you say have good coal, how much railroad would it require from the seacoast?

Mr. LANE. If you went in through by Seward, something like 120 to 150 miles. Of course, you could cross from Prince

William Sound in probably half the distance.

Mr. BACON. Seventy-five miles?
Mr. LANE. Yes.
Mr. BACON. Yet we are talking about building a thousand

miles to get to the coal.

Mr. SMITH of Michigan. That would be competitive, would it not? Private enterprise already has that country opened up? Mr. LANE. No. You see, the trouble with railroads in Alaska

is this: All quotations from there in recent years have shown that they do not make a profit. The supposition that they do is based, as I have heard the argument, on a false assumption. They begin at the seacoast, but they do not reach anywhere. They do not get on into a productive country. When you get up into the Bering district, off Katalla, the wind whistles off the glaciers 60 miles an hour at times, and it is as cold as ice, and it is a very hard place to make a landing.

Mr. BACON. I understand the Senator to say that 75 miles

will reach the coal fields.

Mr. LANE. I am told so. It is something like that. It may be a hundred miles.

Mr. BACON. Therefore the other 925 miles are not for the

purpose of reaching the coal fields.

Mr. LANE. But you will get up into the interior. Mr. BACON. But the coal question can be developed with

Mr. LANE. That may be; but I will say that I did not rise for the purpose of saying anything which would obstruct the passage of the bill.

Mr. THOMAS. The Senator from Oregon [Mr. CHAMBER-LAIN] requested me to ask, when this discussion was over, that Senate bill 48 be temporarily laid aside.

The VICE PRESIDENT. Without objection, it will be so

ordered.

Mr. KERN. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Thursday, January 22, 1914, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

Wednesday, January 21, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the follow-

ing prayer:

We bless Thee, eternal God our heavenly Father, for the spark of divinity which glows in the heart of man, which lifts him infinitely above the animal, makes him a living soul, a progressive being destined to live on forever. Impress us, we beseech Thee, O Lord, with the great responsibility Thou hast laid upon us as individuals and as a people, that we may think and think right, act and act right, keeping ever before us the highest ideals in intellectual, moral, and spiritual attainments, thus moving onward and upward, under the leadership of the Jesus of Nazareth, the world's great Exemplar. Amen.

The Journal of the proceedings of yesterday was read and

approved.

NAVAL HOLIDAY.

Mr. HENSLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by inserting an article from

Berlin on the naval holiday.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the Record by inserting an article from Berlin on a naval holiday. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I

want to say that that is rather indefinite. What is it?

Mr. HENSLEY. It is a dispatch from Berlin which appeared in the press of this country, showing that Germany, instead of being opposed to a naval holiday, is anxious to join the great nations in a plan of this character, in order to relieve their people of the great burden of taxation which is due to the increase in armaments.

Mr. MANN. From some Berlin newspaper?

Mr. HENSLEY. Yes, sir; indicating the position taken by Germany upon the proposition of a naval holiday for one year. It is a short article.

Mr. MANN. I am making no objection.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection. The article is as follows:

THE ATTLEE IS AS IGNOWS.

TIRE OF NAVY "BLUFF"—GERMANS GLAD THAT ENGLAND FAVORS BATTLE—SHIP 'HOLIDAY—SEE PRACE BETWEEN NATIONS—KAISEE'S SEA FORCE TO-DAY AS STRONG AS GREAT BRITAIN'S WAS 10 YEARS AGO, BUT LIMIT IS ABOUT REACHED—WILLINGNESS IN EMPIRE TO FOLLOW WINSTON CHURCHILL'S PROPOSAL.

[Special cable to the Washington Post.1

BERLIN, January 17.

Nothing in the foreign political situation is more pleasing to the German people than the fact that the English-German tension, which at times last year seemed to threaten the peace of Europe, is lessening. It is not quite clear to the Germans whether this is a result of the Balkan drama or, what it is preferred to believe, because the English statesmen are gradually becoming convinced of Germany's sincere love of peace. But whatever the reason, there is refoicing to see that England has discovered that there is absolutely no necessity for her to keep practically her whole naval fighting force concentrated in the North Sea.

SEES PEACE NAVY PROGRAM.

In a talk the writer had the other day with a prominent naval expert, Capt. L. Persius, a frequent writer on naval subjects in the Berliner Tageblatt, he expressed the firm conviction that the way is now open for an Anglo-German agreement restricting naval armaments, as repeatedly suggested by Mr. Winston Churchill. No one can deny the proposed naval budgets of both countries are so gigantic it is to be feared it will be found almost impossible to carry them out.

"About a decade ago," Capt. Persius said, "the British fleet consisted of 61 battleships, with an aggregate tonnage of about 800,000, while the navies of Russia, France, and the United States were about half as strong. Germany had at her disposal 25 battleships, with an aggregate tonnage of 270,000. Now the German Navy program provides for 61 battleships, and at this moment Germany actually possesses 33 first-class battleships of 537,000 tons and 13 battle cruisers and armored cruisers, with a tonnage of 186,000. That is to say, Germany's navy is to-day about as strong as was England's 10 years ago.

GERMANY FORGING AHEAD.

GERMANY FORGING AHEAD,

"If the present program is carried out and the ships antedating the dreadnought period are replaced by modern battleships, the tonnage of our 61 battleships will reach the enormous total of 1,500,000. The new English and American battleships will have a tonnage of from 28,000 to 30,000."

to 30,000."

If Germany considers 61 battleships necessary for her defense, Capt. Persius went on to say, England will certainly need 100. The cost of construction of a modern battleship of 30,000 tons is about \$15,000.000, and it requires a crew of about 1,100. These figures show what enormous heights the naval budgets must reach in a near future. Will the nations really be able to bear this burden?

EUROPE LOOKING ON.

All the other powers fully realize this and let England and Germany fight out their "bluffing match" alone, fully aware that one of them will be forced to give up and that they will be the ones to profit thereby. France's program provides for only 28 battleships and Russia's naval

plans are equally moderate. Italy is satisfied to build one battleship a year. Austria intends to do the same and the United States wisely follows suit. It had been expected that Japan would quickly build a mighty navy after the war; but patriotic though the Japanese are, their papers have stated in no uncertain terms: "The people demand that their real interests be not sacrificed to the Moloch of militarism and marinism." The cries of the Japanese jingoes have been entirely drowned in the storm of popular protests. Brazil has discovered that dreadnoughts are expensive toys and is now endeavoring to sell the ships she was too quick to buy, and Chile is following her example.

WHOLE WORLD AGREES.

Practically every power in the world has admitted that naval armaents have been excessive and that it is absolutely necessary to call a

ments have been excessive and halt.

Remembering the words of Winston Churchill, on November 15 last, that with a little good will much might be accomplished, the whole German nation fervently wishes that the two Governments will show the necessary good will during the present year.

IMMIGRATION.

Mr. GOLDFOGLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the immigration bill.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the Record on the immigration bill. Is there objection?

There was no objection.

RAILROADS IN ALASKA.

The SPEAKER. This is Calendar Wednesday and the unfinished business is the Alaskan railroad bill. The House automatically resolves itself into Committee of the Whole House on the state of the Union, with Mr. HARRISON in the chair.

The CHAIRMAN. The House is in Committee of the Whole

House on the state of the Union for the consideration of the bill H. R. 1739, of which the Clerk will read the title.

A bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. HOUSTON. Mr. Chairman, I move that the committee now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Harrison, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee had had under consideration the bill H. R. 1739, the Alaskan railroad bill, and had come to no resolution thereon.

Mr. HOUSTON. Mr. Speaker, I ask unanimous consent that the time for general debate on the Alaskan railroad bill be limited to five hours and a half on a side after the conclusion of the speech of the gentleman from Oklahoma [Mr. Ferris], one half of that time to be controlled by the gentleman from Oklahoma [Mr. DAVENPORT] and the other half by myself.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that after the gentleman from Oklahoma [Mr. FERRIS] concludes his speech there shall be five hours and a half of debate on each side of this question, one half to be controlled by himself and the other half by the gentleman from Oklahoma [Mr. DAVENPORT]. Is there objection?

Mr. MANN. Reserving the right to object, I suggest that some gentleman on this side of the House ought to have control

of some of the time.

Mr. HOUSTON. We thought the matter of discussion could be taken care of by the advocates of the bill and the opponents without regard to partisan control.

Mr. MANN. I understand; but I do not know who wants

to be heard on this side.

Mr. MONDELL. Mr. Speaker, reserving the right to object, I want to call the attention of the gentleman from Tennessee to the fact that those who favor this legislation have up to this time had between four and five hours more—

Mr. DAVENPORT. They have had six hours.

Mr. MONDELL. Six hours more than those opposing the

legislation. Now the gentleman from Tennessee proposes to have a division of the time without regard to what time has heretofore been consumed. I want to ask the gentleman if he thinks that is a fair division?

Mr. HOUSTON. The gentleman from Wyoming does not state the matter properly. We do not ask for such a division of the time. We propose, in order to compensate for additional time, that the gentleman from Oklahoma [Mr. Ferris] shall have time to conclude his speech before the limitation begins. After that is done, which will set us right, we propose to limit the time.

Mr. MONDELL. The gentleman from Oklahoma [Mr. Fer-RIS] has not suggested that he wants to take all day, and it will be necessary for him to take the entire day in order to average up the time. I think the gentleman from Oklahoma ought to have all the time he desires, but I do not think he desires four or six hours. Therefore I think it would be better

to go on with the debate, and at the conclusion of the debate to-day, perhaps, come to some arrangement in regard to it. But, in any event, whatever debate there is to be from this time forward—and it seems to me there ought to be two full days—ought to be divided so that at the end of the debate each side will have had an equal length of time.

Mr. MURDOCK. If there are enough against it to occupy

that much time.

Mr. HOUSTON. Mr. Speaker, we have agreed, the opponents of this measure and those who are in favor of it, in the committee on this division of time. We agreed to compensate the negative for the additional time we have had in favor of the bill by allowing the gentleman from Oklahoma [Mr. Ferris] to complete his speech, and after that to fix the limitation of time. So far as the question raised by the gentleman from Illinois [Mr. Mann] is concerned, I do not think we will have any trouble about Republicans and Democrats alike getting a fair division of time.

Mr. MONDELL. Mr. Speaker, does the gentleman from Oklahoma expect to consume enough time to equalize the time in debate up to this time, which will be some five or six hours?

Mr. FERRIS. Mr. Speaker, I have not the floor, but I will say that I do not expect to use over an hour and a half; I hope less than two hours. This question is one of making reference to hearings that we can not get over as readily as we would like and that has consumed by former speakers and will by myself consume some more time than one would like. I am sure that I will be through within two hours.

Mr. MONDELL. Mr. Speaker, in view of the statement that the gentleman has made, it is very apparent that there will not have been an equal division of time after he has closed his speech. Therefore it seems to me better to go on to-day, alternating on each side. I suggest an arrangement such as will equalize debate at the end of two days between those in favor of the legislation and those who are opposed to it. That will

leave two days for general debate.

Mr. MANN. Mr. Speaker, it is quite evident that the request of the gentleman from Tennessee [Mr. Houston] would occupy one more day besides this in general debate, and I think likely

run over that.

Mr. HOUSTON. Mr. Speaker, that is evidently correct, and in order that we may get through with this measure and not have such extensive time consumed, it is very important I think that we fix this limitation now. We had agreed on the limitation of time, after allowing the negative side on this question to present their case in as much time as the gentleman from Oklahoma [Mr. Ferris] deems proper to consume. We have reached an agreement of that sort in committee, and I think that will be fair to all.

Mr. MONDELL. Mr. Speaker, I desire to suggest to the gentleman that he put his request so that there shall be general debate on to-day and on the Wednesday following, and that the time be equally divided between those in favor of and those opposed to the bill, taking into consideration the time already used.

Mr. HOUSTON. Mr. Speaker, I am very anxious that we should get through with this matter in a reasonable time. We have reached an agreement that I think is fair, and I shall

insist upon that proposition.

Mr. DAVENPORT. Mr. Speaker, after discussing the matter with the chairman of the committee, I said to him that I would be willing to agree to that. However, I do say that I believe the time should have been equally divided, notwithstanding I told the gentleman a moment ago that if the gentleman from Oklahoma [Mr. Ferris] were permitted first to finish his remarks, I would agree to five hours and a half on a side. Yet those favoring the bill have had six hours and something more than those opposing it, and I feel that this bill is of such importance to the people of the United States that all time necessary for Members of this House to discuss it should be given.

Mr. FERRIS. Mr. Speaker, will the gentleman yield?

Mr. DAVENPORT. Certainly.
Mr. FERRIS. It is true, and I think all understand it, that those in favor of the bill have used about six and a half hours more than those who are opposed to the bill.

The SPEAKER. That is correct,

Mr. FERRIS. But I think there is guite a well-defined reason for that. The gentleman from Alaska [Mr. WICKERSHAM] is the Delegate from that Territory, and in a colloquy between myself and the gentleman from Tennessee [Mr. Houston] on Wednesday last, it was pretty well explained and accepted by the House that the gentleman from Alaska should have more time than the rest of us. I am rather in hopes that the sugges-tion of the chairman will be agreed to. It is undoubtedly incumbent upon the chairman to try and get the legislation through some time, and we have had already a good deal of general debate. And if the gentleman from Wyoming [Mr. MONDELL] should feel that he could agree, even if we have had more time, I hope he will agree to that and let us go ahead.

Mr. MONDELL. Mr. Speaker— The SPEAKER. The gentleman from Tennessee [Mr. Hous-TON] asks unanimous consent that, after the conclusion of the speech of the gentleman from Oklahoma [Mr. Ferris], there shall be 11 hours of general debate, one half to be controlled by himself and the other half by the gentleman from Oklahoma [Mr. DAVENPORT]

Mr. MANN. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. MANN. The gentleman from Oklahoma [Mr. Ferris] has been recognized in the Committee of the Whole House on the state of the Union for one hour. That is all he can get except by unanimous consent or an order of the House.

The SPEAKER. That is true.

Mr. MANN. If any further time was used by the gentleman, would that come out of the 11 hours?

The SPEAKER. No.

Mr. MANN. It would unless there was some agreement to

The SPEAKER. Of course, if the rule is strictly construed, nobody can speak more than an hour without unanimous con-

Mr. FERRIS. I understood the gentleman from Tennessee

to include in his motion that I have time to conclude.

The SPEAKER. The gentleman from Tennessee included in his motion that at the expiration of the speech of the gentleman from Oklahoma-

Mr. MANN. Why not modify the request and make it seven hours and a half to those opposed to the bill, which will give the gentleman from Oklahoma [Mr. Ferris] two hours, and five hours and a half to those who favor the bill?

Mr. HOUSTON. I am perfectly willing to do that; I am willing to put my request in those terms.

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Tennessee this: Under this proceeding, when we began this discussion of the bill those of us who wanted to speak went to the Speaker's desk and put our names in for time. Among those who put their names in was Mr. Falcones, of Washington, Mr. Bryan, and myself. I have had, I think, 10 or 15 minutes' time. Mr. Falconer and Mr. BRYAN are still waiting for time. Are they to have a portion of this time?

Mr. HOUSTON. Certainly, they are to have a portion of the time as limited. They are to have a portion of the 11 hours, if

my request is agreed to.

Mr. MURDOCK. Under this proceeding, I will say to the gentleman from Tennessee, we put our names in and it is within the control of the Chair to recognize whom he pleases.

Mr. HOUSTON. I think there will be no trouble under that.

Those gentlemen will be given time.

Mr. MURDOCK. That is all I desire to know-whether they will be given time or not.

Mr. MADDEN. Mr. Speaker, I reserve the right to object unless some of us who are opposed to the bill have an opportunity to be heard upon it.

Mr. MONDELL. Let me suggest to the gentleman from

Tennesse

Mr. MADDEN. Mr. Speaker, I reserve the right to object unless some of us who are opposed to the bill have an opportunity to be heard upon it.

Mr. HOUSTON. There are seven hours and a half proposed

to be given to those who are opposed to the bill.

Mr. MADDEN. I notice that under the procedure hastily agreed to heretofore those in favor of the bill could get time,

whereas those opposed are left no time.

Mr. UNDERWOOD. If the gentleman will permit, I suggest to the gentleman from Illinois [Mr. Madden] it is entirely within the power of the chairman of the committee to move to close debate

Mr. MADDEN. I understand that.

Mr. UNDERWOOD. And then it will be equally divided.
Mr. MADDEN. I understand that.

Mr. UNDERWOOD. And this grants two and a half hours more to the opponents of the bill than to those in favor of the

Mr. MADDEN. But those in favor of the bill have had two-

thirds of the time already.

Mr. UNDERWOOD. But they are going to be compensated. It seems to me it is an exceedingly fair proposition for those opposed to the bill.

Mr. MONDELL. How can the gentleman undertake to say !t is fair when they have already used six hours more than those

opposed to the bill?

Mr. DAVENPORT. In answer to the gentleman from Illinois [Mr. Madden] I desire to say to him that a number of gentle-men on that side have submitted to me requests for time and have been granted time, and that the time, if we should fix it as suggested now, has all been taken.

Mr. MADDEN. Then I object.

Mr. DIES. Mr. Speaker, I object if it is all taken, for I want to make a speech against the bill.

Mr. SLAYDEN. So do I. The SPEAKER. Objection is made.

Mr. MANN. We had better let debate run for the day. Mr. HOUSTON. Mr. Speaker, I move that general debate on

this bill be closed in 111 hours.

Mr. MANN. The gentleman just agreed to 13 hours.

Mr. HOUSTON. Not 13.

Mr. MANN. Five hours and a half on a side, and 2 hours extra to the gentleman from Oklahoma [Mr. Ferris], which makes 13 hours.

Mr. HOUSTON. That is right. Mr. Speaker, I move that general debate be closed in 13 hours, and that the time be controlled by the gentleman from Oklahoma-Mr. MANN. You can not do that.

Mr. HOUSTON. I make my motion to close debate in 13

The SPEAKER. The gentleman from Tennessee [Mr. Hous-TON] makes the motion to close general debate in 13 hours.

Mr. SMALL. Mr. Speaker, that is the same request to which objection has just been made.

The SPEAKER. The question is on the motion of the gentleman from Tennessee.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. DIES and Mr. FERRIS demanded a division.

The House divided; and there were—ayes 85, noes 39. Mr. DIES. Mr. Speaker, I make the point of no quorum. The SPEAKER. The gentleman from Texas [Mr. Dies]

makes the point of no quorum. The Chair will count. [After counting.] One hundred and fifty-five gentlemen are present; not a quorum. On the last vote the yeas were 35 and the noes 39. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. Those in favor of limiting general debate to 13 hours will, as their names are called, answer "yea," and those opposed will answer

The question was taken; and there were—yeas 283, nays 66, answering "present" 5, not voting 79, as follows:

So the motion to limit general debate was agreed to. The Clerk announced the following pairs:

For the session:

Mr. Scully with Mr. Browning.

Mr. METZ with Mr. WALLIN.

Until further notice:

Mr. Underhill with Mr. Prouty. Mr. Smith of Maryland with Mr. Smith of Idaho.

Mr. SHARP with Mr. PORTER.

Mr. RUCKEB with Mr. Woods. Mr. ROTHERMEL with Mr. PATTON of Pennsylvania.

Mr. NEELY of West Virginia with Mr. Peters of Maine.

Mr. White with Mr. Willis. Mr. McCov with Mr. Vare.

Mr. Loft with Mr. J. M. C. Smith. Mr. Levy with Mr. Moss of West Virginia.

Mr. Lever with Mr. Martin.

Mr. Korbly with Mr. Griest.

Mr. Griffin with Mr. Langham. Mr. Goeke with Mr. Kiess of Pennsylvania.

Mr. George with Mr. Helgesen. Mr. Gallagher with Mr. Cary.

Mr. Covington with Mr. Graham of Pennsylvania. Mr. Carlin with Mr. Burke of South Dakota.

Mr. BEALL of Texas with Mr. AINEY.

Mr. Ansberry with Mr. Burke of Pennsylvania. Mr. Goodwin of Arkansas with Mr. Avis. Mr. Talbott of Maryland with Mr. Merritt.

Mr. CRISP with Mr. HINDS (transferable).

Mr. CLANCY with Mr. HAMILTON of New York. Mr. Webb with Mr. Volstead.

Mr. FITZHENRY with Mr. ROBERTS of Nevada.

Mr. ASWELL with Mr. SLEMP.

Mr. Hobson with Mr. BARCHFELD.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present, and the Doorkeeper will open the doors. The House automatically resolves itself into Committee of the Whole House on the state of the Union.

Mr. HOUSTON. Mr. Speaker, I desire now to submit a request for unanimous consent. It is the proposition we agreed to. The proposition is that 7½ hours of the 13 hours be allotted to those opposing the bill and 51 hours to those in favor of it, the time to be controlled by the gentleman from Oklahoma [Mr. DAVENPORT] and myself, respectively.

The SPEAKER. The gentleman from Tennessee [Mr. Hous-TON] asks unanimous consent that the 13 hours allowed for general debate be divided, 72 hours to be used by the opponents of the bill and 51 hours by the proponents of it, the 51 hours to be controlled by himself and the 74 hours to be controlled by the gentleman from Oklahoma [Mr. DAVENPORT]. Is there objection?

Mr. DIES. Mr. Speaker, I object. The SPEAKER. The gentleman from Texas [Mr. Dies] objects. The House automatically resolves itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and the gentleman from Mississippi [Mr. Harrison] will take the chair.

The House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the

bill H. R. 1739, with Mr. HARRISON in the chair.
The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 1739, which the Clerk will report by title.

The Clerk read the title of the bill, as follows:

A bill (H. R. 1739) to authorize the President of the United States locate, construct, and operate railroads in Alaska, and for other purposes.

The CHAIRMAN. The gentleman from Oklahoma [Mr.

FERRIS] is recognized.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that I be permitted to conclude my remarks in not to exceed two hours.

The CHAIRMAN. The gentleman from Oklahoma [Mr. Fer-ris] asks unanimous consent to be permitted to conclude his remarks in not to exceed two hours.

Mr. HUMPHREY of Washington. Mr. Chairman, reserving the right to object, does that mean that the gentleman is to consume 2 hours out of the 13?

The CHAIRMAN. The Chair thinks it would be 2 hours out

of the 13.

Mr. HUMPHREY of Washington, Mr. Chairman, I do not want to object, but I would like to know something about the allotment of this time. I am as much interested in this legislation as anyone in the House, not even excepting the gentleman from Alaska [Mr. Wickersham], the Delegate. The other day he had all the time to talk that he wished, and I am glad that he did, and I consented to it; but under this arrangement the Members from the State of Washington, it seems to me, are not going to have an opportunity to talk upon this question. I think that the gentleman from Oklahoma [Mr. Ferris] ought to have all the time that is desired, but at the same time, if we are going to be limited to 13 hours, I think we ought to have some understanding about it. I want to have a little time myself.

Mr. MANN. Mr. Chairman, I suggest that the Chair, who unofficially has knowledge of what has already taken place in the House and who now has charge of the time, will undoubt-edly recognize gentlemen in opposition to the bill for seven and one-half hours and gentlemen in favor of the bill for five and one-half hours, so that the granting of this time would not interfere with the rights of the gentleman from Washington

[Mr. HUMPHREY]

The CHAIRMAN. The Chair thinks that the 2 hours would come out of the 13-

Mr. MANN. Certainly— The CHAIRMAN. And in recognizing the various Members

he will take those two hours into consideration.

Mr. HUMPHREY of Washnigton. Mr. Chairman, reserving the right to object for just a moment, I want to call attention to the situation we are in just now. Here is a bill of vital importance, and five Members from the State of Washington, and five and one-half hours of debate are allowed, and 15 or 20 gentlemen wanting time; and yet, in the face of that fact, without attempting to make any arrangement or adjustment of the time, the chairman of the committee asks that this debate be limited. I want to call the attention of the House to the injustice of that proposition. I am not going to object. I have never made an objection in this House since I have been herefor 10 years.

Mr. Chairman, in view of the tremendous importance of this measure and the great number of gentlemen who are anxious to be heard upon it, I am constrained to

The CHAIRMAN. Objection is made. The gentleman from

Oklahoma [Mr. Ferris] is recognized for one hour.

Mr. FERRIS. Mr. Chairman, I had hoped to dwell historically on Alaska for a few moments, but my time being limited, I will not be permitted to do that. In place of that I wish to thank the gentleman from Alaska [Mr. Wickersham], the Delegate, who gave us a great deal of historical data on last Wednesday about his people and about his Territory.

I concede to any Member of Congress here the right to say as many nice things about his people as he cares to say, and as many hopeful things about the future of his country as he cares to, but living in the West myself, and knowing something of what chambers of commerce and people living in a new State or Territory are apt to say and think and hope for the future, I shall neither be amazed at what he said nor deceived by it.

There are nine railroads or parts of railroads in Alaska, ranging from 5 to 195 miles in length, part of them narrow gauge, part of them standard gauge, with a total trackage of 466 miles, all "busted" and "broke" except three, and trying to sell out.

RAILWAY COMMISSION.

The last Congress authorized the President to appoint a commission to go to Alaska to examine the railroad situation. President Taft appointed on that commission Maj. Jay J. Morrow, Corps of Engineers, United States Army, chairman; Alfred H. Brooks, geologist in charge of Division of Alaskan Mineral Resources, Geological Survey, vice chairman; Civil Engineer Leonard M. Cox, United States Navy; and Colin M. Ingersoll, consulting railroad engineer, New York City. They were directed to report to Congress at the succeeding session their findings. Their work necessarily had to be done with great least and as their report on numerous consistent indicates. haste, and as their report on numerous occasions indicates, they based it on facts, figures, and data collected from rail-roads and other parties on the ground rather than by personal contact, surveys, and investigations. They made an estimate of cost on 16 different lines of railroads, specifically stating that in each of the estimates made no allowance was made for organization and promotion expenses.

I will here insert the commission's estimates and their remarks on construction.

The commission has made a careful study of conditions in Alaska as regards wages, cost of materials, and freight rates. It had at its disposal the results of preliminary surveys of only a portion of the roads considered. Such surveys were lacking on many of the routes, though considerable data bearing on costs of construction were available.

The commission has prepared estimates of cost of construction of all roads under consideration. These estimates are submitted herewith in the order in which the various roads have been described. It will be observed that the cost of the line from Chitina to Fairbanks has been estimated in considerable detail. It is regretted that the other lines could not be treated in the same manner, but this was impossible on account of lack of data, and in these cases the commission was compelled to assume a cost of construction per mile comparable to that experienced m country of similar character traversed by existing lines or estimated for in the Chitina-Fairbanks line, over which the commission actually traveled.

The commission had opportunity to obtain construction results from a number of existing railroads and also to discuss costs with engineers who have had Alaskan or Canadian experience; and it was on information such as this that it based its unit prices for the various classes of excavation, clearing, grubbing, trestles and bridges, masonry work, etc. For equipment the commission assumed the number of locomotives and cars which it believed sufficient to care for the traffic immediately in sight. In all of the following estimates no allowance has been made for organization and promotion expenses.

Estimate No. 1—Haines-Fairbanks route.—This line involves the construction of 638 miles of line, starting at the town of Haines, running in a northwesterly direction through 287 miles of Canadian territory and terminating at Fairbanks.

Cost of construction of this line is estimated at	\$21, 284, 700
Engineering and superintendence, 5 per cent Terminal ground and land damages	1, 064, 235
Telephone	159, 500
Contingencies, 10 per cent	2, 252, 844
struction	2, 230, 315
Rolling stock plus overhead charges	1, 173, 920
	20 405 544

Total 28, 186, 000
Average cost per mile of track 44, 300
Average cost per mile of track 44, 300
There was no profile of this line available, and the above estimate is based almost entirely upon information furnished by the engineer who conducted the exploratory reconnoissance. One member of the commission, having traveled over approximately the same route, was sufficiently familiar with the character of the country traversed to form a general idea of the cost of railroad construction.

Estimate No. 2—Chitina-F	airbanks	route.

Their estimates of cost for the 16 lines of railroad estimated upon range from \$41,000 to \$64,000 per mile. If all of those lines were constructed concerning which they made a partial or full report, it would require more than \$600,000,000 from the Treasury to construct those lines. But relying upon one of the leading railroad presidents who appeared before the committee in advocacy of this bill, he said it would require 10,000 miles of railroad to develop Alaska. Let us strike a balance of the average cost per mile of \$48.000, and they estimate that to be the average price. To construct 10,000 miles of railroad, at \$48,000 per mile, would take \$480,000,000 out of the Treasury. this House, who have promised the people economy and sane, careful, patient, well-defined government, what does all this mean? I ask you what political platform, aside from the Socialist and the Progressive platforms, ever promised, prior to their election, any such propaganda as that?

This bill appropriates \$1,000,000 outright. It authorizes a bond issue of \$35.000,000 outright, and authorizes the President to do anything and everything he desires to do with that first \$36,000,000. There is a velled suggestion coming from somewhere behind the scenes that from this \$36,000,000 they are going to build three lines of railroad, but no part of the bill, from first to last, limits it to any particular line or any particular feature of construction, and no part of the bill limits the number of miles to be constructed, or offers a word of restraint as to the purchase of these seven defunct, "busted" railroads that are now seeking to sell out. Any attempt to parallel them would be opposed on every hand, so what will probably happen is an unloading of those defunct, worthless roads on the Gov-ernment, which will blast us and plague us.

The Alaskan Territorial Legislature have expressed themselves on this proposition, and in a letter directed to the Secretary of the Interior on April 13, 1913, signed by the president of the senate and six senators, have expressed the gravest doubt about the advisability of the construction of the railroad by the Federal Government.

I will insert this letter in the RECORD at this point:

Alaska Territorial Legislature, Senate Chamber, Juneau, Alaska, April 13, 1913.

TO THE SECRETARY OF INTERIOR, Washington, D. C.

Sin: We are informed that it is a general opinion prevalent at Washington that the people of Alaska are unanimously in favor of a Federal Government owned, constructed, and operated railroad in Alaska.

The majority of the people, in our opinion, are opposed to the principle of Government ownership.

It is true, however, that in order to prevent the depopulation of Alaska we are in favor of any plan or system that will result in the immediate construction of trunk-line railroads in Alaska, as an imperitive necessity to the development of our vast mineral resources and extensive coal fields.

We consider "transportation" the key to the present situation in Alaska.

Alaska. Yours, respectfully,

L. V. RAY,
President of the Senate,
ELWOOD BRUNER,
Senator Second Division,
B. F. MILLARD,
Senator Third Division.
CONNAD FREEDING,
Senator Second Division.
H. T. TRIPP,
Senator First Division.
J. M. TANNER,
Senator First Division.
HENRY RODEN,
Senator Fourth Division.

Hon. FRANKLIN K. LANE, Washington, D. C.

I can scarcely think this Congress, irrespective of party and irrespective of any program mapped out in the minds of those here, can realize what all this means. Ten thousand miles of railroad, it is stated in the Senate hearings, will be required to develop Alaska. Ten thousand miles of railroad, at \$48,000 a mile, calls for an appropriation of \$480,000,000. Is there anyone who thinks that by the building of the three lines of railroad referred to the clamor from the Seattle Chamber of Commerce and the various chambers of commerce in Alaska will be stopped? Are the eyes of anybody so blinded to the truth as to believe that this \$36,000,000 which we are now proposing to appropriate will be the end? Not at all. It will merely whet and sharpen the appetite of every other chamber of commerce, of every other town-site booster, of every promoter up there to come down and claim their part.

What is the history of appropriations in this House? Look at them. Look at the Army and Navy. Look at the rural-route appropriations, which started in a few years ago with \$30,000 or

\$40,000 and now amount to \$45,000,000.

Tom Reed and his entire Congress were swept off the map because they appropriated a billion dollars in a single Congress saying that there was not a single acre of land granted in aid of two years. We are appropriating more than a billion dollars

every session of Congress, and we are asking to be retained from an economical standpoint and on a platform of economy.

I do not blame my good friend the gentleman from Kansas, Vic Murdock, and his Progressive Party for advocating this scheme. But I should like to have a Republican or a Democrat step up here and say that he advocated the Government ownership of railroads in any platform that he ever ran on, at any time, at any place, or anywhere. The Bull Moose Party are so few in number and so far from power and responsibility they can advocate anything. They were organized to destroy the regular Republican Party. That is done. Their mission is

Mr. BRYAN. Will the gentleman yield? Mr. FERRIS. For a question. Mr. BRYAN. Will not the gentleman admit that Mr. Bryan, Secretary of State, openly advocated Government ownership of

Mr. FERRIS. Not at all. I have attended the last four or five national conventions, and nowhere, except in the platform of the Socialists or the Progressives, has there been any plank on the Government ownership of railroads. The courageous Secretary of State has had much to do with the making of each one of these platforms, and if he desired Government ownership in them it would undoubtedly have been inserted.

Mr. BARTLETT. V. Mr. FERRIS. Yes. Will the gentleman yield?

Mr. BARTLETT. I know that the gentleman is familiar with what I am about to ask him.

Mr. FERRIS. I do not know about that.

Mr. BARTLETT. One suggestion that has been made here, and as an argument why we should build this railroad to develop Alaska, is to compare it with what we have done in the matter of railroads in the Philippines. Is it not a fact that the Government of the United States has not at any time guaranteed any bonds of any railroad in the Philippines, but that the Philippine Government alone is responsible for them?

Mr. FERRIS. I think that is true. I have not given that close attention recently, but this is undoubtedly our first at-

tempt in anything of this kind.

Mr. GARRETT of Tennessee. If the gentleman from Oklahoma will allow me, that is absolutely true. Congress permitted the Philippine Government to guarantee the bonds, but the United States did not guarantee them.

Mr. BARTLETT. I do not want to take up the gentleman's

Mr. FERRIS. I endeavored to get some additional time, but

did not get it.

Mr. BARTLETT. That was one of the reasons and one of the arguments given by the advocates here, that we were doing this thing in the Philippines, and I want it to appear in the RECORD, and I knew that the gentleman from Oklahoma was familiar with the matter.

Mr. FERRIS. The Government is not doing it in the Philippines, neither are they doing it anywhere else. They have heretofore granted to railroads a large amount of land, which is a blot on the Nation's history, and no man can defend it. All through this debate that has been offered as a precedent as to why we ought to do this, but instead of being a precedent in favor of it it is a hideous, ghastly, blighting precedent against it, and we ought not to need anything more to make us realize it.

The proponents of this legislation offer as a precedent for this bill that the Federal Government has heretofore granted 159,-125,734 acres of the public domain to the railroads of the country to encourage them in railroad building. I pause to call attention to the cold but stolid fact that this acreage, at \$10 an acre, would bring an amount of \$1,591,257,340 of the people's money; I pause to again call attention to the somber fact that this was the granting away of homes of 40 acres each to 3,988,143 homeless American families; I pause again to ask if such a precedent is sufficiently encouraging to warrant us in supporting the Alaskan railway bill. So far as I am concerned, I am opposed to any more land grants, and I think the records will show that the land grants of this country, by which the railroads were enabled to sell at extortionate prices and on harsh terms to bona fide home builders the lands received gratis from the Federal Government, is a blot upon our history and would serve only as a condemnation rather than as a precedent to proceed further upon the same line.

My good friend from Alaska [Mr. WICKERSHAM], who is able, bright, and brilliant, made a noble fight for his people, and I am glad that he did; but he toek occasion to whack my colleague and myself and my State over the fact. This morning I secured from the General Land Office a letter which I have here, time to read the letter, for our State is not on trial. We are not asking the Federal Government to appropriate \$36,000,000 in aid of any railroad project.

It is doubtless important to this Congress to know exactly what is proposed to be done here. It might also be interesting to know just who wants the Federal Government to build this line from Chitina to Fairbanks. We are fortunate in having so good an authority as ex-Secretary of the Interior, Mr. Fisher, to quote from, wherein on page 141 of the Senate hearings he illuminates quite well, though possibly unintentionally, the real situation in Alaska. The exact colloquy is as follows

situation in Alaska. The exact colloquy is as follows:

Senator Walsh. Mr. Secretary, does not that condition, with the immense wealth of agriculture and mineral deposits, in that neighborhood offer the most inviting kind of a field for the construction of a railroad by private enterprise?

Mr. Fisher. No; it does not, for this reason, Senator: The difficulty is that the people that are asked to build this railroad will say:

"Alaska is a long way off and we are not satisfied with the return on our investment in Alaska that we would be satisfied with in Indiana, Iowa, or Montana. We want a great deal more if we are going to put our money in up there. We do not see where we are going to get it. It may be that in the course of time there will be traffic developed which will justify it, but it is a long wait, and we do not know; we will proceed tentatively. We will develop up to the Matanuska field, then we will stop, and we will wait to see what happens."

The result is nothing happens except in the most casual fashion. As I said before, it is a vicious circle. You never get any place. You have got to get your transportation in advance of development, and the financial interests that have been concerned so far have no disposition to do it. I have talked with the representatives of the people interested in the Copper River Railroad. They talked very sensibly about it. They say, "We do not care to extend from Chitina over to Fairbanks, because it would not pay." Why have they built that railroad? They have built it because they were interested in the Bonanza copper field up at Kennicutt, and they figured there was enough copper ore up there to justify putting in the road that far. They came up to Chitina and came up the Chitina River to Kennicutt and built the road. It cost them, so they say, approximately \$20.000,000, You say, "Build it from here" [indicating]. They say, "That is an awful way off, and we do not see the justification for it at all. We do not care to do it." I have asked them, "Do you care to give a

we do not want to do that; we have had our dose in Alaska. Our present investment is not particularly encouraging, and we do not care for more."

What they would like to do would be to have the Government build a road from Chitina over to Fairbanks.

Senator Walsh. That is quite obvious.

Mr. Fisher. That is one reason why I have advocated the Government taking over this road from Seward, this 72 miles, and extending this other road. I have not much use for this feeder system, the Government building the feeders and the privately owned trunk line getting the advantage of them.

Senator Walsh. If you were endeavoring now to interest us as the directors of a private road to construct beyond the coal fields and into the Tanana Valley, what inducements would you hold out to us as the directors of a private road to construct?

Mr. Fisher. If you were a private road, all I could do to you would be to describe as eloquently as I was able the probable future development of the country.

Senator Walsh. That is what I want to know.

Mr. Fisher. I should like to do that. I think the railroad commission has done it as well as men could who wished to be careful about what they said, and have a solid foundation for every statement. They have said what they think can be done. They have said that if private capital builds that extension from Chitina over to there [Indicating], and pays what private capital would have to pay for its money, or would expect to get as a return on its investment, that there is not enough freight visible at the present time to pay the carrying charges, let alone a profit over and above what might be called a proper bond interest for private capital under conditions like that. But they say that if the Government would have to pay on its money and what private capital would expect to pay on its money and what private capital would expect to pay on its money and what private capital would expect to pay on its money and what private capital would expect to pay on its money and what private capital would

Now, let us see what the situation is. Here are the Guggenheim people, who have built their road from Cordova up to From there to Fairbanks the record in the Senate before the Territories Committee shows that it is a wild, barren, worthless, glacial country, and that nothing will grow there and that nothing does grow there. The glaciers have come down from the mountains from time immemorial, and there are huge cakes of ice there 200 feet below the surface, which have each season been buried deeper and deeper as the last glacial formations would come down upon them; so that it is a bleak country of no value. The Government, if it builds that extension, will do one of two things-either buy out the Guggenheim line and be in the attitude of buying out alleged crooks instead of prosecuting them, or building a Federal Government line up there, up through a barren waste, so that the Guggenheims will get the profits and the Federal Government will get the experience. I ask you which one of the horns of this dilemma do you choose? Here comes Secretary Fisher, who says that the Guggenheims refuse to build any farther up there; that they have had enough of Alaska. They told Senator Nelson in the Senate that they wanted to sell the lines. Here is Mr. Ballaine, who owns the Seward town site and was the promoter of the now "busted" railroad 70 miles long. He is here, too, and before the committee seeking to get the railroad taken over. Without becoming personal, there is a lady in my hotel who owns stock which she was induced to buy in a railroad to be built across

Bering Strait from Alaska into Russia, under the sea, beginning nowhere and ending nowhere. Is the Government, of which we are the chosen agents, to be duped, scuttled, and cheated? Are we to allow our Government to be the unsuspecting one?

This new theme of buying out alleged crooks, criminals, and monopolists rather than prosecuting them is a propaganda wonderfully and terribly made. I should prefer, had I my way, that we make use of our clear-headed administration, our welltrained and well-equipped Department of Justice, and see to it that every species of monopoly is crushed out of Alaska; that every monopolist is prosecuted and imprisoned, so that the humblest man in all America may be given an opportunity to lease a piece of coal land and carry on his industry under fair treatment and not admit that we have to buy out the Guggenheim and other defunct Alaskan railroads or to build railroads that will accommodate them in order to ward off the monopoly and oppression of which they stand charged.

These schemers and promoters from up there are going over the country selling wild blue sky stock to people, and they have come down into this House and into this Government with their moving picture shows, and pictures, and chambers of commerce, and they are about to blind the eyes of the clearest-headed men in the House. I will offer some remedies before I get through of how you can open Alaska, and do it without any noise or whoop hooray, and without any breaking of precedents, and without any going back on our party plat-

form or anything else.

Again I quote from Secretary Fisher in the hearings from the Senate. I quote now from a portion which comes after a colloquy between him and Senator Walsh. He says:

I want to say, Mr. Senator, that you would not be interested in it at all as private parties unless you were quite optimistic about the future development and willing to go through a lean period in order to obtain a sufficient return upon your capital. You would figure a loss if you figured the carrying charges upon your investment.

Gentlemen, after all, the Federal Government wants to do its full duty. I want to do my full duty and you want to do your full duty, but at the same time you are Representatives of the people and of the Government, and you should not launch your Government into something that your ex-Secretary of the Interior tells you is not feasible, and you should not put the Federal Government in the attitude of going through a lean period that no private person would be interested in. Appropriations have grown beyond all reason and defense, and some time, somewhere, somebody ought to take unto themselves the painful task of having the Federal Government use a little common sense and head off appropriations that can not be defended from any economic source whatever.

Mr. Chairman, one word about the coal fields. There are but two known coal fields in Alaska that anybody will assert have a merchantable value sufficient to bear shipping expenses to the States. They have a lot of lignite coal up in and around Fairbanks and in the interior of Alaska, but everyone knows that lignite coal will not bear shipping across Alaska, a distance of 400 or 500 miles and then a 1,500-mile water haul to Seattle. The two fields are the Matanuska and the Bering coal fields. Where are they? They are right on the coast, not right on the edge of the water, but one is 25 miles back from the water and the other is about 130 miles back. The construction of 25 miles of railroad will give us water transportation to the Bering field and a distance of 110 miles added on to the Ballaine defunct road, that is now "busted," and which is now on the market on amicable terms by the lamb speculators who want to let loose. I ask my own party, who are charged with responsibility here and who are on trial, what more would you want to do than to build those two extensions if you wanted to build anything? Why appropriate \$36,000,000 to build up through a country that has nothing to invite either private or public capital to construct? I again revert to some of ex-Secretary Fisher's statements. He is not of my party and he is not an official of this day, but I have been a member of the Committee on Indian Affairs and of the Committee on the Public Lands, and I grew quite well acquainted with him. He was before both of those committees many times. I say for him in his absence, and I would say to him anywhere, he is one of the clearest-headed men in this country. Here is what he says:

Alaskan coal is of great value, but its extent and character have been much exaggerated. There are great quantities of lignite and low-grade bituminous coal in several parts of the Territory, but there are only two fields of accessible high-grade coal known in Alaska.

Of course, Secretary Fisher then did not know that the Secretary of the Navy had tested this coal and finds that it is not feasible for naval purposes. I will present those letters in a few minutes. He continues:

Their location is shown on the accompanying map, page 1—which we do not have here. The better known of these two fields is the Bering River field, which is near Controller Bay, and in which the

Cunningham claims were located. It is the field about which the Alaskan controversy has been fiercest and most bitter. The Matanuska field is larger and may prove to be the more important. Both of these fields contain anthracite and high-grade bituminous coals. The question is how they shall be opened so as to promote development and protect the public interests. Before answering that question it is necessary to consider the general conditions that now exist and the real end that we wish to attain. Alaskan coal can be opened so as to enable a larger or smaller number of individuals or groups of individuals to make money out of its development, bringing with this development considerable incidental benefit to the community as a whole through the expenditure of money and the employment of men; or it can be opened on terms which will offer to the operator a sufficient profit to furnish an adequate incentive for his investment and his efforts, but which will result in placing the coal upon the market at the cheapest price consistent with this incentive, conferring upon the community the manifold advantages of cheap fuel and of the development of the many forms of industrial enterprise that cheap fuel renders possible.

That states the case more beautifully than I can state it,

That states the case more beautifully than I can state it, and, if I can have the time, I am going to state how this can be done without the construction by the Government of any road. Again, it will be observed that 500 tons of that coal has within the last month been examined, been burned, been used on the steamship cruiser *Maryland* in the test, and in addition to that a test has been made down here at Annapolis, where that coal has been washed and screened and given all possible advantages of the test. Let me read what the Secretary of the Navy says in a letter addressed to my colleague [Mr. DAVENPORT]:

NAVY DEPARTMENT, Washington, December 15, 1913.

Hon. James S. Davenport,

Committee on the Territories,

House of Representatives, United States.

My Dear Mr. Davenport: The report of the coal investigations in the Bering River fields have not yet been completed. At the present time the progress is as follows: The conditions in the Bering River field have been observed and a large sample of coal mined. It has been estimated that the field contains an adequate supply. The sample of run-of-mine coal contained a much larger percentage of ash than former investigations of the field indicated, and possibly on account of this large ash content and the clinkering of the coal the test by the U. S. Maryland proved that run-of-mine Bering River coal is unsuitable for naval use. A portion of the coal was screened and washed at the naval engineering experiment station, Annapolis, Md., and an evaporative test will be made on December 17 and 18 to show whether the washed and screened coal from the Bering River field is suitable for naval use.

The department regrets that your letter was not received in time to forward you this information at the hour requested by you.

Sincerely, yours,

JOSEPHUS DANIELS.

JOSEPHUS DANIELS.

Now, let me read what they say after they made a test at Annapolis:

NAVY DEPARTMENT, Washington, December 27, 1913.

Washington, December 27, 1913.

Hon. James S. Davenport, M. C.,

House of Representatives.

My Dear Mr. Davenport: The preliminary report of the tests of Bering River washed and screened coal at the engineering experiment station, Annapolis, Md., notes that under similar conditions Bering River coal produced only about 75 per cent of the power gotten with Pocahontas.

The department, therefore rates with

The department therefore notes with regret that the Bering River coal sample has thus far proved unsuitable for naval use.

Sincerely, yours,

FRANKLIN D. ROOSEVELT,
Acting Secretary of the Navy.

I ask with what bland complacency those gentlemen in favor of this bill can go along claiming this is the place to establish a naval base. I ask what becomes of the argument that was the sole moving cause that undoubtedly interested the President and the Secretary of the Interior. Though not endeavoring to quote them here or without any brief for them, the fact was it was a place from which they could ship naval coal, and I want to call attention to the fact that Josephus Daniels, Secretary of the Navy, in the report so recent that he can not be mistaken about it, says it is not naval coal, and he regrets very much that it is not suitable. But that is not all.

Mr. LENROOT. Now, the gentleman wants to be fair-Mr. FERRIS. I do.

Mr. LENROOT. That applies only to the Bering field coal. Mr. FERRIS. Oh, absolutely; but the Bering field has been considered better than the other.

Mr. LENROOT. Quite the contrary.

Mr. FERRIS. I do not want to enter into an argument with the gentleman; I can not do so in the time I have; but I have plenty of reports to show the two fields are on a parity, and many assert the Bering is the better.

Mr. BOOHER. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. BOOHER. From what field was the coal obtained that

was tested at Bremerton?

Mr. FERRIS. I am not acquainted with the Bremerton tests. Is that one of these?

Mr. BOOHER. That is from the Matanuska field, and held to

be the best naval coal in the country.

Mr. FERRIS. I am not familiar with that test; but I am referring to the test which was held at Annapolis, which says they used 500 tons, and it is not feasible coal. It was examined at Annapolis as recently as December 18-19, 1913, and this other letter relative to the Annapolis test is of date of December 27, and it shows it did not bear the test.

Mr. BOOHER. I thought the Matanuska coal was decided

by test to be the best coal.

Mr. FERRIS. I am not acquainted with any such report, and it must be of a more ancient origin than this.

Mr. MANN. Is the gentleman aware the Secretary of the Navy has recently reported that the Navy Department ought to

mr. FERRIS. I am, and I am going to read a letter here in relation to it. Might I not have more time? I am going to hurry through. Mr. Chairman, I ask unanimous consent that I may be permitted to conclude, which will only run a little over

my time.

Mr. MANN. How much time would the gentleman desire

over the hour?

Mr. FERRIS. I would like to have authority to finish within the two hours, if I can, and I will try to finish within Mr. FERRIS. an hour and a half.

Mr. MANN. I will again ask unanimous consent that the gentleman have an hour's extra time if he needs it.

gentleman have an hour's extra time if he needs it.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Oklahoma have an hour's additional time. Is there objection? [After a pause.]

The Chair hears none, and it is so ordered. [Applause.]

Mr. BATHRICK. I would like to say gentlemen appearing in connection with the hearings before the Naval Committee

stated that this coal could be used in time of peace and was

among the best used.

Mr. FERRIS. I will say in response to the gentleman I do not know what happened before the committee; you can get anything you want before a committee, but here we have a statement from the head of the department that the Secretary of the Navy says, in two letters dated in December, 1913, both of them, that the coal is poor, inferior, and not suitable for naval use. That settles it, as far as I am concerned. am not interested in what was said by some enthusiast before a commercial club or before a committee or anywhere else, but what the Secretary of the Navy says is what interests me and he has stated in writing his views. Now, if the gentleman will let me proceed, I will do so.

Again, as has been suggested by the gentleman from Illinois, and he merely anticipated what I was going to say, because I have the letter here, all future battleships are to be built to burn crude oil, and not coal. Not only that, but most all of the battleships now burn oil. To be sure that I make no mistake, let me present a letter on this oil-burner question of

the Secretary of the Navy, as follows:

NAVY DEPARTMENT, Washington, December 15, 1913.

Hon. Scott Ferris,

Washington, December 15, 1915.

House of Representatives, United States.

My Dear Mr. Ferris: The tests of Bering River coal will not be completed until December 18. In general, it may be said that an adequate quantity of Bering River coal exists in that field; that the sample mined contained a much larger ash content than analyses would indicate: that the U. S. S. Maryland's tests showed that run-of-mine Bering River coal is not suitable for naval use; and that the tests at the engineering experiment station at Annapolis are being conducted to ascertain whether washed and screened coal from this field is suitable for naval use.

The Navy has definitely abandoned the use of coal in future fighting-ship design, and all destroyers, submarines, and battleships are being designed for oil burning. There are now built and building 4 battleships, 41 destroyers, 30 submarines, 1 monitor, 3 tank ships, 1 submarine tender, and several tugs and small vessels, all of which are to use oil fuel. Eight battleships burn both coal and oil, and 1 transport and a supply ship will be fitted to burn either oil or coal.

Sincerely, yours,

JOSEPHUS DANIELS.

JOSEPHUS DANIELS

What has become of these bland gentlemen who say that nowhere can such a naval base be found as that contemplated in Alaska? Here we find the Secretary of the Navy telling us, first, that the coal is not good and feasible for naval use, and, second, we find the use of coal in fighting battleships has been totally abandoned. With what consistency can men come here and say that we must appropriate money lavishly, and, I fear, almost idiotically, for a purpose that is so wanting in feasibility and sense and so nonfeasible from every possible view-

Mr. SHERLEY. Will the gentleman yield?
Mr. FERRIS. I will.
Mr. SHERLEY. Is it the gentleman's contention that the
Navy will have no need for coal in the future?
Mr. FERRIS. Not that. They will use some coal, I assume.

There is no question about that.

Mr. SHERLEY. The reason for my question is that they are making provision for a very great supply of coal at Panama, and I was wondering, in view of what the gentleman says, why they are doing it.

Mr. FERRIS. To make sure that we be not mistaken about that, if the gentleman from Kentucky will give me his atten-

Mr. SHERLEY. Certainly. Mr. FERRIS. I have in my hand a letter of December 16, 1913, from the head of the Navy Department, which says the Navy has abandoned the use of coal in future battleship designs.

Mr. SHERLEY. I am not questioning the gentleman's statement. But I was struck immediately on hearing it how it appeared to be in conflict with the policy they are pursuing in connection with the use of coal in Panama.

Mr. FERRIS. I did not know that was true. men, if we do not have coal in Alaska that is suitable for the Navy Department, and we are not constructing any ships to use it, what under high heaven can be the reason for entering Alaska with a Government railroad?

Mr. MANN. The gentleman has not referred to the annual report of the Secretary of the Navy. He goes into the subject matter more thoroughly there than in the letter which the gen-

tleman has read.

Mr. FERRIS. That was made a year or two ago. Mr. MANN. I refer to the annual report of the Secretary of Mr. MANN. the Navy submitted about the 1st of December. He says that every civilized nation that knows anything is trying to abandon coal in the Navy, and that we have the best chance of any of

Mr. JOHNSON of Washington. I want to ask the gentleman if he does not admit that coal that is 75 per cent as good as the Pocahontas standard coal would not be available in the service of the Government on the Pacific Ocean, not only for some war ships, but for revenue cutters, colliers, cable ships, and so forth, and be plenty good enough?

Mr. FERRIS. I assume myself it would be certainly good for some purposes, but I do not know of any better authority to go to than our Secretary of the Navy, who has so recently had tested 500 tons of it—washed it and screened it, gave it every chance—at Annapolis, and has absolutely exploded that view

from every standpoint. Mr. LA FOLLETTE. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. LA FOLLETTE. Can you give us any idea of the depth

at which the coal tested was mined?

Mr. FERRIS. I can not. I have the letters before me. They seem to have gone to great pains about it. They have brought it here to our Naval School and have screened and washed it and given it the highest possible test.

Mr. BATHRICK. I will answer the question of the gentle-

man from Washington [Mr. LA FOLLETTE].

Mr. FERRIS. I will not yield for a side colloquy. make the speech myself. I say that, of course, with due courtesy to the gentleman. I know the gentleman does not want to try to take me off my feet.

Mr. GOULDEN. Will the gentleman yield for just this question? How many tons of coal were brought over to Annapolis and used in that test?

Mr. FERRIS. Five hundred tons, I think; although the let-

ter does not disclose the amount.

Mr. JOHNSON of Washington. If the gentleman will permit, the amount sent east for actual test was but 50 tons, and only

500 tons were used on the coast for actual trials.

Mr. FERRIS. I accept the gentleman's statement, because I think he knows. Now, if there is any reason on earth for building a railroad, we will have to show the reason for hauling something out of Alaska or something into Alaska. That is a bold, but nevertheless practical, statement.

As stated before, that is a bald, frank statement, but I am

going to deal presently with that very statement.

Mr. SAUNDERS. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Virginia? Mr. FERRIS. I do.

Mr. SAUNDERS. We have evidence of recent tests showing the inefficiency of this coal. I wish to ask the gentleman whether there are any tests that have shown its efficiency for

Mr. FERRIS. I do not know of any having been had; otherwise they would have been presented here with glaring headlines.

Mr. SHERLEY. How about coal for the use of the Army? How much coal does the Army use in comparison with the Navv'

Mr. FERRIS. I can not make accurate answer to that, but, as I understand, we do not need much coal for the Army posts in Alaska. We have enough coal in the States, at the rate of 400,000,000 tons consumed last year, to last us 7,000 years. The Geological Survey assures us of this by their full and complete reports

Mr. SHERLEY. Well, we have transports for the Army that

use coal.

Mr. FERRIS. I can not answer the gentleman, but I believe that such coal as might be needed for the Army posts in the far West could be transported from Wyoming, where the Geological Survey report for 1908 shows there is enough coal to supply the people of this Republic, at the rate of 400,000,000 tons' consumption a year, for 1,000 years, and that as yet the surface has been but scratched. This, of course, includes Army posts and all sorts of consumption. I take it that we could use that Wyoming coal much more cheaply than by bringing the Alaskan coal down. It is close by-from two to four thousand miles-with railroads and normal conditions present.

Mr. JOHNSON of Washington. That is lignite coal in Wyo-

ming, is it not?

Mr. FERRIS. I am not so sure about that. It is good coal. I have a report of the Geological Survey showing that they have enough coal in that State, with only a mere handful of people, comparatively, to last the people of this country 1,000 years, at the rate of 400,000.000 tons a year.

Mr. HELGESEN. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yeld?

Mr. FERRIS. Yes.

Mr. HELGESEN. Does the gentleman claim that the test he refers to is a fair test of the value of all the coal in Alaska?

Mr. FERRIS. In answer to the gentleman's question, I will say this, that we have from ex-Secretary Fisher and from all of my associates in opposition to this bill, and from all the hearings and reports that can be got, the general testimony to the effect that there are only two known coal fields in Alaska, the Bering field and the Matanuska, that would justify the expense of shipping coal from Alaska and then incurring the expense of a haul of 2,000 miles for its transportation by water. The books and reports are full of data showing that the Matanuska coal field is on individual property, and that the Bering coal field. according to the reports, is superior to the Matanuska, but the coal other than these two fields is all in the interior of Alaska, and nobody claims that that lignite coal is of any other than local value.

Mr. HELGESEN. Are there not reports on file showing that

there are great quantities of it?

Mr. FERRIS. Secretary Fisher says there are enormous quantities of low-grade lignite around the Tanana and in that interior section of the country, but he states that it is of value only for local purposes.

Now I must proceed. We have, about 50 miles south of Fairbanks, and within 20 or 30 miles from the proposed road from Cordova or along the proposed route from Seward, the Nenana

coal field. I do not know just how that is pronounced.

Mr. WICKERSHAM. Ne-na-na.
Mr. FERRIS. Yes. The Nenana coal field is a coal field where there is an enormous amount of lignite coal. But that is in the interior, where they are holding out the olive branch to us and telling us that we must open it up. Now, everybody knows what lignite coal is. Everybody knows that lignite coal is only good coal for local purposes, and that it is not of sufficient value to warrant its transportation for a long distance. I will read from the hearings an extract of testimony by Dr. Alfred H. Brooks, of the Geological Survey, who was a member of the railway commission, and here, no doubt, is a reference to one of those chamber of commerce pictures. The colloquy between The colloquy between Mr. Wickersham and Dr. Brooks is as follows:

Mr. Wickersham and Dr. Brooks is as follows:

Mr. Wickersham. Have you seen this picture over here [indicating]?

Mr. Brooks. I did not take that photograph. I am a little skeptical about the picture of a coal bed.

Mr. Wickersham. How thick is that bed?

Mr. Brooks. I have measured coal about 20 feet in thickness in this field. That is about the workable limit of commercial mining, so I prefer to think there is no coal quite so thick as indicated by the picture, because I do not think it would be worth much. But whatever may be said about the thickness of any individual bed, there is an enormous amount of coal in the field. Our party made an estimate on the basis of the actual coal in sight—and our surveys were not detailed—of some 9,000,000,000 tons, which is more lignite coal than we estimated in all Alaska at the time we made the reports of the conservation commission. There is an abundant supply of coal there. So far as we know it is all lignite, a fair grade of lignite, and can be used to advantage in local industries.

I hope the House will get that point, because, gentlemen, we have got to produce something in the interior of Alaska; otherwise they do not need a railroad. Reading from the report:

So far as we know, it is all lignite, a fair grade of lignite, and it can be used to advantage in local industries.

Is not that what I told you a moment ago? Dr. Brooks is the best geologist and the highest authority, and both the proponents and opponents of this bill will so insist. What he says ought to have weight here. It is not guesses and horseback opinions, but words from some one who knows-words from a man who is not biased and has no schemes to promote.

Continuing, he says:

It should be used, because they need fuel at Fairbanks very badly, and will need it much worse before many years have passed, because the timber supply has been rapidly used up by the local needs of the community.

So we have Dr. Brooks explaining to us that the only coal they have in the interior of Alaska is lignite. The other two fields are down where they have water transportation. What earthly reason do they have for this proposed Government Do you suppose a ton of lignite coal could ever stand the freight charges out to the coast and then stand 1,500 or 3,000 miles of water shipment? Certainly not. This is not any speculative theory, but this is the theory of Dr. Brooks, of the Geological Survey, who has long been a resident of Alaska, and who was of such high standing that President Taft appointed him on this railroad commission. Both friends and foes of this legislation must recognize him.

I take it it may not be amiss to let the people know, first, how much coal is used annually in the whole United States. I have the figures here, 405,000,000 tons in round numbers. Fifteen million tons come from Alabama, 2,000,000 tons from Arkansas, while California and Alaska, both put together, only produce 11,000 tons. I do not say there is not coal in Alaska, but Alaska is so inaccessible, so far away, that it can not stand the ship-ment charges and never will be able to stand them. With coal enough in the States already located by the Geological Survey to

last 7,000 years, we will never need it.

I will read a table from the Geological Survey giving some statistics on coal production, by States, which might be interesting:

Coal production of the United States, 1911, by States. [Value per ton and price per ton per employee.]

States.	Tons.	Average per ton,	Tons per employees.
Alabama	15, 021, 332	\$1, 27	662
Arkansas	2, 106, 789	1.61	372
California and Alaska	11,647	2.00	012
Colorado	10, 157, 383	1.45	710
Georgia and North Carolina	165,330	1.49	1.10
Idaho and Nevada	1,821	2.68	***********
Illinois.	53, 679, 118	1.11	701
Indiana	14, 201, 355	1.08	670
lowa	7,331,648	1.73	442
Kansas	6, 254, 228	1.54	538
Kentucky	13, 706, 839	.99	628
Maryland	4, 685, 795	1.11	779
Miehigan.	1,476,074	1.89	
Missouri	3,760,607	1.71	444
Montana	2,976,358	1.79	376
New Mexico.	3,148,158	1. 54	770
North Dakota			788
	502, 628	1.43	
	30,759,986	1.03	688
Oklahoma	3,074,242	2.05	350
Oregon	46,661	2.32

Pexas	1,974,593	1.66	
Utah	2, 513, 175	1.69	821
Virginia	6, 864, 667	.91	929
Washington	3,572,815	2.29	550
West Virginia	59, 831, 580	.90	896
Wyoming	6,744,864	1.56	851
Total	405, 757, 101		

Now, the possible tonnage: We had the statement in glaring figures here about the products that come from Alaska. What are the facts? More than half the products that come from Alaska are furs and fish that do not need any railroad; that tonnage comes out of the water up there, and nature has supplied water transportation. Let me give you the exact figures. The total receipts of Alaska from 1868 to 1911 in mineral products, including coal, gypsum, marble, and tin, amounted to \$206,000,000, while the receipts for sea food and furs amount to \$222,000,000, making a total of \$428,000,000.

Is there anybody here who thinks we need a railroad into the interior of Alaska, through that cold, bleak, barren country, frozen 200 feet below the surface, in order to haul the furs and fish brought out of Alaskan waters down to Seattle? Ships into it?

will carry them without any railroad. No one would use a railroad for that purpose if they had one. The rest of the products are mostly precious metals with large intrinsic value but devoid of tonnage. Railroads must have tonnage if they succeed.

Mr. HARDY. Do those figures include the fish output? Those figures include the fisheries and furs. Mr. FERRIS.

Now, the real truth about it is that the mineral products of Alaska are beginning to fail, and I will present figures here to show it. There is a marked decrease in the Alaska production The Geological Survey puts out an advance statement, which has later been embodied in their annual report. which shows the following facts. These are not speculative statements; these are not the statements of chambers of commerce; but these are the official statements of your own Geological Survey. This is not charged with town-site schemes or with railroad schemes, but comes from your own Geological Survey:

The total mineral output in Alaska in 1912 was \$22,000,000. The total output in 1913 was \$18,000,000, a dropping off of \$4,000,000 in a single year. The total gold output in Alaska for 1912 was \$17,000,000, and for 1913, \$15,000,000, dropping down \$2,000,000. Copper and other minerals dropped down in proportion.

Now, I want to devote a little time to agriculture and its possibilities in Alaska.

Mr. HARDY. Before the gentleman leaves that subject, is it not likely that if freight rates and conditions of access continue to be as hopeless in that section as they are to-day, finally the

mining industry will have to be abandoned?

Mr. FERRIS. I do not think so. I will offer the gentleman remedy a little later that I think the gentleman will accept. Mr. HARDY. It would seem to be natural that people cease to endeavor to develop that country if the difficulties of getting to it should continue as they are now.

Mr. FERRIS. I have no criticism at all of that question. It is a very proper question, and I will try to answer it.

Alaska has been very much abused by the handling of its public domain, its land laws, and coal laws, and I have a plan that I think the conservation people of this House will accept, and I believe the anticonservationists will accept, and I believe Alaska may have the door swung wide open for such resources as she has and give her population a chance to grow. I will present that plan a little later. The man who comes into this House or who goes elsewhere and tears down, but has nothing to put in its place, is a mere destroyer; but the man who comes here and has something to advocate, is at least trying to do his duty and

is entitled to your consideration. [Applause.]
Mr. LENROOT. Will the gentleman yield?
Mr. FERRIS. Certainly.
Mr. LENROOT. I want to ask the gentleman if he thinks this plan will result in the building of railroads for private enterprise?

Mr. FERRIS. I think it would; and I will produce for the gentleman's edification the words of ex-Secretary Fisher, and I know that he is an ardent admirer of the ex-Secretary, as I am myself. The ex-Secretary says that it will, and I have no doubt of it.

Mr. LENROOT. The reason that I asked the gentleman the question is that up to this point the gentleman is making the point that there is nothing in Alaska to build railroads for, so I was curious to know what his opinion would be.

Mr. FERRIS. We will let the House pass on that after I get through. Now, it has been presented to this House by the chamber of commerce pictures and chamber of commerce resolutions and these booster sheets that have crept into the House from one source and another-I do not know where-that the interior of Alaska was a garden and as fertile as the Nile; that it would grow wheat, corn, and potatoes and everything on earth that you want to grow; and that the things would grow like a weed in a fertile soil.

Mr. HARDY. Will the gentleman yield?

Mr. FERRIS. For a question.

Mr. HARDY. Does the gentleman recall the effort by the Northern Alaska Railroad Co. to get an extension of its franchise and how vigorously the ex-Secretary wanted the committee to guard against any kind of a privilege that might be deemed of value in case the Government should want to take over the railroad?

Mr. FERRIS. So far as I know that is true; but I do not

know the situation the gentleman refers to.

Mr. HARDY. Did it not appear that the road seemed to be so hampered by present restrictions that capital was loth to go

Mr. FERRIS. That is true, and the gentleman is anticipating my remedy; a remedy which the gentlemen may accept or not as they see fit.

Now, as to agriculture. In the first place, I want to say that since 1897 Congress has appropriated for the installation of five agricultural bureaus in Alaska-one situated at Sitka, one at Fairbanks, one at Copper Center, one at Kodiak, and

one at another place.

If I show you what these agricultural agents who have been there in charge since 1897 say about the agricultural outlook of that country, would not that be as good evidence as the moving-picture show that the chamber of commerce is presenting to us around the Capitol and about Washington? Would not the House be more apt to listen to men that they themselves employed and sent there to compile the facts than they would in looking at the moving pictures? Why, in my town to-day William F. Cody, "Buffalo Bill," is killing and scalping Indians and hanging them up by the toes, and they are burning down haystacks and covered prairie wagons, to show what beautiful moving pictures they can produce. They make good pictures, but, of course, are not based on facts at all. I think most of us know what the Seattle-Alaska Co. is doing here. Why, they are having moving pictures over in the Senate Office Building; they are running them in my hotel. In a little while we will have these people that are down in Oklahoma producing moving pictures showing Cody down there scalping and burning Indians, but nobody believes that it is so. It is beautiful to entertain the children, but I am going to give you some facts. Facts, not moving pictures, are what should guide this House when they

are spending the people's money.

Much has been said by the town-site promoters and realestate men and the proponents of this measure about the agricultural possibilities of the interior of Alaska. After the experience I have had in new Territories I am neither amazed nor deence I have had in new Territories I am heither amazed nor de-ceived by them. I have lived in a new town, I have lived in a new Territory, I have lived in a new State where every man was an enthusiast and every man was willing to buy, boom, and promote to-day that which on the coming morrow he would sell to his unsuspecting brother, and so on, ad infinitum, until

the general collapse came. [Laughter.] However, this is a novel scheme to have the Federal Government carry on the boom, or more unusual still is the fact that it is the first time I ever found it to be true that the Federal Government itself is to be the unsuspecting one. This is the first time I ever heard of the Government being asked to hold the sack. Fortunately for this Congress and for the Federal Treasury we have valuable testimony from Prof. Charles V. Piper, of the Department of Agriculture, in the District of Columbia, a member of the Alaska Railway Commission, sent there by President Taft, in the Senate hearings, pages 548, 550, 552, and 556, showing what Alaska is from an agricultural view-

Listen to this man. Here is a member of the railroad com-mission, here is one of the men who had charge of the Alaskan

agricultural stations:

mission, here is one of the men who had charge of the Alaskan agricultural stations:

Prof. Pyper. The development of the Copper River region anticipated at the time that the station was there established did not materialize. When it comes to predicting the future agriculture of Alaska from these experimental results, backed up by the results of many farmers scattered over Alaska, one is confronted with a difficult problem. Before I touch on that I may state that most of the work done at these experiment stations have been done on small plats. The yield of oats has varied from 50 up to 125 bushels per acre, and of barley from 50 to 60 bushels. Yields of 50 to 60 bushels of barley were, I understand, scarred last season at Fairbanks in pretty large sized fields. No wheat, so far as I know, has yet been grown in fields of any area, or at least where considerable fields have been small.

There can be no question from these results that there is a possibility of the production of grains in the agricultural lands of Alaska. Just here I may say that the amount of tillable land in the interior of Alaska has been estimated by most of the men who have attempted to make an estimate at about 30,000 square miles. The total area of agricultural lands in Alaska has been estimated at 100,000 square miles, of which it is assumed that at least one-third is tillable, and that of that tillable land probably more than two-thirds is in the interior. So there is a very large area of land which if capable of raising profitable crops of grain would furnish a large amount of freight. As I said a moment ago I do not think there is any question as to the possibility of growing these grains, especially the oats, barley, and rye. In fact, I think there can be no doubt that sufficient of them will be grown for all local needs. As to whether quantities will be raised that could be exported, I am very far from being sanguine. There is, as I understand, in the interior of Alaska no large area of land on which a farmer can go and plow up as he

Mr. Joslin. Yes; up in that heavy timber.

Prof. Piper. That was also about the cost at Kenai on lands covered with light timber.

Mr. Ballaine. That is heavy timber—very heavy timber at Kenai.

Prof. Piper. I would not call it very heavy.

Mr. MacKenzie. I have had a little experience in clearing land up in the interior of Alaska, and if you can get a burn on the ground and kill those trees, the roots will lie on top of the frost, and in two or three years you can go along there and almost kick them out. It is very easy. Of course if you do it in one season it is a very expensive system.

system.

Prof. Piper. At any rate, whether you put it at \$100 an acre or \$50 an acre, you can still get good farm lands in the United States at \$50 an acre. However, I would not give too much weight to that, because the pioneer is attracted to public land that he can homestead even if it cost \$200 an acre to clear. The \$200 an acre for clearing it is based, I suppose, on wages to the ordinary laboring man of \$5 and \$6 a day, and if a farmer clears the land himself he saves that \$5 or \$6 a day. So that it is really the high cost of labor that makes the apparent high cost of clearing that land.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. I am quoting from testimony, but I will yield

to the gentleman.

Mr. HUMPHREY of Washington. I have read the testimony which the gentleman has just quoted, that it cost \$200 an acre to clear this land, but it is my understanding that that clearing was done by the Government by hiring labor that worked eight

hours a day and paying \$7.50 a day for it.

Mr. FERRIS. Then that is one somber example of what the Government would do if we sent the Government up there to build railroads. What a hideous example that would be! If it cost \$200 an acre for the Government to clear land in Alaska, land that is covered with moss a foot thick, what would it cost to build a railroad? We have more than 300,000,000 acres of public land in the United States merely waiting for the homesteader to go upon it with his family and to turn over the soil, build a house, dig a well, set out an orchard, and farm. You can buy land in Illinois within 40 miles of Chicago for \$150 an acre. Why go to Alaska, where the ground freezes 200 feet deep, where the thermometer goes down to 80° below zero, where they have eight months' darkness, and take up land that costs \$200 an acre to clear?

Mr. HUMPHREY of Washington. Mr. Chairman, will the

gentleman yield?

Yes. Mr. HUMPHREY of Washington. I want to ask the gentle-

man if he has also read the evidence from my distinguished friend, Mr. Boyce, who wrote the article that has been circulated? After admitting everything, he says that they made a

profit of \$600 an acre on their potatoes.

Mr. FERRIS. He may have, but I will show you a little later where they grow a few potatoes on that muck soil by aid of fertilizers, where it freezes 200 feet deep, and that those potatoes were so watery that they are a drug on the market at 4 cents a pound in Fairbanks, while potatoes from Seattle and the States were selling at \$1 a pound. I do not wonder that the Seattle Chamber of Commerce is here with their moving pictures, wanting transportation facilities, so that they may be able to sell their potatoes at \$1 a pound to the poor benighted Alaskans.

Mr. HUMPHREY of Washington. Has the gentleman seen

the pictures

Mr. FERRIS. No; I have not been taken in as yet, though

I may be run down with them.

Mr. Chairman, fearful that Prof. Piper may have made a mistake, that he may have placed a charge too high, I want to give you more recent authority as to what it costs to clear land in Alaska, this wonderful Alaska. Did any of you know of Seth Mann? I do not know whether he is kin to the gentleman from Illinois or not. In any event, he was appointed by President Taft to go up there with the Seattle Chamber of Commerce to look over Alaska and to report to him personally what the situation was, and anything he would say against it, after being in the hands of the Seattle Chamber of Commerce as long as he was, you would take for granted, would you not? Listen to what he says. On page 12 of his report this is what he says about clearing the land:

The trees are small and valueless, except for fuel. They are easily prooted, and when the clearing is completed the covering of moss

uprooted, a and tundra-

I do not know what that is, but it must be something awfulabout a foot in thickness must be removed and the soil exposed to the summer sun. The initial expense in preparing the ground is in many places considerable, reaching as high as \$125 per acre.

Prof. Piper says it would take from \$50 to \$200 an acre, and

Mr. Mann says that it would take \$125 an acre. Mr. Mann has just got back from there, and he rushed that report to every desk, a beautifully blue bound report. He says that it would cost \$125 an acre to clear it, so some of these fellows must be

telling the truth, and this man Mann all of the time under the influence of the Seattle Chamber of Commerce. If he says \$125 an acre, we might double it and then be safe. Here is what Prof. Piper says again:

So far as railways into the interior are concerned, any great amount of agricultural freight in the future would have, in the main, to come from and on account of possible grain production; that is, the production of other things like dairy products, or even meats, would not yield any very great amount of freight.

The most interesting experiment stations, so far as this problem is concerned in Alaska, are those at Rampart, which has been conducted since about 1900; Fairbanks, where the experiment station has been in existence since 1907, I believe; and Copper Center, on the Copper River, where an experiment station was conducted from 1902 to 1906.

It will be observed that conditions were so unfavorable at this point that the Agricultural Department was compelled to abandon it after six years of futile effort.

They sometimes cut wheat green before it has time to head up, because it will not ripen. I will show you where on July 1, on August 8, on August 25, on September 5, there was a killing

Mr. HUMPHREY of Washington. At what place? Mr. FERRIS. At one of the agricultural stations.

Again, here is what Prof. Piper says. He is still working for the Agricultural Department and these are his annual reports, which you gentlemen can get from the Agricultural

In general, my impression of the whole interior country is that there will be successful homesteads wherever there is a local market for the produce. I am somewhat skeptical about there being in the near future any surplus produce, either of potatoes or potato products, or of cereals, which will be exported.

Now I will give a little more.

Now I will give a little more.

Prof. Piper. I may state briefly, in conclusion, that my own viewpoint, and I think that is the viewpoint Prof. Chubbuck has taken—and I am sure it is the one Prof. Georgeson takes in all his reports—is conservative as to the future agricultural development of the interior of Alaska. I have no doubt that with the building of the railways there will be plenty of literature of the boom type published, but I think it would be something of a calamity to induce any large number of homesteaders to go there to-morrow with the idea that it could be developed rapidly, like much of our prairie country was in the West. In the development of a new agricultural region usually the first development is live stock and the second is grain raising—usually wheat raising. Now, in the development of the live-stock industry in Alaska somewhat different methods will have to be used to those which farmers have been familiar with in the States, and, in a way, they will have to feel their way along toward the most profitable methods.

In the matter of extensive grain culture, while that may be possible, I feel that the farmer himself will have many problems to solve before the ordinary man can be advised to go into grain farming. That is, in other words, I would fear that the greatest danger to the proper development of the interior of Alaska would be of holding out too roseate hopes of what can be done in the way of its agricultural development.

Observe the spectacle of asking one aspiring to own a home. leaving the more than 300,000,000 acres of Government land behind in a mild climate among good schools, good roads, near-by markets, where land can be had by merely residing upon it, to go to Alaska, where it costs from \$50 to \$200 per acre to clear it, where they have frost every month in the year, the thermometer 80° below zero, and the ground frozen 200 feet below the surface.

Now let me go a little further, and I desire to speak of weather conditions in Alaska, and I want to talk a little about that. These are the annual reports of the department I am quoting from they make in Alaska, the same as here, and they can be had by anyone applying, and they say the weather conditions in Alaska are both varied and uncertain, and the success or failure in agriculture is necessarily dependent upon them. The annual reports from the agricultural stations in Alaska usually commence with the condition of the weather, as shown by the excerpts from the agricultural experiment station reports for the years 1905, 1910, 1911, and 1912.

I shall first present for your consideration an excerpt from the annual report for the year 1912, at page 99:

annual report for the year 1912, at page 99:

The plans outlined in former reports have been followed during the past year. In experimental work it is disastrous to change plans. They should be so well considered beforehand that no change will be necessary. The fundamental lines should be broad and well defined. Additions may be made to them, but to substitute others is detrimental to the results. The fundamental basis for work in Alaska is to obtain answers to the question, "What will the country produce?" It follows as a corollary to ascertain how to produce it. The dominating motive in the experiments of the stations is to answer these questions truthfully. The soil, climate, and crops must be studied and animals bred, and subsequent work must be governed by the results obtained. Experiments have already proven that grain of certain sorts can be successfully grown in Alaska, that hardy vegetables of all sorts can be produced, that live stock can be kept here, and that therefore it is possible for the farmer to make his home here. The agricultural problems of the country are new. Nowhere else in the United States are similar climatic conditions encountered, and all methods must be adjusted to meet these conditions. Every step in advance is new and untried, and no one can predict with certainty what the results will be until the fact has been established by experiments. All agricultural work in Alaska is in a peculiar sense experimental, and since there is

great variation in the climate and soil throughout this great Territory, it became necessary to start experiments in several regions.

Work AT SITKA STATION.

Sitka is the smallest of the four stations, measured by the area under culture. It is the headquarters station chiefly by virtue of its location. It is more accessible and in more direct communication with the Department of Agriculture than any of the others. Its work is representative of the possibilities in agricultural lines in the coast region of Alaska, and more particularly of southeastern Alaska. Whatever can be done at Sitka can also be done in most places throughout the coast region, and whatever can not be done at Sitka can not be done with any degree of success anywhere else in this region. The nature of the country and the climate together determine the nature of this work. The region is mountainous and heavily timbered. There is but little land available for culture, and as a rule it must first be cleared of timber. Farming on an extensive scale is therefore out of the question. The climate limits the work as to the crops that can be successfully grown. Grain growing is a failure not because the season is not long enough between frosts, but because the heavy rains which prevail during the fall make it almost impossible to save grain crops after they mature. Vegetables and small fruits, on the other hand, are at home in this region, and the work of the Sitka station is therefore naturally confined to these crops. Small areas given intensive culture will always be the rule in the coast region of Alaska; there is little chance for the use of machinery.

You will observe that in this instance at Sitka, which is in WORK AT SITKA STATION.

You will observe that in this instance at Sitka, which is in southeastern Alaska, they say farming on an extensive scale is clear out of the question. At Sitka the rains drown them out and up at the northern stations the frosts freeze them out. Vegetables do fairly well at Sitka.

At page 7 of the report of agricultural investigations in Alaska they report as follows:

WEATHER CONDITIONS.

Weather conditions.

In Alaska the weather is the controlling factor which determines the degree of success attainable in agriculture. During the season of 1905 the weather was favorable to agricultural operations in the coast region. The months of July and August were bright and warm, and the gardens throughout that region were quite successful. In the interior, on the other hand, conditions were somewhat less favorable. The spring was late, raw, and overcast. Seeding was therefore late and early growth was slow. In July and early August the weather was favorable, but during the middle and latter part of August the weather was rainy and overcast, which retarded the ripening of the crops. Conditions were not uniform throughout the interior. In the Yukon and Tanana Valleys the settlers complained of too much rain and not enough sunshine. In the Copper River Valley there was not enough rain, and killing frosts began in the latter region as early as August 14. Light frosts occurred in the Yukon Valley on several days the latter part of August, but no killing frosts destructive to hardy plants occurred until September. Hence the grain crops matured at the Rampart station, allowing they were late, while only a small percentage matured in the Copper River Valley, because of an early killing frost.

You will observe from this report that frosts appear on

You will observe from this report that frosts appear on August 14, long before the crops have time to mature; and, again, almost a total failure is recorded at the Rampart station, which has heretofore been referred to as the banner station of the Territory. It will also be observed that in the Copper River Valley and the Yukon Valley similar frosts occurred all through the season, which made agriculture impossible and extremely hazardous on anything like an extensive

We are again fortunate to have before us the report of Mr. C. C. Georgeson, special agent in charge of the Alaskan work, and he, in his annual report for the year 1910, again commences his report with the conditions of the weather, as follows:

It seems trite to begin an annual report with remarks on the weather, and yet the weather is the most important factor in our operations. In these northern latitudes all vegetation is dominated by the weather. Low temperatures are not the only factors which make for success or failure. The percentage of cloudiness is almost of equal importance. Whenever the growing season is overcast, even if it is not exceptionally cold, vegetation languishes. The soil does not dry out and remains cold, and these conditions are further augmented for the worse when the rainfall is heavy. An exceptionally favorable season is one with a large percentage of sunshine, for sunny weather means warm weather.

I stated in an interrogatory a few days ago there were killing frosts in that country every month in the year, and I state it again, and I desire to present my authority for it, which is as follows:

There were killing frosts at Fairbanks station the past summer-

And that is the home of my genial friend the Delegate, whom we all like, and who everyone knows presented the chamber of commerce reports from the various sections of the Territory better than any other human being could do, and I am glad of the opportunity to pay this compliment to him. It says:

There were killing frosts at the Fairbanks station the past summer on July 31 and August 5, 9, 20, 29, and September 5. It is the first time that this station has had frost in July and as early as August 5 or 9. The summer in the Tanana Valley was cool and cloudy, and in the first part of the season the rainfall was light. These conditions were, of course, very unfavorable. It is to be noted, however, that the frosts which occurred prior to that of September 5 did not injure the grain, but they did injure the potatoes on low ground.

You will observe from the excerpt of the report of 1910, at page 36, there were killing frosts at the Fairbanks station during the preceding summer, on July 31; again on August 5, 9, 20, 29, and September 5. It will be observed that these killed

the potato crops and shows conclusively at what great hazard agriculture can be carried on, even at the objective point for which all these Government-owned railroads are headed.

Again, you will observe that this is the valley that is being held out to us as the valley that is to afford sufficient tonnage to warrant the construction of a railroad and to make Alaska famous as an agricultural country. With killing frosts occurring once in July, four times in August, and once on September I can not think any sane homesteader would leave behind him 300,000,000 of acres of Government land awaiting the plow and be attracted to any great extent for agricultural purposes to Alaska.

Again, the report of 1911 starts off with the remark as to the condition of the weather, and on page 9 Prof. Georgeson blandly remarks as follows:

Weather conditions must always receive the first consideration in all Alaska agricultural work. Plenty of sunshine during the growing season and a well-distributed rainfall means success, whereas much cloudiness and heavy precipitation means more or less complete failure. The past season was favorable in some respects and in others not. The spring was unusually late and cold. This was true both of the coast region and the interior. It was not until the last of May that the soil was warm enough and dry enough to sow and plant, and not until the beginning of July did the various garden and field crops begin to grow with vigor.

Here it will be observed that it is not until the last of May that the soil is warm enough and dry enough to sow and plant, and not until the beginning of July did the various garden and field crops begin to grow with vigor. As we observed in the preceding paragraph, if you could not plant until the last of May, and if the plants would not come up until July, and the frosts began on July 31 and lasted without interruption all through August and early September, I ask the proponents of this bill who they can seduce from among homesteaders to go and take up land under such conditions in Alaska?

Now, my friends, when the crops will not come up until the end of July by reason of the cold, clammy, mucky soil, and you have chilling frosts in August, have frost from July to September, I ask you with what propriety can any homesteader, seeking a home, be induced to abandon 300,000,000 acres in this country, where we have good schools, good roads, railways, and every other convenience, and go there-I ask with what propriety this Government can be asked to build a Federal Government-owned railroad, bringing on such an enormous bond issue, in the beginning, in such a favorable administration as we have to carry out any such propaganda as that?

Mr. BRYAN. Will the gentleman yield? Mr. FERRIS. For a question only.

Mr. BRYAN. If I understand correctly the gentleman is going to submit a plan whereby private capital will go and do

Mr. FERRIS. I will submit my plan if the gentleman will content himself in peace. I shall not allow him to pervert anything I am going to say. I will present the plan that I have referred to presently, which will bring improvements into Alaska, with her resources, as fast as she is entitled to, and what I think should be done whether the railroad is built or not.

Mr. BRYAN. And that will include the building of the rail-

Mr. FERRIS. I did not yield to the gentleman for a statement to be injected into my remarks. I do not intend to be discourteous, but I did not yield to him to make the speech. The gentleman does not appear satisfied with what my position is, but I will state that myself, and, so far as I may be wanting in that, of course, the House will accept or reject

Now, I come to weather conditions, on page 46 of the 1911 report, and let us see what they say. It is in this country where we are going to abound in homes where they have increased 733 souls in 10 years, and, I understand, took the census in the middle of the summer so as to take in the people up there who came to look at the glaciers, in order to increase the number. I am going to read the agricultural report for 1911, by Prof. Georgeson, at page 46.

Mr. WICKERSHAM. Will the gentleman yield?

Mr. FERRIS

Mr. FERRIS. With pleasure. Mr. WICKERSHAM. The gentleman stated that they took the last census in midsummer so that they could get the benefit of the additional population?

Mr. FERRIS. I was drawing, of course, somewhat on my angination. When was it taken?

imagination.

Mr. WICKERSHAM. It was just the opposite.

Mr. FERRIS. Well, let us give him 333 more souls and let it go at that. Even then the increase would be such a sad commentary that I know the gentleman would dodge when it

was even referred to. I say that in good 1 mor, of course. Now, as to weather conditions. Did you ever hear a report concerning the weather being always started with, "How do

you do? How is the weather?" My friends, we greet each other on the street in that way, but what do you think of five annual reports from Alaska each one of which is opened with How do you do? How is the weather?

Let us give them a little favorable report for a while. We have been quite heavy on Alaska. In the 1911 annual report from the Alaskan representative of the Agricultural Department, at page 46, they say:

WEATHER CONDITIONS.

In comparing one season with another it is found that the weather behaves very peculiarly. Last season (1910) was quite favorable to growing crops during the early season, changing to the other extreme about midsummer, and it continued cold, with frequent showers and killing frosts through the remainder of the season, while this season was almost the opposite.

This season opened a little later than usual and continued cold and wet with little sunshine until June 1, when the weather suddenly turned warm and dry with an unusual amount of sunshine.

I thought we were going to be spared the reports of this country being afflicted with drought, but they seem to be afflicted with that.

Continuing, the report says:

These conditions prevailed until well into August, with the exception of two or three light frosts in the lowlands late in July and early in August. Cold, rainy weather set in late in August, which made it very difficult to finish curing and storing the hay crop. Several light frosts occurred in the lowlands during the last week in August, and on August 31 potatoes and other tender plants were killed all over the valley. The temperature fell to 28° F. at the station and as low as 20° F. at Fairbanks and on the lowlands.

Here it will be observed that Prof. Georgeson stated that they had frosts in the lowlands late in July and the early part of August. He says, as you have observed, that several light frosts occurred in the lowlands during the last week in August, and on August 31 potatoes and other tender plants were killed all over the valley; that the temperature fell to 28° F. at the station and as low as 20° F. at Fairbanks and on the lowlands.

How flattering it must be to this country which is going to furnish tonnage enough to cause us to go into the Federal Treasury in order to build a railroad! Only 163 homesteads in the entire country have been patented. Only two coal claims patented. Only one cemetery site to care for the perishing.

Again, at page 10 of the report for 1911, Prof. Georgeson advises us that in the interior there was a killing frost on August 31, enough to injure grain that had not matured by that date, in the following language:

In the interior there was a killing frost on August 31, enough to injure grain that had not matured by that date.

How much time have I left, Mr. Chairman?

The CHAIRMAN (Mr. THOMPSON of Oklahoma). The present occupant of the chair was informed by the former Chairman when he took the chair that the gentleman had an hour.

Mr. FERRIS. Now, again, at page 10, we have another annual report. This is coming right on down, now. This is on page 10 of the report of 1912 by Prof. Georgeson. It says that agriculture is at all times at the mercy of the weather. It is again, you see: "How do you do, Mr. Weatherman? How is the weather?" Every annual report begins with that. I will quote from the report:

Agriculture is at all times at the mercy of the weather. This statement is trite, but it is so true that those who are not familiar with the conditions in Alaska fail to appreciate its force unless it is brought home to them with emphasis and frequent repetition. Rain and sunshine are the two factors which determine success. When sunshine is abundant during the growing season the farmers' efforts prosper; when rain and cloudy weather unduly dominate their efforts languish or fall completely. These elements are beyond control, and it is necessary to learn how to meet them. This adaptation constitutes no small part of the experimental work of the Alaska stations.

If the reports I have just read were not from the very highest authority and did not cover a series of years, they might not be of value to this House; but I confess and submit to you what higher authority could there be than a representative of the Agricultural Department there on the ground at Government expense to the department, whose sole purpose was to ascertain real conditions independent of real-estate men, independent of boomers, independent of promoters and those who would proclaim for their country more than calm and dispassionate eyes could behold? I can not fathom with what propriety homeseekers could be induced to launch out on agriculture under such conditions without any hope whatever of reward; I can not think but few, if any at all, will go there. The fact of the business is the country amidst all its boom days and mining excitement of the last 10 years has increased but 733 persons; only 163 homesteads have ever proceeded to patent; only 2 coal claims of less than 200 acres have ever proceeded to patent; only 7 town sites have proceeded to patent; 12 mission sites; 311 mineral claims; 7 trade and manufacturing sites; and 1 cemetery site.

Now, my friends, I have given you what Prof. Georgeson, Prof. Piper, and Prof. Chubbuck, the three representatives of the Agricultural Department in charge of the four stations in Alaska, have to say about the climate and agriculture. I want to talk to you a little about the soil. I do not really want to talk so much myself about it as I want to present what is said about it by our own Agricultural Department on whom all can

Will the gentleman yield for a question?

Mr. FERRIS. I will.

Mr. MANN. Is the gentleman able to say from the report of the investigations of the experimental stations what crops have

Mr. FERRIS. They raised some little rye in patches, and some barley, and some potatoes. They do raise some things on a small scale. They really seem to raise more potatoes than anything else, but I will soon present a report to the effect that potatoes, owing to the fact that they were raised on the frozen mucky land, where the soil is acid, are watery, and they sell for only 4 cents a pound, and in many cases not at all, and that they had to import potatoes from Puget Sound to keep the Fairbanks people going. The man who is in charge of the agricultural bureau says that the Alaskan people around Fairbanks will have outside potatoes at any cost and at any price.

Mr. MANN. Have they raised anything at these experiment

stations which they have sold?

Mr. FERRIS. I have the figures on that. We have expended up there \$298,000, and we have gotten back \$22,000. So we are about \$276,000 behind.

Mr. MANN. But they have been able to sell \$22,000 worth?
Mr. FERRIS. Since 1897. My figures are from 1897 up to
the present. They use commercial fertilizer, hotbeds, and with great care they can raise some produce. Prof. Chubbuck, who is conceded to know more about Alaskan conditions than any other gentleman, has submitted a report contained in Bulletin 50, which is just off the press, in which he says:

Reference has been made to the water and frost holding characteristics of the moss growth. It is this that makes the moss an impediment to agricultural development in sections where tiliage is feasible. It appears to decay very slowly, as is the case to a certain extent with all vegetable matter in localities where there are but brief periods of warm weather, so that a coat of moss varying in thickness from a few inches to a number of feet accumulates over much of the land surface.

You remember this moss is of the kind which costs from \$50 to \$200 to remove. It also keeps the land frozen the year around.

Continuing, the report says:

Even in those portions of Alaska where the winters are comparatively mild, but the summers cool and moist, the frost will be so near the surface under a coat of moss that at any time during the summer a cane may be thrust through the moss to the frost line. Under these wet and cold conditions and the slow decay of the vegetation the soil is quite acid, as is evidenced by much of the plant growth, the species being those that grow on land that is too sour for most farm crops. When the timber and other plant growth, including the moss, is removed from the land, thus giving the heat of the sun and the air a chance to penetrate the soil and dry out the moisture, the frost line goes lower each season until it ceases to be an injurious factor, and in the meantime the acidity of the soil grows less.

There is something about the long freezing the content of the soil grows less.

There is something about the long freezing, there is something about that foot or two feet of Arctic moss, that leaves the land sour, or akali, as we know it in the West. I read further:

THE SOILS OF ALASKA.

Alaskan soils have their origin largely in material formed by glacial action. They are not very rich in available plant food as a rule. The vegetable matter that has accumulated on the surface is in such a partially decayed and acid condition that it is quite apt to be injurious to some cultivated plants.

Here it is manifest that this country is impossible from an agricultural standpoint for thousands of years yet to come. It is all a dream of things that are not true and can not, from your

own agricultural reports, come true.

I stated a while ago that you can go down 200 feet below the surface and take out great blocks of blue ice. They even say you can go down 1,000 feet and find ice, but I am not warranted in saying that. Glaciers have come down since time immemorial and formed that gravelly, glacial, sour, acid, alkali,

and worthless soil that will not grow anything.

So, my friends, what a frost does not kill, the acid and the

alkali of the land kill. I read again:

This is quite pronounced even in the regions of mild temperatures and abundant rainfall, as in southeastern Alaska, where vegetation is luxuriant and the soil is apt to be quite peaty and mucky. In fact, extensive beds of peat exist in various portions of Alaska.

I understand, by way of digression for just a few moments, that the Alaska Chamber of Commerce has just arranged to pump the Japan current over into the Yukon River so as to warm the inferior of the country instead of permitting its use to warm up the southern country. [Laughter.] No doubt ere long they will attempt to have the Federal Government to do

the pumping, but other sections would grow jealous, and it is possible that even this would not pacify the Alaska Chamber of I read again:

Wherever there has been sufficient drainage and the vegetable matter-has fully decayed there is a rich black loam of varying depths; but these areas are limited to small valleys, some of which are the dried-up beds of former shallow lakes. The alluvial deposits along the larger streams contain good soil, but there are many gravel beds that have only a thin covering of fertile seil. Much of the soil, particularly of the benches and low hills, is composed largely of material deposited by the melting of the ice sheet that formerly covered the land.

That is where we get the ice 200 feet below the surface.

Again, Prof. Chubbuck, in a painstaking, well-worded message, warns homesteaders against going up there. With one unbiased arm of the Government warning people not to go there. here we are asked to build that railroad to try to force people to go there. What a spectacle! Prof. Chubbuck deals with what difficulties would confront homesteaders who contemplate going to Alaska to take up homes, and I take it everyone must feel interested in this matter, because if Alaska is to be settled people must go there and make homes for themselves. Prof. Chubbuck says:

DIFFICULTIES THAT CONFRONT THE HOMESTEADER.

Over against the optimistic facts pertaining to this great northwestern portion of the North American Continent are others that should be remembered by those who contemplate going to Alaska for the purpose of home making, particularly farm-home making.

On the south coast, where the climate is mild, tillable land is scarce, because of the proximity of the mountains to the shore line; elsewhere in Alaska the winters are long and very cold and frost-proof buildings must be provided for shelter of family and stock.

The ground freezes to a great depth and there is but a short period during which this can thaw, and the surface is covered with an accumulation of undecayed moss and other vegetable material serving as a protection to the frost and a reservoir for moisture.

Mr. WEAVER. Will the gentleman tell us what he is reading from?

Mr. FERRIS. I am reading from page 27 of Prof. Chubbuck's report, which is known as Bulletin No. 50, which is available in the document room. He says further:

The frost line under natural conditions sinks but a few feet during a season, and the thawed layer is usually a morass of muck in all portions of Alaska where tillage is possible.

Now, the gentleman from Illinois [Mr. Mann] asked a few minutes ago about the kind of soil, and about potatoes, and so on. Here is Prof. Chubbuck, on page 27 of Bulletin No. 50, off the press within the last few days, saying that "the frost line under natural conditions sinks but a few feet during a season, and the thawed layer is usually a morass of muck in

all portions of Alaska where tillage is possible."

That indictment of Alaskan soils by Prof. Chubbuck, representing an arm of your Agricultural Department, is more severe than anything any of us could think of. He declares it to be a condition that makes land travel almost out of the question during the summer until wagon roads shall have been

built.

Now, I want to say that they have expended \$2,000,000 out of the Treasury on the wagon roads up there, and yet Mr. Ballaine, who is very largely the owner of one of those towns and chief booster of this proposed railroad, as appears in the hearings

Mr. FALCONER. Mr. Chairman, will the gentleman yield there for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. FERRIS. Ballaine says that the \$2,000,000 is mostly squandered. I have a letter in my pocket written by the chairman of the wagon-road commission up there, and in it the writer says that everything Mr. Ballaine has said is untrue, I do not know which one of them is telling the truth, and I can youch for neither one of them.

Now I will yield to the gentleman from Washington.

Mr. FALCONER. I think the gentleman is fair and would not be inclined to make a misstatement if he knew it. The gentleman ought to know that Mr. Ballaine has no money in this Alaskan railroad and has had no money invested in it for years. He ought to know that the Alaska Northern Railroad is fighting this bill. The gentleman from Oklahoma and others on the committee know that the representatives of that company were against the bill and appeared before the committee and made known their attitude to that effect.

Mr. FERRIS. Now, let me ask you something, and we will be how we come out. There has been a good deal of this loose see how we come out. talk around here that everybody who is in favor of this bill is a patriot and that everybody who is opposed to it is not a patriot, and we will have that out before we get through. If it has come to pass that a Member of this House who is trying to save the Treasury from unwarranted appropriations and bond issues and trying to save the people from a big scheme has got to be assaulted and pelted from every side by pillagers

and plunderers, we will meet the issue squarely, and I will go to the bat on that proposition now. My service in this House is not so new that it needs any defense, and I will be guided by what I conceive to be my duty as long as I am here. plause. I

I will ask the gentleman how many town lots in Seward does

Mr. Ballaine own?

Mr. FALCONER. I do not know.

Mr. FERRIS. He owns the whole town, does he not?

Mr. FALCONER. No; he does not.
Mr. FERRIS. He is the town-site promoter, the one who opened up that town, did he not?

Mr. FALCONER. I think the gentleman knows that Mr. Bal-

laine does not own any interest in the railroad.

Mr. FERRIS. I do not know anything of the kind. been around here urging everybody, trying to get this scheme through, and I do not know anything of the kind which the gentleman states. Senator Nelson states that Ballaine and his associates sold stock to some of Senator Nelson's constituents. I find people around here who are holding some of the stock of these defunct railroads in Alaska, which they are now trying to unload onto the Federal Government, amid a blare of trumpets and a lot of false, incredible, unreasonable, and damnable charges. [Applause.] I will not be driven by any such abnormal influence. I do not have to be. Now, what question does the gentleman want to ask?

Mr. FALCONER. The interests of the several men interested in the railroads in Alaska are fully set out in the hear-ings. Mr. Ballaine stated definitely his interest in Alaska and

made a very frank explanation of it.

Mr. FERRIS. I can not yield to the gentleman for the purpose of allowing him to make a speech. If the gentleman asserts that Mr. Ballaine does not own anything and he wants to say that, that is all right, and I do not want to argue it with him. I say that Mr. Ballaine is a town-site promoter who has been for five or six months hanging around this Capitol lobbying, trying to get this bill through. I do not know his I do know that he was the town-site promoter who opened the town site of Seward and that he owns a lot of it yet, and he is here trying to get this bill through. It is fair to Mr. Ballaine to say that he asserts in the hearings that he does not now own any stock in the Alaska Northern Railway.

Mr. TOWNER. The gentleman did not say that Mr. Bal-

laine owned any of the railroads. I think he was strictly within

Mr. FERRIS. I did not say that, although I do not know what the facts are. I do not know that he does, I do know that he was the original promoter of it and that his crowd were peddling out this stock and unloading it onto a lot of unsuspecting persons, and now he is down here trying to make the Federal Government play the part of an unsuspecting purchaser; and whatever the consequences may be, I will not subscribe to the proposition to have the Federal Government be an unsuspecting investor in this matter.

Mr. TOWNER. I shall be glad to ask the gentleman a ques-

Mr. FERRIS. I shall be glad to answer it if I can. There are a lot of things about Alaska that I do not know.

Mr. TOWNER. Does the gentleman know about the owner-

ship of the Alaska Northern Railroad?

Mr. FERRIS. I think Mr. Ballaine does assert that he sold his interest. Senator Nelson makes the assertion that they peddled stock among his farmers, and so forth.

Mr. TOWNER. I do not care anything about Mr. Ballaine I want to ask you if you know anything about the present

ownership of the Alaska Northern Railroad.

I have not gone into that far enough to give Mr. FERRIS. the gentleman the best information. I take it he wants the best information, and I can not give it to him. This is a matter upon which I will not make a statement unless I have the facts.

Mr. LENROOT. I should like to ask the gentleman if Mr. Jenness was not one of the trustees of this Alaska Northern Railroad, and if he did not appear before the Committee in opposition to this bill?

Mr. FERRIS. I do not know. I have neither seen him nor his testimony. The gentleman may be right about it. I neither affirm nor deny.

Mr. HARDY, Will the gentleman yield? Mr. FERRIS. In a moment. I was, in a measure, unfortunate in the matter of not being present at most of the hearings. I was tossed on to the Committee on the Territories at the last The Speaker very kindly appointed me a member of the Mulhall investigating committee, and I missed most of the hearings before the Committee on the Territories; so whatever my errors and mistakes may be they are owing to a lack of

information and are not intentional. I have read enough to make me exceedingly skeptical of these Alaskan railway schemes.

Mr. HARDY. Having been on the Committee on the Terri-

tories when a good deal of this matter was inquired into, and having been off that committee during this session, I wanted to ask the gentleman if it was not a fact that before that committee the question was not simply one of buying these railroads, but whether the Government ought to open up Alaska by some Government-owned road built either from Seward or Cordova or Valdez, or anywhere where the Government saw proper, without buying any of these roads, or by buying an existing road, as might be deemed best, and is there anything in this bill that requires the buying of these roads? On the contrary, does not this bill give the President the full right to ignore the existing roads?

Mr. FERRIS. It is not compulsory, although it gives him full

authority to buy one or all of them.

Mr. HARDY. Exactly. He is not bound to buy either of these roads. Did your committee investigate the question Exactly. He is not bound to buy either of whether we might not more cheaply build from a central station like Valdez?

Mr. FERRIS. There was much testimony, which I can not go over now, some of it credible, some incredibile. I think the

bill contemplates building three lines.

Mr. HARDY. The committee, when I was a member of it, were discussing whether the road was desirable and whether they should build it or buy it. This bill determines the first of these questions in the affirmative and leaves the second for the President to decide.

Mr. FERRIS. I have nothing but the highest praise for the chairman and every member of the committee. I know that they are honest, painstaking, patriotic men, trying to do their duty, and I would not if I could and I could not if I would make any Member of the House believe differently. Each man on that committee is following his own patriotic instincts, as he ought to do, and that is all that I have to say about that.

Let me proceed. I was reading from Prof. Cubbuck, Bulletin

No. 50, page 27:

No. 50, page 27:

This condition makes land travel almost out of the question during the summer until wagon roads shall have been built, and these must be largely of the corduroy type. Meantime the farm home must generally be located close to navigable water.

The swampy character of much of the surface of Alaska makes it a great breeding ground for mosquitoes and gnats, which are almost intolerable pests to both man and beast. It also makes drainage a prerequisite in order to remove the surplus water so that the land can be worked, raise the temperature of the surface soil, lower the frost line, facilitate the decay of the accumulated organic matter, and bring about chemical changes which will transform the soil from a very acid condition to one much less so. Nature requires much time for this last process.

Where the vegetable accumulations are largely moss, this must be destroyed, either by burning or by carting it from the land, for if plowed under it decays very slowly and seems to have an injurious effect on most crop plants.

The timber growth, which occurs on practically all the land suitable for tillage, must, of course, be cleared from the land.

All this work—building houses and barns, drainage, clearing land of moss and timber—is very slowly accomplished in the short outdoor working season if done single handed by the homesteader, and costly, almost prohibitively so, if hired labor is used, because of the high wages and living expenses.

It will be observed that this comment of Prof. Chubbuck's is every word a warning to homesteaders to keep away from Alaska, showing with what disaster homesteading in Alaska is fraught, and admonishes them to not be mislead by reports that

are impossible, farcical, and even monstrous.

Prof. Chubbuck says that we must not only first build the railroads, but then we must build wagon roads. \$2,000,000 worth of wagon roads as an extension of the Guggenheim line from Chitina up to Fairbanks. It may have been a proper expenditure to do that. I do not want to leave any imputation anywhere, but Chitina is the end of the line and they spent \$2,000,000 building wagon roads from Chitina to Fair-Mr. Chubbuck says that we must build more wagon roads or settlers can not go there. When will this clamor for appropriations end and where is the House drifting? First, we build the railroads and, second, wagon roads, with five agri-cultural stations established there to prove that there is nothing but morass, muck, and sour, acid soil that will not grow any-

Now, as to the soil. Did you know, my friends, that in Alaska, due to the long freezing and due to the sour, mucky nature of the soil, they have to use fertilizer on the land to grow anything? What do you think of using commercial fertilizer on virgin soil the first year that it is cleared and plowed up? In old worn-out soil, in old depleted run-down soil they have to use fertilizer. I call your attention to the somber fact that they have to use fertilizer in Alaska to start with. Let me present my authority. I am reading from page 13 of the annual report from the keeper of those experiment stations.

FERTILIZERS IMPROVE THE YIELD.

It is further to be noted that the soil is not naturally rich. Where fertilizers were applied there was an increase in the yield of straw, which in some cases amounted to double the weight obtained on unfertilized plats. Alaska soils are as a rule not fertile, except on alluvial deposits near the mouths of the rivers or elsewhere where silt has accumulated. There is but a small amount of vegetable mold in the soil. In the coast region, where the rainfall is abundant, vegetation is luxuriant nearly everywhere, but in the interior, where the rainfall is scant, the native vegetation is not abundant. Consequently, but little humus is accumulated. Owing in part, also, to the same cause, disintegration of the rocky material is not so complete as it is in more southern latitudes; that is, the soil, as a rule, contains a large percentage of gravel. These conditions combine to make the addition of fertilizers very desirable. The fertilizer used the past season was fish guano, an Alaskan product manufactured at Killisnoo.

Here it will be observed that the soil is poor and inferior and in the main of no substantial value for agricultural purposes. I submit that millions of acres of land within our own country, in fact, almost within the shadow of the Capitol, in Maryland and Virginia, could, with a sufficient amount of fertilizer, be made productive and, of course, valuable; but in a country where the climatic conditions are so extremely hazardous and the soil itself is lacking in fertility, and where the plants do not come up until July and are cut off by the frosts in August, pray tell me what is there that recommends such a country to a home builder and a home seeker, and pray tell me with what propriety can this Congress be induced to issue bonds, breaking all precedents, bankrupting the Treasury, abandoning economy, starting in on a project that is of more than doubtful propriety, when the very reports of the Agriculture Department itself tell us on every hand that the country is of little or no merit from an agricultural viewpoint.

Now, another report here, presented on page 33—and I hope the House will hear me, because upon this will hinge the result as to whether we build these railroads:

Alaska soils are not rich. Frequently statements from travelers and other observers are seen to the effect that the soil must be exceedingly rich in plant food, to judge from the height of the grasses and the luxuriance of some of the vegetation, but such a conclusion is not warranted. Grasses will sometimes grow rank on an almost barren gravelly soil, because they have plenty of moisture and they are adapted to the climate and to the conditions. The virgin soil in the interior is everywhere frozen to an unknown depth or to bedrock. In this state of refrigeration there can be no activity of the organisms which aid in the formation of mold and the manufacture of plant food from the organic matter, and what plant food the soil may hold is in a large degree insoluble, and therefore not available for plants except by a long and slow process of weathering. For this reason the soil soon becomes exhausted, and fertilizers are necessary. This is particularly demonstrated by the results of the Fairbanks station the past season, which will be referred to later.

What do you think of that? The interior of the soil is

What do you think of that? The interior of the soil is frozen everywhere to an unknown depth or to bedrock. This is no chamber of commerce report; this is no moving-picture report, but this is your own agricultural report.

Here it will be observed that many persons casually passing through Alaska are deceived at the fertility of the soil by reason of the growth of certain grasses thereon, but you will observe that the man familiar with the soil states that the growth of such grasses does not indicate a rich soil, but, on the contrary, is often found growing on barren, gravelly soil, being produced merely on account of the moisture contained therein. Again, you will observe that the irrigable soil in Alaska is frozen to bedrock, and it seems to me where he so well explains the soil to be in such a state of refrigeration that there can be no activity of the organic matter that the soil is doubly wanting under such conditions. He goes on and explains so well and so carefully how soon the soil becomes exhausted, and that fertilizers become necessary. He calls attention to the fact that this is more particularly demonstrated at the town of Fairbanks in the famous valley where this region is to afford ample tonnage, and at the very objective point of this railroad itself.

I now come to maintenance of fertility. It will be seen that they have not only a frost which comes with every month, and they have not only this other condition, this Alaskan moss, which takes from \$50 to \$250 an acre to clear, but they have other trouble. The soil is so barren that the annual report says they can not crop it every year, but they have to crop it every other year. I want to read now from the maintenance of fertility report, at page 38, for the year 1910:

MAINTENANCE OF FERTILITY.

As already stated, generally speaking, Alaskan solls hold but a limited supply of available plant food. They soon become exhausted, and the problem is how to increase this limited store of plant food. There are two ways: One is to raise a crop on the land only every other year and summer fallow the intervening years; that is to say, give nature time to act upon the soil and gradually change the plant food in the soil from its insoluble to a soluble form.

Here you will observe that the man acquainted with agriculture and with soils, who was a representative of the Government and who has no selfish interest to serve, says that the Alaskan soils hold nothing but a limited supply of available plant food,

explaining how soon under the conditions they become exhausted, and that there is no way to increase the limited store of plant food. He suggests the raising of crops on the land only every other year, but this is both expensive and unsatisfactory to any prospective home seeker, and all of this in the valley and at the point which is the objective point of the proposed railroads to be constructed at Government expense, that has heretofore proved unattractive to capital from any source or from any

Why, my friends, if it costs from \$50 to \$200 an acre to clear the land in the beginning, if you have to use fish guano to fertilize it the first year it is plowed, if you have to crop it every other year because you can not crop it every year, I ask you, What is there to attract an ordinary home builder? Will the home builder leave 300,000,000 acres of land behind him in the States, beckoning him to come with his family and reside upon it, and go to such a place as that? But even worse yet. Will this House adopt this moving-picture, chamber-of-commerce propaganda and build a railroad, unheard of in the history of this country, that begins nowhere and ends nowhere, with nothing to haul after you get there?

Mr. TOWNER. Mr. Chairman, will the gentleman yield? Mr. FERRIS. I will.

Mr. TOWNER. The gentleman speaks about there being 300,000,000 acres of land in this country available for farm use. Will the gentleman be kind enough to tell us where that is

Mr. FERRIS. I will. In Arizona, New Mexico, California, Wyoming, Utah, Idaho, Nevada, Montana, California, Oregon, Washington, and a number of the Southern States there are small areas yet subject to homestead.

Mr. TOWNER. Is the gentleman not giving now the total

unoccupied land in the United States?

Mr. FERRIS. No; I am giving the land that is subject to entry. There are great areas in forest reserves that are not included at all in this statement. These figures are fresh from the tract books of the General Land Office and can be corroborated.

Mr. TOWNER. I was under the impression that if there were any public land that was really useful for farm purposes it was being occupied about as rapidly as the people could get to it, and that the Government when it could get a little reservation away from the Indians and could turn it over to the people was having difficulty in satisfying the clamor of those who were wanting a chance to get hold of the land.

Mr. FERRIS. That would undoubtedly seem to be true to those who had not looked into the matter, but on the contrary, independent of Indian reserves, independent of forest reserves and mineral reserves, there yet awaits a little more than 300,000,000 acres-I could give you the exact figures from the Interior Department—subject to homestead entry, that the gentleman from Iowa and other gentlemen here who have not exhausted their homestead rights can go and take to-morrow if they will but present themselves to the appropriate land offices.

Mr. TOWNER. The question is not whether we have a right to do that or whether the people have a right to do it, but

whether it is worth anything after it is taken.

Mr. FERRIS. Of course the gentleman knows that that is a speculative question. I may say to the gentleman that much of those 800,000,000 acres is good land and will be taken up and will make good homes on which people will live, and they will do it by dry-farming methods—intensive cultivation, irrigation, and so forth, which has become a science. I wish I could have time to speak of that at length. They are entering it every day.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. MADDEN. As a matter of fact, there are millions of acres of the richest agricultural land in the world in the Southern States that can be purchased anywhere from \$15 to \$25 an acre, are there not?

Mr. FERRIS. I would not try to answer as an expert on that, but I understand that is true; and there are some lands open to entry in the Southern States. Arkansas has areas of public land, Alabama has, and Mississippi has small areas of public land-not much, but some.

Mr. FOWLER. Does the gentleman include in his estimate the 75,000,000 acres of swamp lands the richest lands in the

world?

Mr. FERRIS. Well, if it is public land, I do, yes; because I take in all the land subject to homestead entry. There are a great many millions of acres in forest reserves and in military reserves and in other reserves that I have not referred to at

Mr. BOOHER. Will the gentleman yield for a question? Mr. FERRIS. Yes; for a question.

Mr. BOOHER. I will ask the gentleman if he knows where the Government owns any swamp lands anywhere? Did not the Government give all the swamp lands in the country for school purposes?

Mr. FERRIS. I think not. There are many lands in the

State of Arkansas now, such as are known as "sunk" lands.

Mr. BOOHER. That is not Government land.

Mr. FERRIS. Yes; the gentleman could file, and I, if I had not exhausted my homestead rights, could file. I have been a homesteader myself within the last dozen years.

Mr. BOOHER. Does the gentleman know any other swamp lands which have not been given by the Government for school

Mr. FERRIS. I could not give the gentleman an answer offhand, because there may be such lands. How much time have

I left, Mr. Chairman?

The CHAIRMAN. The gentleman has about 16 minutes left. Mr. DONOVAN. Mr. Chairman, I just wanted to suggest to the gentleman not to allow his time to be taken up by outside matters in connection with his Alaska talk.

Mr. FERRIS. Yes; I will proceed as rapidly as I can. I

have only a few minutes——
Mr. HARDY. I would like to have the gentleman's plan, as I am interested in his plan.

Mr. FERRIS I am going to get to that.

Mr. STAFFORD. How much more time would the gentleman need to present his plan fully?

Mr. FERRIS. I do not know; I will journey on as fast as

Mr. STAFFORD. We would like to have a full presentation of the gentleman's views, because the House is deeply interested in the gentleman's presentation.

Mr. TOWNER. I think that ought to be done. The gentleman has given the matter such careful consideration, and

ought to have as much time as the Delegate from Alaska.

Mr. FERRIS. I do not ask that much. I am not entitled

to it.

Mr. HELM. Will the gentleman yield for just a question?

Mr. FERRIS. I will. Mr. HELM. What does the gentleman think was the orig-

inal purpose of the Government in buying Alaska?

Mr. FERRIS. Well, I do not know; probably fish and furs; that is my candid belief. Now, if the gentleman will pardon

Mr. STAFFORD. Mr. Chairman, I ask in view of the statement of the gentleman that he be granted unanimous consent for an additional half hour.

If I need it. Mr. FERRIS.

Mr. STAFFORD. If the gentleman needs it.

Mr. DAVENPORT. That means it is not to come out of the

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the gentleman from Oklahoma may proceed for 30 minutes additional to the time already allotted. Is there

Mr. BRYAN. Mr. Chairman, I will not object if it is to be taken out of the ordinary time, but if it is to give the negative side this addition of time, unless the affirmative is going to have

an addition also there will be opposition.

Mr. HARDWICK. The affirmative side on this question has had a great deal more time than the negative side—three or four

the House.

The CHAIRMAN. The Chair will state that there are about 25 persons desiring time, and only 11 hours left in which to divide that time.

Mr. BRYAN. I understand this extension will not be taken out of the 13 hours?

The Chair did not so understand the The CHAIRMAN. request

Mr. HARDWICK. The request was that this be in addition to the time the House had granted by unanimous consent, not to exceed 30 minutes.

Mr. STAFFORD. I understand we can not in the Committee of the Whole change the time originally set for general debate.

The CHAIRMAN. The Chair will state the time was fixed by

Mr. SISSON. But in the event there is no objection here there would be no violation of the rule.

I will state for the benefit of the chairman-and he may have kept up with that better than I have—that I have no disposition to lengthen this debate; but those in favor of the bill have consumed three or four times as much time, with the exception of this speech this morning, and if you look at the RECORD you will find that is true; and the gentleman from Alaska [Mr. Wickersham] was given unlimited time to debate

this question, and in fairness I believe the gentleman from Oklahoma [Mr. Ferris] ought to have unlimited time. I have not any brief to speak for or against the gentleman from Oklahoma having time. I have no disposition to do otherwise than to give both sides a fair opportunity to present this thing to the country, and if no point of order is made, this matter may proceed by unanimous consent.

Mr. LENROOT. I suggest to the gentleman that unanimous consent can not extend it beyond the 13 hours, and that any gentleman at the expiration of the 13 hours might raise the

point of order that the time had expired.

Mr. SISSON. I understood that they had an agreement in the House that if the gentleman did not conclude in an hour and a half or in two hours if he needed additional time it should not be taken out of the 13 hours.

Mr. STAFFORD. That was not the understanding.
Mr. SISSON. I was mistaken, then, about the agreement.
Mr. HOUSTON. I will say to the gentleman we tried to
make an arrangement and agreement by which we could have an equal division of time at least satisfactory to the opponents of the bill and agreed upon by those in favor of it. It was perfectly satisfactory to the gentleman from Oklahoma [Mr. Ferris] and to the other gentleman from Oklahoma [Mr. DAVENPORT], who, it was suggested, should have charge of the time. Now, then, the House, by its solemn action, fixes the time at 13 hours. I have no disposition to cut it off at all with a point of order, but we must get through some time. I do not think we should extend the time at which the House has fixed it.

Mr. DAVENPORT. I suggest that the gentleman proceed until the two hours of his time is exhausted, and then I will

dispose of it by a motion-

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that we may have an additional time of half an hour, making it at the suggestion of the gentleman now occupying the floor. think it a reasonable request. I do not wish the gentleman to be pressed to conclude his remarks in a limited time.

The CHAIRMAN. The gentleman from Wisconsin [Mr. Staf-FORD] asks unanimous consent that he may proceed for 30 minutes in addition to the time already allowed. Is there ob-

jection?

Mr. HUMPHREY of Washington. If the committee can do this without taking it out of the 13 hours, I hope it will.

Mr. DAVENPORT. If nobody objects to it, it will go that

The CHAIRMAN. Is there objection?
Mr. SAUNDERS. This is additional now to the 13 hours? The CHAIRMAN. The Chair does not understand it that

Mr. SAUNDERS. I understood that to be the motion.

Mr. STAFFORD. I know, but that will be contrary to the rules of the House.

Mr. SAUNDERS. Technically speaking, that is true; but if we all agree to it we can do it. We will make the motion specifically that he shall have the time, not to be taken out of the

Mr. LENROOT. Reserving the right to object, I have no objection in this particular case, but that would be a precedent for other gentlemen extending time beyond that point.

Mr. SAUNDERS. If anybody else makes that motion, I will

Mr. HUMPHREY of Washington. If the gentleman is going to take that attitude, I do not think it is going to help matters.

Mr. SAUNDERS. As I understand, we want to make an exception in the case of the gentleman from Oklahoma [Mr. Ferris]. If I understand the situation, that is what we want to do.

Mr. LENROOT. May I suggest to let the motion of the gentleman prevail, and then at the end of the 13 hours make a mo-

tion to extend the time further?

Mr. SAUNDERS. Well, I do not know. We can do it now,

but we can not know who will be in the House at the end of 13 hours

Mr. SISSON. Mr. Chairman, if the Chair will permit, the suggestion made by the gentleman is that at the end of 13 lours it can be arranged. If the gentleman from Oklahoma [Mr. Ferris] shall consume 30 or 40 minutes more than the time allotted, I think there would be no objection in the House to extending the time at the end of the 13 hours by just the amount by which the gentleman from Oklahoma exceeds the allotted time, because the gentlemen in charge of the bill on both sides are anxious that that be done.

The CHAIRMAN. Does the gentleman from Wisconsin [Mr. STAFFORD] accept the amendment proposed by the gentleman

from Virginia [Mr. SAUNDERS]?
Mr. STAFFORD. I have no desire to object to it.

Mr. LENROOT. I will be constrained to object to the propo-

sition of the gentleman from Virginia.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] asks unanimous consent that the gentleman from Oklahoma [Mr. Ferris] be permitted to proceed for 30 minutes in addition to the time already allotted to him. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Chairman, I hope the Chair will avoid taking this out of my time.
The CHAIRMAN. Very well.

Mr. FERRIS. Mr. Chairman, now let us examine at page 49 in the report of 1912 from the man in charge of these agricultural stations in Alaska and ascertain what the six years' experience they have had there have led him to say about the soil and the treatment of it. His exact words are as follows:

SOIL TREATMENT.

The soil in a cold climate requires somewhat different treatment from that where the ground does not freeze. Here the ground is frozen nearly seven months of the year, and chemical action is therefore very much retarded. Plant food does not become available rapidly enough to crop the land every year. A system of cropping most of the land every other year has been inaugurated, especially for the hay and grain crops. This system admits of summer plowing when more or less green stuff can be turned under, and it also relieves the spring rush of preparing the soil for seed. The soil should be plowed deeply in July or August and left rough so that the air can act upon it. For good results the spring cultivation should be very thorough before seeding. If time will permit, it is highly beneficial to replow the land in the spring, as it helps to warm the soil, and it seems the more the soil is stirred in the spring the better the crops which follow. Care should be taken not to plow too much litter under, as it tends to cut off the capillary action of the moisture, and the rainfall is usually very light during the months of May and June. Without proper tillage the soil is apt to become too dry, and the crops will suffer from lack of moisture. It should be remembered that most of the snow water runs off before the soil is sufficiently thawed to absorb it, and it becomes necessary to conserve the moisture as much as possible.

Here you will observe he says they have been forced to abandon the proposition of cropping the land every year; that the soil is frozen seven months and there is not enough chemical action to keep plant life alive. He further explains that so much of the year the soil is frozen so hard and so deep that the water runs off into the sea and does not water the crop. He even cautions the farmer not to plow too much litter under, as it tends to cut off the capillary action of the moisture, and the rainfall is very light during the months of May and June. I had truly hoped that we might be spared this one comment, for I had at least assumed that they would not be drought-stricken on top of all the other series of calamities that the agricultural bureau in that Territory have to put up with, but it seems with their barren soil, with their arctic climate, with their midsummer frosts, and their necessity to fertilize, which is always expensive, and usually prohibitive, on top of this we find them afflicted with droughts that can not be overcome or checked, due to the fact that the frozen ground can not absorb the water, which rushes off madly to the sea.

No, my friends; farming in Alaska under such conditions as these can not become a reality. As one who has gone through the frontier days and frontier conditions incident to the opening and development of a new country, in the light of these facts this country is without hope and without possibilities so far as a poor man's country is concerned, and surely, if the Federal Government is to develop it at Government expense, it should be for the benefit of the poor man and for him alone. I can not fathom that the Federal Government would ever get so beside themselves as to think this is an agricultural country or induce its citizens to go there to suffer, freeze, and starve in the bleak and barren hills of Alaska.

CROPS.

This Congress is asked to issue \$35,000,000 in bonds and appropriate \$1,600,000 outright in cash for the purpose of con-structing a railroad in Alaska which is to derive its tonnage from agriculture, because there is not sufficient coal of value to transport from within the interior, and because of what precious metals there are in Alaska no tonnage of any significance is connected with them; hence, we must rely upon the agricultural tonnage if we are to meet with any success in constructing this railroad.

Much has been said, Mr. Chairman, about potatoes being the leading crop up there. It is an important crop. It is the vegetable upon which the poor live almost everywhere, and it is an important crop. Let me explain to you why Alaska is not suitable for the production of potatoes. I read not my own words, but I read from the annual report for 1911, page 7, on potatoes. Here is what is said there:

POTATOES.

The potato is by long odds the most important vegetable grown in Alaska. It constitutes a very important item in the people's diet. Everybody uses it; everybody knows how to grow it; and with proper

care it can be grown all over the Territory. But in spite of this, several thousand tons are imported into Alaska every year. About a thousand tons are shipped into the Fairbanks region alone each summer from the Puget Sound district. It is maintained that "outside" potatoes are drier and mealier than those grown in Alaska, and they therefore bring a higher price in the market than do native-grown relations.

Here it will be observed that, though much has been claimed for Alaska as a potato country and much has been said of excessive freight charges, still the report says several thousand tons of potatoes are imported into Alaska every year and that about 1,000 tons are shipped into the Fairbanks region alone from the States. He also gives us the reason why this is true. The Alaska potato is watery, unpalatable, and is only eaten when the outside potato can not be had at any price. I think none of the proponents of this bill, laboring under the impres-sions they are of all the real-estate boomers and other pressures combined, will try to contradict this statement or attempt to combat it.

Now, my friends, that extract quite well corroborated what I said, but in the event it should not be so considered, let me read a little further. I read from page 50 of the annual report of 1912 of the men in charge of one of the arms of the Agricultural Department. This is a report which can be had by every gentleman here. This is said there:

Garden stuff commands a good price, but the supply usually exceeds the demand. Native potatoes are slow sale this season at 4 cents per pound. The Alaska potato market is peculiar. The Fairbanks market especially demands, first, an outside, or imported, potato regardless of price, kind, or quality; therefore, the merchants in their endeavor to please their customers do not like to handle the native potatoes, and will not, as a rule, when it is possible to have the outside stock.

Here you will observe that the Alaskan merchants will not even handle the potatoes and they are a slow sale at 4 cents a pound. He says the Fairbanks people demand outside potatoes regardless of the price, kind, and quality. I ask the proponents of this bill what kind of potatoes do they raise in Alaska and where does all this bland complaisance hail from with reference to their agricultural possibilities in Alaska?

Now let us look at the premises for a moment and follow it for a moment. First, it says that potatoes are the leading crop, and then it says the Alaska people will not use them. It says they can not sell them. At other places in the report the Agricultural Department representatives say they can not sell them, and assert that they are a drug on the market.

The statement is made that a thousand tons of potatoes were shipped into Fairbanks alone from Puget Sound in one season. Now, if that is so, I believe it would be cheaper to bring those people out of Alaska entirely and give them a home in one of these several million acres of unoccupied public land. Why, we could board them at the Waldorf-Astoria Hotel more cheaply than keeping them in Alaska.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield

for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. FERRIS. Yes.

Mr. BARKLEY. My question is prompted by a desire for information rather than by mere curiosity. If they can not eat or sell the potatoes, what do they use them for?

Mr. FERRIS. Oh, I guess they can mix them up with guano and put them back on the soil and fertilize the soil and

raise more potatoes of the same kind. [Laughter.]
Mr. JOHNSON of Washington. Mr. Chairman, if the gentle-

man will permit, I will answer that question.

Mr. FERRIS. Certainly.

Mr. JOHNSON of Washington. It is an actual fact that potatoes are shipped from Alaska to Seattle, the very place from which are shipped the potatoes that were sold at Fair-

Mr. FERRIS. Where does the gentleman get that information? When was that?

Mr. JOHNSON of Washington. That was within the last year or two.

Mr. FERRIS. I do not know where the gentleman gets a report of that kind.

Mr. JOHNSON of Washington. I get it from the Federal statistics.

Mr. FERRIS. I have in my hands, Mr. Chairman, the report of 1911 and the report of 1912, which show that to this wonderful country a thousand tons of potatoes were sent to the gentleman's home town in Fairbanks from the States. One of two things must be true-they are either without home potatoes or those they have are worthless, or they would not ship in such quantity as that.

Mr. BRYAN. Mr. Chairman, will the gentleman yield for a

question?

The CHAIRMAN. Does the gentleman yield?

Mr. FERRIS. Yes.

Mr. BRYAN. Has the gentleman ever bought an article marked "Made in Germany"?

Mr. FERRIS. Oh, the gentleman would not desire me to digress to answer that.

Mr. BRYAN. That is on the same principle. Mr. HELM. Mr. Chairman, will the gentleman yield?

Mr. HELM. Mr. Charlindi, whi the general Mr. FERRIS. Yes.
Mr. HELM. Is it not a fact that there was collected in customs duties at the ports of the United States \$60,000 or \$75,000 on potatoes imported into United States ports in the year before last?

Mr. FERRIS. I do not think so. I am sure that can not be. They do not even eat the Alaskan potatoes themselves, only when a potato famine is on. But I will say that since the date of the purchase of Alaska for \$7,200,000 the imports from Alaska have been a mere bagatelle and negligible in comparison with the expense of that Territory. If it takes from 1867 down to this good day to pay back \$7,000,000 on the money we have spent for Alaska, I would like to know how long it will take for the imports from Alaska to pay for this \$400,000.000 railroad which it will eventually amount to if the scheme is entered into at all—that you propose to build up there. That is a proposition that you gentlemen can take home with you and think of until you are tired. We have spent \$35,000,000 on Alaska, and only

\$17,000,000 has as yet been returned.

Mr. HELM. If the United States is importing potatoes for consumption, is it a crime for the people of Alaska to import

potatoes also?

Mr. FERRIS. No; but the gentleman well knows, if he is earnest in his efforts to secure information, that attempts to raise Alaskan potatoes are not successful. On the contrary, the soil is so sour and mucky and devoid of fertility that potatoes raised upon it have no quality that makes them palatable. Po-tatoes from outside were imported into the gentleman's home town—the town of the gentleman who has presented this matter to the House so creditably and favorably. Under the circumstances, I can scarcely fathom his metive in making such a remarkable statement as he has made.

In his own town they had to import a thousand tons of po-tatoes, and his town is the olive branch that they hold out. All three of these railroads are headed for Fairbanks. What for? To carry in potatoes to keep the Fairbanks people from starving to death. [Laughter.] Why, we ought to bring those people out and board them where we can board them cheaply.

Mr. WICKERSHAM. Besides those potatoes we have brought out \$75,000,000 of gold inside of 10 years from that same town.

Mr. FERRIS. I will not take the time now but I beared.

Mr. FERRIS. I will not take the time now, but I have the gold figures here. I should like to present those figures. They are falling off at the rate of \$4,000,000 a year. I will present them to the gentleman. Turning to page 33 of the report for 1912, let us see how we are getting along on potatoes, wherein it says:

It is a question whether the potato market will continue to be a profitable one. The population gradually diminishes as the placer ground is worked out, and the homesteaders are gradually extending the area in potatoes. The time will come when the price of the native-grown potato will be so low that there will be no profit in it. In this connection it is well to call attention to the fact that potatoes grown on lowlands, as a consequence, suffer from early frosts and seldom mature normally. They are therefore soft and watery when cooked, and when placed on the market they ruin the reputation of the Alaska-grown potato.

In the lowlands, where the soil is rich, the frost gets them, and on the high mucky soil they die for want of fertility; so in either event you raise nothing. Continuing, the report says:

Ranchers should transfer their potato growing to southern slopes of the low hills. There they will get a potato of better quality, which will not be discredited in the market.

What a spectacle that is!

Mr. HARDY. Is it not the excessive freights on potatoes that make them cost, when imported, a dollar a pound?

Mr. FERRIS. I think it is; but if the country had the fer-tility its friends claim for it there would not be any need to import foodstuffs. They could feed themselves.

Mr. HARDY. I will ask the gentleman to deal with this

question: If the freight rates are so high that potatoes cost a dollar a pound, ought we not either to close up that country or

give some access to it? [Applause.]

Mr. FERRIS. I will tell the gentleman frankly what I think about that. Let me read again in the report for 1911 and see what the Agricultural Department says about that. Here we have what the Agricultural Department says, which ought to

be placed before the people who anticipate going there.

First, however, let us for a moment sum up what our agricultural investigations in Alaska have really resulted in. First, the expenditure of \$298,000 out of the Federal Treasury, with coal is right there?

a return of \$22,000. I presume the Auditor for the Treasury Department will audit this amount as so much for experience in agriculture in Alaska. So far as I am personally concerned, I think the money has been well spent, for I believe it will prevent many of our patriotic home-seeking people from getting on the rocks of starvation and disaster by ever going to Alaska at all and taking up a homestead there.

One of the stations at Copper Center has already been abandoned. I have no doubt but that that station is buried in the one cemetery site that has heretofore been patented, and I have no doubt but that in the near future there will be four freshly made graves for the other stations now in existence there, namely, Sitka, Rampart, Fairbanks, and Kodiac. I shall not attempt at this time to make reference to what would be a proper inscription upon the tombstones of these costly and unsuccessful ventures.

Again, at page 31 of the same report of 1912, we will observe where the agricultural report shows that potato culture will in all probability have to be abandoned altogether, due to the fact that as they work out the placer mines and the population begins to recede there will be no demand for the potato. The language is as follows:

guage is as follows:

It is a question whether the potato market will continue to be profitable, however. The population gradually diminishes as the placer ground is worked out, and the homesteaders are gradually extending the area in potatoes. The time will come when the price of the native-grown potato will be so low that there will be no profit in it.

In this connection it is well to call attention to the fact that potatoes grown on lowlands, as a consequence suffer from early frosts and seldom mature normally. They are therefore soft and watery when cooked, and when placed on the market they ruin the reputation of the Alaskagrown potato. Ranchers should transfer their potate growing to southern slopes of the low hills. There they will grow a potato of better quality, which will not be discredited in the market.

Let us now for one moment go up to the Tanana Valley in

Let us now for one moment go up to the Tanana Valley, in the vicinity of Fairbanks, and observe conditions there through first-handed information secured from the agricultural repre-sentatives, who must of necessity be the highest authorities upon whom we can depend for information as to the agricultural conditions in Alaska. At pages 49 and 50 of the report of 1911 we are again favored with a report on the conditions of wild grass and hay. The report is as follows:

The writer challenges the many reports that are continually appearing in eastern papers—

That is some more of my friends Wickersham and Humphrey's moving-picture shows-

magazines, and other current literature, calling the public attention to the supposed vast areas of meadow lands in the Tanana Valley, which are calling forth innumerable letters of inquiry.

These moving-picture fellows are raising potatoes to beat the band in Boston and New York and around this Capitol. main way that they raise potatoes is in these moving-picture shows. Continuing, the report says:

It is true, travelers often see small meadows and short stretches of good grazing, but when we consider the great area comprised in the Tanana Valley we lose sight of the few scattering grassplats. There are probably not a dozen of the 200 or more homesteaders in the valley who can cut enough wild hay on their homesteads to winter a team.

Mr. MADDEN. What are horses worth up there?
Mr. FERRIS. They do not have any. Let me read to you here. They have no hay to feed them with if they had them, but they do not have any. I will present the agricultural report:

Nearly all homesteads, however, do afford some grazing four or five months in the year.

Considerable grazing land may be found near the headwaters of the Tanana and also occasionally small areas are found on the hills above timber line. Where forest fires have devastated the timber grass usually springs up in abundance until choked out by a new growth of timber and moss.

It costs \$125 an acre to remove the moss.

Continuing, the report says:

While a few of the more prosperous settlers have cleared up enough land to raise their own feed and some to sell, the great majority of homesteaders do not have any stock at all, but hire their neighbors to plow up a small area, and they finish the cultivation by hand, while others devote their whole time to cutting wood for a living.

That answers the gentleman's question. They do not have any at all, but hire their neighbors to plow up a small area, and they finish the cultivation by hand, while others devote their whole time to cutting wood for a living.

Mr. MADDEN. What do they do with the wood? Mr. FERRIS. I guess they toast their toes by it. They have eight months darkness and the thermometer goes down to 80° below zero. They need firewood worse than anything else, and somebody ought to build a fire under some of these moving picture fellows and stop them from misrepresenting these things

in the East, and their own Agricultural Department says so.

Mr. JOHNSON of Washington. Why should they be cutting
wood in a country where the wood is mostly conserved and the

Mr. FERRIS. I will get to that. The gentleman and I are pretty nearly in agreement about that. I have a plan to pro-

pose about that, and I will come to it presently

The reports even show that the agricultural agent in charge up there has even become vexed at the lack of knowledge on the part of our people in the States as to true conditions in Alaska. You will observe, he says, that in that wonderful valley, which has been pictured to us as the great millenium of agriculture, that less than 200 homesteaders are there, and that there are probably not a dozen of them who can cut enough hay to winter a team, many of them having to devote their whole time to cutting wood for a living. How does this compare with the boom literature we find emanating from chamberof-commerce and real-estate men up in that country? I ask this House, Will you employ men to go to Alaska in-charge of your affairs and instruct them to obtain the facts, and when brought home to you free from excitement, free from noise, will you turn them aside and follow the booster sheets and movingpicture shows of the chambers of commerce and interested partles instead? Alaska would not be entitled to have this said about her but for the fact that it is necessary to bring about an awakening to the extent that the Federal Government will not, through a misapprehension, break precedents in making large expenditures of the public moneys for a proposition totally wanting in feasibility, practicability, and common sense.

Again, at page 53 of the same report, we again meet the true

conditions with reference to tame hay, and there the experiment station, after four long years of preparation of the ground, has

the following to say:

As has been stated in former reports, the hay crop is much improved by summer fallowing and frequent cultivating through the summer. The ordinary land will not stand cropping every year without using some fertilizer.

Early seeding is highly important, as it is next to impossible to cure hay cut after the first week in September.

I think it is unnecessary to say to this House, even though many of you have not been connected with agriculture, that where the land has to be plowed each year, or lay idle, that no human being can make it profitable. I have been fortunate in having more or less to do with agriculture all my life, and I think every farmer in this House will bear me out in the state-ment that the uncertainty of getting a "stand" is so great that unless it would stand from 10 to 20 years it would not be considered valuable for a crop. In the report you will observe that they treat tame hay as an annual crop that must be planted yearly, and the report goes on to say that the land can be cropped only every other year.

I shall not devote more time in calling attention to the numerous and voluminous reports that show conditions in Alaska and the preposterousness of trying to hold out to this Govern-ment or anyone else the fact that agriculture in Alaska will ever afford any tonnage for a railroad. The only possible good such railroads could serve would be to carry in food from the States to ward off starvation from the people who live within, and I think the excerpts from the reports of the man on the ground in charge warrant a statement as drastic as this one.

At page 22 of Bulletin 36, by ex-Secretary of the Interior Walter L. Fisher, it being a bulletin from the Bureau of Mines, he there very ably discusses the method of opening coal mines, the inadvisability of Government operation, and so forth. His

words on pages 22 and 23 are as follows:

METHODS OF OPENING THE ALASKAN COAL FIELDS.

[Page 22, Bulletin 36. By Mr. W. L. Fisher, Bureau of Mines.]
On the other hand, direct Government operation, including the mining and the selling of coal, involves such deep and far-reaching changes, both of policy and of administration, that there is no likelihood at the present time of its adoption to the exclusion of private operation. Unlike the Government ownership of railroads, public coal mining has never been held by the courts to be a function of government. It would be regarded by many sincere and disinterested citizens as an invasion of the field of private enterprise, and would involve such general and uncompromising opposition that even those who believe in its adoption as a matter of principle should not insist upon tying up the coal fields of Alaska until the great economic and political questions that are involved in its exclusive application to these fields have been fought out to a practical conclusion. The true function of government is not merely the preservation of public order or the regulation of the conduct of Individuals, but the carrying on of any enterprise which will promote the welfare of the community as a whole more effectively if carried on by the organized community than if left to the voluntary action of individual members of the community. But to determine whether a particular activity answers this test depends in every instance on a final and complete analysis involving a consideration not only of Immediate results, but of the far-reaching consequences upon humanity and upon the social order. While, therefore, much can be said in favor of permitting the Government to enter experimentally into those fields upon which industrial development and the welfare of society depend, which perhaps may in the future include the development and distribution of power and the means by which power may be created, I do not believe that the Government alone should preempt these fields or exclusively assume their development by private enterprise can not be effectively controlled. For this rea [Page 22, Bulletin 36. By Mr. W. L. Fisher, Bureau of Mines.]

to the policy of having the Government alone own and mine Alaskan conl.

Here it will be observed that ex-Secretary Fisher is inclined to be against having the Federal Government mine the coal in Alaska, and he is undoubtedly right about it. The building of a railroad in Alaska does not in any sense soive the problem, but, on the other hand, it must yet be met. We should first bravely meet the problem and then solve the railroad proposition later. I do not always agree with ex-Secretary Fisher in all things, but he deals so clearly with problems that are of great moment to our people that the country may well find itself indebted to him for it.

Again, at pages 27 and 28 of Bulletin 36 of the Bureau of

Mines, by ex-Secretary Fisher, he says:

CONDITIONS TO BE INCORPORATED IN COAL LEASES

With records at hand giving the results of a large volume and great variety of experience covering the operations of both private and public coal-land leases in our own and many other countries, it should not be difficult to decide upon the ordinary conditions and requirements that should be incorporated in a leasing system for the Alaska coal fields—working conditions that will meet the legitimate demands of the prospector, the investor, and the operator, safeguard the health and life of the mine worker and the operator, safeguard the health and life of the mine worker and the property of the Government, to the end that the public may secure an adequate supply of fuel at the lowest cost consistent with these conditions.

It may be practicable to provide in connection with the renewal of leases at their termination that such renewals shall be subject to the then existing laws applicable thereto. This principle has been successfully adopted in the Australian leases. Our first leases can well be made more favorable than those which follow, so that prompt development may be secured; and if they are for reasonable but fixed periods, and if we lease only as much of our coal lands as may be required for the existing market and its effective extension, we can thus proceed experimentally, correcting early mistakes and meeting future conditions as they arise.

The prime requisites of a leasing system are that only sufficient coal lands should be leased to meet the existing market and encourage its development; that the terms of the lease should be such as to attract capital and protect both the capital invested and the public interest; that the quantity leased to any one lesses should be limited to the amount that can be profitably mined as a unit and yet be large enough to attract investors; that the lessee should be limited to the amount that can be profitably mined as a unit and yet be large enough to attract investors; that the lessee shall pay his royalty as he mines his coal; that this shall annually amount to at

Here ex-Secretary Fisher shows with amazing clearness that it would be easy to incorporate in the lease provisions which would meet all the legitimate demands of the prospector, the inventor, the operator, and well safeguard the life and property of the mine worker and likewise the property of the Federal Government. At almost the same breath he shows that the public may secure an adequate amount of fuel at a low cost, further explaining how safeguards could be placed in the leases to ward off monopoly and viciousness on the part of any of those who may enter the field for mining purposes.

Again, on page 23 of Bulletin 36 from the Bureau of Mines.

ex-Secretary Fisher dwells on the many advantages of the

leasing system. His words are as follows:

SOME ADVANTAGES OF AND OBJECTIONS TO THE LEASING OF COAL LANDS.

Page 23, Bulletin 36. By Mr. W. L. Fisher.]

I believe that the leasing system avoids the controversies and the difficulties of both extremes of public and of private ownership. It has been adopted with conspicuous success in the great mining communities of Australia and New Zealand. It is now the established law of the Yukon territory lying in Cannula just across the border line from Alaska. It is the system under which much of the privately owned coal land of the United States is in fact to-day being developed. Under it we can insert as matters of contract and as conditions to which the lessee voluntarily consents those regulations and requirements which promote the public interest, the enforcement of some of which by mandatory law might be unconstitutional. By making the terms of our leases liberal we can make them even more attractive to capital than if we adopt the policy of an outright sale of the fee.

Let us consider for a moment what ordinarily happens with coal land that is sold outright, Comparatively little of it is mined by the original purchaser. He usually disposes of his title to a succession of others, each of whom in turn adds to the cost of his purchase the profit in consideration of which he sells, and with increasing frequency the final result is the operation of the coal mines by a lessee, who must pay a return on these accumulated profits and who adds his own, transferring the burden of it all to the consumer. One hundred and fifty-six ferring the burden of it all to the consumer. One hundred and fifty-six million tons of coal, or 34 per cent of the total production of the United States for the year 1900s, were mined from lands operated under private leases, and these leases are common in every coal-mining State, naturally much more so in some States than in others. Considering the naturally much more so in some States than in others. Considering the continent, about 90 per cent of the area in the Pocahontas district and

about 60 per cent of that in the New River district are mined on a private-lease basis, which pays the lessor a royalty fee averaging 10 cents per ton.

Here it will be observed that the lease can be so arranged that it will be attractive to investors to come and develop Alaska; then Alaska's purposes will all have been served and our Government will have practiced prudence and economy. We will only be walking in the wake of New Zealand and other countries that are carrying on coal mining in this way and by this system the Alaska Territory may reach her highest goal

of development.

Even if railroads should be built by the Federal Government, the real problem yet stares you in the face of How shall the coal be mined? How shall it be handled? How is monopoly to be crushed? How shall the weak be protected from the strong? All these, nay more, questions stare you in the face as before. Why not solve the real problem first? Then, if conditions do not hold out sufficient inducements to invite railroads, wagon roads, and other developments, then it would be time enough, after a fair trial, to look to Government ownership and the knotty problems that go with it.

On this proposition of leasing, I again call your attention to the words of ex-Secretary of the Interior Hon. Walter L. Fisher, appearing on page 132 of the Senate hearings, and which

They will all be agreed upon the proposition that the way to handle these fields is to have the Government lease them, and lease them upon terms that will encourage development, will protect the operator, and will give him a far better chance in the practical operation of the coal mines than he can possibly get under the existing system. You do not propose to throw this coal land open under the present law except in very small quantities, so small that it is not profitable to operate, so small that certainly if there is any operation it is upon the most uneconomic basis.

Further, on page 133 of the Senate hearings, speaking of the leasing plan and the method of opening Alaska, ex-Secretary

Fisher says:

Now, the Federal Government can make a lease that will make the royalty whatever it wants, and it can impose conditions with regard to the protection of the interests of the miners and the workmen that will be right and proper—not unreasonable, not finical, or anything of that kind, but right, and if that involves a financial expense on the operator that ought to be taken into consideration, it can be taken off the royalty. So far as I am concerned, I do not care whether the royalty amounts to anything or not in cash money if the Government gets the things it wants and if the public gets the things it ought to get instead of actual money.

I am again proud to refer to the remarks of ex-Secretary Fisher, at page 135 of the Senate hearings, as follows:

In the past we have made land grants, and we have given other assistance to railroads. I think that time has definitely gone by. I do not believe that Congress is going to make any more land grants in aid of railroads.

Now, as to the question of what would happen in the event a leasing system properly safeguarded were put into vogue in Alaska, we are again proud to have what ex-Secretary Fisher says, as shown at page 140 of the Senate Hearings, the exact colloquy being as follows:

colloquy being as follows:

Senator Walsh. You are apparently of the opinion, Mr. Fisher, that if these roads were built, or if any of them was to be built to the coal fields, and a law were passed providing for the leasing of coal lands, that lessees would appear in abundance?

Mr. Fisher. I have no doubt whatever of it, Senator. I have been told by many men that there would not be any question about it.

Senator Walsh. If, then, such an act were passed making provision for the disposition of the coal land under such a system as that, so that the coal lands were to be opened up, would it be your opinion, then, that private enterprise would construct these lines in order to carry out the coal thus to be mined?

Mr. Fisher. I think private interests would construct lines necessary to carry out the coal, both at the Bering field and at the Matanuska fields.

Senator Walsh. Under a leasing system?

Schator Walsh. Under a leasing system? Mr. Fisher. I think so.

I am in favor of leasing the coal lands in Alaska on a royalty basis, just as a farmer would lense his farm for one-third of the wheat or one-fourth of the cotton, or the usual crop rent, so that the man who mines coal in that country will not only make a profit for himself, but for the Federal Government and for Alaska herself, and will help develop the country-with no scandal, no noise, no buncombe, no Guggenheimism, and no blinding, blighting, idiotic statements, challenging the patriotism of men who are here to do their duty. [Applause.]

The leasing system is one you will have to come to anyway.

We are doing it in Oklahoma, we are doing it everywhere, and now I ask the gentleman from Alaska [Mr. WICKERSHAM] how does he stand on a leasing law? You were against it in the

hearings.

Mr. WICKERSHAM. What is the use of a leasing law if there is no coal up there, as the gentleman says there is not?

Mr. FERRIS. The "gentleman" does not say there is no

coal there. He has never said so and he does not say so now. but you are getting the cart before the horse in that way; we

But I want to know how does the gentleman stand on a leasing law?

Mr. WICKERSHAM. I am in favor of it, provided that it is so arranged that the Guggenheims can not get control of it.

Mr. FERRIS. The gentleman did not so state in the hearings. The gentleman then said that he was against a leasing law.

Mr. WICKERSHAM. Yes-

Mr. FERRIS. What has changed his opinion?

Mr. WICKERSHAM. Nothing.

Mr. FERRIS. Is the gentleman for it or against it?

Mr. WICKERSHAM, I am against it if-

Mr. FERRIS. He who is in favor of real conservation, of real development, is in favor of opening the mines under a leasing law free from exploitation.

Mr. WICKERSHAM. Will the gentleman let me answer his

Mr. FERRIS. Yes. Mr. WICKERSHAM. I am in favor of a leasing law such as is indicated in the language of President Wilson in his last

message. Is the gentleman in favor of that?

Mr. FERRIS. I do not recall just what that language was, but I am in favor of more that President Wilson stands for than is the gentleman from Alaska. The gentleman wants to drag us up into Alaska to spend \$36,000,000, where he only has 35,000 white souls with only the pitiful increase of 733 souls for the last 10 years.

Mr. HARDY. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HARDY. Can the gentleman expect a man to go up into Alaska mining coal and getting enough out of it to pay \$1 a

pound for potatoes that they must have?

Mr. FERRIS. Well, the gentleman has asked a question that will call for a considerable digression, and I do not think he expects me to go into that. I have a way of remedying that. If you lease the coal and control monopoly by Federal and trust legislation, you have solved the problem. Whether you pass the railroad bill or not, you have to come to the lease law for Alaska, and you know it. We are merely getting the cart before the horse. I am not in favor of the Guggenheims grabbing any more of Alaska, and I am not in favor of letting anybody else grab Alaska, but, on the contrary, I am in favor of leasing the minerals of Alaska, and that is the only way to solve the problem.

Mr. HARDY. Will the gentleman yield?
Mr. FERRIS. Yes.
Mr. HARDY. Would anybody go up there and accept a lease under the present conditions and the law?
Mr. FERRIS. Yes; they would be glad to do it. The hearings are full of the names of people crying to do it.
Mr. HARDY. Under present conditions?

Mr. HARDY. Under present conditions? Mr. FERRIS. Under present conditions. There is no lease law on the statute books. It is the duty of this brilliant, clear-headed, progressive Wilson administration to give Alaska laws which will enable them to lease these lands; and they ought to do it without any more ceremony, and I welcome the aid of the Progressives and the Republicans to do it.

Mr. LENROOT. Will the gentleman yield?

Mr. FERRIS. I will. Mr. LENROOT. I am thoroughly in accord with the gentleman.

Mr. FERRIS.

Mr. FERRIS. I know the gentleman is. Mr. LENROOT. I want the gentleman to tell the House what reason he has to believe that under proper laws which will guard against monopoly the railroads will be built into these fields?

Mr. FERRIS. Read Mr. Fisher's statement in his bulletin on Alaska. He says in substance that he has no doubt that they

will, and I believe that they will.

Mr. LENROOT. Does the gentleman place greater credence in the judgment of ex-Secretary Fisher, a Republican, than he does in the statements and opinions of Secretary Lane?

Mr. FERRIS. Not at all. I think they are both clearheaded, patriotic gentlemen; but because men happen to differ in opinion on a single proposition, it is no sign that they are lacking in patriotism, intelligence, or true worth that goes to make up manhood.

Mr. SIMS. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. SIMS. In case the Government builds the railroad, could not it lease the property for better returns?

Mr. FERRIS. Possibly it could and possibly it could not;

should solve the conservation proposition first and build the railroads later.

Mr. WICKERSHAM. Will the gentleman yield?

Mr. FERRIS. Certainly. Mr. WICKERSHAM. Does the gentleman remember that Secretary Fisher appeared before the Committee on the Territories and strongly recommended this bill?

Mr. FERRIS. I do; he was in favor of the bill, and he was

in favor of a lease law, which the gentleman did not favor and is not in favor of now.

Mr. LENROOT. There is nothing inconsistent with this bill

and a leasing law.

Mr. FERRIS. I think the leasing law makes this bill unnecessary.

Mr. HARDY. I think I am with the gentleman for a lease

Mr. FERRIS. And I want to say to the House that if anybody thinks that the appropriation of \$36,000,000 out of the Treasury at this time will stop the noise and clamor for more railroad appropriations, he is wrong. I want to call attention to the fact that the passage of this bill and an appropriation of \$36,000,000 will in no sense solve the problem in Alaska. there a man in the Progressive Party, is there a man in the Republican Party or in the Democratic Party, who would stand up here and advocate that the Federal Government ought to go up there with a pickax and dig that coal out and load it on to freight cars? No good man would have the temerity to stand up and advocate any such a thing as that.

Mr. BRYAN. Mr. Chairman, I certainly believe it will be

all right for Uncle Sam to do that.

Mr. FERRIS. There is one lone Progressive.
Mr. BRYAN. And supply the market with coalMr. FERRIS. Brethren, are there any others? [Laughter.]

Brethren, are there any others? [Laughter.] Mr. BRYAN. It will be so much better than the West Virginia scheme and the Colorado scheme that there will be no comparison.

Mr. FERRIS. Can there be others? Mr. Chairman, there is a sample of the Progressive Party for you. There is a man who would have the Federal Government leave the ordinary functions of government behind and go up with a pick in hand to dig coal in Alaska. What do you think of that? [Laughter.] I see 19 or 20 good Progressive Party men sitting around here, all good fellows, who would not think of such a thing as that, They are all lovable, good fellows, that have the milk of human kindness in them, and I am with them lots of the time; but what a spectacle that would be. Still, the gentleman lives near Seattle, where the moving pictures come from, so that may account for it. [Laughter.]

Mr. BRYAN. I will state this, that we have none of those

Indian shows which the gentleman has spoken about, with

Buffalo Bill as a central figure.

Mr. FERRIS. I know the gentleman is a few days in ad-

vance of us on that.

Mr. TOWNER. Mr. Chairman, I would like to ask the gentleman if he thinks, seriously, that with a leasing system any railroads would be constructed to the two coal fields that we have in Alaska?

Mr. FERRIS. Undoubtedly; and they are clamoring to-day and they will do it, and we can put the protection of the Interstate Commerce Commission around them so that they can practice neither monopoly nor extortion, and that is the sensi-

Mr. TOWNER. I had supposed that the reason that these railroad projects to these coal fields had been abandoned was because the projectors could not get hold of the coal fields.

not that the gentleman's idea?

That is largely true. No one can mine coal Mr. FERRIS. there now. A lease law will cure this, so things can move on without scandal and true conservation will be in vogue.

Mr. TOWNER. I know that is very true, and I am with the entleman on the leasing proposition; and is it not likely, if that is true, that a leasing system would prevent any large monopolization, or certainly control, of those coal fields?

Mr. FERRIS. It would, because we could write into the face

of the lease every safeguard that we wanted in there.

Mr. TOWNER. That being true, would any of these syndicates—these people who have been building railroads, or any other large interests that would take up railroad building-be likely to go to the coal fields?

Mr. FERRIS. I think they would if they could get tonnage. Mr. TOWNER. That is a problem I think we will have to

consider very seriously.

Mr. FERRIS. True, indeed.

Mr. TOWNER. The leasing system will do no good unless the coal can be taken to the seaboard.

Mr. FERRIS. True enough,

Mr. TOWNER. And it will not be worth while for us to pass leasing law unless that will result in allowing the coal that is mined to be taken out and made available.

Mr. FERRIS. Precisely; but let me answer the gentleman. Mr. MADDEN. Suppose that we have a railroad and that we do not have a lease law; how will we get the coal to the seaboard?

Mr. FERRIS. Mr. Chairman, I want to answer the gentleman from Iowa. I have ample authority here that I may not have time to present; but it shows that the two coal fields that are merchantable in character are very near the coast.

The Bering Sea field is 25 miles from Cordova Bay. other one has a railroad built 70 miles above Seward and by the construction of 110 miles more will go clear through to the Matanuska coal field and will be built if they can get the tonnage. The history of railroad construction since it began has been based on the fundamental principle of tonnage, and tonnage is a thing that brings railroads—nothing else. And with a lease law you have that tonnage. Why? Because men can be made certain in their investments, can know what they can earn, can know what the Government will exact in the way of royalty, will know on the face of the contract precisely what they have to do; they will know that instead of being governed by a noise, they will be governed by law, by contractual relations, by decent relations, which will bring honest, patriotic development; that there will be no monopoly, that there will be no oppression of labor, that there will be no extortion of freight rates, or any of the things of which both the gentleman and myself complain.

Mr. TOWNER. One other thing I want to call attention to. In reading these hearings-I do not want to take up the gen-

tleman's time.

Mr. FERRIS. I know, but we are a little short of time, if

the gentleman will pardon me.

Mr. TOWNER. Then I will not press the inquiry.

Mr. FERRIS. I dislike very much not to be able to yield further; I like to be considerate and at all times courteous to Members, but I must hasten on. Passing from the agricultural phase of it, I want to say this, particularly to my own side of the House. I have probably less source of information and right to make a suggestion to my own side of the House than anyone here, but nevertheless I am going to venture one. I want to call attention to the growth of appropriations.

The Senator from Ohio [Mr. Burron] did it more for-cibly than I can hope to do and I have kidnaped some of his figures and used some of my own. We promised the people in our platform that we would be careful in our expenditure of the people's money and, without any criticism, I believe our party is pledged to it, and I think every Democrat here can point with pride not only to-day but as long as he is here, to the great strides we have made in our progress and development and along lines that will tend to put Woodrow Wilson and ment and along lines that will tend to put woodlow which his administration and our party in history as a great progressive set of men making up a Democratic Party that proposes to do something. Now, I do not want to see anything that tends to blight or blast our beautiful prospects by a wild expenditure of money that is not based on something fundamentally sound. Now, let me call attention to the growth of appropriations. In the Army appropriation bill of 1873 the appropriations were \$28,000,000. In 1914 the appropriations were \$94,000,000. The naval appropriation bill in 1873 was \$18,000,000, and in 1914, \$140,000.000. The appropriations for rivers and harbors in 1873 were \$5,000,000; in 1914, they were \$51,000,000. The Department of Agriculture in 1881 had an appropriation of \$253,000; in 1914 it had an appropriation of \$17,000,000. We appropriated for pensions in 1873, \$30,000,000; in 1914, \$180,000,000. The total appropriation for the Forty-third Congress amounted to \$653,794,991; in the Sixty-first Congress we appropriated \$2,654,584,510.90.

Senator Burron calls attention to the fact we have increased our appropriations 366 times since 1790, while our population has only increased 24 times. Now what is the result? When every one of these appropriations started they said this will only be for a few years and we will hold them down next vear.

It shall not be my purpose to condemn any one of the above appropriations, for, on the contrary, we can all recognize good in the expenditures of the money and the improvements effected by them. It is always easy to call attention to the good things that money will buy; it is always painful and disturbing to debate the source from whence money comes; it is true in private life, in local municipalities, in the county, in the State governments, and in the National Government. I can not help but feel, however, that it is the duty of some one, somewhere, to

call attention to where we are really drifting. As the above figures disclose, we launch out at a particular time on what looks to be a small venture and a correspondingly small expenditure only to find ourselves a few years later appropriating sums so vast and so enormous that it would stagger the judgment of any man who even had a passing thought for the welfare and perpetuity of the Federal Treasury. I can not think it would be unfair to offer the above growth in appropriations as a somber criterion for what will follow in the event we commit the Federal Government to the owner-ship of railroads, which is more far-reaching, more enormous, and more unfathomable than any of the figures preceding us.

Let us pause for a moment to ascertain something of what Government ownership really means. To ascertain what it really means is important, irrespective of whether we favor it

It means, first, the ultimate taking over of all railroad lines in the United States, aggregating a total mileage of 248,888, and a salaried roll of 1,669,000 employees. It likewise means the taking over of the telephone, telegraph, and express companies and an addition to our pay roll in that regard of 322,044 employees at an annual salary of \$164,825,435.

The total number of Government employees, exclusive of the Army, Navy, and Marine Corps, is 469,528. It is not possible to assume actually what amount of money is estimated to pay these salaries, but the growth in the appropriations made by Congress since it has reached the \$2,000,000,000 mark is indicative of what we are getting into should we add the long list of telephone and telegraph and express companies and railroad salaries to the list. The enormity of such a proceeding can hardly be fathomed or understood.

The United States with her 248,888 miles of railroad is not to be compared with European Government ownership, countries that are densely settled and whose railroad mileage is not to be compared with ours. The 16 European countries which have Government ownership range in mileage from 318 to 37,996. There are five countries in America other than the United States, which have Government ownership, their mileage ranging from 3,526 to 24,726. There are six countries in Asia having Government ownership, the mileage ranging from There are five countries in Africa having Government ownership. The exact mileage is not given separately, but in each case the mileage is so small that it makes comparison unpardonable. Australia has seven subdivisions having Government ownership of railroads, ranging in mileage from

Government ownership would divest the several States of \$103,873,193 in taxes annually, equitably apportioned among the respective States according to the railway mileage in the States. The taxes range from \$130,031 for Delaware to \$7,561,014 for New York. It may well be asserted, and we are undoubtedly within the facts, to say that the purchase and taking over by the Federal Government of the railroads, telephones, telegraph lines, and express companies would increase the personnel of the national pay roll approximately 3,000,000, or, to be exact,

It will be observed that the last 10 presidential elections elected Presidents by a plurality varying from 7,000 to a little more than 2,500,000. Might we not well anticipate what the increase to the Federal pay roll of such a number would amount to in the controlling of a political machine to choke, strangle, and even overthrow this Republic?

But whether we believe in Government ownership or not, this particular project we are discussing is totally lacking in feasi-The construction of a railroad will not solve the problem. Legislation must be passed authorizing the mining and removal of coal and minerals, otherwise a railroad would be of no avail. It has been asserted that Alaska is overrun with grafters and crooks. For my purposes it is not necessary to either affirm or deny this assertion, but, in my opinion, the construction of railroads would increase rather than diminish this element, unless proper safeguards were thrown around the mining and removal of both the coal and the mineral.

Are we going to start in and build all the railroads in Alaska that the moving-picture people want up there? Falcon Joslin, proponent and president of one of the defunct railroads up there, says it will take 10,000 miles of railroad to open Alaska, which calls for an expenditure estimated at \$480,000,000. There are 35,000 white people there, an increase of 733 in 10 years. any Democrat, can any Republican, can any gentleman other than the gentleman from Washington [Mr. Bryan], who wants to have us go up and dig coal and raise potatoes, can anybody justify such a venture as that?

Mr. BRYAN. As far as going into that point you just suggested, they could mine the coal without suspending the Constitution as they did in West Virginia, but I am not suggesting anything in regard to that. But did Falcon Joslin say it would take 10,000 miles of railroad to open Alaska?

Mr. FERRIS. He did in substance. I am not trying to quote verbatim

Mr. BRYAN. Did he not say it would take that to develop Alaska?

Mr. FERRIS. That is only the difference between tweedledee and tweedlednm You give one community in Alaska 733 miles of railroad and there will be 732 other communities that would want a like amount immediately. Here comes a Member of Congress with an appropriation for rivers and harbors in his district. His brother Member across the aisle must have as much as he, and Tom, Dick, and Harry say that they must have as much as he has, and so on ad infinitum.

Mr. MADDEN. What percentage of the present population would be served by these 733 miles of railroad?

Mr. FERRIS. That has been figured out and has been stated

in the last few days. The big bulk of the population lives down on the seacoast, and they do not need the railroads; and the rest of the population is scattered throughout the interior.

Mr. KELLEY of Michigan. Would it bother the gentleman to state what the 10,000 miles of railroad of which this railroad

president speaks would be put in there for?

Mr. FERRIS. The theory is that the chambers of commerce up there want them. That is the main reason, I observe, and the people of Seattle want them, because every time we appro-\$36,000,000 for Alaska, Seattle figures on getting \$30,000,000 of it.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. HUMPHREY of Washington. In order to be entirely fair to Mr. Joslin, for whom I know the gentleman has a high

Mr. FERRIS. I have heard him to be a lovable character.
Mr. HUMPHREY of Washington. Is it not true that in
speaking of the development of Alaska he referred to the time t would be developed until it would have the number of inhabitants of Norway and Sweden?

Mr. FERRIS. That is a blissful time, which will never be

Mr. HUMPHREY of Washington. Was not that the statement?

Mr. FERRIS. I have the statement here, and it does not state that. I have his statement in the hearings and I will print it in my remarks. Mr. Joslin says:

Over 99 per cent of the area of Alaska is public domain. It cost the Government scarcely 2 cents per acre. Less than 1 per cent of the area has been reduced to private ownership. At least 10,000 miles of railroad will be required to develop the Territory.

I will read you another extract over the signature of Falcon Joslin from a letter dated April 15, 1912, addressed to the editor of the New York Times in reply to an editorial that appeared in the Sunday Times on the "United States Railway in Alaska." Mr. Joslin says:

You say, "Doubtless Alaska urgently needs a railway and ought to have one." What Alaska really needs is not "a railway." but many railways. One railway does not develop a continent. The instant need of Alaska is one or two trunk railways connecting tidewater with the navigable river systems of the interior, with two or more spurs opening up the nearest coal fields. One thousand miles of road properly distributed would do this. Even 500 miles might be sufficient to start with, but 10,000 miles of railroad will evidently be required before the Territory is well developed.

Now comes my suggestion:

A SUGGESTED REMEDY.

The citizen or the Representative who stands in opposition to an undertaking should be both able and willing to advance something in its stead more feasible. Three methods of actually opening up the coal mines in Alaska are before us, and only

The first is to permit, in the old way, private individuals to acquire title in fee to the coal lands in Alaska under existing

The gentleman from Alaska [Mr. WICKERSHAM] said in the hearings that he was not in favor of a leasing bill, so we assume ho is in favor of this one.

Now, as to method No. 2: To have the Federal Government own, operate, mine, remove, and market the coal through its own agents and its own instrumentalities; and third, that of having the Federal Government execute a lease properly safeguarded with proper limitations to insure, first, development; second, to prevent monopoly; third, to ward off extortionate prices; and fourth, to prevent abuse and maltreatment of

So far as I am concerned, in the face of conditions here present, I shall take my stand with the leasing method, giving to the Federal Government full power to work out a lease that will be properly safeguarded; that will have due regard for the welfare of Alaska, the welfare of labor, and with no opportunity for selfish monopoly to step in and retard Alaska's

The method I have proposed, I think, will meet with the ardent approval of every patriotic conservationist in the United States; it will be objected to by a few of the anticonservationists of the United States; it may be partially objectionable to probably all of the anticonservationists of the United States. It is this, invite the President, the Department of Justice, and the Secretary of the Interior to join in the drafting of a leasing bill for the Territory of Alaska on a royalty basis, the royalty to be governed and based upon the net profits derived from the mining and removal of the coal. I think the bill should contain a provision carefully drawn which would ward off monopoly, oppression, and extortion, and the provision should go in the face of the lease so the same could not be avoided.

I would place the power to fix the area in the President of the United States, so that Alaska could immediately be put on a working basis without coming back to Congress to have any particular phases of the lease modified or changed. My personal opinion is that the lease contract should likewise contain a strong provision well guarded and the strongest sort of a forfeiture clause for the maltreatment of labor either by reduced

wages, inhuman hours, or other inhuman treatment.

Second. Ample authority should be given the Interstate Commerce Commission over such matters as come under their jurisdiction; power to regulate rates and prevent extortion in that The Alaskan Territorial Legislature should be given power, if they do not already have it, to fix rates within the Territory. A corporation or railway commission within the Territory should likewise be created so railroads would be forced to deal justly with the people and at the same time be reasonably secure in the return of their investment and the operation of their rates.

The mere building of a road does not solve the question as stated; more questions will stare you in the face than before; they would still await solution at your hands, because as the matter now stands the coal claims are all withdrawn from entry; no Secretary of the Interior or President would be willing to restore them under entry and acquirement of the old law.

Too many claims have been initiated by the Guggenheims and others already that might become valid if this course were pursued, so the plan proposed is not only theoretical but it is something that must be done whether railroads are or are not built, and it is my earnest judgment, and I believe I can show from the highest authority that it is the judgment of those who know most about it, that if a course of this kind we're pursued that the door of opportunity to Alaska would swing open; that railroads and wagon roads would follow as fast as the business of the community would warrant; monopoly, graft, and irregular dealing would no longer be present, and the Federal Government could avoid committing itself to the enormous expenditure of \$36,000,000 at this time, which is only to serve as a predicate for the expenditure of millions in the future, so the Federal Government could avoid launching upon a scheme of doubtful propriety without precedent or without information that few, either inside or outside of Congress, can either fathom or understand.

I am full well aware that the treatment accorded Alaska has been difficult for them to forbear. The withdrawal of all their lands from public entry has naturally retarded railroad development, naturally retarded wagon-road development, naturally decreased the production of their mines and resources; and something no doubt should be done. Still, at the present time, to do a thing not properly worked out, to do a thing improperly understood, to do a thing without precedent, to raid the Federal Treasury for a scheme of doubtful propriety, is asking more of the Federal Government than should be expected at our hands.

My friends, did you know that since 1867 but two coal claims have ever proceeded to patent of less than 200 acres? friends, did you know that only 163 homesteads have ever proceeded to patent since 1883? No developments! Alaska has not been treated fairly? Alaska has not been treated fairly, they say; but, my friends, perhaps it has been treated as fairly as it could be treated under the circumstances. What should be done now is to open the door by the leasing system, and proceed orderly and decently up there to open the country.

Suppose for the moment that the Federal Government builds this 733 miles of railroad for \$36,000,000, does anyone think | planes and better things.

that act by itself will open the mines in Alaska, will mine and remove the coal from its hidden walls or load it on to the cars and find a market for it? Does anyone think, either in Congress or out, that the expenditure of such an enormous sum for the construction of three lines of railroad would make the other portions of Alaska less clamorous for their share and

grab at the Public Treasury?

The growth of our appropriations heretofore mentioned belies any such a theory, but, on the contrary, is but the holding out to them of roseate hopes that can never be realized upon as long as even the semblance of economy and prudence remain within the make-up of any of us. Do the proponents of this bill think that the American Congress will spend this enormous sum and construct these precarious lines of railroad and then turn Alaska over to them for exploitation and misuse? Do the proponents or the citizenship of Alaska themselves believe that the Secretary of the Interior or the President will release those Cunningham coal claims and the other partially segregated claims in the Bering and Matanuska coal fields? No; it will not be done; Congress will not permit that; public sentiment through the press and through the country will not permit that; but, on the contrary, we will have an expensive railroad, an expensive undertaking, with no tonnage to patronize the railroad, and with the same troublesome, perplexing problems to confront us that have heretofore perplexed this Nation and retarded the growth of Alaska for the past series of years.

Let us for the moment presuppose that the enactment of a leasing bill-which, after all, is but the placing of the Federal Government in the prudent and careful position that an indi-vidual citizen would place himself in had he coal lands under his ownership—should prove a failure; what, then, would be the status of the Alaska problem? The Federal Government would still have the right to construct a railroad if it then desired it; the Federal Government would still either own its coal lands and mineral lands or the royalties from them; they would still have the key to the safe door of the costly treasury until such time as the matter could be equitably and successfully settled. On the contrary, the proponents of this bill would have the American Congress take a leap in the dark and commit the United States to a policy that is both dangerous and uncertain.

The proposal I have suggested is not a new one, but, on the contrary, a very old and well-defined one. In Australia they have a minister of mines who looks after the leasing and handling of their mines. In our country the Interior Department would doubtless perform that function, and, in my judgment, we are especially blessed with a clear-headed, statesmanlike Secre-In New Zealand, where the leasing system has been in vogue for years, it has worked amicably and admirably; in Nova Scotia the system is in vogue; and it is the leasing of the Alaskan mineral and coal lands where the real solution of this problem must finally lie. It is right, it is just, it is logical. It will open Alaska; it will be workable. No matter what becomes of this railroad scheme, the lease law for Alaska is where we will all finally land. [Loud applause.]

I yield back, Mr. Chairman, any time I may have remaining. The CHAIRMAN. The gentleman from Ohio [Mr. BRUM-

BAUGH] is recognized.

Mr. BRUMBAUGH. Mr. Chairman, the Committee on the Territories of the House of Representatives gave long and careful study during the past summer to the bill which is now, through the honored chairman of the committee, presented to this House for the development of the great rich wonderland of Alaska.

The committee invited and held extensive hearings, hearing freely and fully at great length experts and others from all parts of the United States, Canada, Alaska, and the world at

The results of our labors-the complete reports of the hearings-are printed in book form and have been available to all. It is but fair to state that the committee approached the consideration of this great subject with open minds, and that those of the committee who could or would attend the hearings and thus make up their decision from the evidence in the case and the facts deduced have given their support to this measure; moved to that position wholly by the justice and benefits of this great measure both to all the people of the United States as well as to the people of Alaska themselves.

PRESIDENT WILSON'S STATEMENT FOR ALASKA.

We are more than gratified that our position is so completely sustained by our great President, whose wonderful grasp of affairs and fine statesmanship has not only met every delicate emergency with consummate ability but whose keen sense of right and justice is leading the thought of the world to higher

You all heard what he said in his masterly address before the House and Senate December 2 last on the subject of the need, the benefits, and the justice of Alaskan development. President speaks of Alaska as a great storehouse, and points out that the development of Alaska is an imperative duty that confronts us. I want to refresh your minds with his clear, logical, and forceful statement based on reports obtained from most minute and thorough inspection of all parts of Alaska. The President says:

most minute and thorough inspection of all parts of Alaska. The President says:

A duty faces us with regard to Alaska which seems to me very pressing and very imperative; perhaps I should say a double duty, for it concerns both the political and the material development of the Territory. The people of Alaska should be given the full Territorial form of government, and Alaska, as a storehouse, should be unlocked. One key to it is a system of railways. These the Government should itself build and administer, and the ports and terminals should itself control in the interest of all who wish to use them for the service and development of the country and its people.

But the construction of railways is only the first step; is only thrusting in the key to the storehouse and throwing back the lock and opening the door. How the tempting resources of the country are to be exploited is another matter, to which I shall take the liberty of from time to time calling your attention, for it is a policy which must be worked out by well-considered stages, not upon theory, but upon lines of practical expediency. It is part of our general problem of conservation. We have a freer hand in working out the problem in Alaska than in the States of the Union, and yet the principle and object are the same, where we touch it. We must use the resources of the country, not lock them up. There need be no conflict or jealousy as between State and Federal authorities, for there can be no essential difference of purpose between them. The resources in question must be used, but not destroyed or wasted; used, but not monopolized upon any narrow idea of individual rights as against the abiding interests of communities. That a policy can be worked out by conference and concession which will release these resources, and yet not jeopard or dissipate them, I, for one, have no doubt; and it can be done on lines of regulation which need be no less acceptable to the people and Government of the Nation at large, whose heritage these resources are. We must A FAIR, JUST MEASURE.

We believe the bill herewith presented is a fair, just, and reasonable measure that merits the favorable action of this House. The bill is not only a measure for the development of Alaska, but, as conditions now exist in Alaska, it is a measure for the very preservation and salvation of Alaska.

PRESIDENT ROOSEVELT'S GREAT SERVICE

President Roosevelt did a great service to future generations when he pried the hands of the special interests of greed and avarice, who were planning to take and appropriate this richest country on earth, loose from the throat of Alaska. stop there and to continue in the resultant cessation of activities would and must mean the destruction of Alaska,

We must start Alaska on a new life of industrial freedom and development, or, more properly speaking, simply give Alaska a chance to start and give her that assistance to start that any sensible Government has always given any frontier land; just as the United States in the past has given every new frontier part of the United States assistance to start. And then let Alaska free to work out her own destiny, and Alaska will work it out, and answer the call of the future with fine American States, of fine American citizens to safeguard the Pacific coast and make all possible future wars with the Orient impossible. [Applause.]

GIVE ALASKA UNBIASED CONSIDERATION.

I trust this great question will be considered by this Congress-as all great questions ought to be considered-without party or sectional bias or interests, but with an eye single to the honor and glory of our great land we all love so well and to the great needs of this great Alaska, of such splendid and wonderful possibilities, whose trustees we are, and bound, therefore, by every honor and tradition of the past to treat her fairly, as we have been treated in like cases in every part of our national domain by the Government of the United States.

Mr. Chairman, we know so little about the real Alaska, and the little we know has been all so incorrect, that it may be appropriate to describe briefly the Alaska we would develop.

FALSE CONCEPTIONS OF ALASKA.

Possibly no country on earth has suffered so much by the conception held of the whole land as obtained from the parts of it which are usually visited as has Alaska. The traveler sails along the 7,000 miles of coast line and sees nothing but a high range of snow-capped mountains, with but three gateway valley inlets through them into the great interior beyond, or he visits the Klondike, one of the worst climatic regions on earth, and comes away saying and thinking that like these is He does Alaska the same injustice that a traveler would do the United States who saw only the slums of New York and went away saying and thinking so is all the United States; or who saw only the eternal snow-capped Pikes Peak, of Colorado, knew nothing of the beautiful world beyond, and

went away saying and thinking like Pikes Peak is all of the United States.

ALASKA DESCRIBED BY COMPARISON.

Possibly the best way to describe Alaska is by comparison. To continue thinking of Alaska as a glacier field of snow and ice and mountain limitless wastes is to do violence to truth and ordinary intelligence. Alaska has wide areas of valley lands and timber, with as many varieties of climate as can be found in the northern parts of the Middle States. The warm Japan ocean current does for many parts of Alaska exactly what the Gulf Stream does for Great Britain, Ireland, Norway, and Sweden, and many parts of Alaska has a northern temperate climate, where people can live in all the comforts of the northern Temperate Zone.

ALASKA A WONDERLAND OF WONDERFUL POSSIBILITIES.

We must wake up to the truth and to the fact that here is a great tract of land larger than Norway and Sweden, capable of outranking in population and wealth both of these combined, with a much better climate and much better farm lands, infinitely richer mineral deposits, with rivers navigable more miles than the Mississippi or the Ohio, with valleys where future American States can be planted, where ten to twenty millions of people can live just as comfortably and successfully as they can in northern Minnesota, Wisconsin, the Dakotas, or Canada. In fact, Alaska is a great slumber land awaiting the awakening touch of development; ready to give happy, comfortable homes to millions of people; ready to give and guarantee a cheaper coal supply to all the people of the United States for centuries to come; ready to give us the greatest copper, gold, and silver mines the world has ever known; ready to grow a future brave, strong, hardy race of men and women such as inhabit Norway and Sweden, future American citizens to safeguard our Pacific coast, to defend the Government that will nourish it into life and to give back to us and to do for us infinitely more than we can or need to do or give to Alaska. With this view and conception of its future let us think of Alaska, and thus come to know the possible Alaska of the future and appreciate the grandeur and patriotic responsibility of our part in this great measure now before us.

ALASKA BY COMPARISON.

Alaska's importance and value to the United States can best be comprehended by comparison with other lands of like climate and soil. As a history-making epoch event the purchase of Alaska stands second in importance only to that great epochmaking event in history known as the Louisiana Purchase. Louisiana Purchase consummated by Jefferson doubled the then existing area of the United States, and gave us the great domain of the Union along the Mississippi River from the Gulf of Mexico to Canada and out to the mountain ranges and beyond, and therewith gave us full possession and ownership of the great Mississippi River and its tributaries. The consummation of the Louisiana Purchase by that great future-seeing President and statesman—Thomas Jefferson—was one of the great epoch-making events in the history of the world, and has been regarded by the world as the very flower of consummate statesmanship. It changed the map of the world and the destiny of the Governments of the earth.

Second only in importance to this momentous event of history is the purchase of Alaska from Russia, consummated by Secretary Seward in 1867. During the darkest days of the Civil War, when we feared that England would declare for the South, Russia's mysterious fleet stood out to sea. Later Secretary Seward desired to find a way to pay our moral financial obligation, and he found the excuse to pay the debt by buying from Russia, for \$7,200,000, what was supposed to be worthless Alaska. It has turned out to be like buying a hidden gold mine with a copper 1-cent piece, and our income, measured in dollars and measured in benefits and blessings to all, will prove a like prosperous investment and return on every dollar spent to develop Alaska.

Mr. FESS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BRUMBAUGH. I regret I can not. I have but a little time. I am nearly through. When I have finished I will yield to the gentleman.

Mr. FESS. I wanted to ask the gentleman about the ridicule that Mr. Seward suffered when he bought Alaska.

Mr. BRUMBAUGH. I thank the gentleman. I remember very well that history so states that fact.

ALASKA HOLDS THE FUTURE GOLD SUPPLY OF THE WORLD.

We gave \$7,200,000 for Alaska. Last year we took out of Alaska, in gold alone, about \$22,000,000. In the last 14 years we have taken out of Alaska, in gold, silver, copper, coal, fish, and furs, about \$475,000,000. On account of the lack of shipping and railroad facilities we have hardly begun to scratch the surface of Alaska. No one can estimate the billions of undiscovered wealth awaiting us in this undeveloped, unknown wonderland. In fact, Alaska holds the future gold supply of the world. The Transvaal now furnishes 40 per cent of the world's supply of gold. When we shall have permitted Alaska to develop in a normal, natural way, Alaska will furnish 40 per cent of the world's supply of gold.

COMPARISON AS TO SIZE, CLIMATE, VALLEYS, HOMES, AND OPPORTUNITIES.

Any attempted description of this wonderland must necessarily be both brief and very incomplete. Alaska in size: The shape of Alaska is that of a large rectangular with two long, broad wings. If Alaska were imagined to be placed upon the map of the United States, the first wing would begin at Columbia, S. C., and the body of Alaska would cover the States of Illinois, Missouri, Kansas, Iowa, Nebraska, Wisconsin, Minnesota, and North and South Dakota. The second broad, long wing would reach from Illinois down through the States, through Texas, and out into the Pacific Ocean. The body of Alaska lies alongside of British Canada; it almost touches the Empire of Russia, while its wing reaches down from out of the Western Hemisphere into the Eastern Hemisphere, sweeping north of the Empire of Japan. In square miles Alaska is larger than Norway, Sweden, Finland, England, Scotland, and Ireland com-bined. It is one-half times larger than the thirteen original States: it is as large as the United States east of the Mississippi River; it is 12 times the size of the State of New York; and in its present undeveloped condition, with but few of its known gold mines imperfectly worked, it produces yearly as much gold as the great gold-producing State of California. It has a climate as varied as that of Texas and Dakota, while it holds in its great area the greatest gold and copper mines and coal fields on earth and waits to house and home millions of American citizens. Its climate is more inviting, its soil more productive, with more acres of farm lands, than that of the great nations of Norway, Sweden, or Finland, which house and home more than 11,000,000 of the earth's hardiest, healthiest The rivers abound with valuable fish; one-half of the world's supply of salmon comes from Alaska. On account of the Japan Current the valleys have the same climate as the northern parts of the United States or Canada. The summers there are long enough to permit the crops to ripen nicely. The winters for the interior valleys are about like the Dakotas

or Minnesota and adjoining Canada.

Alaska's great river, the Yukon, is navigable more than 2,000 miles and is said to discharge one-third more water than the Mississippi. The Tanana River is the Ohio River of Alaska. Alaska has more coal in her hills than Pennsylvania, Ohio, and the Virginias; more copper than Montana and Arizona; more gold than California and Colorado; more tin than Wales; more fish than the balance of the waters of America.

THE POSSIBLE ALASKA-FARMING AND AGRICULTURE,

From Government reports-not statistics furnished by the "interests" or by their paid lobby—let us see what Alaska might become in a very few years as an agricultural country. In Europe and Russian Provinces lying north of latitude 60° like Alaska as to latitude-Alaska lies between 54° 30' and The census statistics show us that there are now living in such valleys as they have fit for cultivation, together with the population of the cities, more than 11,000,000 people. There is under cultivation 8,373,000 acres of land, which produce yearly as follows: Wheat, 6,000,000 bushels; rye, 36,000,000 bushels; barley, 26,000,000 bushels; oats, 120,000,000 bushels; potatoes, 110,000,000 bushels; and about 8,000,000 tons of hay. The live stock is as follows: stock is as follows: Horses, 2,000,000; cattle, 6,000,000; sheep, 4,000,000; hogs, 2,000,000; goats, 400,000; reindeers, 500,000.

FUTURE ALASKA COMPARED WITH NORWAY AND SWEDEN.

Compared with the above, let us see what Alaska could do. A study of the topography, climate, native plants, and crops shows that the conditions are very similar in the two regions, with the advantages in favor of Alaska. All the above could be produced in Alaska and more. In 1910 Prof. C. C. Georgeson, a man of wide practical experience, whom all agree thoroughly trustworthy and reliable, estimated the tillable and pasture land of Alaska at 64,000,000 acres, as against 8,000 000 acres in the above Provinces, which sustain more than 11,000,000 people. Mr. J. W. Neal, who is in charge of the Government agricultural experiment station farm at Fairbanks, Alaska, states that by actual survey there are 9,700,000 agricultural acres of land in the Valley of the Tanana. This valley alone could, therefore, support more people and raise more agricultural products than the Provinces of Norway and Sweden

and Finland, with all the live stock, crops, and people above mentioned

AGRICULTURAL POSSIBILITIES OF ALASKA.

Most people are incredulous when told of the fine agricultural possibilities in Alaska, because they imagine that the country lacks sunlight. They forget that every spot on the earth's surface during the course of the 12 months has the same amount of The shortest day in Alaska is the 22d day of Desunshine. cember, when it has not more than 2 or 3 hours of sunshine, but 6 to 8 workable hours of twilight. On the 22d day of June the Tanana Valley has from 21 to 22 hours of direct, vigorous sunshine and heat; and all the crops mentioned above are grown, matured, and harvested in the 4 months of this most constant sunshine and heat. During these 6 months the Tanana Valley has three-fourths of the year's sunshine-more sunshine in a like period of time than any point on the earth's surface south of it; more sunshine than California, Ohio, Georgia, or Florida has in the same period of time.

Mr. Chairman, I know the facts I have stated and the deductions I have made about the climatic conditions and the agricultural possibilities of Alaska possibly will be doubted by some and disputed by others. I have not given statistics furnished by the agents or interests of the Morgan-Guggenheim Syndicate, but statistics furnished by the departments of the United States Government itself. Of the immense, inexhaustable min-eral deposits of coal, gold, copper, tin, lead, zinc, and so forth, there can be no dispute, and I therefore omit reference to these. I want to back up these statistics by the best possible evidencethe testimony of uninterested parties who know Alaska from personal observation. I believe it is reliable information we all want, and that when we find these things to be true that our sense of right, justice, as well as of national security and profit, will lead us to vote for this bill.

In the Washington Post of January 12, 1914, there appeared an interview with the Rev. Dr. P. T. Rowe, bishop of Alaska. The reverend bishop resides at Sitka, Alaska, and I desire to here insert his testimony on Alaska as given in said interview. The reverend bishop spoke as follows:

CHATS OF VISITORS TO THE CAPITAL.

CHATS OF VISITORS TO THE CAPITAL.

"Alaska and Alaskans are becoming impatient at the continued attitude of the Federal Government in retarding development of the Territory," declares the Rev. Dr. P. T. Rowe, of Sitka, Bishop of Alaska, at the Raleigh. "With a generous policy toward Alaska, even as liberal a policy as the Government has shown toward the Philippines, Alaska will not only go forward with giant strides, but will profit the rest of the country as well as itself.

"Two things are necessary in the course to be pursued by the General Government—a change in the opposition to the extension of transportation facilities, and the releasing of the coal lands. I know these are hackneyed subjects in Washington, but they are live ones in Alaska, and Alaska will not become the great Territory that is possible until the Government has changed its tune. The possibilities in Alaska lie not only in its great mineral deposits—gold and copper—but in its coal and fisheries and its agriculture, and the last named is by no means the least. Prof. Georgeson, the Government agent at Sitka in charge of farm experiments, told me recently that the Tanana Valley alone is capable of producing sufficient crops to take care of 5.000,000 people. And the Tanana is not the only agricultural land in Alaska.

"It is well known that the coal deposits in Alaska are enormous. Our industries are crying for it, but it has been locked up securely in the name of conservation. We have to get our coal now from Australia, and to pay \$25 at ton for it. While I was in Nome, not long ago, two great freighters reached port with several thousand tons each. The Government established a naval base at Seward, but what good is it without coal? Suppose we were to have a war with some Eastern country, where would we get our coal? We could get all we need in Alaska at \$5 at ton.

"Instead of encouraging the extension of transportation facilities, the Government imposed a tax of \$100 a mile annually for the operation of the little narrow-gauge roads that we

SECRETARY LANE'S STATEMENT.

I want to call attention to the statement of Secretary Lane, a thoroughly informed man on Alaskan affairs. In a letter to the Senate committee, among other things, Secretary Lane says:

DEPARTMENT OF THE INTERIOR,
THE SECRETARY OF THE INTERIOR,
Washington, May 15, 1913.

My Dear Senator: My opinion is requested as to Senate bills 48 and 133. These measures, in a word, provide for the construction by the National Government of a railway system in the Territory of Alaska. I favor the adoption of this policy. I believe it to be that under which Alaska will develop most safely and most speedily, and under which the resources of that Territory will most certainly become available to the whole people.

There is but one way to make any country a real part of the world—by the construction of railroads into it. This has been the heart of England's policy in Africa, of Russia's policy in western Asia, and is the prempting hope of the new movement in China. Whoever owns the railways of a country determines very largely the future of that country, the character of its population, the kind of industries they will engage in, and ultimately the nature of the civilization they will enjoy. The policy of governmental ownership of railroads in Alaska seems to me to be the one that will most certainly make for her lasting welfare. To many of our people Alaska is little more than a land of natural wonders, here and there dotted with mining camps and fishing villages. If Alaska is to be nothing more, it is almost a matter of indifference as to who builds her railroads. I have talked with many who know that country well, and I am convinced that we should think of Alaska as a land not only of mines and fisheries, but of towns, farms, mills, and factories, supporting millions of people of the hardlest and most wholesome of the race. If this conception of a possible Alaska is a true one, our legislation should be such as to most surely bring about this possibility, and it seems to me there is less of hazard as to Alaska's future if the Government of the United States owns the railroads which will make its fertile interior valleys accessible from the coast and bring its coal, iron, copper, and other mineral resources within the reach of the world.

This is a new policy for the United States. Very true. This is a

the world.

This is a new policy for the United States. Very true. This is a new part of the United States. And policies properly change with new conditions. The one determining question in all matters of government should be: What is the wise thing to do? The ancient method of opening a country was to build wagon roads. The modern method is to build railroads. To build these railroads curselves and control them may be an experiment, but such a plan does not suggest scandals more shameful or political conditions more unhealthy than many we have known in the new portions of our country under private ownership. And in the end we will be free to establish and maintain our own chosen relationship between Alaska and the rest of the United States unhampered by threats of confiscation or the restraining hand of any merely selfish influences. We can only secure the highest and fullest use of Alaska by making her railways wholly subordinate to her industrial and social life and needs—true public utilities.

Respectfully,

Franklin K. Lane.

Hon. Key Pittman; Chairman Committee on Territories, United States Senate.

These are the words of a statesman, words of patriotic states-

manship. [Applause.]

I desire to further verify the statements I have quoted concerning climatic conditions and agricultural possibilities of Alaska from another witness. I want to briefly quote from the facts condensed and published by Mr. R. H. Stretch, whom, I am informed, is a gentleman of wide experience, trustworthy, conservative, and reliable.

I herewith desire to insert quotations from his compilation of

facts on Alaska:

THE VALUE OF ALASKA TO THE UNITED STATES.

Alaska is a land whose area is equal to one-fifth of the United States, or 12 times that of the State of New York. Its production of gold for the year 1912 was \$17,398.943; that of our gold State, California, whose population is 37 times as great, was only \$19,928,500.

Alaska's per capita production of copper, the mining of which is only begin, is now equal to the per capita production of Montana. It has coal fields of greater area than those of Pennsylvania and arable lands greater than the entire State of Oregon. Tin, iron, gypsum, and oil are found in commercial quantities, and its marble quarries rival those of Vermont.

The reindeer industry established in 1000.

are found in commercial quantities of Vermont.

The reindeer industry, established in 1902 with 1,280 head, has spread until the 47 herds number 38,000 head and promises to become a valuable source of food supply, while the extent of its fishing grounds exceed those of all the States combined and are excelled nowhere in the world.

Its undeveloped water power exceeds that of the entire Pacific Coast

On an investment of \$7,200,000 Alaska has given us in return, since 1867 (and by far the greater portion since 1899, or only 14 years), as shown in the reports of the United States Geological Survey, Director of the Mint, and other official documents:

Silver Copper Coal Coal Cother minerals	1, 824, 364 13, 377, 194 355, 489 993, 119
Fisheries and furs	240, 830, 168
Total	470, 399, 053
And produced in 1912, as per preliminary estimates:	21 580 000

Gold, silver, and copper Other minerals Fish and furs Miscellaneous	21, 580, 000 360, 000 18, 120, 132 394, 046
Total	40, 354, 178

Total	40, 354, 178
The commerce of Alaska for 1912 was: Imports Exports	26, 758, 341 45, 982, 719
metat .	70 744 000

These results have been obtained at a cost to the Government of about \$13,000,000 over and above the revenues collected in 45 years, showing a profit to the Nation of practically \$450,000,000 on an investment of \$20,000,000. Contrast this with the money spent in the Philippines on an alien nation, and with the results which will not bear comparison. If Alaska has achieved so large a measure of success under adverse conditions of every kind, what may not the results be under more favorable auspices?

SCENIC ALASKA.

Alaska is a country unique in its geographical situation, unique in its climate, and unique in its physical beauties. Point Barrow, its northernmost cape, is warmer than any point in the world as far north of the Equator, and its southern shores, bordering the North Pacific Ocean, are

likewise warmer than any point in the world in similar latitudes during the winter months, as the result of the beneficent influence of the Japan Current.

CLIMATE.

Alaska has its mountain areas with their snow fields and glaciers, with the loftiest summits in the Union, and broad expanses of mossy tundra, but it has also wide areas of valley lands and timber, and nearly as many varieties of climate as can be found in the Eastern and Middle States, controlled largely by the principal mountain ranges and by the Great Britain, Ireland, and Norway. The following remarks are as true to-day as when written some years ago:

It is not possible to judge of the climate of a country by a look at a map to see how far it is north of the Equator. When many people in the Eastern States, who are more or less acquainted with the inhospitable coast of Labrador, find on a map that the bulk of Alaska lies north of Labrador they appear to conclude that the conditions of life must be infinitely worse up there and that the stories of its ice and snow must be true. The town of Fairbanks, in Alaska, with its mines, farms, electric lights, and all the comforts of modern life, is more than 1,500 miles north of New York and 300 miles north of the southern tip of Greenland at Cape Farewell.

CLIMATIC PROVINCES.

(Authority, maps of the U. S. Weather Bureau.)

CLIMATIC BROVINCES.

(Authority, maps of the U. S. Weather Bureau.)

Special features easily divide the Territory into six natural subdivisions, according to rainfail, temperature, and latitude, the details of which are shown in the accompanying tables.

First. Southeast Alaska, 300 miles long by 125 miles in width, and the coastal region as far west as Cook Inlet is characterized by a heavy rainfail and moderate temperature, the average of the latter for the three winter months being similar to that of Boston and New York. The southeastern portion covers the Alexander Archipelago of some thousand islands, heavily timbered, possessing many available garden spots and a rank foral vegetation. In a narrow belt, lying between the ocean and the Chugach Mountains, this region extends westerly to Cook Inlet, and all its ports for the entire distance of 900 miles are open the year round to the commerce of the world.

Second. The second region covers the southern coast of the Alaska Peninsula, has a moderate rainfail and similar temperature, but it is almost timberless, the forests giving place to grazing lands. Like the first recion, its harbors remain open during the winter.

Third. This covers the entire coastal region of Bering Sea from Unalaska to Point Barrow and beyond, and is characterized by wideareas of tundra and treeless plains, but, like many parts of Arctic Russia, is capable of supporting great herds of reindeer. As might be expected in its 2,000 miles of coast line, the rainfail and temperature vary greatly, both diminishing as we go northward. Including the alaska to Point annual precipitation ranges from 84 inches at Unalaska to Point annual precipitation ranges from 84 inches at Unalaska to his total annual precipitation ranges from 84 inches at Unalaska to his total annual precipitation ranges from 84 inches at Unalaska to his total annual precipitation ranges from 18 inches the many fair and the company of the Country of the

Japan current.

The length of the day at all latitudes is the same on March 21. On June 21 the length of the day at various places in Alaska is closely as given below:

	Degrees.	Hours.	Minutes.
Ketchikan and Prince Rupert, latitude about Skngway, Cordova, Valdez and Seward, latitude	55	17	20
about. Fairbanks, Eagle, Ruby City, Nome, latitude about. Bettles and Coldfoot.	60-81 64-65 67	18 22 24	50 00 00

Note.—The places mentioned are approximately in the latitudes

I have dwelt upon the climatic conditions because you will be told by some who follow me that the Japan current has no effect on Alaska.

Table of Government experimental stations. Climate compares very favorably with towns in Minnesota, Wisconsin, the Dakotas, Washington, and Canada.

VALUE, \$416,992.40 FOR 1911-TOTAL VALUE TO 1912, \$52,252,13

VALUE, \$416,902.40 FOR 1911—TOTAL VALUE TO 1912, \$52,252,125.

The immense herds of seals which annually resort to the Pribliof and St. George Islands in Bering Sea for breeding purposes was estimated at 123,600 on a recent count, being a slight increase over the previous year, and was estimated to consist of mature males, 3,885; young males from pups to 3 years old, 35,781; mature females, 41,480; young females from pups to 2 years old, 42,454; or a total of 39,666 males and 83,934 females.

The former leasing system has been abandoned, and the islands are now under the direct management of the United States Government. The following details are from the annual report of the Department of Commerce and Labor.

	1910	1911
Number of sealskins taken. Gross receipts for same. Average per skin. Net receipts for same! Estimated receipts to United States under old lease system.	\$33.68 \$403,946.94	\$385, 862, 28

¹ From which must be deducted the costs of management.

These herds, numbering 123,600, are all that are left of the 4,600,000 to 5,000,000 which formerly made these islands in Bering Sea their summer rendezvous. Overkilling, raids by poachers of various nationalities, and pelagic, or open-sea, killing having wrought the destruction. Under present conditions and the stoppage of pelagic sealing the herds seem to be increasing in number.

FURS.

VALUE FOR 1912, \$370,519-TOTAL VALUE TO 1912, \$22,216,872.

While the number of fur-bearing animals in Alaska is undoubtedly much smaller than in the days of Russian occupation, the annual output of skins is still an important industry, as may be judged from the following official table covering the year ending December 31, 1912:

	Number.	Value.	A verage value.
Bear, black	618	\$5,676	\$9.18
Bear, brown	23	864	37.65
Bear, cinnamon	9	90	10.00
Bear, glacier	1	10	10.00

GRAIN CROPS AND GRASSES.

[United States agricultural reports and C. C. Georgeson, in charge of experimental stations.]

experimental stations.]

That oats, barley, and rye can be grown successfully has been demonstrated at the experimental stations in the Yukon-Tanana Valleys, as well as in that of the Copper River, and also by the farmers around Fairbanks and in the Susitna Valley, who have cut barley for hay, giving 3 tons to the acre. Much time has been devoted to the study and growth of all kinds of grain from northern countries, and the end is not yet. In the rooms of the bureau may be seen handsome sheaves of all these grains and their cleaned products, 60-day and Finnish oats, as well as hull-less and beardless barley.

The rapid growth of grain applies also to the grasses. Timothy springs up wherever imported hay has been fed to stock, and is rapidly becoming acclimated. Among the 40 native grasses redtop attains a growth breast high in 30 to 40 days, and also seems to be the richest in nitrogen among its congeners. It grows everywhere, but is said to be rebel against annual cutting, so that cropping every other year is recommended.

Several kinds of vetches and peas make excellent wild fodder, but do

Several kinds of vetches and peas make excellent wild fodder, but do not take kindly to cultivation, so that experiments are being made with varieties of alfalfa from Siberia living under conditions similar to those in Alaska, the same being the case with Siberian wheat.

VEGETABLE CROPS.

[United States agricultural reports and C. C. Georgeson, in charge of experimental stations.]

[United States agricultural reports and C. C. Georgeson, in charge of experimental stations.]

It is possible to grow magnificent vegetables in all parts of Alaska, except on the tundras and mountains. To Alaskans they are no novelty, but to strangers unacquainted with the country they are a constant surprise. They include all the products of the Temperate Zone in America, and the bureau has in its exhibit potatoes, turnips, beets, rutabagas, sugar beets, carrots, parsnips, kohirabi, celery, rhubarb, radisbes, onlons, cabbage, cucumbers, peas, and even tomatoes, and in one or two very favored spots even melons have ripened. The samples, both for size and quality, will compare with the markets of New York, although grown more than 1,500 miles north of that city. Every family can have its garden, which will not only furnish the necessities of life, but will beautify the home with a wealth of flowers. These facts have become so well known that notice of them has practically disappeared from the reports of the agricultural stations; but as the potato is so important an item in the daily menu, every effort is being put forth to secure those varieties best adapted to the climatic conditions of rainfall and sunshime. The following facts are from the latest reports of the station located at Fairbanks, in the Tanana Valley, only about a hundred miles south of the Arctic Circle.

Twenty-seven varieties of potatoes were cultivated during the season of 1911, of which three were planted on June 1, nine on June 9, and the remainder on June 10. They matured between September 11 and 22, with a yield at a rate varying from 7,260 to 18,876 pounds per acre on the experimental plats. In the open field three varieties produced 5 tons per acre after sorting and grading on second-year unfertilized ground. The character of the potato depends much on the kind of soil and method of cultivation. The best results are said to be secured by allowing the potato to sprout and setting them out on the surface of the ground with plenty of room b

Alaska is a land of berries, not only in the profusion of fruit but in

Alaska is a land of bettree, not only in the processor of the great variety of species.

Currants, both red and black, abound in southeast Alaska, and in lesser degree elsewhere, and both are remarkable for the size of the fruit and the length of the bunches, rivaling, if not excelling, the best

of the cultivated forms.

Strawberries of good size and excellent flavor abound in and on the coast belt from Yakutat to the Copper River Delta, and have been grossed with cultivated varieties, producing plants of more luxuriant growth than either of the parent forms both as to foliage and fruit.

Some hundred varieties of these hybrids are under cultivation at the Government experimental stations.

Raspberries are characteristic of the interior regions, especially of the Yukon and Tanana Valleys.

Blueberries are universally distributed and fruit in profusion, the berries attaining a diameter of half an inch. So abundant are they that two ladies near Nome put up 119 gallons in one season.

Huckleberries abound through the Pacific coast and interior regions, and form attractive pasturage for bears, both black and grizzlies.

Cranberries, both high and low bush, are characteristic of the interior plateau and Seward Peninsula.

Salmon berries grow luxuriantly in all the coast regions bordering on the Pacific Ocean.

the Pacific Ocean.

If further proof of the climatic conditions and the agricultural possibilities or the wisdom of Alaskan development were needed, the following report should be to all fair-minded people con-

In the fall of 1912, by act of Congress, the Alaska Railway Commission was appointed. The personnel of this commission was as follows: Jay J. Morrow, major, Corps of Engineers, United States Army; Alfred H. Brooks, United States Geological Survey; Leonard M. Cox, civil engineer, United States Navy; Colin M. Ingersoll, consulting

civil engineer, United States Navy; Colin M. Ingersoll, consulting engineer.

Briefly, the duties of this commission were defined by the act of Congress to examine railroad routes from the seaboard to the coal fields and to the interior and navigable waterways, and to recommend in respect to most available routes for railroads in Alaska, which will best develop the country and the resources thereof for the use of the people of the United States.

In their conclusions they state that "the commission is unanimously of opinion that this development should be undertaken at once and prosecuted with vigor; that it can not be accomplished without providing the railroads herein recommended under some system which will insure low transportation charges and the consequent rapid settlement of this new land and the utilization of its great resources." They state further that "the data presented shows that the United States possesses in Alaska a frontier territory of great size and of wonderful industrial possibilities. The commission believes that its climate is favorable to permanent settlement and to agriculture; that its mineral resources are vast and as yet but little exploited; that its population is sparse, but only by reason of its inadequate transportation facilities; and that its people are of the same type of hardy pioneers that have carried the United States frontier to its present limits."

The commission's report to Congress, third session.

Does any sincere, candid man think that this commission

Does any sincere, candid man think that this commission would have so reported if Alaska were the bleak, useless coun-

try its enemies would have you believe it is?

Mr. Chairman, the opposition to Alaskan development has been very severe, and painted a very dark picture of Alaska. But has not this been the same with every new part of the United States? Read the speeches of Congressmen and Senators when the development west of the Mississippi River was contemplated. Daniel Webster thought it could never be inhabited. Senators said nothing can grow there-a vast worthless land. And so we have the critic and pessimist to-day. What charlatans this Government board to state the above if Alaska is what the opponents of Alaskan development say it is.

Mr. HARDY. Will the gentleman permit an interruption

right there for a very brief question?

Mr. BRUMBAUGH. If it will not be taken out of my time.

I want to finish within the limit of my time.

The CHAIRMAN. The Chair will state that it will be taken

out of the gentleman's time.

Mr. HARDY. Does it not appear to the gentleman that the whole question before the House is whether we shall give the resources of Alaska away to private parties or build these railroads and own them ourselves?

Mr. BRUMBAUGH. That is the whole thing in a nutshell. have prepared some tables from Donaldson's great work on the public domain, and I wanted to read them to show what the Government has done for the newer parts of the United States, but the table is so long that I omit it.

DEVELOPMENT OF ALASKA-WHY AND HOW.

The question very naturally arises, first, why should the United States spend the people's money to develop Alaska; second, if we consider development, how shall we develop—by Government control, by Government assistance, by gift, or subsidy? In answer to the question why the Government should assist in the development of Alaska, it can be argued that in fairness we owe this to ourselves and to Alaska as well; that every consideration of duty, obligation, and wisdom demands it, as well as every consideration of national security and national gain. If the development of Alaska is properly safeguarded and the people's rights protected, then the citizens of the United States as well as the Government can hardly fail to realize \$100 for every \$1 expended on Alaska.

SAFEGUARD THE FUEL SUPPLY OF THE FUTURE,

By taxation all the people of the United States helped purchase and pay for Alaska; Alaska therefore belongs to all the people of the United States. The fuel supply of the future is so essential to future generations that these deposits should always be safeguarded to the people of Alaska and the people of the United States, and never be surrended to corporate or to be used free of cost.

private interests to promote any scheme of development of Why, even those representing the interests admitted before the committee that we could get 10,000 miles of railroad built in Alaska if we would give Alaska away to have it done. Do you suppose the syndicate interest would do this in a useless and worthless land?

Again, it can be argued that the Government has always assisted to develop its frontier or its Territories; that this has

been the policy of the Government in the past.

Donaldson, in his great work on Public Domain, a book of over a thousand pages, sets forth in detail what the United States has done to assist the development of different parts of the United States. I had thought to present a table dealing with this subject, but I find the United States has done so much for so many sections to assist in their development that the entire book is full of tables setting forth the work and the amounts expended.

GOVERNMENTAL HELP TO FRONTIER SECTIONS.

The Government began by assisting in the building of the first railroad in the United States-the old Baltimore & Ohiofrom tidewater at Baltimore through the forests to the Ohio River; and this road, with assistance of the old national pikes. told the story of the future greatness of Ohio, Kentucky, Indiana, Illinois, and the other great interior States. Later the Government assisted the great Territories of the West in building the Pacific Railroad, which told the story of the great West.

LET THE GOVERNMENT SPEND MONEY TO ASSIST THE PEOPLE RATHER THAN ON BATTLESHIPS.

In fact, the Government can always and everywhere afford to expend the people's money where that expenditure gives protection to life and property, security to homes and home builders, assistance in opening up new fields to labor that helps to make the necessaries of life more plentiful and cheaper. In fact, the millions that the Government yearly puts into the building of battleships that float the seas in idleness, at great constant expense, to challenge quarrels, can better be spent in opening up such a land as Alaska, providing cheap homes for pioneers, and in assisting its citizens in the flood-swept districts of the country to make safe their homes and the lives of their little ones by assisting in building fortifications to prevent such disasters as befell the cities of Ohio and Indiana and other sections of the United States in the recent great flood which devastated some of the best portions of our fair land.

RAILROAD DEVELOPMENT IN ALASKA

The prime essential in the development of Alaska centers, of course, in railroad building. There has been already constructed in Alaska about 500 miles of railroad. This is all This is all owned by private interests and does not penetrate the interior. and renders, therefore, little aid to the great interior development desired by all.

The consensus of opinion is that some railroad should be built from the south sea of Alaska up through the interior, so that by branch lines it would open the great coal fields and gold fields of the country and the great river valleys for home builders, ending at some great river navigable to the western ocean. Such a railroad, if but one is built, can be constructed with about 400 miles of trackage, with a cost of about \$20, 000,000, that will give over 7,000 miles of traffic by railroad and water, not to speak of the branch lines of the railroad, thus opening up to civilization the great valleys that are able to house and home millions of settlers, support great cities, and give outlet to the greatest coal fields of the world. Such a road, accomplishing such great results, would cost no more than two battleships, or less than one-fortieth of that spent on the Panama Canal, or less than we yearly spend on the Philippines.

THE GREAT ADVANTAGE AND VALUE OF SUCH RAILROAD DEVELOPMENT.

The desirability and immense value of such development and its supreme importance to the United States is most apparent to all. Consider a few of the great results that would come there-from. The southern shores of Alaska furnish the best sen harbors for our vessels and battleships on the western coast, better than at Seattle or Hawaii. These immense, unused harbors on the southern coast of Alaska are on the shortest line by over 1,500 miles from San Francisco and Seattle to the Philippines, Japan, or the Orient. These unused harbors would provide the best and safest defenses for our Navy. It costs this Government \$3,000,000 a year to chip the coal from the United States used by our vessels on the Pacific, while within 25 miles of these harbors we have coal in inexhaustible supplies-six years' shipping coal bill will build the Alaska railroad-equal to our best grade of Pennsylvania or West Virginia coal, ready

FUTURE FUEL SUPPLY OF THE UNITED STATES.

Again, consider the fuel supply of the United States. There are used in the United States yearly 400,000,000 tons of coal. There are used in the United States yearly 400,000,000 tons of coal. There are used 85,000,000 tons per year more coal west of the Mississippi River than is mined west of the Mississippi River. It is plain, therefore, to all that the price of coal is fixed by the few Atlantic States for all the people of the United States. Coal is selling on the western coast for from \$8 and \$10 to \$12 per ton. Government experts, who have made an examination of the situation, report that at our present consumption of coal there is enough coal in Alaska, now explored, of the finest quality, to say nothing of the unknown coal fields of Alaska, to supply our needs for 500 years. In Alaska there is one coal field in area as large as the coal area of the State of Pennsylvania. Now, should we make it possible for Alaska coal to come out to the ocean by this railroad, and then into the United States, a few Atlantic States, and should it save but \$1 per ton on the price of coal, it would save in our coal bill to the people of the United States \$400,000,000 yearly, or twenty times the cost to build the railroad each year, to say nothing of the value of the railroad in opening up the great valleys to home settlers from the United States and the coal supply for our fleet on the Pacific coast. fleet on the Pacific coast.

The consensus of opinion appears to be that the best way to insure the building of the railroad without scandal, collusion, quarrels, and delay is to put the matter entirely in the hands of the President, authorizing him to locate the road and construct

ALASKAN DEVELOPMENT INEVITABLE,

Alaskan development is bound to come in some form or other. It is inevitable. If we do not provide for it, some more just and sensible Congress will. We should not let our incorrect knowledge and information of Alaska work to the detriment of this great undertaking. Because Alaska is not now settled and developed like Norway and Sweden argues nothing. Oklahoma was the same for centuries. The geographies of our grand-fathers had Illinois and Missouri marked "The Great American Desert," and little development occurred therein until the Government gave assistance. Kansas, Nebraska, Colorado, and the great Oregon country remained undeveloped until the Government assisted in the construction of the Pacific Railroad. The poet Bryant, in his "Thanatopsis," compared Oregon to the Balkan Desert of Africa in these words:

Take the wings
Of morning, pierce the Barcan wilderness,
Or lose thyself in the continuous wilderness,
Where rolls the Oregon, and hears no sound
Save his own dashings—

And so forth.

OBJECTIONS AND THE OBJECTORS.

Mr. Chairman, the objectors to Alaskan development may all be classified under two general heads or classes—the constitutional argument need hardly be referred to: First, Government ownership of railroads. Those who say they fear that Alaskan development would commit the Government to Government ownership of railroads. The Government-ownership problem is not in this question at all. Because the United States Government In the past assisted many, many times in many places did not commit the Government to the policy of Government ownership of railroads, and neither will this great commendable states manship and humanitarian-like piece of work commit the Government in any way to the policy of Government ownership of railroads.

THE FELLOW WHO JUST OBJECTS.

Second. Those who object to the Government doing anything anywhere, except in their own locality, but do not object to it there. In fact, when I hear some of these Representatives of sections of our country where the United States Government has done so much, talk, I marvel that they have it in their hearts to do so poorly by Alaska. They just object. The great Jefferson found them crying unconstitutional and objecting to the expense of the Lewis and Clark expedition that made known to the world another world west of the Mississippi River, but the great Jefferson, with faith in the right and the future, did just what his great successor, President Wilson, is now recommending to be done.

THE LOGICAL POSITION OF THE OBJECTORS.

What is the logical position of the objectors who would prevent Alaskan development? For the defeat of railroad building either prevents Alaskan development or hands Alaska over to the syndicate to exploit-a prey to the interests-because without railroads by the Government none but the syndicate can get in or out of Alaska. Everyone must be aware of this. Without meaning to impugn the motives of anyone, yet it appears to me their position, logically, is this:
Those who would defeat railroad building in Alaska are

willing and would continue the useless expense of \$3,000,000 a year shipping coal to our Pacific Fleet. They would continue to expend millions on naval harbors at Hawaii, far out from our coast in the ocean, where coal must be hauled at great expense, and leave unused the fine natural harbor nature has made for us on the south Alaska coast with inexhaustible coal within 25 miles.

They would continue to leave our Pacific Fleet in peril; continue to buy coal from Japan and Australia; ship it from West Virginia and Pennsylvania, playing thus into the hands of the coal monopoly and Shipping Trust. They would leave the coal monopoly go on with the demand resting on West Virginia and Pennsylvania, largely, and let the high prices of coal continue for all time. They would be willing to leave our Pacific coast open to all the dangers of attack which our foolish policy of nondevelopment of Alaska invites.

They would keep out of Alaska all settlers, all home builders, all but the "interests." They would say to the people of Alaska, as brave a race of pioneers as ever braved pioneer dangers in any land or any age, "Bone of our bone, blood of our blood,

leave the land where sleep your dead, or stay and starve."

They would say to the United States Government, "Pull down the flag of progress in Alaska, scuttle the ship of enterprise. beat the retreat on a magnificent opportunity, and abandon a magnificent responsibility."

Gentlemen, it will not be done; Alaskan development is bound to come. If we can not see the opportunity and do it, then some wiser Congress will; for God in His wisdom, I believe, would not permit Alaska to be forever blighted by such senile senility and such supine stupidity as such action as nondevelopment would imply and impose. [Applause.]

We should develop Alaska, because it opens up future homes for future American citizens, and we are legislating well when we open up cheaper homes for the poor. We can thus draw from our congested places in our great cities and solve the labor problems there. The farmers of the United States can find added markets in Alaska and Alaska can furnish the farmers and the business enterprises of the United States with the great fuel supply of the future and prevent coal monopoly and coal famines of the future.

We should develop Alaska because it gives the needed harbors and the greatest security to our ships at sea necessary to guard the Pacific coast. The Pacific coast defense is of the utmost importance, and coal is the one great essential. United States is now purchasing coal in Japan and Australia and we are shipping coal from the coal fields of West Virginia and Pennsylvania to our Pacific fleet. Our naval vessels use 250,000 tons per year on the Pacific coast. In case of war we do not have and could not get enough coal to our fleet on the Pacific coast to last 60 days, for coal is a contraband of war, and during time of war could not be sold to us by any other country. Still more serious is the fact that our coal is carried almost entirely in foreign built and owned vessels, which could not be done in time of war.

We should develop Alaska, because we are pledged to that policy by the Baltimore platform of 1912, which promises immediate development of the resources of Alaska. In fact, platforms of all parties have promised this for the last 25 years. Besides, this has been the policy of the Government in regard to all the new parts of our country in the past. The Government spent \$8,000,000 in the building of the old dirt roads or pikes over the Alleghenys through Pennsylvania; it assisted Kentucky, Ohio, and other interior States by building the old Baltimore & Ohio from Baltimore to the Ohio River; it assisted the Territories of the West by giving the immense sum of 155,504,994 acres of land up to the year 1868 as a bonus to railroads through the West. In the Government's policy of the past referred to its help was purely a gift and it owned no part of the road in the end, but in now assisting in the development of Alaska the Government can get all its money back and not be out one cent; still own its own railroad, and can then operate it, lease it, or sell it as it may desire, and leave open this great country to future civilization for millions of American settlers and good, cheap homes for the future poor.

We should develop Alaska, because it speaks and indicates the growing life of the Nation. Any nation growing is safe.

Any nation standing still is in danger. For us to take the latter course, when the former is open to us with every inducement of profit and sentiment and patriotism, would be most foolish and unwise.

We should develop Alaska, because the trifle spent, in comparison to the benefits to be derived both to us and to Alaska, would never be felt or noticed. For should the Government announce that this railroad would be built cities would spring up as by magic and the town sites of such cities alone would reimburse the Government for the money spent in constructing the railroad, while the cheapening in the Nation's coal bill for the people of the United States would repay all the money spent in building the railroad ten times over a year.

We should develop Alaska, because thereby we avoid the probability of any naval defeat in the Pacific Ocean, and therefore remove the temptation to attack us at any time, and thus avoid all the calamities of war.

We should develop Alaska, because we would thus perform a service and put in motion a movement for which future generations would rise up and call us blessed. We would make a bigger, better, stronger United States of America, where labor would be lighter, life sweeter, and the earth a better place to live upon; and upon our work, if consummated in justice, honor, and honesty, would rest the gratitude of future races to be and the benign benedictions of the skies. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRUMBAUGH. I should like to have five minutes more,

Mr. Chairman.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes.

Mr. MANN. Mr. Chairman, it is not a matter of unanimous consent.

The CHAIRMAN. The Chair will recognize the gentleman for five minutes.

[Mr. KREIDER addressed the committee. See Appendix.]

Mr. SCOTT. Mr. Chairman, in my opinion the Members of this House, and the country at large as well, should be congratulated upon one circumstance attending the discussion of this bill—a circumstance, I regret to say, that has not attended the deliberations of this House in connection with other important and fundamental legislation for some time past. I refer to the fact that the majority, whose proposition this bill is, has seen fit to permit it to take its chances in the arena of free and open debate, untrammeled by preliminary caucus obligation. I mean no invidious insinuation when I venture to express the hope that this course, so happily begun, may be continued to the end, and that when Members come to record their convictions upon the desirability of this legislation those convictions may be both freely and fearlessly expressed.

At the outset I desire to say that I am in favor of the construction of railroads in Alaska, and I want to say, further, that I am in favor of the Government of the United States constructing and owning such railroads, at least until such time as conditions seem to warrant the adoption of a different policy. This not because I am a convert to the policy of Government ownership of railroads in general, because I am opposed to that policy, but because I believe that conditions in Alaska are so peculiar that private capital can not be induced to enter the field of railroad building there in a way best calculated to open up that country unless we offer or permit as compensation an unwarranted sacrifice of Alaska's resources. When we built the major portion of our great railroads in this country we submitted at the time to what appeared to be the necessities of the situation, and we have since been reaping the results of the policy adopted; and, if I mistake not, we are likely to continue the harvest for some time to come. I, for one, do not want to repeat the experiment. I neither want to sacrifice the great natural resources of Alaska to the desires of a few who would exploit them to monopolistic ends, nor encourage the promotion of railroad construction there under a policy that will result in pernicious overcapitalization.

The chairman of the committee reporting this bill, at the beginning of his very interesting speech delivered in this House on the 17th ultimo, remarked that "in the consideration of this measure the question arises, Is this country—Alaska—worth developing?" This question I shall not take the time of the committee to discuss. I shall assume that Alaska is worth developing, for I believe that to be a question upon which there is practically no diversity of opinion in this House, and little throughout the country. I believe that Alaska, with its great deposits of coal, copper, gold, silver, and other mineral, its fisheries and fur product, together with the fact that its agricultural qualities are sufficient to sustain any population that is likely to become permanently resident there, constitutes a great augmentation to our national wealth.

A consideration of this bill, however, does present the question how best to initiate the development of Alaska; whether we shall pursue a policy calculated to conserve and develop Alaska's resources for the benefit of the people of the United States, offering equal opportunity to all within reasonable limits, or whether we shall pursue a policy which, merely because it lessens tasks and shifts responsibilities of government, will enable a few to monopolize the great harvest that is now ripening there, leaving the worthy many who may come after to glean the discarded remnants.

The gentleman from Alaska, the author of this bill, in his great speech delivered a week ago to-day said:

The bill under discussion is in the interests of the people and puts the issue of Government or Guggenheim control in Alaska squarely to the vote of this House. Which shall it be, Government or Guggenheim?

This is but another way of stating the alternate policies that I have suggested. I am in full sympathy with the gentleman from Alaska so far as concerns the ultimate object of his effort. I only wish I were so sure as he that the bill under discussion presents the question as he seems to see it. As to whether this bill presents the question of Government or Guggenheim, I am in serious doubt. I greatly fear that it presents the question of Government and Guggenheim, and that if enacted in its present form it will lead to an entangling alliance that we will in the future seriously regret, and it is this danger lurking, as it seems to me, in the bill to which I shall direct my attention.

The general knowledge of Alaska that has been acquired dur-

The general knowledge of Alaska that has been acquired during the last 15 years or more, supplemented by more recent special investigation, seems to have crystallized a general opinion that an essential preparation for the development of Alaska is transportation facilities from the seaboard to the interior. That in order to make available and accessible the mineral and agricultural products and possibilities of that country, railroads should be built connecting the open harbors on the southern coast with the inland navigable waters, at the same time penetrating the most wealthy mineral regions and the great valleys best adapted to agriculture.

Alaska's greatest navigable river is the Yukon, which, rising in British America and flowing westward, cuts Alaska almost midway, emptying into Norton Sound. The valley of the Yukon, together with the valley of the Tanana, its principal tributary on the south, contains a large portion of Alaska's most valuable agricultural land. The second great river is the Kuskokwin, rising in central Alaska and flowing southwesterly into Kuskokwim Bay. The valley of this river also contains a large amount of agriculturally adapted land. These river valley regions, except during the short period of navigation, must be reached overland from the ocean harbors on the southern coast. Along that coast trend high and almost continuous ranges of mountains. The gentleman from Alaska has told us, as well as other gentlemen, both on the floor and at the hearings, that there are three great gateways through these mountain ranges through which access can be gained into Alaska's interior-the White Pass gateway, the Copper River gateway and the Seward gateway. These gateways, with the wonderful harbors lying at their portals, witness what seems to have been a wise providence of nature. Through these gateways and into these harbors the great current of Alaska's future commerce must flow. This fact was shrewdly foreseen by those enter-prising spirits who first undertook Alaska's exploitation, and they quickly laid claim to and posted sentinels at these great

The White Pass gateway opens through at the lower end of the Panhandle and leads into Canadian territory and thence into the valley of the Yukon. This gateway is now occupied by the White Pass and Yukon railways, the lines, terminals, and harbors of which are owned and controlled by the Morgan and Guggenheim interests. This gateway is thought to be impracticable for the purposes of this bill. The Copper River gateway, beginning with the harbor in Orca Bay and extending up the Copper River Gorge and Valley, is also occupied and controlled by the Morgans and Guggenheims. The Seward gateway, including the great harbor in Resurrection Bay, through the Alaska Syndicate, is also practically owned and controlled by the Morgans and Guggenheims. I quote from the testimony of the Delegate from Alaska given at the hearings before the committee reporting this bill. On page 406, Mr. Wickersham says:

You now see how the White Pass gateway into Alaska is controlled—is in partnership with the Alaska Syndicate—and I want to go with you now to the Copper River & Northwestern Railroad and talk to you about that, because that occupies the next great gateway into Alaska. It is a main gateway up the Copper River on a water grade, and is the principal gateway into Alaska, and yet it is in the charge, control, and ownership of the Morgan-Guggrenheim combination. They built the Copper River & Northwestern Railroad through that pass at an expense of about \$20,000,000. It is a fine standard-guage railroad. It has beautiful fine iron bridges. It is well built, well ballasted, and runs from the town of Cordova up the Copper River to Chitina, and thence to the right along the Chitina River to their great copper mines at Kennicott or Bonanza.

I again quote from the speech of the gentleman from Alaska to which I referred. His language will be found on page 1662 of the RECORD of January 14:

I have gone into this matter thus carefully to show you that the Alaska Syndicate not only owns the Copper River & Northwestern Rallroad gateway into the interior of Alaska, and that it is a partner with the owners of the White Pass and Yukon gateway, but that it is

substantially the owner of the Alaska Northern Railway and in control of that gateway. In short, we find the Alaska Syndicate in control of three of the principal gateways to the interior of Alaska.

A little further on, at the bottom of the same page, the gentleman says:

There is a side gateway from Valdez which cuts into the Copper gateway, and there is said to be a side gateway that opens into the Seward route. It would not be much of a trick to condemn the Seward road and take it over by paying its value. It is a bankrupt concern, closed down, and has not been in operation for three or four years.

If I were inclined to doubt the testimony of the gentleman from Alaska and others or the consensus of opinion entertained both at this and the other end of the Capitol, I should still find evidence sufficient for me in the fact that the Guggenheims and gentlemen of the Alaska Syndicate were on the ground with all the skill and facilities that money could buy at a time when the opportunity to pick and choose was unlimited, and that they exercised and embraced their opportunities to the fullest extent of their desires. If they refrained from laying hold of anything, either of existing, potential, or strategic value, I have only to say that I am seriously mistaken in my estimate of these gentle-

men; they are not the men I took them for.

Mr. Chairman, this is a remarkable situation that we find ourselves in. A great mountain-locked empire to be developed, and the three principal gateways into that empire in the occupancy, ownership, and control of the Alaska Syndicate, and we are to congratulate ourselves upon the fact that there yet remains an obscure side gateway through which the Government of the United States may steal for the purpose of gaining access to its great domain. Under existing conditions the front entrance into the people's great warehouse of Alaska seems to be reserved for the Alaska Syndicate and the Guggenheims, and it is proposed that the majesty of the people of the United States as represented by the National Government must resort to the deviously approached side entrance, usually "reserved for servants and tradesmen.'

Now, were it not for this remarkable situation, I think there can be no doubt what Congress would do at this time. A bill would be passed authorizing the construction of one or two lines of railway connecting the open ports upon the southern coast of Alaska with the inland navigable waters. those lines would be projected from Orca Bay, at Cordova, up the Copper River to Fairbanks and, ultimately, to the Yukon. The other line would be projected from Resurrection Bay, at Seward, around Cooks Inlet, across the Susitna Valley, and westward to the Kuskokwim River. The former line, with the aid of a short branch, would tap the Bering River coal fields, and the latter line would tap the Matanuska coal fields. lines, respectively, would penetrate the broad, fertile valleys of the Tanana, the Yukon, and the Kuskokwim. These lines of railroad, together with adequate seaboard terminals and the great ocean harbors from which they are projected, would be owned and controlled by the Government of the United States. The two great gateways to the interior of Alaska would be in control of the Government of the United States, and the portals of these great highways would be kept in trust for the people of the United States, offering equal opportunity to all who might enter there.

In the light of our present knowledge of Alaska, is it not worth while to stop and consider whether these great commanding advantages are irretrievably lost? Shall we yield without question the permanency of dominion taken under fraud and in bad faith, or shall we not ask, in the language of the gentleman from Alaska, "Who are these Colossi who stand astride not one but three of the gateways of the Territory of Alaska?" Shall we not examine into the character of tory of Alaska?" Shall we not examine into the character of their title, legal and equitable? Shall we not even satisfy our-selves that their present hold is in fact secure upon these great strategic positions? It seems to me that a great responsibility rests upon the House and the Senate in this respect-a responsibility which we must acknowledge and discharge to the uttermost or leave ourselves open to imputation of unfaithful-

ness to the greatest duty of the occasion.

This brings us to the question of the policy to be pursued by the Government in initiating the construction of railroads in Alaska. Shall we begin at the bottom and lay a secure foundation, clearing away if needs be the obstructing rubbish. or shall we begin with the superstructure, building upon this rubbish and trusting to its sufficiency, durability, and adaptability to answer our ultimate purposes? In my opinion we should begin at the bottom. We should examine into the rights of the occupants of these gateways and of their relation to the people and to the Government of the United States. We should ascertain what obligations they and their predecessors sumed when they laid hold of the public domain and whether they have discharged those obligations, and whether they can

be trusted in the future to continue to discharge their obligations and responsibilities. And then, if we shall find that they have entered in bad faith, that they have failed to discharge their obligations, that they are unable or indisposed to discharge them in the future, I believe there is power in the Government of the United States to say to these "Colossi" who now stand "astride" these gateways to stand aside and yield possession and control to the original proprietor. If, upon investigation, we shall find that these occupants have made improvements for which we are legally or morally obligated to pay, I believe the value should be fixed upon the basis of present conditions. If we are to acquire the present lines of railroad and terminals, we should acquire them upon the basis of incomplete, failed, abandoned concerns; that we should not wait until by the enactment or in pursuance of the proposed legislation we have brought about conditions which will infuse into these properties many millions of dollars of unearned increment. That we should acquire the lines occupying these two principal gateways, together with their terminal sites and harbor bases, I am convinced. If we are justified in spending thirty-five or forty millions-aye, sixty or seventy millions-before we are through in building a fragmentary portion of a system without any gateways, terminals, or harbors, leaving all of these in the possession and control of the Alaska Syndicate, we are surely justified in spending eight or ten millions more to get possession and control of all of these essential portions of

I shall ask the attention of the committee while we examine the record in connection with the location and construction of the two railroads projected from Seward and Cordova. During the second session of the Sixtieth Congress a letter from the Secretary of the Interior transmitting certain data relating to railroads in Alaska was made House Document No. 1201. This document gives valuable information touching the origin of all the Alaska railroads. I first call your attention to the Alaska Northern. This road is the successor of the Alaska Central Railway, which was projected from Resurrection Bay. On page 2 of the document referred to we get the information that the Alaska Central Railway was incorporated under the laws of Washington and that the purpose of its organization was to build a railroad over a certain route. The route described in the articles of incorporation is from Resurrection Bay to the Yukon River; that this company filed 15 maps of preliminary location-one from Resurrection Bay to a point on the Yukon, another from Resurrection Bay to the Tanana, and to various other points. Now, mark you, the proposition under which the Alaska Central laid hold of the public domain, including terminal site and the harbor in Resurrection Bay, was that it would build a railroad from this seaboard terminal into the interior of Alaska to some point on the Yukon or Tanana River; that it would open up a great public highway, for the development of Alaska. But we find that, after a more or less checkered and stormy career, and after taking possession of the harbor and terminal site and constructing about 72 miles of railway, it is bankrupt, construction abandoned, and in the hands of the Alaska Syndicate, with no pretense now being made of continuing the line to the Yukon or the Tanana. The opposing parties to the compact with the Government, after seizing this harbor, this strategic terminal site and the gateway to the interior, have utterly failed to deliver their part of the consideration. They do not purpose to deliver it. Under these circumstances shall they hold us to the bargain? I now call your attention to the Copper River & Northwestern Railway, which is the successor of the Copper River Railway.

The Copper River Railway Co. was incorporated under the laws of Washington for the purpose of building a railway over a certain route. The route described in its articles of incorporation is from a point near the mouth of the Copper River to a point on the Tanana River near Fairbanks, and branch lines. The Copper River & Northwestern Railway was later incorporated under the laws of Nevada, and it took over the properties of the Copper River Railway. Its articles of incorporation described a route from a point near tidewater in western Alaska tributary to the Copper River Valley in a general northwesterly direction to a point in the vicinity of the Copper River copper fields and extensions in the general direction of Eagle City or Fairbanks, with branch lines. suance of this proposition the Copper River & Northwestern Railway has acquired practical control of the harbor at Cordova, with the choicest terminal grounds there, and a right of way extending to the Copper River and up the gorge or valley of that river to Chitina, with a branch thence to the copper fields. This company took possession of this property with all its strategic advantages under the pretense of building to the Tanana River. Their avowed purpose was to build a great

public highway for the purpose of developing Alaska. It soon became apparent, however, that their purpose was to develop Alaska for themselves only, and when their purpose in this respect was thwarted they abandoned the enterprise, at least in all respects not directly pertaining to their private interests. The Guggenheims have completed the line to the copper fields owned by themselves. They do not now purpose to extend the line to the Tanana or to any other point. They have the harbor at Cordova, the terminal grounds, the gateway through the mountain range. They have placed their property there, but in such a way and to such an extent as serves their own interests only.

In other words, they have repudiated their obligations to the Government and to the people of the United States; they have built no public highway for the development of Alaska, and the fragment of railroad which they now have, when considered for that purpose, is almost valueless. We are now confronted with the question whether these people shall hold the Government and the people of the United States to the bargain. Shall they be permitted to hold this, the principal gateway into Alaska, as a private equipment to their copper mines? They Alaska, as a private equipment to their copper mines? have failed to deliver their part of the consideration or to live up to their side of the compact; why should not the Government lay hold of this gateway, designed by nature to serve as the route of a great public highway, for the benefit of the people of the United States and devote it to that purpose?

If the Government is ever to gain control of the harbors and gateways at Cordova and Seward, it should do it now. we are to condemn and take these properties we should make that course certain by the provisions of this bill, and not merely suggest it as a contingency. We should adopt our course while the present status of those properties exists. We should determine the matter while they may be acquired at their present actual value as railroads and railroad facilities, and not after we, by legislation and Executive action, have given them a status which will increase their value as railroads tenfold. As I have stated, these lines are of little value when considered in a proper light as lines of railway. The Alaska Northern is practically an abandoned project. It is not being operated. It is not in the course of being extended so as to become more valuable.

WICKERSHAM. If the gentleman has read the bill carefully, does he not think that under its provisions the President would have authority to condemn and take over either one of these roads?

Mr. SCOTT. I think he would; but I think that is a responsibility that rests upon this House, and that it is too great a responsibility ever to let pass beyond the doors of this

Mr. HARDY. Does not the gentleman think that if this bill had emphatically and absolutely directed the President to buy or condemn that road it would have stiffened the price he would have had to give for it if he wanted to get it?

Mr. SCOTT. No; because we can condemn that property and its value will be fixed under existing conditions, under the law and the rules of evidence.

Mr. HARDY. My opinion is that if it is known that we are either going to buy that road or build another, whichever seems best to do, the road itself will offer to surrender for a far less consideration than if they know that the President has to buy it.

SCOTT. But whenever you make it legally sure by legislation that a line is to be extended, then you have given the existing line a legal status different than it now occupies. You have given it the opportunity, when you institute your condemnation proceedings, to offer itself as part of an assured continuous line to the Yukon, and you will find that under the law and under the rules of evidence you will have to pay from five to ten times the amount that you would have to pay if you made this matter sure at the outset.

Mr. HARDY. My idea was that this bill did not make that

an assured continuous line at all.

Mr. SCOTT. It will the very minute Executive action is taken under this bill.

Mr. TOWNER. Will the gentleman yield?

Mr. SCOTT. Certainly.

Mr. TOWNER. Is it not true that this bill contemplates two extensions, not either of them a complete system, but one an extension of the line from Chitina on to Fairbanks and the other an extension of the line from Kern Creek, the terminus of the Alaska Northern Railroad, up into the Kuskokwim Valley and the Matanuska coal fields?

I think there can be no question about that. Mr. TOWNER. And does not that mean that the very determination and projecting of the idea of building these two railroads will immediately add to the value of these other railroads, because they could not possibly be made available unless they used the Guggenheim road that runs into the Copper River Valley and the Alaska Syndicate road that runs north?

Mr. SCOTT. The legal status will be changed immediately. It may properly be considered as junk. The Copper River & Northwestern Railway, while capitalized at nearly \$28,000,000-\$27,698,400—reported to the Interstate Commerce Commission for the fiscal year 1913 an operating and maintenance deficit of \$163,765.84, or, when reduced to mileage, \$839.91 per mile. It is pertinent now to consider what are 195 miles of railway worth that can not be operated except at a loss of \$839.91 per mile annually. And why are these properties in this condition? The answer to this question ought not to be difficult. These lines do not reach their objective points. They are mere fragments, no longer even in the course of construction. They have no future under existing conditions. If these lines were condemned by the Government of the United States now, they would be valued under existing conditions. The reports of their owners to the Interstate Commerce Commission would be competent evidence of that value. I do not mean by that that they are absolutely worthless; they have a potential value, but not as a part of an assured line which when completed would constitute a successful railway.

Let us suppose that the course suggested in the message of President Taft and in the report of the Alaska Railway Commission should be followed. Suppose that this bill should pass and the President should locate lines of railway from Chitina to Fairbanks, and from Kern Creek around Cook Inlet and westward to the Kuskokwim River, and the construction of those lines should be legally assured. What effect would this action have upon the Alaska Northern and the Copper River & Northwestern? They would not each only become the lower main trunk of a through line, but would own and control the terminals and the harbor at the foot of such line.

Mr. WICKERSHAM. Will the gentleman yield?
Mr. SCOTT. Certainly.
Mr. WICKERSHAM. Did they in the same report give any opinion as to the value of the ore they carried which belonged to them?

They did not.

Mr. WICKERSHAM. There is where they make the profit. Mr. SCOTT. Property that is now commercially worthless would be of great value. The Government of the United States would own two fragments of railway, but the harbors, the terminals, the trunks projecting through the great gateways of Alaska would be owned and controlled by the Guggenheims.

Mr. HARDY. Will the gentleman yield? Mr. SCOTT. I will.

Mr. HARDY. It seems to me that the gentleman's purpose of mind is the same, but our conclusions are just the reverse. It seems to me that the bill declared that it was going to build the road, say, from Cordova to Fairbanks, using the Copper River road as a part of it; that would give the value that the gentleman is talking about; but if it is left optional with the President whether he would condemn the Guggenheim road or build another, then it becomes in the nature of junk, as the gentleman said, and the liberty in the bill avoids the conditions.

Mr. SCOTT. There is where the gentleman falls into a trap. If the initial step makes it certain that we are to take these lines, that fixes the status that they must occupy in the court

in the condemnation proceedings.

Mr. HARDY. If the bill declared that the road should be a part of the route, then it would do the very thing the gentle-

Mr. SCOTT. If you will examine the bill carefully, you will come to another conclusion.

Let us suppose that the Government should then undertake the acquisition of the existing lines and institute condemnation proceedings to that end. Would the Government be able to acquire these lines at their present value? Would the same rules and limitations of evidence apply in establishing that value? Not at all. If condemned under existing conditions, applying wellknown rules of evidence and law, the value of those lines would be fixed at much less than original cost. Those connected with the promotion, construction, and ownership of those lines have already sustained a great loss. That loss should rest where it has fallen. If the Congress of the United States by legislation shall make legally assured the continuation of those lines to their original objectives, that loss will not only be made good, but in case the Government should in the future attempt to acquire those properties, the burden not only of that loss but an additional great profit to the present owners would be shifted to the Government. There is but one rational course in this connection. That is to acquire these lines either before or simultaneously with definite action by the Government

with respect to the establishment of routes and the locations of

On August 24, 1912, an act of Congress was approved authorizing the President to appoint a commission to conduct an examination into the transportation question of the Territory of Alaska, to secure surveys and other information with respect to railroads, information in respect to coal fields and their proximity to railroads, and other matters. The President appointed such commission, which made the investigation referred to and transmitted its report to the President, which was later transmitted to Congress. I have no doubt that nearly every Member of the House is familiar with that report. It in substance recommended the building of a line of railroad from Chitina to Fairbanks and from Kern Creek around Cook Inlet to the Kuskokwim River, these lines connecting with the existing Copper River & Northwestern and the Alaska & Northern lines. The aggregate amount of new construction was to be 773 miles and the estimated cost \$35,000,000. Among the principal reasons urged for the connection with existing lines was the superiority of the harbors in Orca and Resurrection Bays and the facilities which the existing lines had on those harbors.

The objections I would have to the carrying out of the recom-mendations of the Alaska Railroad Commission are that it would involve the construction and ownership by the Government of the portions of lines extending from Chitina to Fairbanks and Kern Creek to the Kuskokwim River, leaving the lower portions of the continuous lines together, with their terminals, harbors—in fact, the two great gateways into Alaska—in the control and ownership of the Alaska Syndicate and the Guggenheims. It would necessitate the Government entering into contract relations with the Alaska Syndicate and the Guggenheims, which would forever seal the hold of these interests upon these two great gateways. It would prevent the Government from ever acquiring the control of those gateways, harbors, terminals, and railroad trunks except at stupendous cost, at a valuation which would capitalize the very act and policy of the Government for the benefit of the Alaska Syndicate and the Guggenheims.

Mr. WICKERSHAM. Will the gentleman yield again?

Mr. SCOTT. Certainly.

Mr. WICKERSHAM. Does the gentleman know that at Resurrection Bay, fronting on the bay, the Government has large reservations of the water front and large reservations for town-site purposes which nobody can get, and from those water sites owned by the Government they may build into the interior without purchasing anything of the Alaska Central? That is not true at Cordova, but it is at Seward.

Mr. SCOTT. The gentleman may be correct, but I apprehend that when these interests took hold of this property they did not take the worst position. I apprehend that if there was any

choice there they took advantage of the choice.

The fundamental objection that I have to this bill is that it is calculated to bring about the same result as the Alaska Railroad Commission plan. As this bill was introduced it embodied a plan substantially identical with that recommended by the Alaska Railroad Commission in the respects referred to. required the location and construction of a line or lines not exceeding 733 miles in the aggregate, to be so located as to connect one or more of the open Pacific coast harbors on the southern coast of Alaska with the navigable waters of the Tanana, the Yukon, and the Kuskokwim. Now, the distance from Chitina to Fairbanks plus the distance from Kern Creek to the Kuskokwim River over the routes referred to in the commission report is exactly 733 miles in the aggregate. Two lines of railroad built so as to connect open harbors on the southern coast with these inland navigable waters could only be kept within the limit of 733 miles by extending the existing lines from Chitina and Kern Creek; and, again, these two lines could only be so constructed within the limits of \$35,000,000 under the estimates by extending them from these points. The purpose of this bill as it was introduced was as clear as noonday; it was the Alaska Railroad Commission plan.

The bill has been amended in the committee by striking out the 733-mile limitation, but the \$35,000,000 appropriation remains the same. The requirement that it be "so located as to connect one or more of the open Pacific harbors on the southern coast of Alaska with the navigable waters in the interior" is still there. And it will be observed that this requirement can be fulfilled by building from Chitina and from Kern Creek. It will be noted that the bill does not require the lines to be constructed by the Government to extend from the harbors to the interior waters, but only requires that they shall be "so located as to connect." This requirement, of course, can be fully met by connecting with the existing lines. The purpose of the bill for fear of repeating what has already been said.

in this respect is further made apparent by the provision authorizing the President "to lease" any other existing line or any other existing line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him in the first instance, or to make contracts and agreements with any other railroad for joint transportation of freight and passengers. In other words, the bill fully authorizes the President to locate and construct a line at Government expense from Chitina to Fairbanks, and to lease the Copper River & Northwestern line from the Guggenheims, or if a lease is not desirable, to make a contract or agreement with the Guggenheims for joint transportation of freight and pas-The same plan is authorized with respect to the other line. Under the bill as amended, the President is given full authority to carry out a plan identical with that of the Alaska Railroad Commission, leaving these two gateways and harbors with all their advantages as they now are in the control of the Alaska Syndicate and the Guggenheims. Indeed, the appropriation carried by this bill contemplates that very course, and

as I view it, permits no other course.

It has been pointed out, of course, that the bill does not restrict the action of the President; that it authorizes him to build a through line, to acquire wharfage and harbor facilities, and terminals if he deems that course wise. It seems to me, however, that these provisions of the bill are calculated to mislead. The President is required to construct lines that will connect the open harbors on the southern coast with the navigable waters of the interior, but he is also required to connect with coal fields of ample capacity, and to so construct the lines as best to aid in the development of the agricultural and mineral and other resources of Alaska as a whole and the settlement of the public lands. Of course, the President could confine him-self to the construction of a single line connecting one port with one of the navigable rivers, but I do not believe that anyone anticipates such a course. It is desirable to reach both the Bering River and the Matanuska fields and the Tanana and Kuskokwim Valleys. This can only be done under the present bill by connecting the proposed Government roads with the existing lines, or incurring expense far in excess of the amount of the appropriation.

Here is the situation as I view it. It is essential to the proper development of Alaska that railroads be built connecting the seaboard with the coal fields, the copper fields, and the agricultural sections. Those railroads must be projected from good harbors on the south coast. They ought to be projected from the best harbors. The best harbors and gateways to the interior are the Seward and the Copper River harbors and gateways. One is in the possession of the Alaska Syndicate and occupied by a derelict fragment of a railroad. The other is in the possession of the Guggenheims, and is occupied by good terminals and a good line of railroad, extending to the Guggenheim copper mines, but constitutes no public highway for the development of Alaska. The Alaska Syndicate and the Guggenheims have not kept faith with the Government of the United States. Those harbors and gateways in justice belong to us. Have we the wisdom, the courage, and the disposition to take them; or shall we supinely acknowledge the permanency of their claim? The responsibility for the solution of this question rests with the Congress of the United States. That responsibility can not and ought not to be shifted to any other department of the Government. When this bill leaves this House it should carry the command of Congress to condemn and take the Alaska Northern and the Copper River & Northwestern Railways and the two great gateways now occupied by This bill should not leave this House without that command. [Applause.]

Mr. CURRY. Mr. Chairman, I shall have to disagree with the conclusions of the honorable gentleman who has just preceded me [Mr. Scott] in one or two particulars. The United States Government, should this bill be enacted, will not have to take either by condemnation or purchase any railroad constructed in Alaska, whether in operation or not, but the Government through the President of the United States may select a route entirely different from any occupied at the present time, or the President may purchase, if he can obtain a good bargain for the United States, the Alaska Northern, or if its owners try to stand him up he may parallel the Alaska Northern or any other road. The United States Government owns the best water frontage at Seward, and should that place be selected as the ocean terminus of the road the Government would not have to purchase any land for harbor, wharfage, or terminal purposes.

The Alaska railroad bill has been fully and ably discussed pro and con by those who have preceded me. I shall not, therefore, in my remarks go very extensively into statistical details

The reasons why the Federal Government should construct a railroad in Alaska-its feasibility, prospective routes, and comparatively moderate cost of construction-have been clearly explained in detail by Judge Houston, the chairman of the Com-

mittee on the Territories, and by other Members.

The vast extent of Alaska, the wonderful fertility of its valleys south of the Yukon River, the abundance of crops of the hardier vegetables and cereals that can be grown on the valley land after it has been cleared for and subjected to agriculture, the extent of its natural pasturage and the possibility of raising large numbers of domestic animals have been presented. Its inexhaustible mineral resources, including coal, copper, and gold, in the valleys and coast ranges of mountains south of the Yukon have been dwelt upon.

The healthfulness of its climate and the ability of the Territory to maintain in comfort, happiness, and the highest degree of Christian civilization a large white American population

have been shown

This wonderfully rich country has been bottled up by Executive orders, national legislation, and by the assumption and exercise of authority by the departments for a great many

years. [Applause,]

The original bottling up of Alaska by the Government may have been excusable as necessary to prevent its being pioneered and monopolized by exploiters from their offices in New York, Chicago, Boston, and Montreal, but there is no reason on earth why that policy should be continued in perpetuity. The time has come when the settling and developing of Alaska by genuine American home-building pioneers should be encouraged by the Government and, if necessary, made possible by proper

The President now has it in his power, through Executive order, to relieve the conditions, and I believe the chairman of the Committee on Territories has satisfactorily discussed the situation with him. But legislation should also be enacted by Congress that will permit and assist the pioneering and developing of Alaska and at the same time prevent its mineral wealth from falling into the hands of syndicates. Its natural resources should be properly conserved and worked under Government supervision that will effectually prevent the monopo-

lizing of its wealth.

The only tenable reason for a man to leave his home and the comforts of civilization to pioneer a new country is an opportunity to better the conditions of himself and family. existing conditions no such opportunity awaits him in Alaska. He will find that the law has more consideration for the brown bear of the Territory than it has for an Alaska pioneer; that it is a misdemeanor to pick up and use driftwood on the beach; that the administration of the Forestry Service is so strict that wood brings \$16 a cord on the edge of a forest; that the law will not permit him to mine coal for his own use; and that within a few miles of an almost inexhaustible supply of coal he is forced to pay from \$16 to \$25 a ton for coal shipped in from Canada.

Any man, with the exception of a Government official, who would go to Alaska with the intention of making it his home under existing conditions is playing hookey from an insane

Alaska can not be effectively pioneered and developed without a railroad is constructed on which to ship out the products

of its mines and to ship in supplies.

Private capital can not and will not construct a railroad in Alaska without the Government makes unreasonable concessions, and I do not believe this Government will ever again give a dollar or an acre of land to a railroad company as an induce-

ment to build a road.

Of course you could find promoters who would jump at the chance to accept a franchise to build a road for the opportunity it would give them to make a clean-up by selling stock and bonds, but legitimate capital can not be interested in an Alaska railroad enterprise without it is given an opportunity to own and develop some of the mines, and that opportunity I hope will never be given.

The construction of a Government railroad would pioneer Alaska, develop its resources, and populate its domain with

sturdy Americans,

Those who oppose the bill have exercised their ingenuity in manufacturing and plausibly presenting excuses as to why it should not pass. You will find some who worked hard for the passage of the Hetch Hetchy bill fearing the socialistic tendencies of the Alaska railroad bill. Now, where is their consistency? The San Francisco-Hetch Hetchy water and power plant will be a public utility, built, operated, and owned by the municipality of San Francisco, and it will cost San Francisco between two and three times as much to develop her water and

power supply and plants as it will cost the Federal Government to build the Alaska railroad from a harbor on the southern Alaska coast to navigable water on the Tanana River, and San Francisco will sell water and power in competition with private business enterprise, while the Alaska railroad will not compete with any other railroad, but will only develop an undeveloped country.

The cry of public ownership of public utilities does not scare me, as it does some people. It is true that the business of Government is to govern and not primarily to engage in business enterprises, but public ownership of public utilities is right when such ownership is clearly in the interests of the people and can be better conducted and maintained under public ownership than under private business enterprise. It has always been so recognized and in many places and instances adopted and used in this country both by the Federal and local

governments.

It is dangerous to the liberties of the people to place in the hands of any human being or human agency, including the Gov-ernment, any great or extraordinary power over the means of subsistence, existence, and happiness of the people and the natural rights and individual liberty of men, and the greatest valid objection-if it is a valid objection-to the public ownership of all public utilities and their operation by the Government is the extraordinary power and influence it would place in the hands of the Government and the opportunity it would make for and give to officials either insidiously or by the exercise of direct authority to dominate, command, and oppress the people and control the electorate and the fact that as yet no adequate check to the possible assumption and exercise of such authority and power by Government has been thought out.

The Alaska railroad bill provides that after construction the

road may be operated or leased or sold by the Government, as may best serve the interests of the people, and no Member who fought for Hetch Hetchy need fear to vote for this bill on ac-count of its public-ownership features.

It is much better that the Government should build the road for the benefit of all the people, with the probability of in time being reimbursed for the original cost, than that a few capitalists should be permitted to build it for their personal benefit, and in return for their enterprise be given the privilege of ex-ploiting the people and monopolizing the rich mineral resources of the Treasury, which should be reserved and protected by the Government for the hardy men and women pioneers and for its future citizens on whom the genuine development and prosperity

of Alaska must depend. [Applause.]

I have heard the fact that there are but 35,000 white people in Alaska advanced as an excuse against the Government constructing the road. It has been stated on this floor that there are but 35,000 white people in Alaska, and it is proposed to build a \$35,000,000 road for them, a railroad the construction of which will entail on the Government the expenditure of an amount of money equal to \$1,000 per capita for every white man, woman, and child in the Territory. I wonder if the honorable gentleman who made that statement knows that when the populous, rich, and magnificent State he represents in this House was a sparsely settled Territory with less than 35,000 white inhabitants the railroads constructed through it received Government aid, and that practically all of the Western States, then Territories, had populations of less than 35,000 when railroads were constructed through them with Government aid, and that if the roads had not received Government aid they would not have been constructed, and if they had not been constructed those magnificent and prosperous States would to-day be sparsely settled wildernesses? Oregon and California, I believe, were the only two Western States that had a larger population than 35,000 when Government-aided railroads were through them.

Mr. WICKERSHAM. Will the gentleman yield?

Mr. CURRY. I will.

Mr. CURRY. I WIII.
Mr. WICKERSHAM. In 1870 the Territory of Washington only had 23,000 people. The land grants for the Northern Pacific were made by act of Congress in 1864, six years before that Territory had its 23,000 population.

Mr. CURRY. I was in the Territory of Washington when its first railroad was constructed, and I donated a full day's work to the first railroad that was built through there, and I would do

[Applause.] it again.

Would it not have been better for the Government-aided roads to have been constructed by the Government than as they were? The Government has spent and is spending hundreds of millions of dollars in digging the Panama Canal, which, by the way, is another instance of public ownership, construction, and operation of a public utility—and there are only 37,428 people on the Isthmus, and only 5,288 of them are white. Are we digging the canal for that handful of people? Oh, no; the canal is being constructed by the American Government with American money primarily for the benefit of the American people, but also for the benefit of the shipping and commerce of the world. Of course, the people of Panama will also be incidentally benefited. And we do not intend to build the Alaska railroad for the benefit only of the 35,000 people in Alaska. As a matter of course they will be benefited, and they ought to be benefited, but the primary object of building the road will be to pioneer and populate the Territory, develop its resources, and supply our Pacific squadron and the people of our Pacific States with good coal at about one-half the cost of what they have to pay for coal at the present time. The construction of the road will also encourage gold and copper and other mining. Enough prospecting and development work has already been done to prove that Alaska is one of the richest gold fields in the world. The dredge mines are working ground that prospects from \$2 to \$10 a cubic yard. In California we make money from ground that produces 7 cents a cubic yard. Of course, most of the dredge mines of California yield a much higher value.

Since 1880 Alaska has produced \$228,200,000 in gold, about 27 per cent of this amount from quartz mines, and there has been little or practically no quartz mining in the interior, away from the navigable waters, because of the prohibitive cost of transportation of machinery, the repressive policy of the Government, and the underhanded methods and tactics of monopolists in their attempts to syndicate the resources of the Territory. The gold output in 1913 was \$15,450,000; Silver, \$220,000; and

copper, \$3,014,000.

There are inexhaustible supplies of coal covering an area of nearly 13,000 square miles, as surveyed, platted, and estimated by the Geological Survey. The greatest deposits are in the Matanuska and in the Bering fields. The Matanuska, producing the best coal, is the field through which the Government will undoubtedly build the road if it is constructed.

In my opinion the time has come when the Government should change its policy in Alaska. It should build a railroad and encourage the pioneering and developing of Alaska by genuine pioneers, and at the same time prohibit and prevent the exploiting and monopolizing of Alaska by the sharks who pioneer by

proxy. [Applause.]

As a Californian, I am very much interested in the development of Alaska. We need her cheap hard coal in my State for our homes, our factories, our smelters, and our steamships; and while we have not developed the Alaska trade as we should, and have permitted the merchants of Seattle to monopolize 99 per cent of her commerce, while our merchants in return have been content to control the bulk of the commerce of Hawaii, if this bill passes, I predict that though, on account of her nearer location, Seattle may continue to enjoy the bulk of the Alaska commerce, the San Francisco merchants will go after and get their share of that trade.

San Francisco is located on the most beautiful, the greatest, the safest, and the best natural harbor in the world; she is, and she is destined to continue to be, the commercial and financial metropolis of the Pacific. [Applause.]

If the Government intends to do anything for Alaska and her people, now is the time and here is the opportunity to do it. The passage of the railroad bill should be followed by Executive orders gradually releasing the mineral and agricultural land to occupation by actual settlers, but preventing and pro-

hibiting their monopolization.

If, on the other hand, the Government does not want Alaska inhabited and developed, now is the time and here is the opportunity to say so and to let the Alaskans know that fact while most of them are still young enough to leave the Territory and establish themselves eisewhere. I hope, however, that the mis-treatment of the people of Alaska by the Government is about to end, that the policy of the Government toward Alaska will change, and that the Alaska railroad bill and other legislation that will encourage the development of Alaska and will permit her industrious and energetic people to go to work and establish prosperous and happy homes for themselves will be enacted during this session of Congress. [Applause.]

Our committee has given a great deal of thought to the Alaska problem. We worked hard and conscientiously in the preparation of the bill. Exhaustive hearings were held, at which a great deal of testimony was taken. The hearings were published for your information and for the information of the public. We sought and secured illuminating information wherever obtainable. The chairman of the committee has compiled and filed a convincing favorable report on the measure. We have reported to you a bill which, in our opinion, will safeguard the interests of the Government, and at the same time will promote the welfare of and encourage individual enterprise in the

development of Alaska. We believe that if this bill is enacted into law Alaska will be developed by genuine pioneers, and not exploited by the interests, and that it is not likely that the Government will ever be called upon to take up the bond issue of \$35,000,000 authorized by the bill, as in time that liability will be met by the earnings of the road. For these reasons, and the believe that I have not the time to present, I believe the bill should pass. [Applause.]

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. CURRY. Certainly.

Mr. HARDY. Is there anything in this bill, or anything in

the conception of the gentleman, which prevents, contemporaneously with the passage of this bill, the enactment of a leasing law which shall properly safeguard the rights of the public, such a law as was spoken of by the gentleman from Oklahoma [Mr. FERRIS]?

Mr. CURRY. No. I think that would be a good measure

with which to supplement the enactment of this bill.

Mr. HARDY. And it would afford no reason whatever for refusing to pass this bill?

Mr. CURRY. None whatever.

The CHAIRMAN (Mr. HARRISON). The time of the gentle-an from California has expired. The gentleman from Ohio man from California has expired. [Mr. SWITZER] is recognized.

Mr. SWITZER. Mr. Chairman, the enactment into law of the pending measure, carrying an authorization to borrow \$35,000,000 on 30-year bonds at 3 per cent interest for the construction of railways in Alaska, would, in my opinion, com-

mit our Government to a colossal undertaking.

Mr. Joslin, an Alaskan, who indorses this proposed legislation and who testified before the House Committee on Territories, stated that it would require from 10,000 to 15,000 miles of railway to properly develop Alaska. And when you fully comprehend its enormous size-something like 600,000 square miles of land and water-a territory as large as all that part of the United States lying north of Tennessee and east of the Mississippi River-the estimate of Mr. Joslin appears to be exceedingly modest.

Mr. JOHNSON of Washington. Mr. Chairman, will the gen-

tleman yield?

Mr. SWITZER. Certainly.

Mr. JOHNSON of Washington. I want to ask the gentleman a question. If it is a fact that in all the country north of Oklahoma and west of the Missouri River the famous landgrant railroads amount to only 5,300 miles, how does it come that from 10,000 to 12,000 miles of railroad have since been constructed in that country? Did not the original land-grant railroads open the West?

Mr. SWITZER. I think so; but I am now discussing this

bill with reference to Alaska.

If it requires \$35,000,000 to construct 733 miles of railway, as contemplated by this bill, it will require not less than half a billion dollars to construct the railways referred to by Mr. Joslin, whether they are made standard gauge or narrow gauge; and if the money is raised by bond issues it would result in an annual interest charge of not less than \$15,000,000 a year, a sum almost equal to the whole amount of revenue derived from Alaska since the time of its acquisition in 1867 down to the present hour.

Mr. WICKERSHAM. Mr. Chairman, will the gentleman

yield?

Mr. SWITZER. Yes; for a question. Mr. WICKERSHAM. There is nothing in this bill that commits anybody to that.

Mr. SWITZER. Nothing in the bill, but you know how it is when you put your hand to the plow.

WICKERSHAM. And Mr. Joslin will have nothing to

do with it if the bill passes.

Mr. SWITZER. But the enthusiastic agitator who favors this initiative step toward the maelstrom of governmental railway ownership will contend that it will not be necessary to construct more than \$35,000,000 worth of railways to unlock the undeveloped resources of Alaska.

You will recollect that President Wilson, in his first message delivered from the throne at this session of Congress, stated,

among other things, that-

Alaska as a storehouse should be unlocked. One key to it is a system of railways. These the Government should build and administer.

It will be noted that he is not committed to any particular system or committed to a limited mileage. He says, in effect, that a sufficient number of miles should be built to unlock the storehouse, and Joslin states that a proper unlocking will require from ten to fifteen thousand miles.

You will also observe that the President, while committing himself to governmental building and ownership, does not commit himself to governmental operation of these proposed railways after they shall have been constructed.

When he arrives at this proposition, he uses the broad word "administer" instead of the word "operate," which the up-todate Socialist is demanding.

Whence comes the sudden demand for the adopting of this socialistic stunt?

We know that our President is in a neck-and-neck race with the great leader of the Bull Moose Party to put over certain so-called progressive measures, regardless of who first declared for the same.

But neither the Republican nor the Democratic national platforms have ever yet contained a plank declaring for Govern-ment ownership of railways. True, our distinguished Secretary of State some years ago, after an extended trip abroad, became so imbued with this schism that upon his return to this country he immediately repaired to Madison Square Garden, in New York City, and delivered his famous speech in which he advocated the taking over of all railways and telegraphs and, in fact, all interstate public utilities by the Government; but it created such a furor within the rank and file of his party and brought forth such a loud, strong, and violent protest that upon this subject from that day to this he has been as still as a mouse, although he has since been the candidate of his party for President and dictated the nominee as well as the platform of the last Democratic national convention.

Within a few hours after the deliverance of his message the majority report of the Committee on Territories was filed in the House, setting forth that-

The building of this road by the Government and its ownership by the Government does not at all imply that the Government shall operate the railroad. It is far preferable that the roads, when built, should be operated by lessees. There is much opposition to Government operation, and this idea, it seems, has unjustly prejudiced the minds of some against the Government construction and ownership of the road.

A remarkable utterance by a body of men who recommend the passage of a bill to give the President full power to operate or lease railways. They find there is much opposition to Government operation and that the minds of many are prejudiced against Government ownership of the roads.

But this is not all. After the discussion of the bill on two legislative days and the light of day had been let into the "wild-goose scheme" by Mr. Davenporr and others, an echo of the voice from the throne is heard reverberating from the President's cabinet room through the door opened by his Secretary of the Interior in his report for the fiscal year ending June 30 last, released on the 24th day of December. This report seems to have not been fully completed until after the deliverance of the President's message; and it was not released until after hearing from Mr. Davenport. So it seems that the President's message, the report of the Committee on Territories, and the Report of the Secretary of the Interior are all exceedingly well timed and that there is behind this proposed legislation a strong arm which up to this time has been all-powerful with the majority side of this Chamber. The majority side of this House is again confronted with the proposition of deferring to the views of the President or asserting their self-respect by voting their honest convictions at the risk of incurring his displeasure.

The bill proposes to give the President full authority and absolute control, but the Secretary of the Interior, after hearing from Mr. Davenport, recommends the enactment of further legislation, creating an administrative board to deal with all Alaskan problems. So we are now confronted with scheme after scheme, pyramided on schemes, and many of them as visionary as the maudlin dreams of an ultra conservationist or those emanating from the mind of the writer of the Arabian Nights.

The Secretary of the Interior suggests the creation of an administrative board to which is to be given jurisdiction over all Alaskan territory-" her lands, fisheries, Indians, Eskimos, seals, forests, mines, waterways, railroads—all the Nation owns, cares for, controls, or regulates."

One of the chief reasons assigned by the Secretary of the Interior for the creation of this board is that there can be no satisfactory administration of the land laws or any other laws at the distance of 5,000 miles from the point of action. Much less is it possible where the two sections of the country are separated by an ocean and the land calling for attention is closed to the world for one-half of the year. He further says that "the eye that sees the need should be near the voice that gives the order."

Secretary Lane says that it is not possible to satisfactorily administer any law 5,000 miles from the scene of action, especially situated as Alaska is. So, if you pass this bill, you do it with the echo of the voice from the throne ringing in your ears that it can not be satisfactorily administered by the President 5,000 miles from the scene of action. I wonder if the President

is beginning to doubt the ultimate success of the proposed scheme? Is he now wishing to escape full responsibility? Have the speeches of Mr. DAVENPORT and Mr. FORDNEY set him to thinking? Is he now wavering in the faith? Must a board or commission be created, so that when the time comes that he who runs can see the miserable collapse of this already apparent frigid scheme? A scapegoat can be made of some board or commission by charging it with incompetency, mismanagement, or some other excusable action or inaction.

The President and the gentleman from Wisconsin and others who have heretofore voiced the passage of this measure parade the ghosts of the "special interests" as a scarecrow to frighten Members of this body into voting for the bill. We are told in plaintive tones that the Guggenheims have some time in the past set the laws of the land at naught, and have caused murders to be committed on the soil of Alaska, and that Morgan & Co. have actually refused to loan money to some would-be rival exploiter of Alaska's unknown resources. And that, because the Morgans and the Guggenheims have refused financial aid to some misguided exploiter of this region of ice and snow who has become much wearied in his toilsome march as a speculator and a promoter, therefore the Government should now pour out of its coffers untold millions for the construction of ways in Alaska for the benefit of our people and as a slap at some hideous "special interests." What people are to be benefited? Who is to lease these railways which it is proposed for the Government to build? Will it be some of the common people of the land, or will it not be some person or corporation with millions at his or its command? Who is to mine the coal at the low cost figured on by the commission? Will it not be some person or corporation with millions at his or its command?

Mr. Joslin, on page 64 of his testimony before the House Committee on Territories, makes the following statement:

If your trunk lines are held by the Government and operated by the Government, I gravely doubt whether sufficient inducement could be offered to private capital to build these branch lines.

If the Government contemplates the operation of the lines, then it must at once consider the construction of branch lines and spurs when needed, thereby bringing about exclusive Government ownership and development of rallroad lines and transportation systems for all time to come. I do not think that ought to be done; I do not think the Government should proceed that far.

And when asked the following question, on page 62-

Is there any doubt, in the event this railroad is built, that the Government would be able to find an operating company? he makes the following answer:

I do not think so, except this: I do not think the operating company could afford to pay interest on the cost of these roads from the beginning and give bond to do it. * * * The lease should be from 30 to 50 years, then private capital would build branch lines. * * * It is possible that the Government would have to forego interest on the cost of the lines four or five years.

And again, on page 64, he states as follows:

Now, if these lines are built and owned by the Government and are not leased, but are held and operated by the Government, then you can see that the obligation immediately fails upon the Government to build these necessary spurs and branch lines. If they do not construct the branch lines, the trunk line will not pay. The trunk line needs the branch line just as much as the branch needs the trunk lines.

So, according to Mr. Joslin, if the Government leases the railway it must be to some one with sufficient money at his command to enable him to construct hundreds and hundreds of miles of sidetracks and branch lines in order to make the railways pay. No man of moderate means could meet the pay roll for the hundreds and hundreds of employees necessary to maintain and operate the railways and furnish the money for the construction of the branch lines necessary to make it a going concern. The lessee of the coal mines, if leased, in order to put the coal at the coast for the low cost estimated by the railway commission, must be some one who has sufficient money to install four or five hundred thousand dollars of mining equipment, and maintain a pay roll of three or four hundred men in a country where the lowest paid laborer is now receiving (7.50

Mr. WICKERSHAM. The gentleman is not quite correct. Mr. SWITZER. What dark-horse special interests are to profit by this proposed enormous governmental expenditure?

In order to keep out Guggenheim is it necessary to spend from \$35,000,000 to \$100,000,000 to bring forth a dark-horse What is the difference which special interests Hoppenheim? reap the profits, whether it is Guggenheim or Hoppenheim? No one will undertake to mine coal in Alaska unless he believes he can reap a profit, and no one can undertake to deliver this coal out of the mine to vessels on the coast unless they are backed by large capital. And if they are not a Guggenheim when they start the operation they will soon become one unless the venture proves unprofitable. Men hold up their hands in holy horror at the thought of Guggenheim or Morgan & Co. owning and operating a railway in Alaska, even when it is not

making money; but they propose voting for a bill which purposes the building by the Government of an immense system of railways and leasing it to some other representatives of predatory wealth. You can rest assured that no responsible person or corporation is going to lease or operate these railways and coul mines unless they believe there can be reaped large profits. No one is going to bond himself to operate these lines unless he knows something as to the net profits. Where do the common people come in? True, they can dig coal for the wealthy mine operator; they can run an engine, brake a freight car, or ballast a railway track for some wealthy railway operator; but will they be paid any more money for their work than if it was operated by Morgan & Co.? If Guggenheims are committing murders in Alaska, invoke the aid of the criminal law and see to its enforcement; if Morgan & Co. are maintaining an armed force in open rebellion to the laws of our land, dispatch the naval and military forces of the Nation at once to Alaska, or so much of it as may be necessary, to maintain peace and order and uphold the courts in administering the law. I take it that this could be done at no large expense and at much less than \$1,000,000 a year. So, casting aside the ghosts of the invisible special interests and coming down on terra firma, let us investigate some of the other reasons assigned for the building of railways by the Government. It is claimed that it will open up and develop an immense agricultural country, as well as a large coal territory. The copper industry has already been fairly developed by the Guggenheims, and any further development of this industry in Alaska will no doubt have to be backed by millions of capital before it could be operated successfully.

And, by the way, I have failed to note any complaint in the report of the rallway commission or by any witnesses appearing before the Committee on the Territories to the effect that the Guggenheims were not paying their employees fair and re-munerative wages in the operation of their copper mines, railways, and smelting plants, as well as their shipping interests on the Pacific. This is certainly strange, for I do not understand how this band of outlaws, murderers, and land pirates described by the gentleman from Wisconsin could ever find it in their hearts to accord anything like fair and humane treat-

ment to their large force of employees.

Mr. Davenpour has certainly demonstrated the absolute futility of undertaking to develop Alaska as an agricultural country. If railways will bring farmers to Alaska, why have they not brought them to those parts of it where railways are already built? So far as the coal development is concerned, it only takes 25 or 30 miles of railway to reach the Bering coal field. Coal companies in the United States think nothing of putting in 25 miles of railway tracks in order to provide an outlet for their coal.

But when you read the reports of the railway commission and the reports of the naval tests made of this coal, which is said to be the best coal in Alaska, there appears to be much doubt of its utility and whether it has little or any commercial At any rate, there is no necessity to spend \$35,000,000 in building one or two hundred miles of railway to ascertain whether the Alaskan coals possess a commercial value. As to the value of Alaskan coals for fuel and commercial purposes, the Alaskan Railway Commission have this to say, on pages

the Alaskan Railway Commission have this to say, on pages 132 and 133 of their report:

It may be stated, however, that to be assured of any portion of this market the Alaska coal will first have to show its suitability and then meet the price of the known and established eastern coals, such as New River, Pocahantas, and Georges Creek. The best information at hand seems to indicate that, while Alaska coal seems to be suitable as to composition, it may run too high in slack to meet naval requirements.

Besides changing the quantities required by the Navy, the completion of the Panama Canal will effect an immediate change in the Pacific coal markets. This is difficult to forecast, depending, as it does, on prices of coal in the East and on the condition of the transportation market. It is probable that if the present prices continue the Navy can deliver coal in San Francisco from the eastern mines at a price, including the cost of the coal, of about \$6.60 per ton; this yusing large colliers with no return cargo. If commercial ships can be assured of obtaining suitable return cargo, they should be able to deliver coal at a lower price. It is possible that these coals may be bought in cargo lots at San Francisco at as low a price as \$5.50 per ton, and at Seattle at prices but little higher. Should Alaska coal prove suitable for naval use it will have to meet whatever these prices may be, and it is probable that if it can meet the San Francisco price it can also meet the price of the eastern coals delivered at Honolulu and Manila.

The question of the establishment of Alaskan coal in the Pacific markets is finally one of cost. In a recent bulletin of the Geological Survey a member of this commission gives an analysis of the consumption of coal in Pacific waters. This analysis would tend to show that despite the advances in the use of oil for fuel purposes there is on the Pacific coast an annual market for nearly 1.500,000 tons of coal at points where competition by Alaska coal is not impossible, this amount being co

The tests of this coal made in December last under the direction of certain Government departments, after the expenditure of \$150,000 to make same, certainly confirm the grave doubt as to the utility and commercial value of this coal that one necessarily forms from reading the report of the Alaskan railway commission.

The following is an account of the recent tests, appearing in the Washington Star:

ALASKA COAL A FAILURE—VALUELESS FOR NAVY, ACCORDING TO OFFICIAL BEFORE OF TESTS.

Preliminary tests of Alaskan coal from the Bering River district have been very discouraging to officials who hoped they might develop a new fuel supply for the Navy. Rear Admiral Griffin, in charge of the investigation, has reported to the House Naval Affairs Committee that the Bering River coal tested has fallen so far under expectations in practical use as to be of no value, but that from the Matanuska fields and other sections of the Bering district, from which coal is yet to be tested, the Navy is hoping for better results.

Chemical tests of the Bering River coal indicated that it contained a higher efficiency of thermal units than the Pocahontas coal of West Virginia, but when put to firing tests in the Navy, notably aboard the cruiser Maryland, it developed only 43 per cent of the same efficiency and caused a great deal of trouble. It made immense clinkers, which clogged the furnaces and covered the grate bars with a moiten substance like tar, which shut off the draft and hampered steaming.

Congress has appropriated \$75,000 for experiments with coal from the Matanuska district, and these will be carried on.

Those who are opposing the Alaska railway bill now being debated in both Houses of Congress are pointing to the admiral's testimony before the Naval Committee as an added argument in their favor. One of the arguments advanced by the supporters of the bill is that a Government railroad is needed to tap the northern coal fields and bring a fuel supply to tidewater for the Navy.

The Railway Commission figure the Alaskan freight tariffs at from 5 to 7 cents per ton-mile, which is from 10 to 15 times higher than charged by rallways here. So if it is possible to raise a few thousand bushels of potatoes in the Yukon Valley it would be possible to ship them to this country only at abnormal prices—say, at \$2 or \$3 per bushel. Just imagine a farmer on the Yukon picking that frozen moss off the land and awaiting the thawing process described by Mr. Davenport, and paying labor \$5 or \$6 per day for this work as well as for planting and harvesting his crop, then 5 or 6 cents were to mile on his product for it to reach the coat and that per ton-mile on his product for it to reach the coast, and then the cost of transferring it to some seafaring vessel for the ports of the United States or the Orient. It would likely be more sensible for him to load it on a dog sled and to start out to hunt a market among the Eskimos nearer the pole. It is said that cattle can be raised in this icy region, but an investigation of the matter discloses that it is claimed that a herd can be bred which may withstand the arctic cold. Reindeer raising is claimed to be a success, but evidently it has not supplanted the American beef, as people pay as high as \$40 and \$50 a ton to have it transported to them I take it reindeer can be obtained for the mere killing. I imagine that this meat, so highly complimented by Mr. Houston, possesses a toughness which is not relished by the American immuterant. Immigrant.

By the expenditure of forty or fifty millions of dollars on the Mississippi River levees within the next three or four years it is estimated that 20,000,000 acres of land in the delta of the Mississippi can be fairly well protected from the floods which frequently course their way down the Father of Waters, and that an additional twelve and one-half million acres of land made available for farming purposes. On this can be grown yearly more cotton than has ever yet been raised in any one year of the past history of our country. Eight hundred thou-sand bushels can be grown yearly and millions of bushels of potatoes. In portions of this delta, I am told, three crops can be raised in a year. More farm and garden products can be be raised in a year. More farm and garden products can be raised on the lands possible to be reclaimed in the Mississippi delta in one year than will likely be grown in the whole of Alaska in the next 100 years. These products, grown in the heart of the Nation, close to the large cities located in the Mississippi basin, and easily accessible to the marts of the eastern coast of the United States, would be of inestimable value to the people of the Nation. Here in the central part of the country are tried and tested farm lands that, when protected from the floods, we know to be available for the raising of all farm products; where it will not be necessary to pick off the green, icy moss from the soil, at an expense of \$125 per acre, and walt for the arctic sun to draw the frost from the ground for a couple of seasons before undertaking to raise a few furm and garden products. This land can be drained and cleared and put in a high state of cultivation for fifty to one hundred and fifty dollars per acre, and great railway trunk lines are already in operation for the distribution of the bounteous harvests to be gathered therefrom, while the development of Alaska's farming resources would only inure to the benefit of the mere handful of Caucasians residing there. I do not want it understood that I am averse to voting reasonable aid for assisting in developing Alaska's resources, but I believe it should be in conjunction with private enterprise and where private capital must bear the burden of maintenance and the greater part of the risk and the loss in the event of failure.

So, as it is not possible to develop agriculture in Alaska or stock raising, for export, and as railways are not needed in developing her sealing and fishing industries, and the copper industry seems to have been sufficiently developed, there is nothing left but the gold and coal propositions.

It has been contended here for several years and fairly demonstrated that the great increased production of gold since 1896 has depreciated the gold dollar to such an extent that it will not purchase as much as it once did, and thereby increased the cost of living.

So I do not suppose that it will be seriously argued that we ought to spend \$35,000,000 for the purpose of further decreasing the purchasing power of the gold dollar and increasing the present high cost of living.

The coal is shown to be of exceedingly doubtful utility, but if it be later found to possess a commercial value and private capital is given an opportunity, there will be no trouble as to its development.

Under this Government ownership scheme and proposed leasing scheme, what is going to become of section 4 of the bill? The report of the Secretary of the Interior shows that they do not expect to derive any royalty from the coal for quite a number of years. The Government will own the railroad and it will be nontaxable and, in my opinion, not self-sustaining, And it is proposed to hold the forests in cold storage. So what will there be to derive a revenue from to aid in the development of Alaska as recommended by the Secretary of the Interior and to pay into the redemption fund provided for in section 4 of this bill?

No one will certainly be so inhuman as to require the settler who has the courage to undertake farming under such adverse conditions to pay any more for the land he preempts than the cost of surveying and registration fees.

So the income from these sources will not exceed the expenses and salaries of the officials looking after their collection; and section 4 becomes a huge loke.

From a careful examination of the record of the hearings on this bill, and from all the information so far brought to my attention, I fail to find any justification for the expenditure of \$25,000,000 in building railways in a Territory inhabited by only 65,000 people, including all races, and having an increase of population in the last decade of less than 1,000 persons, and where there is only 1 human being to every 6,000 acres of ice and snow, and cause us to meet an annual interest charge of not less than \$1,000,000 for the next 30 years, as well as the ultimate payment of the principal, together with all the other millions that will necessarily follow from embarking in Govern-ment railway building and operation and the colonization of Alaska with an aditional horde of high-salaried public officials, [Applause.]

Mr. FESS. Mr. Chairman, I come to the consideration of this question with an open mind. If I have any prejudices it would rather be against governmental ownership and probably would be regarded in opposition to the bill; but, as I say, I come with an open mind, a student listening to the representations of the men who have made a study and who from their store of knowledge are giving us the information needed to vote intelligently on this bill. The first question that had to be answered in my own mind was whether the future possibilities of Alaska would justify any effort whatever in the building of this proposed railroad. I have never been in Alaska; I have only been a student of its development. I have sat here and listened to the representations of the men who know, both those who are in favor and those who are opposed to this bill, and I have been trying to weigh the strength of the arguments upon the question of the future possibilities of Alaska with reference to making up my own mind as to how to vote, and, giving due credeuce to all the arguments offered for and against, it seems to me that I am convinced that the future possibilities of Alaska would justify an effort on the part either of private capital or the Government in the building of this railroad. [Applause.] The argument that has been offered against it on the basis that there is no possible future, due largely to the condition of climate, and, following that as a corollary to the soil, could have been offered also in the early times against the development of the Northwest, the development of Washington, and the development of the northwestern part of Canada. The same sort of argument was offered in opposition to the stimulation

ernment or private enterprise would have listened to that argument we would not have builded the continental railroads as we did, marrying the West with the East. Why, my friends, the strongest possible representation upon the same basis was made against our purchase of Louisiana in 1803. That very argument was made, but it was not that argument that troubled Jefferson, but a constitutional one. He said we did not have, as he saw it, constitutional authority to buy it, because of his strict construction views which denied implied powers, but when he consulted Albert Gallatin as to whether he should do it or not, Gallatin said the possibility of the new country will justify it, and he urged that the purchase be made.

And Jefferson said:

I stretched the Constitution until it almost cracked, in order to do it. The identical argument was made against the development of the Southwest when we began the development of the vast empire which came to us through the Guadalupe-Hidalgo treaty with Mexico in 1848. In 1850, on the 7th day of March, Daulel Webster delivered the only speech known in our history by the day on which it was given, and which is always referred to as the "fatal 7th of March speech." In this address Daniel Webster declared this Government ought not to enter upon a controversy over this particular section of country, because "you can not develop a country where nothing grows but sage-brush and cactus bush." That statement was made 63 years ago in reference to the vast country that came from Mexico as the fruits of the Mexican War.

Tom Corwin, Ohio's greatest political orator, I think, in any time before or since the war, stood upon the floor of the Senate, in 1846, and made his greatest speech. Among other things, he spoke against the occupation of Oregon, on the ground that the mails could not be carried from this section of the country to Oregon without having the standing Army accompany them. That was pronounced the greatest speech 'Tom Corwin ever made in Congress, and yet its most significant utterance is found in the blunder of its prophecy. See what has been the develop-ment from the day he made it until the present hour. To-day that portion of our land is the seat of an empire dotted with centers of a virile population; such as Seattle, Spokane, Portland, Tacoma, Walla Walla, etc. These statements are to-day revived on this floor

When, in 1867, William H. Seward purchased Alaska the people ridiculed him and said he had "bought the refrigerator of the North," and had paid the fabulous sum of \$7,200,000 for it; they ridiculed him to the point where the scholarly Secretary had to come out in self-defense to state why he had purchased Alaska. And he convinced me as a student of history—I do not mean that I was a student in 1867, but since I became a student—that he was more far-reaching in his penetration than the statesmen of his day, for he understood that \$7,200,000 was but paltry sum in comparison with what would be the output of that great country in the Northwest.

Why, I am told by the eloquence of Government reports that over four hundred millions of wealth, minerals, furs, and lumand so on, have come out of that country, while only

\$7,200,000 was paid for it originally.

So I say that, coming to this question with an open mind, desiring to vote right, I am convinced that the future possibilities of Alaska will warrant the construction of this railroad. the only question to be decided in my mind is whether we shall do it by Government aid, by Government control, by Government ownership, if you please, or shall we do it by making concessions to private capital and allow it to develop the vast undeveloped country? If you say that the Government can not afford to do it, then I ask you Why? Private capital stands ready to quickly develop it if you make concessions to it. The keenest geniuses in the world are the captains of industry—the great financiers of this country. They will not undertake an enterprise that has no profit in it. However, they stand ready to build a railroad in Alaska if we give them a concession. do not believe we ought to do that. However, I am not criticizing the Government for what was done when the first transcontinental railway was completed in 1869. Do you not recall that we voted out of the Treasury of the United States \$60,-000,000 as a subsidy and gave away 130,000,000 acres of land as inducements to capital to build these railroads? But I am not criticizing the Government, as I have said. That action developed the great West. It married the West with the East. I think Congress did right; but I believe that you will agree with me if it could have been done by the Government, or at least if the Government could have leased it, it would have been better than to give away so much valuable public property, and we as a people would have been better off to-day if we had of the growth of population beyond the Rockies. If the Goy-done it in that way. And yet I say I am not criticizing the

Government for what was done. I rather vindicate the Government for it, since no one had in 1859 to 1869 dreamed of

the possibilities of that great country.

But the question now comes to us as Members of Congress whether we shall allow private enterprise, by giving like concessions, to build this Alaska railroad, as was done in other days, or shall it be built as a Government enterprise. Why should we not do it in the latter way? If there is profit in it, and there can be no doubt of this, otherwise private capital could not be interested, why not allow the Government to do it? I would rather not do anything by the Government that the individual can do, provided that in order to get the individual to do it you need not do what must militate against the public welfare. But I am afraid in order to get private capital to build this rord to develop the future of Alaska, you will be compelled to make concessions that we will wish ultimately we had not made. Therefore, I am not in favor of thus inducing a syndicate to do the work. I am in favor, my friends, as a Member who does not believe in Government ownership as a principle, in the Government building this road, not simply to make homes in Alaska, for the agricultural possibilities might be a question of doubt, although after hearing this luminous statement of the Delegate it does not seem to me to admit of serious doubt, for his representations, based upon actual observations, seem convincing. Aside from any consideration of agricultural possibilities I do not think it is a good policy for our Government to give away mineral wealth. It is certainly not a good policy for this Nation to give away to syndicates the mines of Alaska or of any other part of this country whose strategic position as a national storehouse is vastly important if our Nation will embrace her opportunities and employ her ability to utilize the immense trade of the Orient, now made the more attractive since the completion of the Panama Canal. The Pacific is our coming trade route, and with Alaska, an important station, the fulfillment of Seward's prophecy will soon be realized.

We had better hold this treasure in our own possession and develop it under our own control. If we build this road ourselves as a Government, it does not commit me to the proposition of Government ownership. Not at all. Not any more than the building of the Panama Canal commits us to Government ownership. It is simply a choice between two things. One is, Shall we leave Alaska undeveloped? If not, we must enter upon the work, and when we come to do it, shall we do it by making to private enterprise concessions, by giving away the vast wealth, or shall we, on the other hand, proceed to do it by retaining the wealth in our own possession, and starting it as an enterprise of profit for the Nation rather than for the

These are the facts that are in my mind and which have convinced me of my duty. I am going to vote for the proposition, although I do not believe in Government ownership. However, I do believe we ought to care for the future of that great country, and this bill provides a way to do it. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio has

expired.

Mr. HOUSTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and had come to no resolution thereon.

EXTENSION OF REMARKS.

Mr. CAMPBELL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon a bill that I have introduced, requiring manufacturers to certify and place their names upon the articles they produce.

The SPEAKER. The gentleman from Kansas [Mr. Camp-BELL] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 541. An act granting to the Emigration Canon Railroad Co., a corporation of the State of Utah, permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, a certain piece of land now included in the Mount Olivet Cemetery, Salt Lake County, Utah.

LEAVE OF ABSENCE.

Mr. Lieb, by unanimous consent, was granted leave of absence for three days, on account of important business.

ADJOURNMENT

Mr. HOUSTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Thursday, January 22, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the vice president of the Georgetown Barge, Dock, Elevator & Rallway Co., transmitting annual report for the year ended December 31, 1913 (S. Doc. No. 370); to the Committee on the District of Columbia and ordered to be printed.

2. A letter from the president of the United States Civil Service Commission, submitting detailed statement of all expenses incurred from June 30 to December 1, 1913, for attendance of officers and employees of the Government at meetings or conventions of societies or associations (H. Doc. No. 626); to the Committee on Reform in the Civil Service and ordered to be printed.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and plan and estimate of cost of improvement of inland waterway from Charleston, S. C., to Savannah, Ga., including inland waterway from Beaufort, S. C., to Savannah, Ga. (H. Doc. No. 627); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 9574) to authorize the Missouri, Kansas & Texas Railway Co. to construct a bridge across the Mississippi River near the city of Hannibal, in the State of Missouri, reported the same without amendment, accompanied by a report (No. 180), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk. and referred to the Committee of the Whole House, as follows:

Mr. RUSSELL, from the Committee on Invalid Pensions, to which was referred sundry bills of the House, reported in lieu thereof the bill (H. R. 12045) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, accompanied by a report (No. 179), which said bill and report were referred to the Private Calendar.

Mr. LENROOT, from the Committee on the Public Lands, to which was referred the bill (H. R. 1262) for the relief of Hugh P. Strong, reported the same with amendment, accompanied by a report (No. 181), which said bill and report were

referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 1296) granting a pension to Rachel D. Barnes, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:
By Mr. GOEKE: A bill (H. R. 12046) to amend section 4 of

an act to codify, revise, and amend the laws relating to the

judiciary; to the Committee on the Judiciary.

Also, a bill (H. R. 12047) to authorize and empower the President of the United States, by and with the consent of the Senate, to appoint clerks of the circuit courts of appeal, and to repeal section 124 of an act to codify, revise, and amend the laws relating to the judiciary, passed March 3, 1911; to the

Committee on the Judiciary.

Also, a bill (H. R. 12048) to amend section 125 of an act to codify, revise, and amend laws relating to the judiciary; to

the Committee on the Judiciary. Also, a bill (H. R. 12049) to authorize the President of the United States, by and with the consent of the Senate, to appoint clerks of the district courts, and to repeal section 2 of an act to codify, revise, and amend the laws relating to the judiciary,

by Mr. FERGUSSON: A bill (H. R. 12050) reserving from entry, location, or sale lots 1 and 2, in section 33, township 13 south, range 4 west, New Mexico prime meridian, in Sierra County, N. Mex., and for other purposes; to the Committee on the Public Lands.

By Mr. EDWARDS: A bill (H. R. 12051) authorizing and directing the Secretary of Agriculture to purchase a site and put in operation an agricultural and live stock experimental station in the first congressional district of Georgia; to the Com-

mittee on Agriculture.

Also, a bill (H. R. 12052) providing for the appointment of a board of survey for the purpose of selecting a suitable site for a naval armor plant at or near Savannah, Ga., and submitting an estimate of the cost thereof; to the Committee on Naval Affairs. By Mr. STONE: A bill (H. R. 12053) to acquire a site for a

public building at Lacon, Ill.; to the Committee on Public Buildings and Grounds.

By Mr. NELSON: A bill (H. R. 12054) providing for the erection of a public building at the city of Monroe, Wis.; to the Committee on Public Buildings and Grounds.

By Mr. DANFORTH: A bill (H. R. 12055) to amend the act authorizing the National Academy of Sciences to receive and hold trust funds for the promotion of science, and for other pur-

poses; to the Committee on the Judiciary.

By Mr. BUCHANAN of Illinois: A bill (H. R. 12056) to regulate the hours of labor in continuous working plants of the United States; to the Committee on Labor.

By Mr. QUIN: A bill (H. R. 12057) relinquishing to owners thereof any claim the United States of America may have in any grant, sectional subdivision, or section arising from any increase in the acreage thereof by reason of a relocation of the lines thereof after entry from the United States, the State of Georgia, the Kingdom of Spain, or the Empire of Great Britain,

or the Kingdom of France; to the Committee on the Public lands. By Mr. PARKER: A bill (H. R. 12058) to provide for a site and public building at Mechanicsville, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. LENROOT: A bill (H. R. 12059) directing the Secretary of War to make preliminary survey of harbor at Duluth, Minn., and Superior, Wis.; to the Committee on Rivers and Harbors

By Mr. POU: A bill (H. R. 12060) to enable the Secretary of War to pay the amount awarded to the Malambo fire claimants by the joint commission under article 6 of the treaty of November 18, 1903, between the United States and Panama; to the Committee on Foreign Affairs.

By Mr. MONDELL: A bill (H. R. 12101) for the extension of the period of payments under the reclamation act, and for other purposes; to the Committee on Irrigation of Arid Lands.

By Mr. STEVENS of New Hampshire (by request): A bill (H. R. 12102) to amend sections 2 and 3 of an act entitled "An act to promote the safety of employees and travelers upon rail-roads by limiting the hours of service of employees thereon." approved March 4, 1907; to the Committee on Interstate and Foreign Commerce.

By Mr. MANN: Resolution (H. Res. 384) providing for printing House Document No. 1236; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. RUSSELL: A bill (H. R. 12045) granting pensions

and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; committed to the Committee of the Whole House.

By Mr. BROWNE of Wisconsin: A bill (H. R. 12061) granting a pension to Hyram Colwell; to the Committee on Pensions. Also, a bill (H. R. 12062) granting a pension to Anna Huth;

to the Committee on Pensions.

By Mr. BURKE of Wisconsin: A bill (H. R. 12063) granting an increase of pension to Oliver C. Hurd; to the Committee on Invalid Pensions.

By Mr. BUTLER: A bill (H. R. 12064) for the relief of Lieut. Richard Philip McCullough, United States Navy; to the Committee on Naval Affairs,

By Mr. CASEY: A bill (H. R. 12065) to reinstate George H. McConnon as a passed assistant surgeon, United States Navy;

to the Committee on Naval Affairs.

By Mr. GREEN of Iowa: A bill (H. R. 12066) granting an increase of pension to Albert J. Wilson; to the Committee on Invalid Pensions

Also, a bill (H. R. 12067) granting a pension to Rachel E. Howard; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 12068) granting a pension to Ambrose Chrisman; to the Committee on Pensions.

By Mr. DERSHEM: A bill (H. R. 12069) granting an increase of pension to John Rice; to the Committee on Invalid Pensions

By Mr. DOUGHTON: A bill (H. R. 12070) for the relief of the trustees of the Davenport Female College; to the Committee on War Claims

By Mr. EDWARDS: A bill (H. R. 12071) for the relief of the Importing & Exporting Co. of the State of Georgia; to the Committee on the Judiciary

Also, a bill (H. R. 12072) for the relief of R. L. Horne; to the Committee on Claims.

Also, a bill (H. R. 12073) granting an increase of pension to

Jennie Townsend; to the Committee on Invalid Pensions.

By Mr. FERGUSSON: A bill (H. R. 12074) granting an increase of pension to Maria Antonia Martinez de Mink; to the Committee on Pensions.

Also, a bill (H. R. 12075) to correct the military record of

W. Sudduth; to the Committee on Military Affairs.

Also, a bill (H. R. 12076) for the relief of the owners of the Nicolas Duran de Chaves grant; to the Committee on the Public

By Mr. GILLETT: A bill (H. R. 12077) granting an increase of pension to Emeline E. Phelps; to the Committee on Invalid Pensions.

By Mr. HART: A bill (H. R. 12078) granting a pension to

Richard De Groat; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12079) granting an increase of pension to Mary T. Hochstrasser; to the Committee on Invalid Pen-

Also, a bill (H. R. 12080) granting an increase of pension to William K. Evans; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12081) for the relief of James Dodds: to the Committee on Military Affairs.

Also, a bill (H. R. 12082) for the relief of David Robbins:

to the Committee on Military Affairs.

By Mr. HELVERING: A bill (H. R. 12083) granting an increase of pension to William R. Zook; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12084) granting an increase of pension to Ira C. Sage; to the Committee on Pensions.

By Mr. HUMPHREY of Washington: A bill (H. R. 12085) for the relief of George D. Root; to the Committee on Claims.

Also, a bill (H. R. 12086) granting an increase of pension to Stephen Wood; to the Committee on Invalid Pensions. By Mr. J. R. KNOWLAND: A bill (H. R. 12087) for the re-

lief of Emma E. Skaggs; to the Committee on War Claims. By Mr. LANGLEY: A bill (H. R. 12088) for the relief of Sherman Lewis; to the Committee on Claims.

By Mr. LAZARO: A bill (H. R. 12089) for the relief of estate of Joseph Block; to the Committee on War Claims.

Also, a bill (H. R. 12090) for the relief of heirs or estate of Michel Emonet, deceased; to the Committee on War Claims.

By Mr. LOGUE: A bill (H. R. 12091) to place the name of

John W. Boughton upon the unlimited retired list of the Army; to the Committee on Military Affairs.

By Mr. MOSS of Indiana: A bill (H. R. 12092) granting an increase of pension to Henry Trackwell; to the Committee on Invalid Pensions.

By Mr. PARKER: A bill (H. R. 12093) to reimburse Le Grand Cramer for the amount of damage to his motor launch Winninish by the U. S. launch Gunedmertrix at Morris Heights, N. Y., on March 31, 1911; to the Committee on Claims. By Mr. RUBEY: A bill (H. R. 12094) granting an increase of

pension to William A. Kerr; to the Committee on Invalid Pen-

Also, a bill (H. R. 12095) granting a pension to William A. Malloy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12096) granting a pension to William F. Monday; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 12097) granting a pension to Charles L. Grogan; to the Committee on Pensions.

By Mr. SLOAN: A bill (H. R. 12098) granting an increase of pension to William H. Carson; to the Committee on Pensions. By Mr. TAVENNER: A bill (H. R. 12099) granting a pension

to James Garbett; to the Committee on Invalid Pensions. By Mr. UNDERWOOD: A bill (H. R. 12100) granting a pen-

sion to Dock J. Minyard; to the Committee on Pensions. By Mr. GALLAGHER: A bill (H. R. 12103) granting a pen-

sion to Ellen A. Cardenas; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid

on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Turnverein of Joliet, Ill., against flooding Congress with resolutions and protests which tend to rob citizens of their rights of free speech; to the Committee on the Judiciary.

(by request), petition of Ewart & Son, of New York City, N. Y., protesting against the passage of House bill 9302, for celebrating "One hundred years of peace among English-speaking peoples"; to the Committee on Foreign Affairs.

Also (by request), memorial of the Hides and Leather Association of New York, favoring the reorganization of the Foreign and Domestic Commerce Bureau as proposed by the President of the United States; to the Committee on Interstate and Foreign Commerce

By Mr. ASHBROOK: Memorials of Local Union No. 162, of United Brewery Workers, and other labor unions of Newark, Ohio; a labor union at New Philadelphia, Ohio; and the Boiler Makers' Union of Newark, Ohio, favoring an investigation of

labor conditions in Michigan; to the Committee on Rules.

By Mr. BAILEY (by request): Petition of citizens of nineteenth district of Pennsylvania, favoring the Lindquist purefabric law; to the Committee on Interstate and Foreign Com-

By Mr. BOOHER: Petition of the Chicago Federation of Labor, favoring investigation of strike conditions in Michigan;

to the Committee on Rules.

By Mr. BURKE of Wisconsin: Memorials of Local Union, No. 875, Beaver Dam, Wis., and Local Union No. 316, of the Brotherhood of Painters, Decorators, and Paperhangers, of Sheboygan, Wis., favoring an investigation of conditions in Michigan; to the Committee on Rules.

Also, memorials of the German-American Alliance of Marshfield and Marinette, Wis., and Germania Unterstuetzungs Verein, Superior, Wis., protesting against House joint resolution 168;

to the Committee on the Judiciary.

Also, petitions of Locals Nos. 657 and 678, International Longshoremen's Association, of Sheboygan, Wis., favoring an investigation of strike conditions in Michigan; to the Committee on Rules.

By Mr. CARY: Resolutions which were unanimously adopted at a mass meeting of the Chicago Federation of Labor, representing over 250,000 working men and women, urging an investigation as to the conditions in the copper mines of Michigan; to the Committee on Rules.

Also, resolutions by the Eleventh Ward Social Democratic Party of Milwaukee, Wis., urging an investigation as to the conditions in the copper mines of Michigan; to the Committee

Also, resolutions adopted by the Milwaukee Printing Pressmen's Union, No. 7, Milwaukee, Wis., urging an investigation as to the conditions in the copper mines of Michigan; to the Committee on Rules.

Also, resolutions adopted by the Third Ward Social Democratic Party of Milwaukee, Wis., urging an investigation as to the conditions in the copper mines of Michigan; to the Com-

mittee on Rules.

By Mr. CLAYPOOL: Petitions of the German-American Alliance of the State of Ohio, representing 50,000 American citizens, protesting against the passage of House joint resolution 168 and Senate joint resolutions 50 and 88, relative to the manufacture, etc., of alcoholic liquors; to the Committee on the

By Mr. DALE: Petition of citizens of New York, favoring House bill 6060; to the Committee on Immigration and Natu-

ralization.

Also, petition of the Maritime Association of the Port of New York, favoring House bill 3328; to the Committee on Naval Affairs.

Also, petition of Commodore Barry Branch No. 311, Continental League of America, Brooklyn, N. Y., protesting against appropriation of money for celebration of "One hundred years"

of peace among English-speaking peoples"; to the Committee on

Foreign Affairs.

By Mr. DANFORTH: Petitions of citizens of Rochester, N. Y., protesting against the appointment of a committee in the House of Representatives on woman suffrage, and Socialist Party of

Rochester, N. Y., favoring an investigation of the trouble in the copper regions of Michigan; to the Committee on Rules.

By Mr. DIFENDERFER: Petitions of citizens of Pottstown and Quakertown, Pa., and Junior Order United American Mechanical Committees of the Committee of Pottstown and Quakertown, Pa., and Junior Order United American Mechanical Committees of the Committee of the Committee of Pottstown and Pottstown and Pottstown Pa., and Junior Order United American Mechanical Committees of the Committee of Pottstown and Pottstown Page 1988 (1988) chanics, of Souderton; Order of Independent Americans, of Ardmore; Patriotic Order Sons of America, of Norristown; Knights of Malta, of Ambler; Daughters of Liberty, of Pottstown; Order United American Mechanics, of Doylestown; Patriotic Order Sons of America, of Springtown; Senior Order United American Mechanics, of Riegelsville; Daughters of Liberty, of Lansdale; Daughters of Liberty, of Pottstown; Patriotic Order Sons of America, of Perkasie; Patriotic Order Sons of America, of Ardmore; Order of United American Mechanics, of Pottstown; Patriotic Order Sons of America, of Bristol; National Camp, Patriotic Order Sons of America, of Philadelphia, all in the State of Pennsylvania, favoring H. R. 6060; to the Commttee on Immigration and Naturalization.

Also, petition of sundry citizens of the State of Pennsylvania protesting against the passage of House bill 9674, the Sabbath observance bill; to the Committee on the District of Columbia.

Also, petition of sundry citizens of the eighth congressional district of the State of Pennsylvania favoring the passage of the Lindquist pure fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

By Mr. EAGAN: Petition of the American Association of Foreign Language Newspapers, protesting against Bennett immigration bill; to the Committee on Immigration and Naturaliza-
